## HOME AND FOREIGN TRADE.

IN 1921 the London Joint City and Midland Bank published figures of the tonnage of general merchandise and minerals carried on the railways of the U.K. From these figures it would appear that whereas during 1920 the tonnage of external trade, other than re-exports and coal, was only 80 per cent. of the total for 1913, the tonnage carried by the railways was practically the same as for the pre-War year, which would justify the conclusion that internal trade was more active in 1920 than in 1913. During the first half of 1921, however, conditions changed considerably, and as compared with the December quarter of 1920, the fall in railway freight traffic was very much greater than the fall in the tonnage of the external trade, omitting coal in each case. The following statement indicates that the general trade of the country during the June quarter of 1921 bore the same proportion to the 1913 level as did the tonnage figures of exports and retained imports.

## TONNAGE OF GENERAL MERCHANDISE AND MINERALS OTHER THAN COAL, COKE, AND PATENT FUEL.

An inference which may be drawn from the above comparison is that the decline in the tonnage of internal trade during 1921 was more rapid than the fall in the country's overseas trade, and that the tonnage of trade as a whole other than coal was only about half what it was in 1913.

## TIMBER IMPORTS AND HOME PRODUCTION.

IN 1925 the estimated area of the forests and plantations (land planted with trees within the preceding 10 years) in the United Kingdom was 3,098,000 acres, of which 1,720,000 acres were in England, 1,080,000 acres in Wales, 880,000 acres in Scotland, and 390,000 acres in Ireland. Before the War of 1914-18 the United Kingdom imported annually about 10,000,000 tons of timber, valued at about £27,000,000. Of this total, over 85 per cent. consisted of light pine and fir from Russia, Sweden, Norway and Canada. There are in the United Kingdom over 10,000,000 acres of waste land, and about 22,000,000 acres of mountain and heath land, used for light grazing. It is estimated that less than one-third of this total of 22,000,000 acres, if put under trees which can be grown in the country, would supply 95 per cent. of the total requirements, leaving only 5 per cent. (timber which cannot be grown in the British Islands) to be imported from abroad. The Forestry Commissioners are in possession of 103,100 acres of land, of which 68,200 acres are classified as plantable. They are charged with the afforestation of 150,000 acres of new land by the State, and with assisting local authorities and private owners in the development of 100,000 acres during a ten-year period, and with other duties of education research and experiment, &c. A fund of £3,500,000 has been voted by Parliament for the above purposes.

## Volume of International Trade.

The *Japan Weekly Chronicle* published in 1921 a comparative table showing how the quantities of imports and exports of various countries in 1920 compare with the quantities recorded in 1913. Taking the 1913 figure in each case as 100, the table reads as follows:—

## Comparison of 1920 with 1913.

In the quantity of imports only Japan and the United States show a higher figure in 1920 than in 1913, while Canada and the United States alone have increased the volume of exports.

## Values of British Trade.

The relative value of British Trade in 1913, 1919, and 1920, is shown on page 516, the apparent value of the trade of 1919 and 1920 being reduced to the prices ruling in 1913.

## Imports and Exports of Bullion 1920.

During the twelve months ending Dec. 31 the aggregate value of the gold and silver exported was £104,058,403, and of that imported £60,601,317, an adverse balance of £43,457,086. Of the exported gold and silver bullion and coin, more than half (£53,066,149) went to the United States; £27,464,126 to India, £5,736,355 to South American States, £5,081,095 to China, £4,120,061 to South Africa, £3,727,679 to the Straits Settlements, £750,308 to Switzerland, and £612,615 to France. Of the total imports of coin and bullion, £19,148,329 came from Foreign Countries and £41,452,988 from the British Dominions.

## Oil Fuel and Coal Exports.

The growing use of oil for ship propulsion is illustrated by the following figures taken from Lloyd's Annual Report for 1920-1921:—

| On Lloyd's Register | Gross Tonnage. |
|---------------------|----------------|
| 1914, July .....    | 1,300,000      |
| 1919, " .....       | 5,300,000      |

| 1921, " .....       | 12,800,000     |

Steamers burning oil fuel in 1920-21 would have required 20,000,000 tons of coal if coal-fired.

## COMMUNICATIONS.

## Roads.

The total mileage of public roads in the United Kingdom is approximately 240,000 miles, of which 150,000 are in England and Wales, 26,000 in Scotland, and 60,000 in Ireland. The annual cost of maintenance is about £25,000,000.

The maintenance and repair of bridges and main roads is within the jurisdiction of the County Authorities in each Division of the United Kingdom, other roads being maintained by Borough, Urban, Rural, and Parish Councils. The increase of motor traction and the consequent use of highways by other than county or district residents has led to a movement in favour of the nationalisation of the highways. The special sum set aside for the year ending March 31, 1920, for the road and bridge programme of the *Road Improvement Fund* amounted to £10,536,000, of which £8,250,000 was a grant from the Treasury, and £2,286,000 a contribution from the Road Improvement Fund. Under the Act of 1919 the functions and duties of the Road Board were transferred to the *Ministry of Transport*, which now controls all matters previously dealt with by the Road Board.

## Railways.

At Dec. 31, 1920, the aggregate capital expenditure of the companies amounted to £1,158,700,000 of which £1,015,500,000 had been expended on the railways, £52,900,000 on docks and harbours; £42,400,000 on land, property, &c., not forming part of the railways or stations, £8,300,000 on canals, £8,200,000 on steamboats, and £8,000,000 on hotels. The total length of single track, including sidings, at the same date, was 51,248 miles.

Calculated on a single-journey basis, the total number of passengers carried, exclusive of season-ticket holders, in 1920, was 1,566,834,000, against 1,507,117,000 in 1919, and 1,184,196,000 in 1913. Season-ticket holders (calculated on an annual basis) numbered 1,015,000, compared with 903,200 in 1919, and 584,000 in the pre-war year. The totals for the various classes of ordinary passengers in 1913 and 1920 were:—

|                    | Total Number. |               |
|--------------------|---------------|---------------|
|                    | 1913.         | 1920.         |
| First Class .....  | 25,432,000    | 36,918,000    |
| Second Class ..... | 10,357,000    | 5,625,000     |
| Third Class .....  | 892,865,000   | 1,065,805,000 |
| Workmen .....      | 255,642,000   | 458,486,000   |
| Total .....        | 1,184,196,000 | 1,566,834,000 |

The goods traffic carried in 1913 and 1920 was as under:—

|                                   | Total Tonnage |             |
|-----------------------------------|---------------|-------------|
|                                   | 1913.         | 1920.       |

| Other Minerals...                 | 70,864,500    | 68,053,000  |
| Total .....                       | 364,162,500   | 317,877,500 |

The number of Live Stock carried in 1913 was 19,526,500 and in 1920 17,079,000.

The effect of higher fares and rates is seen in the average receipts per passenger and per ton of goods carried in two years:—

|                            | 1913.  | 1920   |
|----------------------------|--------|--------|
| Ordinary passengers:       | s. d.  | s. d.  |

| Miscellaneous net receipts ..... | 46,200,000    | 47,000,000    |
| Total net income.....            | 49,800,000    | 51,300,000    |

The pre-War receipts were:—Passengers, £44,000,000; Parcels and Goods, £78,000,000; Other Sources, £13,000,000; total, £135,000,000; and under the rating scheme proposed in 1921 the receipts were estimated at:—Passengers, £105,000,000; Parcels and Goods, £188,000,000; Other Sources, £25,000,000; total, £318,000,000.

## Canals.

There are 4,673 miles of canals and canalised rivers in the United Kingdom (England and Wales, 3,641 miles; Ireland, 848 miles; Scotland, 184 miles), no additions to the mileage having been made for several years. In 1905 the inland waterways carried 43,161,227 tons of merchandise, the revenue being £2,680,710 and expenditure £1,891,212. Of the total mileage 1,363 miles were owned or controlled by railway companies (the longest systems being the Shropshire Union, 202 miles; Grand Junction, 189 miles; Birmingham, 159 miles; and Leeds and Liverpool, 145 miles). The total paid-up capital of all the canals was £47,550,768. The existing system is at its greatest development in the midland counties of England, and in Lancashire and Yorkshire. A Royal Commission, appointed in 1906, reported, in 1909, in favour of a development scheme under an *Inland Waterway Board*, to improve the existing system. Their principal proposal was the formation of four main routes (from a centre in South Staffordshire) to the Thames (London), the Mersey (Liverpool), the Humber (Hull), and the Severn (Gloucester), the proposed routes to accommodate barges up to 200 tons. On Jan. 1, 1921, there were 1,202 miles of inland waterways in England and Wales, and 304 miles in Ireland, under the *Canal Control Committee*, appointed by the Government on March 1, 1917; there were also 1,025 miles controlled by the *Railway Executive Committee*. The *Manchester Ship Canal*, opened in 1894, has a total length of 36 miles, and

connects Manchester with the Mersey port of Liverpool; in 1913 the tonnage carried through the canal was 3,780,261 tons, and in 1919 the tonnage was 3,589,043 tons.

#### Tramways.

The total mileage of tramways and light railways open in the United Kingdom on Dec. 31, 1919, was 2,728. The total receipts in 1919 were £24,632,286, the working expenses £17,751,277, and the net receipts £6,881,009, the total paid-up capital being £79,049,287, showing a return of 8.74 per cent. on the capital. In 1919, 4,557,640,278 passengers were carried. In addition there were 21 miles of "trackless trolley" routes, a system which obviates the necessity of rails.

#### Mercantile Shipping.

On June 30, 1921, the Mercantile Marine of the United Kingdom consisted of 8,113 steamers (18,110,653 tons) and 448 sailing vessels (29,772 tons), a total of 8,561 vessels (18,330,424 tons). In 1914 there were 205,652 seamen employed in British sailing and steam vessels (exclusive of vessels employed on rivers and inland navigation, but inclusive of fishing vessels); of this total, 222,640 were British, and 21,616 were Lascars and Asiatics, and 21,306 were foreigners—Germans (2,000), Swedes (3,600), Norwegians (2,150), and Russians (2,000) being the most numerous of the foreign nationalities. In 1919 the foreigners numbered 16,835, and in 1920 the number of foreigners had been further reduced.

**Wrecks.**—In 1913 140 sailing vessels (23,082 net tons) and 108 steam vessels (103,824 net tons), a total of 248 vessels (126,906 net tons) were totally lost at sea. In 1918 the figures (exclusive of losses by enemy action) were 70 sailing vessels (8,971 gross tons) and 124 steam vessels (230,082 gross tons), a total of 194 vessels (239,053 gross tons). In 1913 the passengers lost by wrecks numbered 172 and members of crews 466, a total of 638 lives; in 1918 (exclusive of losses by enemy action) the passengers numbered 129 and the members of crews 573, a total of 734 lives.

#### Shipping (Entered and Cleared).

Net tonnage of British and Foreign sailing and steam vessels engaged in overseas trade entered and cleared (with cargoes and in ballast) at all ports in the U.K. :—

#### Coasting Shipping.

The net tonnage of all vessels with cargoes and in ballast engaged in the coasting trade of the United Kingdom in 1913 was 65,273,838 net tons for arrivals and 65,112,086 net tons for departures; in 1919 the net tonnage of arrivals was 40,878,243 and of departures 40,037,045 (exclusive of vessels employed by the Government during the War).

#### Posts, Telegraphs and Telephones.

The carriage and custody of the mails has been maintained by the State "from time immemorial." The telegraphs were transferred to the State on Feb. 4, 1870; the telephones on Jan. 1, 1912. The submarine telegraph cables connecting the British Isles with the various Dominions and Foreign Countries are maintained and worked by private companies.

In the year ending March 31, 1915, 2,400,000,000

letters (74 per head of the population) were delivered in the United Kingdom, in addition to 886,000,000 post-cards, and 1,321,000,000 half-penny packets. There were (March 31, 1929) 98,946 miles of telegraph line (3,547,576 miles of wire), 13,921 telegraph offices, and 826,366 instruments in use. In 1928-29 77,493,000 inland and 11,220,000 foreign telegrams were transmitted. On March 31, 1929, there were 797,218 telephones in use, and 46,263,408 trunk calls were made. The receipts for inland telegrams in 1928-9 were £3,980,746, for foreign telegrams £758,000, miscellaneous receipts £2,533,428, and for telephones (including royalties) £10,760,540, a total of £17,054,724; the expenditure included £7,441,823 for salaries, wages and superannuation, and £11,209,866 for construction, maintenance, etc., a total of £18,651,689.

The number of telephones per 100 of population in the U.K., U.S.A., and certain other countries (1919), is shown below:—

**Savings Banks.**—In 1928 there were 11,829,631 active deposit accounts in the *Post Office Savings Banks*, with the sum of £234,633,323 due to depositors, an average of £19.16s. for each active account. In 1929 there were 6,220,373 accounts open in the *Trustee Savings Banks*, with £71,918,367 due to depositors, an average of £32.7s. 10d. for each account. In 1928 Government Stock to the amount of £185,682,830 stood to the credit of depositors in the *Post Office Savings Banks*, £15,950,695 was held for depositors in *Trustee Savings Banks* (exclusive of Exchequer Bonds and National War Bonds), in 1929.

**Wireless Telegraphy.**—In 1909-1920 the wireless telegraph stations on the coasts of the United Kingdom were acquired by the Government, except the long-distance stations at Poldhu (Cornwall) and Clifden (County Galway), which are maintained (and worked under licence), by the Marconi Company.

The principal Radio-Telegraphic Services are as follows:—*Trans-Atlantic.* For Canada, the United States, British West Indies, Bermuda, British Guiana, Newfoundland, Australasia, New Zealand, Central and South America, etc. *To Paris.* For all parts of France. *To Madrid.* For all parts of Spain and the Balearic Isles, and for the Canary Islands. *To Ships at Sea.* (a) Via British Coastal Wireless Stations for ships within range (about 200 miles). (b) Via Devises, Wilts., for ships with range (about 1,000 miles) which are fitted with long range Marconi apparatus. (c) Via Poldhu, Cornwall, for all ships within range (about 1,500 miles). (d) Via Foreign Coastal Wireless Stations for ships within range. There are also services at reduced rates for Cross-Channel steamers, &c.

#### Radiotelegrams (i.e. to or from Ships).

Private messages are now accepted for H.M. Navy (no "ship charge" made in this case), as well as for merchant ships. Address should contain "British Warship" or "Steamship" respectively, name of vessel and of coast station. The Secretary, Admiralty, will furnish the latter for Navy ships, but P.O. is unable to assist choice of coast station for others, though the word "wireless" may generally be substituted for name of P.O. station, any of which will give all available information about a ship's position in reply to a post-paid telegram (extra fee, 6d.). The P.O. coast stations are: (U.S.A.)—Falmouth, Grimsby, Land's End, Mablethorpe, Naze, &c.

Foreland, Portpatrick, Seaforth, Valentia, Wick. Rules as to counting of words, etc., are as for Telegrams Abroad; the names of ship and of coast station count as one word each.

**Cost of Transmission from any telegraph office.**—A. *Ordinary.* 1. Through P.O. stations (a) to ships of British and most other nationalities: 11d. a word inclusive; (b) to Argentine, Belgian, Dutch, German, Greek, Norwegian, Portuguese ships: inland with coast station charge (1d. a word), plus ship charge (6d. a word, with a minimum of 2s. 6d. per message). 2. Through coast stations abroad (on most coasts except U.S.A.): cost of full rate telegram to station (see table above), plus station charge (2d. to 1½d. a word, sometimes with minimum of 1s. 6d. to 2s. 6d.), plus ship charge (6d. a word, with minimum 2s. 6d. for ships of nationalities given under 1 (b)). B. *Long-distance communication to ships beyond range of above stations:* 1. *via "Poldhu Radio"* (which must appear in the address), at night only (Marconi Station, range 1,600 miles): inland and station charge 2s. 6d. a word inclusive, plus ship charge (same as in A. 2). 2. *via Government station at Devises* (same range) to certain ocean liners (at present about 57, particulars at any telegraph office): 11d. a word inclusive. 3. *via Harrington Passage (Canada)* to those of the 57 liners engaged in N. Atlantic services. *C. Reduced rates for cross-Channel and short-voyage ships:* 1. Through home stations the inclusive charge per word (minimum always 10 words) is: (a) to the majority of such ships (about 220), 3½d.; (b) 4 Zealand Co. boats (via N. Foreland), 3½d.; (c) to *Batavier III, IV., and VI.* (via do.), 3d.; (d) to 10 ships, 5½d. 2. Through foreign coast-stations for the same groups of vessels respectively: (a) the charge is calculated as under A. 1, but ship charge is reduced to 1d. per word (minimum 10d.); (exceptions are: for 8 Dover-Ostend Packets, through Antwerp or Ostend, coast and ship charge is 2s. 6d., plus 2d. for each word after 10; for 20 cross-channel boats, the coast charge through Boulogne or Harve is 1½d.). (b) and (c) through Scheveningen Haven the inclusive charge for 10 words or less is 3½d. per word, plus (b) 2s. 6d., (c) 2s. 6d.; for over 10 words, per word: (b) 5½d., (c) 7d. (d) as in A. 2, but ship charge is 1½d. per word (min. 1s. 2d.).

#### Communication by Air.

In 1929 a *Trans-Atlantic Aerial Post* was inaugurated by the successful flight of an aeroplane from St. John's, Newfoundland, to Clifden, Ireland; and by the voyage of H.M. Airship R 34 from Scotland to New York, and from New York to England. The *Air Mail Services* now in operation are shown on p. 414.

The airships in the possession of the British Government were condemned to be sold in 1921, but subsequently the order was revoked. The largest airship yet constructed was the R 28, which was to have crossed the Atlantic and to have formed part of the U.S. squadron (under the name of ZRs). This vessel was wrecked while over the Humber (Aug. 24, 1921) with the loss of 44 lives. The remaining British airships are as follows:—

|       |     |                   |           |
|-------|-----|-------------------|-----------|
| R 33  | ... | cubic feet of gas | 1,958,000 |
| R 80  | ... | "                 | 1,200,000 |
| R 36  | ... | "                 | 2,101,000 |
| R 37  | ... | "                 | 2,101,000 |
| Z 64* | ... | "                 | 1,950,000 |
| L 71* | ... | "                 | 2,400,000 |

The L 64 is 642 feet long, the L 71 is 743 feet long; the R 36 has a capacity of 2,700,000 cubic feet and was 695 feet in length.

It is estimated that, assuming the ground organisation to be complete and a regular service established, the times by airship for the following journeys would be:—

|                                       |          |
|---------------------------------------|----------|
| England-Egypt.....                    | 2½ days. |

## THE KINGDOM OF ENGLAND.

**Position and Extent.**—The Kingdom of England occupies the southern portion of the island of Great Britain and lies between  $55^{\circ} 45'$  and  $49^{\circ} 57' 30''$  N. latitude (from the mouth of the Tweed to the Lizard), and between  $1^{\circ} 48'$  E. and  $50^{\circ} 45'$  W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the west by the Atlantic Ocean (which washes the Cornish coast), the Principality of Wales and the Irish Sea. The total area of the kingdom is 50,851 square miles, the population numbering 35,678,530 at the Census of 1901 (an increase of 1,633,840 over the figures of the 1911 census).

**Relief.**—There is a natural orographic division of England into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south-east. In the extreme north the Cheviot Hills run from east to west and divide England from Scotland, culminating in the Cheviot, 2,676 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the *Pennine Chain*, running N. by W. to S. by E., with their highest point in Cross Fell, 2,930 feet above mean sea level. West of the Pennines are the *Cumbrian Mountains*, which contain in *Scarf Pike* (3,220 feet) the highest land in England, and east of the Pennines are the *Yorkshire Moors*, their highest point being *Urra Moor* (1,489 feet). South of the Pennines there are heights above 2,000 feet in the *Peak of Derbyshire* (highest point 2,888 feet), and in *Dartmoor* (High Willhays, 2,039 feet). In the western county of Shropshire are the isolated *Wrekin* (1,325 feet), *Long Mynd* (1,674 feet), and *Brown Clee* (1,803 feet); in Herefordshire the *Black Mountain* reaches 2,320 feet, in Worcestershire the *Malvern Hills* reach 1,395 feet, in western Monmouthshire are the *Sugar Loaf* (1,055 feet) and *Colty* (1,005 feet), and the *Cotteswold* (or *Cotswold*) Hills of Gloucestershire contain *Cleeve Cloud* (1,124 feet).

**Hydrography.**—The *Thames* is the longest and most important river of England, with a total length of 220 miles from its source in the *Cotteswold Hills* to its outflow into the North Sea. The lower river is navigable by ocean-going steamers to London Bridge, and small craft reach Lechlade, 160 miles from the mouth. The *Thames* is tidal to Teddington (60 miles from its mouth), and its upper stream is connected with the Severn by a canal at Lechlade; the *Wilt* and *Bucks* canal enters at Abingdon, and the *Wye* canal at Reading. The principal tributaries are the *Cherwell*, *Lec*, *Kennet*, *Wey*, *Mole* and *Medway*. The *Thames* forms county boundaries almost throughout its course, and on its banks are situated the capital of the British Empire; Windsor Castle, the home of the Sovereign; Eton College, the first of the public schools; and Oxford, the oldest university in the kingdom. The *Severn* is the longest river in Great Britain, rising in the north-eastern slopes of *Plinlimmon* (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the *Bristol Avon*, and on the right the *Wye*, its other tributaries being the *Vyrnwy*, *Tern*, *Stour*, *Teme* and *Upper* (or *War-*

*wickshire*) *Avon*. The *Severn* is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as *Tewkesbury* (13½ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the *Severn* is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (16¼ miles), which admits vessels of 350 tons to Gloucester, other canals connecting with the *Thames*, *Trent*, *Dee* and *Mersey*. The *Severn Tunnel*, which carries the Great Western Railway under the river, 14 miles below the Sharpness Bridge, was begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, etc. The tunnel is 4 miles 644 yards in length (of which 2½ miles are under the river). Of the remaining English rivers those flowing into the North Sea are the *Tyne*, *Wear*, *Tees*, *Ouse* and *Trent* from the *Pennine Range*, the *Great Ouse* (160 miles) from the *Central Plain*, and the *Orwell* and *Stour* from the hills of *East Anglia*. Flowing into the English Channel are the *Sussex Ouse* from the *Weald*, the *Itchen* from the *Wiltshire* and *Hampshire Hills*, and the *Axe*, *Teign*, *Dart*, *Tamar* and *Exe* from the *Devonian Hills*; and flowing into the Irish Sea are the *Mersey*, *Ribble* and *Eden* from the western slopes of the *Pennines* and the *Derwent* from the *Cumbrian Mountains*. The *English Lakes* are noteworthy rather from their picturesque scenery and poetic associations than from their size. These lie mainly in *Cumberland*, but partly in *Westmorland* and *Lancashire*, the largest being *Windermere* (20 miles long), *Ullswater* and *Derwentwater*.

**Islands.**—The *Scilly Islands* form part of the county of Cornwall, and are distant 25 miles from Land's End. The group consists of about 40 islands, with a total area of about 4,000 acres, only *St. Mary's*, *Tresco*, *St. Martin's*, *St. Agnes* and *Bryher* being inhabited, the total population in 1901 being 1,740. The capital is *Hugh Town*, in *St. Mary's*. The climate of the *Scilly Islands* is unusually mild, and vegetation is luxuriant, semi-tropical plants flourishing in the open. The *Isle of Wight* forms an administrative county and is separated from Hampshire by the *Solent* and *Spithead*. The total area is 147 sq. miles, with a population in 1901 of 94,697. The climate is mild and healthy, and many watering places have grown up during the last century. The capital is *Newport*, at the head of the estuary of the *Medina*, *Cowes* (at the mouth) being the chief port; other centres are *Ryde*, *Sandown*, *Shanklin*, *Ventnor*, *Freshwater*, *Yarmouth*, *Totland Bay* and *Bembridge*.

**Climate.**—The south-westerly winds from the Atlantic Ocean penetrate to the heart of the country, affecting the temperature of the greater part of the kingdom, and only the coastal regions of the east have a modified continental climate. The mean annual temperature is about 50° Fahrenheit, varying from 45° in the *Scilly Islands* to 48° at the mouth of the *Tweed*, and generally the west of England is mild and wet in winter and cool and less wet in summer, while the east is cool and dry in winter and spring and hot and less dry in summer and autumn, the wettest region being the *Lake district* of *Cumberland* and the driest the *Thames estuary* and the *Lincolnshire Wash*.

## EARLY INHABITANTS.

**Prehistoric Man.**—A skeleton found at *Galley Hill*, near Northfleet, Kent (in 1895), has been ascribed to a man of Central Asian race of the Early Stone Age, and stone implements of the remote Eolithic, Palaeolithic and Neolithic periods are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2500 B.C., and a date between these years has been given to *Stonehenge* (presented by Sir C. H. E. Chubb to the Nation in 1908, and now preserved as a national monument). *Stonehenge* (10 miles N. of Salisbury, Wiltshire) consists of two circles of menhirs (the largest monolith being 25½ feet in height), only 16 remaining in position in the outer circle, while two of the five triple sets are still in position in the inner circle. The use for which the temple or monument was erected is the subject of many conjectures.

**The Celtic Invasion.**—In the latter part of the Bronze Age the *Goidels*, a people of Celtic race, and in the Iron Age another Celtic race of *Brythons*, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

**The Roman Conquest.**—Julius Cæsar raided Britain in 55 B.C. and 54 B.C., and in 43 A.D. the conquest of the country was undertaken by the Roman Emperor Claudius, who sent Aulus Plautius with a well-equipped army of 40,000 men, and himself visited Colchester (Camulodunum) and Londinium. The British leader from 48–51 A.D. was *Caratacus* (strictly *Caratacus*), who was finally captured and sent to Rome. By 70 A.D. the conquest of South Britain was completed, a great revolt under *Boadicea* (strictly *Boudicca*), Queen of the Iceni (Norfolk), being crushed in 61 A.D. In 122 A.D. the Emperor Hadrian visited Britain and built a continuous rampart, known as *Hadrian's Wall*, from Wallend to Bowness (Tyne to Solway), remains of which are still traceable. The Romans administered Britain as a Province under a Governor, with a well defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. A well preserved Roman town of about 100 acres was first uncovered in the 18th century at *Silchester* (Calleva Atrebatum), 10 miles south of Reading, and since 1890 the whole site has been investigated. Four main groups of roads radiated from London, and a fifth (the *Fosse*) ran obliquely from Ermine Street (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Walling Street*) ran through Verulamium (St. Albans) to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. Christianity reached the Roman Province of Britain from Gaul in the 3rd century (or possibly earlier), the Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attending the Council of Arles in 314. The Roman garrisons of Britain were much harassed in the 4th century by Saxon pirates, who invaded the eastern counties from the Wash

to Spithead, while about 350 A.D. incursions in the north of Irish (Scotti) and Picts became most formidable, and towards the end of the century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders, and Britain was cut off from Rome; officials were no longer sent to the island, the garrison was left to defend itself, and appears to have been driven inland by the Northern and Saxon invaders, and to have been conquered and absorbed by the Celtic inhabitants, whose language and customs re-emerged.

**Anglo-Saxons and Normans.**—The Celtic Britons appear to have called in the Saxons to resist the raids of the Picts and Scots, and eventually the *English* (Angles, Saxons and Jutes) drove the Britons into the mountain fastnesses of the West (Strathclyde, Wales and Cornwall), the name of *Welch* (old English *Waelisc* = Foreign) being given to the islanders by the invaders from the continent. The area thus conquered was divided into several kingdoms, of which the chief were Northumbria (Bernicia and Deira), Mercia (Middle Angles), and Wessex. The heathen Angli (whose gods Ti, Woden, Thunor and Frigg are commemorated in "Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishoprics at Canterbury and York, and the whole of England appears to have been converted by the end of the 7th century. In the 8th century Offa, King of Mercia, is stated to have built a wall and rampart, afterwards known as *Offa's Dike*, from the mouth of the Dee to that of the Wye, as a protection against the Welch. The greatest of the English kingdoms was *Wessex*, with its capital at Winchester, and the greatest of the Wessex kings was *Alfred the Great* (871–901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (*Danegelt*) for many years, and was ruled by Danish Kings from 1016 to 1042, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating a Northumbrian revolt under his brother Toetig (aided by an invading army of Harold Hadrada of Norway) at Stamford Bridge in Yorkshire (Sept. 25), he was himself defeated at the *Battle of Hastings* (or *Sautliche*) on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy. Since the *Norman Conquest* all attempts to invade England have been defeated.

## ENGLISH COUNTIES.

For Administrative purposes England is divided into 32 *Administrative Counties* (under the Local Government Act of 1888). The boundaries of these Administrative Counties differ in many cases from those of the older Geographical Counties, while the areas of the 73 *County Boroughs* created under the Act of 1888 are excluded from the County Areas, and the population of the Boroughs is separately enumerated. The area, population and chief officers of the Administrative Counties are shown overleaf.

## THE PRINCIPAL ENGLISH CITIES.

## LONDON.

LONDON, the capital of England and of the British Empire, and the greatest city in the world, is situated on both banks of the River Thames, 30 miles from its outflow into the North Sea. The various areas of London, with the population of each (according to the Census of 1911), are shown below.

| Area                                | Area,<br>1911. | Population,<br>1911. |

| Proposed "London Health Area" ..... | 3,045,120      | 9,610,234            |

The City of London (see pp. 565-6) administers London within its ancient boundaries, where the Saxon Port Reeve became Bailiff in 1066, Mayor in 1191, and Lord Mayor in 1354. The City is the financial and business centre of London, and includes the head offices of the principal English banks, insurance companies, and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall, the Norman Tower and the 14th century Guildhall, to the massive splendour of St. Paul's, and the architectural beauty of Wren's spires (Bow Church, St. Bride's, St. Dunstan's in the East, etc.), for which (and for other City buildings) see pp. 573 et seq.

The City of Westminster, which is bounded by the City of London on the east, by Chelsea and Kensington on the west, by Paddington, St. Marylebone and Holborn on the north, and by the Thames and Chelsea on the south, was formed into a borough by the London Government Act of 1869, and was created a city by Royal Charter of Oct. 29, 1900, the Council consisting of a Mayor, 10 Aldermen and 60 Councillors. Extending from the eastern end of the Strand to Kensington Gardens, and from Oxford-street to the Thames, it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St. James's, and the principal Government offices, Clubs and Theatres are situated in Westminster, which also includes the fashionable residential districts of Mayfair and Belgravia, the chief buildings being described on pp. 573-584. Westminster is the richest of the London areas, the rateable value of property being £7,087,831 in 1900, the product of each rd. in the £ being £28.92.

**Metropolitan Boroughs.**—Under the London Government Act of 1899 the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to 28 Metropolitan Boroughs (see p. 564), of which one became afterwards the City of Westminster. The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham, eastwards to Woolwich, and westwards to Hammersmith.

**London County Council.**—For County purposes the affairs of London are administered by the London County Council (see pp. 566-572), which was created by the Local Government Act of 1888.

**Miscellaneous Authorities.**—The Poor Law is administered in the Metropolitan area by the Metropolitan Asylums Board (see p. 569), and by 31 Boards of Guardians; for Police purposes the administration is invested in the City Corpo-

ration as to the City Police (see p. 584) and in the Home Office as to the Metropolitan Police (see p. 584). The authority for the supply of water is the Metropolitan Water Board (see p. 599), while the River Thames is administered as to its tidal portion by the Port of London Authority (see p. 584) and above Teddington by the Thames Conservancy (see p. 570), the light-house and pilotage authority being Trinity House (see p. 574). The bridges (see p. 577) are maintained in the City of London by the Bridge House Estates Committee of the Corporation of the City, and in the remaining area by the London County Council. The lighting of London is carried out by private enterprise, and in some cases by the Borough Councils, while locomotion is provided by the London County Council as the Tramway authority, and by private enterprise as to underground or other railways and motor vehicles.

## BIRMINGHAM.

BIRMINGHAM (Warwickshire), the chief centre of the hardware trade of the world, is 113 miles N.W. of London. The municipal area is 43,601 acres (about 68 square miles), with a population at the census of 1901 of 919,438.

The chief industries are brass working, jewellery and precious metals, iron, machinery, small arms and ammunition, railway rolling stock, glass making, electro plating, motor engineering, cycles and chemicals.

The principal buildings are the Town Hall, built in 1834-1850 on the lines of the Temple of Jupiter Stator at Rome, with a large hall (where the triennial musical festival is held); the Council House and Corporation Art Gallery and Museum (1876); the University (Aston Webb, 1909); the Central Library; the 13th century Church of St. Martin (rebuilt 1873); the Cathedral (formerly St. Philip's Church, built by Archer, a pupil of Wren's), the Roman Catholic Cathedral of St. Chad (Pugin), and the Wesleyan Central Hall. A memorial bust of Abraham Lincoln was unveiled in 1911. Birmingham was incorporated as a borough in 1836, and was created a city in 1889; it is governed by a Lord Mayor and City Council of 30 Aldermen and 90 Councillors. The city returns 12 members to Parliament. The origin of the name is obscure, as Bromwicham, "the home on the hill by the heath," is disputed. The city was a Saxon town, and William de Bermingham was Lord of the Manor in the early part of the 13th century.

## Principal City Officers.

Rt. Hon. Lord Mayor (1901-22), David Davis.  
Recorder, Sir Ryland Dent Adkins, K.C., M.P. (1900).  
Stipendiary Magistrate, The Rt. Hon. Lord Ilkerton (1902).  
Town Clerk, F. H. C. Wiltshire (1908).  
Clerk of the Peace, Joseph James (1902).  
Coroner, Isaac Bradley (1897).

## LIVERPOOL.

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Atlantic and 201 miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 24,100 acres (which includes 2,823 acres in the bed of the river Mersey) (about 33 square miles, excluding the bed of the river), with a population at the census of 1901 of 849,121. The total net register housing

of vessels on which dues were paid during 1919 was 23,628,751 tons, while the value of the sea-borne trade of the port was stated at £833,849,867 for 1919, and at £1,091,699,000 for 1920. The docks, on both sides of the river, have a linear quayside of about 37 miles, and the Gladstone dock will accommodate the largest vessels afloat. The dock authority is the Mersey Dock and Harbour Board. The chief import is cotton, those next in importance being grain, provisions, sugar, fruit, oil, timber and tobacco.

The principal buildings are St. George's Hall, erected 1828-1854, from the designs of Harvey Lonsdale Elmes, at a cost of £300,000, and regarded as the finest modern example of classical architecture; the Town Hall, erected 1754 from the designs of Wood; the Cathedral (in course of erection from the designs of Bodley and Gilbert Scott), which will be the largest ecclesiastical building in England; the Walker Fine Art Gallery; the University; the Royal Infirmary; the Municipal Offices; and the Custom House.

Liverpool was incorporated as a borough early in the 13th century and was created a city in 1880. The Corporation consists of a Lord Mayor and a City Council which comprises 37 Aldermen and 122 Councillors. The City returns 22 members to Parliament. The name is believed to be derived from Norse words meaning the "Pool of the Slopes."

#### Principal City Officers.

*Rt. Hon. Lord Mayor* (1921-1922), Alderman Charles Henry Rutherford.

*Recorder*, Edward G. Hemmerde, K.C. (1909).

*Police Magistrate*, Stuart Deacon (1910).

*President, Court of Passage*, Sir Wm. F. Kyffin Taylor, K.B.E., K.C.

*Coroner*, A. G. Inglis.

*Town Clerk*, G. Hammond Etherton, O.B.E. (1920).

*Clerk of the Peace*, R. D. Cripps.

*Medical Officer of Health*, E.W. Hope, O.B.E., M.D.

#### MANCHESTER.

MANCHESTER (Lancashire), the centre of the world's cotton trade, is 18½ miles N.W. of London. The municipal area is 21,688 acres (about 34 square miles), the population at the census of 1921 being 730,551.

Manchester is the distributing centre of the cotton spinning and weaving of Lancashire for the whole world, and of butter and foodstuffs for the most densely populated part of England. It also contains large engineering and machinery works and factories of hats, clothing, india-rubber goods, chemicals, etc. The city is connected with the Mersey by the *Manchester Ship Canal* (opened in 1894), which has a total length of 35½ miles, a depth of 26 feet, and a minimum width at the bottom of 120 feet. The value of the sea-borne trade of the port is stated at £146,290,745 for 1919, and at £207,663,045 for 1920, the net tonnage of ships entered and cleared in 1919 being about 2,000,000 tons.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A.; the Royal Exchange, built in 1869, enlarged at cost of £300,000 and reopened by the King, 1921; the Free Trade Hall, erected from the designs of Walters, in 1866, on the site of the "Peterloo Massacres" (Aug. 16, 1819) in St. Peter's Fields; the Art Gallery; the Whitworth Institute; the 17th century Chetham Library; the Rylands Library (1839), which includes the Althorp collection; the University (Owens College); and

the 13th century Cathedral (formerly the parish church). Manchester is one of the principal centres of political, literary and scientific advancement, and the Gaiety Theatre (Miss Horniman) and the Halle Concerts have placed the city in the forefront of dramatic and musical development. The *Manchester Guardian* newspaper exercises a widespread influence throughout the English-speaking world.

The town received a charter of incorporation in 1838 and was created a city in 1853. The Lord Mayor presides over a Corporation of 35 Aldermen and 105 Councillors. Manchester returns 10 members to Parliament. The Celtic name of the city was *Mancunium*.

#### Principal City Officers.

*Rt. Hon. Lord Mayor* (1921-1922), Ernest Darwin Simon.

*Recorder*, Arthur Jacob Ashton, K.C. (1914).

*Stipendiary Magistrate*, Edgar Brierley (1902).

*Town Clerk*, Thomas Hudson (1910).

*Clerk of the Peace*, Francis Ogden (1890).

#### LEEDS.

LEEDS (Yorkshire, West Riding) is favourably situated in the coal and iron districts of England, 18½ miles N.N.W. of London, and is the centre of the woollen industry. The city has also the largest share of the leather trade of the United Kingdom, in addition to large flax, canvas and rope works, and factories of thread, linen, glass and earthenware, with metal casting, machinery and machine tools, steam engines, and other engineering works. Leeds is connected with the Mersey in the west by the Leeds and Liverpool Canal, with the Humber in the east by the Aire and Calder Navigation, and is an important railway centre.

The municipal area is 28,090 acres (nearly 44 square miles), the population at the census of 1921 being 458,320.

The principal buildings are the Town Hall (1828), the Royal Exchange (1872), the Philosophical Hall, the Art Gallery, the University and the Leeds Institute of Science, Art and Literature (1863). The Parish Church (St. Peter's) was rebuilt in 1840; the 17th century St. John's Church has a fine interior with a famous Renaissance screen; the 17th century Mill Hill Chapel was rebuilt in 1849.

Leeds was made a county borough in 1888, and was created a city in 1893. The Lord Mayor presides over a corporation of 17 Aldermen and 51 Councillors. The city returns 6 members to Parliament. The earliest forms of the name are *Loidis* or *Ledes*, the origin of which is obscure.

#### Principal City Officers.

*Rt. Hon. Lord Mayor* (1921-1922), Willie Hodgson.

*Recorder*, John Albert Compston, K.C. (1919).

*Stipendiary Magistrate*, Horace Marshall (1910).

*Clerk of the Peace*, Arthur Copson Peake (1896).

*Town Clerk*, Sir Robert Fox (1924).

#### SHEFFIELD.

SHEFFIELD (Yorkshire, West Riding), the chief centre of the heavy steel and cutlery trade, is situated in the extreme south of Yorkshire 19½ miles N.N.W. of London, at the junction of the Sheaf, Porter, Rivelin and Loxley with the river Don. The city has an area of 31,628 acres (about 37 square miles), with a population at the

census of 1901 of 490,794. The principal industries are the manufacture of heavy steel (armour plates, rails, tyres, axles, engine castings, etc.), cutlery, and instruments, in addition to engines and general machinery, tanning, confectionery, bicycles, iron and brass founding, silver refining, brush making, and many other industries. Sheffield plate (silver rolled on other metals) made during the years 1742-1840, when electroplating superseded the process, is greatly prized by collectors.

The principal buildings are the 14th century Parish Church (St. Peter's), the Town Hall (1807), the Cutlers' Hall (1832), Corn Exchange, Market Hall, Museum, Mappin Art Gallery, Ruskin Museum and the University.

The Saxon town of *Eccafeld* was created a county borough in 1888 and a city in 1893, the Chief Magistrate becoming a Lord Mayor in 1897. The Corporation includes 16 Aldermen and 48 Councillors. Sheffield returns 7 members to Parliament.

#### Principal City Officers.

*Rt. Hon. Lord Mayor* (1901-1902), Alderman Charles Simpson.  
*Recorder*, William James Waugh, K.C. (1915).  
*Master Cutler* (1901-1902), Marmaduke Wardlaw.  
*Town Clerk*, William E. Hart (1913).  
*Clerk of the Peace*, G. E. Smith.

#### BRISTOL.

BRISTOL (Gloucester and Somerset), astride the River Avon and within 8 miles of the estuary of the River Severn (Bristol Channel), is a city and seaport 110 miles W. of London, with a municipal area of 28,445 acres (29 square miles) and a population at the census of 1901 of 377,061.

The principal industries are shipbuilding, rope making, chocolate, sugar and tobacco factories, glass and earthenware, soap, leather and chemical works, breweries, and copper, lead and iron works. The harbour was constructed from the Rivers Avon and Frome in 1809 and extends from the Severn (Avonmouth) to the city. The net tonnage of ships entered in 1909 was 1,845,096 tons, and of those cleared 1,804,325 tons, the value of the seaborne trade being stated at £48,899,222 for 1908. The principal imports are grain, fruit, oils, ore, timber, hides, cattle and general merchandise, and the chief exports are machinery, manufactured oils, cotton goods, tin and salt.

The chief buildings, in addition to the 14th century Cathedral (rebuilt by Street 1868-1888), the 14th century Church of St. Mary, Redcliffe (described by Queen Elizabeth as "the fairest, goodliest and most famous parish church in England"), and the 15th century Temple Church, are Canynges' House, the Merchant Venturers' Almshouses, St. Peter's Hospital, the Council House, Guildhall, Exchange (erected from the designs of John Wood in 1743), Colston Hall, the University and Clifton College. The *Clifton Suspension Bridge*, with a span of 702 feet over the Avon, was projected by I. K. Brunel (the designer of the *Great Eastern*) in 1836, but was not completed until 1860.

Bristol was a Royal Borough before the Norman Conquest, and in 1809 its Chief Magistrate (Sir Herbert Ashman) became a Lord Mayor. The Corporation includes 23 Aldermen and 69 Councillors. The city returns 5 members to Parliament. The earliest form of the name are *Brigstow* and *Briston*.

#### BRADFORD.]

BRADFORD (Yorkshire, West Riding), 192 miles N.N.W. of London and 8 miles W. of Leeds, in the coal and iron district, is the centre of the woollen and worsted trade. The city is connected with the Mersey in the west and with the Humber in the east by canals, and is an important railway centre. The municipal area is 22,879 acres (about 36 square miles), with a population at the 1901 census of 285,979. A proposed extension of the City boundaries would increase the area to 32,612 acres; and the population to 330,337.

The principal textile industries are worsteds, woollens, silks and cottons, and there are also important engineering and iron works, and quarries of freestone.

The chief buildings, in addition to the 15th century Cathedral (formerly the Parish Church), are the Town Hall (1873), Exchange (1869), Cartwright Memorial Hall (1904), commemorating the inventor of the power loom, Temperance Hall (1869), Grammar School, Technical College (1880), and the Mechanics' Institute (1864).

The Saxon township was created a parliamentary borough in 1832, a county borough in 1888, and a city in 1907. The Corporation consists of a Lord Mayor, 21 Aldermen and 63 Councillors. Bradford returns 4 members to Parliament.

#### Principal City Officers.

*Rt. Hon. Lord Mayor (1921-1922), Thomas Blythe. Recorder, Thomas Rowland Drake Wright (1905). Stipendiary Magistrate, Beaumont Morice (1914). Town Clerk, N. L. Fleming (1920).*

#### NEWCASTLE-UPON-TYNE.

NEWCASTLE-UPON-TYNE (Northumberland), on the north bank of the Tyne estuary, 8 miles from the North Sea and 272 miles N. of London, has an area of 8,452 acres (13 square miles) and a population of 274,955 at the Census of 1921.

The city is conveniently placed on the estuary, in the neighbourhood of the Northumberland and Durham coalfields. Its exports include coal, chemicals, pig iron, iron and steel manufactures and machinery; the chief imports being wheat and grain, fruits, iron, iron ore and steel, petroleum, sulphur ore, timber and wood, and potatoes. The net tonnage of ships cleared in 1920 was 3,913,322 tons, and of those cleared was 5,043,375 tons. The chief industries are shipbuilding, metal works and machinery, chemicals, glass, brick, tile and earthenware, and rope making.

The principal buildings are the (11th century) "New" Castle, of which the walls, keep and chapel are well preserved, the Cathedral (St. Nicholas), St. Andrew's Church (11th century), St. John's (14th century), St. George Jesmond, the Roman Catholic Cathedral of Hexham and Newcastle, the Corporation Buildings, Guildhall (1648), Moot Hall (1810), Exchange (1860), Central Newaroom and Art Gallery (1838), Wood Memorial Hall (1870) and the Custom House. The city is connected with the south bank of the Tyne by four bridges, of which the old High Level Bridge (1849) was designed by Robert Stephenson and carries the railway and roadway; the new High Level Bridge (1906) carries the railway only.

The pre-Norman borough of *Monkchester* was re-named Newcastle in the 11th century when the castle was erected as a defence against the Scots. In 1400 it was made a county borough, and in 1829 was incorporated. The City Corporation now includes a Lord Mayor (1906), 29 Aldermen and 57 Councillors. Newcastle-upon-Tyne returns 4 members to Parliament.

#### Principal City Officers.

*Rt. Hon. Lord Mayor (1921-1922), Richard Henry Millican. Recorder, Llewellyn Arthur Atherley Jones, K.C., M.P. (1906). Sheriff, Anthony Oates. Town Clerk and Clerk of the Peace, Arthur Maule Oliver (1907).*

#### NOTTINGHAM.

NOTTINGHAM (Nottinghamshire), the principal manufacturing centre of hosiery and lace, stands on the left bank of the Trent, where the tributary stream Leen enters the river, 125 miles N.N.W. of London. The municipal area is 20,935 acres (27 square miles), and includes an open market-place of 5½ acres in the centre of the city, with a population at the Census of 1921 of 226,621.

The city is connected with the North Sea and

the Atlantic by the river Trent and canals and is an important railway centre. The principal industries are cotton, silk and merino hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing, and the manufacture of tobacco, &c.

The chief buildings are the 11th century Nottingham Castle (restored in 1878), and now the City Museum and Gallery of Art, St. Mary's, St. Peter's, and St. Nicholas's Churches, the Roman Catholic Cathedral (Pugin, 1842-4), the Guildhall and Sessions Court (1829), Shire Hall, Albert Hall, Exchange, University College, Hospital and Eye Infirmary.

*Snotengaham* or *Notingeham* (the "town of the Caves") possesses a Charter of Henry II., and was created a city in 1807. The Corporation comprises a Mayor, 26 Aldermen and 48 Councillors. The city returns 4 members to Parliament.

#### Principal City Officers.

*Mayor (1921-1922), Frederick Berryman. Recorder, Hugo J. Young, K.C. (1920). Sheriff, Abraham Parkes. Town Clerk (1912) and Clerk of the Peace (1921), William John Board, O.B.E. City Coroner, Charles Lambert Rothera.*

## THE PRINCIPALITY OF WALES.

## PHYSICAL GEOGRAPHY.

*Position and Extent.*—The Principality of Wales occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 7,467 sq. miles, and a population (1901) of 2,206,712. It is bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Shropshire, Hereford and Monmouth, and on the W. by St. George's Channel. The greatest length from N. to S. (Point of Air to Barry Island) is 136 miles, and the greatest breadth from W. to E. (St. David's Head to the English border) is 92 miles.

Separated from the mainland of Wales by the Menai Straits is the Welsh island-county of Anglesey or Môn (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826, and by the tubular railway bridge (1,200 ft. long) of the L. & N.W. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and Dublin (70 miles).

*Relief.*—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,571 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,456 ft.); Berwyn (Aran-fawdd 2,970 ft.); Powys (Plinlimmon 2,462 ft., Drygarn Fawr 2,115 ft., Radnor 2,163 ft.); and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,621 ft., Brecon Beacon 2,862 ft., Pen-y-gawr fawr 2,660 ft.).

*Hydrography.*—The principal river of those rising in Wales is the Severn (see England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its way. The Wye (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The Usk (56 miles) flows into the Bristol Channel, through Monmouthshire. The Dee (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The Towy (68 miles), Teifi (50 miles), Taff (40 miles), Dovey (30 miles), Taf (25 miles), and Conway (24 miles), the last named broad and navigable, are wholly Welsh rivers.

The largest natural lake in Wales is Bala (Llyn Tegid) in Merionethshire, 4 miles long and about 1 mile wide; Lake Vyrnwy is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elan and Claerwen valleys.

## EARLY HISTORY.

*Celts and Romans.*—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the Goidele (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic Brythons followed in the ensuing Iron Age. The Roman conquest of South Britain and Wales was for some time successfully opposed by Caradog (Caratacus), King of the Silures, a tribe inhabiting the present counties

of Glamorgan, Brecon, Radnor and Monmouth. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). Christianity was introduced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the withdrawal of the Roman garrison) by native effort, and was carried to the northernmost corners of the British Isles by missionaries to the Hebrides and to the Orkneys and Shetlands.

*The Anglo-Saxon Attacks.*—The Anglo-Saxon invaders of South Britain drove the Celtic Goidele and Brythons into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waelisc*, or Welsh (=Foreign). The West Saxons' victory of Deorham (577) isolated the Waelisc of Wales from those of Cornwall, while the battle of Chester (633) similarly cut off communication with the Waelisc of Strathclyde. In the 8th century the boundaries of the Welch were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dyke). In the 9th century Rhodri Mawr united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of Gwynedd (N.), Powys (Mid.) and Dehenbarth (S.) were divided among his three sons—Anarawd, Mervyn and Cadell—the son of the last-named being Howel Dda, who codified the laws of the country, while Llewelyn ap Seisyllt (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 1015-1025.

*The Norman Conquest.*—After the Norman conquest of England William I. created Palatine counties along the Welch frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I. introduced Flemish settlers into South Wales, but after his death the Welch rose under the leadership of Griffith ap Rhys and routed the Norman-Flemish forces at the fords of the Teifi (Cardigan) in 1136. From the early years of the 13th century the house Gwynedd, in the north, gained an ascendancy over the whole of Wales, and Llewelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign; but Llewelyn, the son of Iorwerth, was killed in 1248 during hostilities between the Welch and English, and his brother David was captured and executed by the English in 1283. On Feb. 7, 1301, Edward of Carnarvon, son of Edward I., was created *Prince of Wales*, a title thenceforward borne by the heir apparent to the throne of England.

The Welch are a distinct nationality, with a language and literature of their own, and the national hardic festival (Eisteddfod), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (ass. mblly), which is believed to date from the time of Prydian, a ruling prince in an age many centuries before the Christian era.

## CARDIFF.

CARDIFF (Glamorgan) at the mouth of the river Taff († aer Taff), the port of the South Wales coal fields, has a municipal area of 8,095 acres, and a population at the census of 1921 of 200,262. The net tonnage of ships entered at the port in 1919 was 5,599,000 tons, and of those cleared 6,163,000 tons, the value of the seaborne trade being £30,981,000 in 1918. The prosperity of the city is largely due to the opening of the Docks in 1839, and to their continuous development since that date. The chief ports are coal, coke, patent fuel, iron, and on and steel manufactures, and there is a large iron repairing industry.

The principal buildings are Cardiff Castle, built in the 11th century, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the University of Wales, Technical College, City Hall and Law Courts, and Glamorgan County Hall. The city returns 3 members to Parliament.

## City Officers.

Rt. Hon. Lord Mayor (1921-22) F. H. Turnbull.  
Stipendiary Magistrate Sir T. W. Lewis.  
Recorder, W. Llewelyn Williams, K.C.  
Town Clerk & Clerk of the Peace, Cecil G. Brown.

## SWANSEA.

SWANSEA (Glamorgan), at the mouth of the River Tawe, is the chief centre of the copper, tinplate and spelter industry of the United Kingdom, and contains the largest tube works in the country. The trade of the port also includes coal and patent fuel; the net tonnage of ships entered in 1919 being 2,253,750 tons, and of those cleared 2,253,605 tons. The trade is principally with France, Italy and Belgium. The municipal area is 24,193 acres, with a population at the census of 1921 of 157,561.

The principal buildings are the Norman castle (re-built in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), and the 17th century Grammar School, founded by Hugh Goro. Swansea was chartered by King John, and incorporated as a borough by Henry III. The borough returns 2 members to Parliament.

## City Officers.

Mayor (1921-22), William Owen.  
Recorder, Sir E. Marlay Samson, K.B.M., K.C.  
Town Clerk, H. Lang-Coath.

## THE KINGDOM OF SCOTLAND.

**Position and Extent.**—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between  $60^{\circ} 51' 30''$  and  $54^{\circ} 30'$  N. latitude and between  $1^{\circ} 45' 30''$  and  $6^{\circ} 14'$  W. longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length\* of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 31,510 square miles (land and water), with a population (at the census of 1921) of 4,382,288, an increase of 121,394 since the census of 1911, of 2.5 per cent.

**Relief.**—There are three natural orographic divisions of Scotland. The *Southern Uplands* have their highest points in Merrick (2,764 feet), Rinn of Kells (2,668 feet), and Cairnannir of Carsphairn (2,612 feet), in Kirkcubright; Hartfell (2,651 feet) in Dumfries; and Whitecumb (2,695 feet), in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Glen*; they contain, in the central Grampian Hills, Ben Nevis (4,406 feet), the highest point in the British Isles, and Ben Muich Dhui (4,296 feet). The *Cheviot Hills* form a natural boundary between Scotland and England, their highest point being Cheviot Hill (3,676 feet).

**Hydrography.**—The principal river of Scotland is the Clyde (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of Daer and Portrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, the largest falls in the British Isles, Bonnington Linn (30 feet), Corra Linn (84 feet), Duffall Linn (10 feet), and Stonehyres Linn (80 feet), all occurring within a stretch of 4 miles, above and below Lanark. The *Tweed* (96 miles) forms a boundary between Scotland and England at Berwick, and has important woollen industries ("Tweeds") in its valley. The *Tay*, noted for its salmon, and the longest river in Scotland (117 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (2 miles 73 yards), opened in 1887 to replace that destroyed by a gale (Dec. 28, 1879). The *Dee* (90 miles), a noted salmon

river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The *Spey* (110 miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling, is spanned by the *Forth Bridge*, constructed 1882-9 at a cost of £3,000,000, with a length of 5,330 feet (with approaches 8,295 feet).

The *lochs* are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the Islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with Lochs Awe, Tay, Rannoch and Erchie in the Grampian valleys; *Loch Ness* (24 miles long and 800 feet deep), with Lochs Oich and Lochy, in the Great Glen; and Lochs Shin (20 miles) and Maree in the northern Highlands.

**Orkney.**—About 6 miles N. of the Caithness coast, separated from the mainland by the *Pentland Firth*, is the island county of Orkney, a group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is 375½ square miles, with a population (1911) of 25,896. Kirkwall, in *Pomona* (or mainland), the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain *brochs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow*, between *Pomona* and *Hoy*, was the war station of the Grand Fleet from 1914-9 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

**Shetland.**—About 50 miles N. of Orkney (with the detached Fair Isle at 25 miles N.) is the island county of Shetland, a group of about 100 islands and islets, of which 20 are inhabited. The total area of the group is 251 square miles, with a population (1911) of 27,911. Lerwick, in *Mainland* (the largest and principal island), is the capital of the county. *Fair Isle*, the southernmost of the group, is famous for hand-knitted hosiery, and *Unst* for the finest of the Shetland woollen work, for which the county is famous. *Muckle Flugga*, about 1 mile N. of Unst, is the most northerly of the group and of the British Isles ( $60^{\circ} 51' 30''$  N. lat.).

**Western Islands.**—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 102 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The *Inner Hebrides* include the island of *Skye* (643 square miles—capital, Portree, famous as the refuge of Prince Charlie after his defeat at Culloden, Invernesshire, in 1746), which contains the *Cuillin* (Sgurr-na-Banachdich, 3,443 feet), *Red Hills* (Ben Callich, 2,403 feet), and many other picturesque mountains; *Mull* (367 square miles).

\* *Land's End to John o' Groat.*—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near Duncansby Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity), a total distance of 597 miles in a straight line and (approximately) 900 by road. But the site of the house of John de Groot (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncansby Head, while Duncansby Head (also in Caithness) extends further N. than Duncansby. John de Groot is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV. (1488-1513).

\* *The Hebrides.*—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Hebouda*, latinized as *Hebrides* by Pliny, and corrupted to its present form. The Norwegian name *Sudreygar* (Southern Islands) was latinized at *odorense*, a name that survives in the Anglican bishopric of "Sodor and Man."

containing *Ben More* (3,185 feet), *Ben Bui* (2,354 feet), and *Ben Creach* (2,289 feet); *Jura* (160 square miles), with a chain of hills culminating in the *Paps of Jura*, *Beinn-an-Oir* (2,571 feet), and *Beinn Chaolais* (2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Minch*, include *Lewis-with-Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W. of *Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callernish*, a well-preserved series of monolithic circles, cruciform in general arrangement, but generally regarded as a heathen monument of the remote Stone Age.

*Climate*.—The climate of Scotland is influenced by the much indented coast line and (like that of South Britain) by the *Gulf Stream Drift*, which emerges from the Gulf of Mexico as a strong current about 30 miles in width, with a speed of about 4 miles per hour; the stream gradually loses its velocity and becomes shallower and cooler, until at about 35° N. lat. (off Cape Hatteras) it ceases to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England, the average duration of sunshine on the east coast being greater than on the east coast of England, while the south-western section is no wetter or more relaxing than the corresponding section of England. The mean winter temperature is in the neighbourhood of 35°, and that of summer about 58° Fahrenheit.

#### EARLY HISTORY.

*Prehistoric Man*.—North Britain appears to have been invaded in Palaeolithic times by a succession of races, who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body. The *Picts* seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts' Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands, and it is generally believed that the *Picts* were driven northwards by later Celtic immigrants. Celtic *Goidels* and *Brythons* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman Invasion of Britain.

*The Roman Invasion*.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Grampian" Hills, but after a victory at *Mons Graupius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the *Wall of Pius*, towards which ran military roads from the Cheviots. The Roman occupation of Southern *Caledonia* was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall*, from the Tyne to Solway Firth, where it was maintained until about 450 A.D. —

*The Scots*.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic *Brythons*, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the *Castrail*, or *Picts' Work* Dyke, of Roxburgh (from Torwoodlee, near Galashiels, to Peel Fell in the Cheviots). *Christianity* was introduced into Southern *Caledonia* about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the *Picts* and *Scots*, the *Brythonic Waelisc* (Welsh) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The *Waelisc* were isolated from their kinsmen in Wales by the victory of the West Saxons at *Clester* (613), and towards the close of the 9th century the Scots under *Kenneth Macalpine* became the dominant power in *Caledonia*. In the reign of Malcolm I. (943-954) the *Brythons* or *Waelisc* (Welsh) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (1005-1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at *Stirling Bridge* (1297), and *Robert Bruce*, who won the victory of *Bannockburn* (1314). James IV. and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.), and Mary (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children died young, and the throne devolved upon George I. (great-grandson of James VI. and I.). In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at *Killicrankie*. In 1715, armed risings led to the indecisive battle of *Sherrifmuir*, but the movement died down until 1745, when the "Young Pretender" defeated the Royalist troops under Sir John Cope at *Preston Pans* and advanced to Derby in England (1746). From Derby, the adherents of "James VII. and III." (the title claimed for his father by the Young Pretender), fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

*The Hebrides* did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III., in 1468, the Danish suzerainty being formally relinquished in 1590.

## EDINBURGH.

EDINBURGH, the Capital of the Kingdom, has a municipal area of 32,402 acres, and a population (Census of 1921) of 420,281 (over the enlarged area). The boundaries were extended in 1920 so as to include the Burgh of Leith and part of the suburban district of the County of Midlothian. The city is built on a group of hills and contains in Princes Street the most beautiful thoroughfare in the world. The principal buildings are St. Giles's Church (restored 1879-83), and St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott), the Castle (which contains, in St. Margaret's Chapel, the oldest building in Scotland), Parliament House (the present seat of the judicature, containing the Advocates' and Signet Libraries), the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gallery, and Holyrood Palace (containing parts of the royal palace of James IV. and V.). The city is governed by a town council of 71 members, and sends 6 members to Parliament (including the member for Leith).

Rt. Hon. Lord Provost (1921-22), Thomas Hutchison.

Town Clerk, Andrew Grierson, S.S.C., J.P.

City Chamberlain, Robert Paton.

## GLASGOW.

GLASGOW, a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 19,183 acres, and a population of 1,034,069 at the Census of 1921 (an increase of 25,582 since 1911). The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries of the world, and its trade was valued at £158,126,941 in 1920, the tonnage of the ships entering being 5,149,037 tons, of those cleared 5,031,571 tons. The principal industries are iron and steel works, shipbuilding, chemicals, leather, woollens, muslin-weaving, distilling, ink-making, tobacco, cotton-mills and furniture. The chief buildings are the Early English Cathedral, built early in the 13th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infirmaries, the Art Galleries and the Mitchell Library. The City is governed by a town council of 113 members, and sends 15 members to Parliament.

Rt. Hon. Lord Provost (1920-23), Thomas Paxton.

Town Clerk, Sir John Lindsay, J.P., D.L.

City Chamberlain, John A. Reid.

In Scotland the principal local court is the Sheriff Court. The Sheriff is the Appeal Judge, but the Judge Ordinary is the Sheriff-Substitute. The jurisdiction of the Sheriff Court is both civil and criminal. In civil questions the jurisdiction is unlimited in regard to the money value of the cause. On the criminal side the Court has cognizance of all serious crime with the exception of murder and three other charges, but the power of punishment is limited to fine and imprisonment; it does not extend to penal servitude.

The Sheriff Clerk is the Clerk of the Sheriff Court, and his duties correspond nearly to those of a Registrar in the English Courts.

The Procurator-Fiscal is peculiarly a Scottish official. Criminal prosecutions are in Scotland conducted by Crown officials at the public expense; the Lord Advocate and his deputies prosecute in the High Court; the Procurators-Fiscal in the Sheriff Court.

The Address of the *Secretary of the Sheriffs-Substitute Assoc.* is County Buildings, Dunfermline.

† SOUTHERN IRELAND.—Under the *Government of Ireland Act, 1920*, the Provinces of Leinster, Munster and Connaught, with the Ulster Counties of Cavan, Donegal and Monaghan, comprising a total land area of 17,019,155 acres (26,592 square miles), and a population (census 1911) of 3,139,688, form the Government of Southern Ireland, with its capital at Dublin.

‡ NORTHERN IRELAND.—Under the *Government of Ireland Act, 1920*, six of the Ulster Counties (Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone) with the Parliamentary Boroughs of Belfast and Derry, comprising a total land area of 3,351,970 acres (5,263 square miles), and a population (census 1911) of 1,250,531, form the Government of Northern Ireland, with its capital at Belfast.

## PHYSIOGRAPHY.

*Position and Extent.*—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,531 sq. miles and its geographical position between  $51^{\circ} 26'$  and  $55^{\circ} 21'$  N. latitude and from  $5^{\circ} 25'$  to  $10^{\circ} 30'$  W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth from E. to W. (Dundrum Bay to Armagh Head) is 174 miles.

*Relief.*—The island is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 250 ft. above mean sea level, with isolated mountain ranges, near the coast line. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone in the North; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.) in the North-East; the *Derryvagh Mountains* (Errigal 2,466 ft.) of County Donegal in the North-West; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway in the West; *Macgillicuddy's Reeks* (Carruntuohill 3,414 ft., the highest point in Ireland) in the South-West; and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford in the South.

*Hydrography.*—The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Bay, and the *Suir*, *Nore*, and *Barrow* to Waterford Harbour.

As in Scotland, the principal hydrographic feature is the *Loughs*, of which *Lough Neagh* (150 sq. miles) in the north-east, is the largest in Ireland and the British Isles, others being the *Shannon Chain of Allen, Bodergh, Forbes, Ree and Derg*, and the *Erne Chain of Cowna, Oughter, Lower Erne and Erne*, in the central plain; *Melvin, Gill, Gara and Conn* in the north; and *Corrib and Mask* (joined by a hidden channel) in the south. In County Kerry, to the east of *Macgillicuddy's Reeks*, are the famous *Lakes of Killarney*.

*Climate.*—The climate of Ireland is more equable than that of Great Britain, and the rainfall is more evenly distributed. The variation in mean temperature is only about  $3^{\circ}$  Fahrenheit, the summer extremes being  $59^{\circ}$  in the N. and  $62^{\circ}$  in the S.

## HISTORICAL SKETCH.

**Primitive Man.**—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island, while the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who eventually established themselves in the north of the neighbouring island.

**Legendary History.**—According to Irish legends, the island was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardrí* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster, and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M Coul (Fingal) to connect Antrim with Scotland (Staffa).

**Christianity.**—Christianity appears to have been known to many of the people of Ireland before the 4th century A.D., although it did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 360, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organise the Christian religion throughout the island.

**The Northmen.**—The Roman conquest of Britain was not extended to Ireland and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as *Finggall* (White Strangers) and the Danes as *Dubgall* (Black Strangers), names which survive in "Fingall," "Macbougall" and MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (Land of the Irish), the Provinces of Ulster, Leinster and Munster being survivals of the Norse *Ulaids-tad*, *Laigin-tad* and *Muman-tad*. The outstanding events in the encounters with the Northmen are the *Battle of Tara* (900), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Ultoniar* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Briens of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes.

**The Anglo-Norman Invasion.**—In 1172 Dermot MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidrí O'Connor (the *Ardrí*, or high king, of Ireland), and visited Henry II., the English king of England. Henry authorized Dermot to obtain armed support in England for the recovery of his kingdom and Dermot enlisted the services of Richard de Clare, the Norman

Earl of Pembroke, afterwards known as *Strongbow*. Strongbow landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermot's daughter. In 1175 (Oct. 28) Henry II. himself landed in Ireland, with a force larger than Strongbow's, and obtained homage from the Irish kings, but Anglo-Norman rule underwent many fluctuations in the succeeding centuries, being confined in the early 15th century within the English "Pale" of 600 square miles. In the reign of Henry VII. English rule was greatly extended, and the administration of Irish affairs was anglicised by Robert Poyning, Lord Deputy of Ireland, who summoned the *Parliament of Drogheda* (Dec. 1494), at which were enacted the Statutes of Drogheda, afterwards known as *Poyning's Law*, making the legislature of Ireland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII. the title of King of Ireland, and in Elizabeth's reign the conquest of the island was completed. In the time of James I. an apparently trivial incident, the introduction of the *potato* (1616), profoundly influenced the future of the nation, as it required little labour to cultivate, and "Raleigh's fatal gift" soon became so much the main food of the Irish that a potato famine caused almost universal starvation. In the same reign also many of the leading families of the north-eastern counties fled the country after participation in an abortive rebellion, and their lands were distributed amongst English and Scottish colonists, adherents of the Reformed Church, the number of Protestant settlers constantly increasing in succeeding years in spite of racial and religious estrangements with the Roman Catholic Celts. Cromwell's campaign in Ireland (1649-1650) was carried on with ruthless cruelty and universal military success, terminating in the subjugation of the kingdom and the legislative union with England, but further estrangement was caused between the Roman Catholics and the Protestant Colonists. At the Revolution of 1688 the Protestants adhered to the cause of William and Mary, and William III. defeated the Roman Catholic adherents of James II. at the *Battle of the Boyne* (July 1, 1690) and at the *Battle of Aughrim* (July 22, 1691). The Jacobite risings of 1715 and 1745 found no adherents in Ireland, but various insurrections took place in the 18th century, culminating in the rebellion of 1798, after the suppression of which the *Act of Union* (Jan. 1, 1801) combined the Irish and British legislatures. Catholic Emancipation was enacted by the Parliament of the United Kingdom in 1829, and extensive relief works were carried out to mitigate the severities of famine from 1831-1847. In 1845 the population reached its highest point (8,295,000) of whom the vast majority were dependent for food on the success of the potato crop.

**Home Rule.**—The demand for a separate Parliament for Ireland was first advanced at Westminster by an Irish party under the leadership of Isaac Butt (born 1813, died 1879), who was succeeded by Charles Stewart Parnell (born 1846, died 1892) by whose efforts the necessity of granting a measure of Home Rule to Ireland was impressed upon one of the great political parties of Great Britain. After many failures to pass a Bill through both Houses of Parliament a Home Rule Bill was eventually placed on the Statute Book in 1914, with a suspensory clause

for the duration of the War. In the later stages of the War, however, the extreme party of Irish politicians developed their organization under the name of *Sinn Féin* ("Ourselves Alone") and demanded complete severance from Great Britain and the recognition of an Irish Republic, and of its elected legislature (*Dail Eireann*). Various efforts have been made by the Cabinet of the United Kingdom to arrive at a solution of the Irish problem, which is complicated by the separatist demands of the extremists (in open rebellion against the Government), and the desire of the Protestants of Ulster to remain united with Great Britain, with the additional problem of the minorities of Protestants in the Southern counties. A Home Rule Bill, in lieu of that placed on the Statute Book in 1914, was passed by Parliament in 1920, and its provisions are stated below.

#### GOVERNMENT.

*Government of Ireland Act 1920.*—Under the Government of Ireland Act 1920 (which repealed the Government of Ireland Act 1914) provision is made for a Legislature, Executive, and Judiciary for Northern Ireland and for Southern Ireland, Northern Ireland comprising six of the counties of the Province of Ulster with the Parliamentary Boroughs of Belfast and Derry, and Southern Ireland comprising the remainder of the Kingdom.

*Executive.*—The Executive Power in Southern and Northern Ireland continues to be vested in the King-Emperor, and as respects Irish Services is exercised by Ministers of the Crown, responsible to the Legislatures and holding office during the pleasure of the Lord Lieutenant. In the event of the Parliament of Southern or Northern Ireland being declared not to be properly constituted (see *Legislature post*) the executive power is to be exercised, as regards Irish Services, by the Lord Lieutenant and a Committee of the Privy Council.

*Seats of Government.*—The seat of the government of Southern Ireland is at *Dublin*; of Northern Ireland at *Belfast*.

*Legislatures.*—The Parliament of Southern Ireland is to consist of a Senate of 64 members—the Lord Chancellor of Ireland and the Lord Mayors of Dublin and Cork *ex officio*, 17 Representatives of Commerce, Labour and Scientific and Learned Societies nominated by the Lord Lieutenant, and 44 elected Senators (4 by the Archbishops and Bishops of the Roman Catholic Church, 2 by the Archbishops and Bishops of the Church of Ireland, 26 Irish Peers who are taxpayers or ratepayers in Ireland by Irish Peers similarly situated, 8 Irish Privy Councillors by the Privy Councillors of Ireland, and 14 Representatives of County Councils); and of a House of Commons of 128 elected Members, 26 for Borough Constituencies (Dublin 12, Cork 4), 104 for Counties and 8 for Universities (Dublin 4, National 4).

The Parliament of Northern Ireland consists of a Senate of 26 members—the Lord Mayor of Belfast and the Mayor of Derry *ex officio*, and 24 Senators elected by the members of the House of Commons of Northern Ireland; and of a House of Commons of 52 elected members, 26 for the Borough of Belfast, 26 for Counties and 4 for Queen's University.

*The Council of Ireland.*—Until the establishment of a Parliament for the whole of Ireland, and for the purpose of bringing about har-

monious action between the Parliaments and governments of Southern and Northern Ireland, there is constituted a *Council of Ireland* consisting of a President nominated by the Lord Lieutenant and of 40 members (7 Senators of Southern Ireland, 7 Senators of Northern Ireland, 13 Members of the House of Commons of Southern Ireland, 13 members of the House of Commons of Northern Ireland) elected by the members of the House of which they are members.

*The Irish Parliament.*—The Parliaments of Southern and Northern Ireland may, by Identical Acts agreed to by an absolute majority of members, establish a *Parliament for the whole of Ireland* consisting of His Majesty and two Houses, which shall take the place of the Council of Ireland and the Southern and Northern Legislatures.

*Legislative Powers.*—The legislatures have full legislative powers in their respective areas except as to (i) the Crown or the succession thereto, (ii) the making of peace or war, (iii) the Navy, Army, Air Force or Territorial Army, (iv) Treaties, (v) Dignities or Titles of Honour, (vi) treason, treason felony, alienage, naturalisation, etc., (vii) trade out of Ireland, (viii) submarine cables, (ix) wireless telegraphy, (x) aerial navigation, (xi) lighthouses, buoys or beacons, (xii) coinage or legal tender, (xiii) trade marks, designs, merchandise marks, copyright or patent rights, (xiv) reserved matters, so long as they are reserved. (R.I.C. and Dublin Metropolitan Police for not more than three years, Postal Service, P.O.S.B. and Trustee Savings Banks, designs for stamps, registration of deeds, and the Public Record Office of Ireland until the date of Irish Union, Land Purchase until otherwise provided.)

*Alternative Legislature.*—The House of Commons of Southern or Northern Ireland shall not be deemed to be properly constituted if the Lord Lieutenant certifies that the number of members validly returned at the first election is less than half the total number of members of the House, or that the number of members who have taken the oath as such members within 14 days from the date on which the Parliament is first summoned to meet is less than one half of the total number of members of that House, and His Majesty in Council may by Order provide for the dissolution of the Parliament thus improperly constituted and for the exercise of the executive power of Government by the Lord Lieutenant, with the assistance of a Committee of the Privy Council, and of the powers of Parliament by a *Legislative Assembly* consisting of the aforesaid Executive Committee, together with such persons as His Majesty may appoint for the purpose.

*Representation at Westminster.*—The number of members to be returned by Irish Constituencies to serve in the Parliament of the United Kingdom is 46, of whom 33 represent Southern Ireland and 13 Northern Ireland, as shown on p. 235.

*The Judiciary.*—Supreme Courts of Judicature are established in Southern and Northern Ireland, consisting of a High Court of Justice and a Court of Appeal, with a High Court of Appeal for Ireland having appellate jurisdiction throughout the whole of Ireland and consisting of the Lord Chancellor of Ireland, the Lord Chief Justices of Southern and Northern Ireland and such other Justices as may from time to time be nominated.

**Financial Provisions.**—Exchequers are established for Southern and Northern Ireland into which are payable the proceeds of all taxes levied by the respective Parliaments and such other funds as may be appropriated to the public service. The *Irish Contribution to the Expenditure of the United Kingdom* is fixed at £18,000,000 for each of the first and second financial years, and thereafter at such amount as shall be certified by the Joint Exchequer Board to be due under the provisions of the Act; the contribution at first payable to be contributed as to £10,000,000 by Southern Ireland and as to £8,000,000 by Northern Ireland and thereafter as may be determined by the Joint Exchequer Board. A residuary share of reserved taxes is payable out of the Consolidated Fund of the United Kingdom to the Exchequers of Southern and Northern Ireland after deducting the amount of the Irish contribution and the net cost of the reserved services. Provision is made for the establishment of an Irish Exchequer and an Irish Consolidated Fund in the case of Irish Union.

### THE IRISH CONFERENCE.

A CONFERENCE opened in Downing Street in October between the Prime Minister and other representatives of the British Government and the delegates of *Dail Eireann*—to "ascertain how the association of Ireland with the community of nations known as the British Empire can best be reconciled with Irish national aspirations." This conference was the outcome of a remarkable correspondence which followed the King's appeal for a settlement of the Irish problem. The conference was to have taken place at Inverness, but the exchange of letters and telegrams between the Prime Minister and Mr. de Valera was so prolonged that this was not possible, and finally Mr. Lloyd George, in sending a new invitation to Sinn Féin to confer in London, declared that no purpose was to be served by any further interchange of "explanatory and argumentative communications."

After Mr. de Valera had received the Prime Minister's letter containing the Government's offer and the conditions considered "vital to the welfare and safety of both Great Britain and Ireland," he consulted *Dail Eireann*, which, by a unanimous vote, rejected the proposals, but declared that it was ready to appoint its representatives to negotiate a peace "on the basis of the broad guiding principle of government by the consent of the governed." In his reply Mr. Lloyd George expressed the view that the Government's proposals completely fulfilled the desire for this principle, and there then followed an academical discussion in which each side strove to find a set of suitable phrases.

A new obstacle was introduced by Mr. de Valera's claim in the course of this "debate," that the Sinn Féin delegates would be "the representatives of an independent and sovereign state." Mr. Lloyd George promptly cancelled the arrangements for the Inverness meeting, declaring that this claim made conference between them impossible. He pointed out later that to receive the delegates in this capacity would constitute "a formal and official recognition of Ireland's severance from the King's domains." The demand for peace grew in volume, and although Mr. de Valera did not entirely withdraw this demand, the invitation to the London conference was given and accepted,

but not on the basis of the correspondence that had passed.

### The Government's Offer.

The chief points in the Government's offer to *Sinn Féin*, outlined by Mr. Lloyd George in his letter inviting Ireland "to take her place in the great association of free nations" over which the King reigns, were that Ireland should assume forthwith the status of a Dominion, with complete autonomy in taxation and finance; that she should maintain her own courts of law and judges, her own military forces for home defence, and her own constabulary and police, and that she should take over the Irish postal service, education, land, housing, labour, transport, trade, and other services.

Ireland was offered the settlement of "age-long problems" subject to six vital conditions:—(1) The *Royal Navy* alone should control the seas around Ireland and Great Britain, such rights and liberties being accorded it as were essential for naval purposes in the Irish harbours and on the Irish coasts; (2) The *Irish Territorial Force* should, within reasonable limits, conform in respect of numbers to the military establishments of the other parts of these islands; (3) Great Britain should have all necessary facilities for the development of defence and of communications by air; (4) Ireland would of her own free will contribute to the *Regular Forces of the Empire*, voluntary recruitment for which should be permitted throughout Ireland; (5) the British and Irish Governments, to avert the possibility of ruinous trade wars, would agree to impose no protective duties or other restrictions upon the flow of transport, trade and commerce between all parts of the British Isles; and (6) the Irish people should agree to assume responsibility for a share of the debt of the United Kingdom and of the liability for war pensions, the share to be agreed or to be determined by an independent arbitrator. The question whether the proposed new powers should be confined to the South or taken over by a single body was to be left to Irishmen themselves to determine.

### TRADE.

**Trade of Ireland.**—The value of the Irish import and export trade for the seven years ending Dec. 31, 1919, is shown below:—

| Year.      | Imports.    | Exports.    |
|------------|-------------|-------------|
|            | £           | £           |
| 1913 ..... | 74,407,000  | 73,877,000  |
| 1914 ..... | 74,125,000  | 77,311,000  |
| 1915 ..... | 87,257,000  | 84,463,000  |
| 1916 ..... | 104,517,000 | 107,127,000 |
| 1917 ..... | 119,181,000 | 133,805,000 |
| 1918 ..... | 126,016,000 | 152,931,000 |
| 1919 ..... | 158,716,000 | 176,032,000 |

The trade of 1919 was classified as under:—

|                                    | Imports.     | Exports.     |
|------------------------------------|--------------|--------------|
|                                    | £            | £            |
| Farm Produce, Food and Drink ..... | 55,245,000   | 93,709,000   |
| Raw Materials .....                | 24,433,000   | 6,777,000    |
| Manufactures .....                 | 79,038,000   | 75,546,000   |
| Total .....                        | £158,716,000 | £176,032,000 |

The principal exports of manufactured goods in 1919 were textiles and ships. The imports amounted to £36 4s. 8d. per head of the population in 1919 and the exports to £39 3s. 5d. per head.

## THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat.  $54^{\circ} 3' - 54^{\circ} 25' N$ . and long.  $4^{\circ} 18' - 4^{\circ} 47' W$ ., nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (227 sq. miles), with a population (1912) of 49,233. The cultivated area (1901) was 83,700 acres, and the live stock included 6,029 horses, 19,662 cattle, 74,466 sheep, and 4,308 pigs. In the ninth century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western Isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1827 the Crown purchased it for the sum of £417,144.

The island is divided into six *sheadings* (Scandinavian=ship districts) called Glenfaba, Middle, Rushen, Garff, Ayie and Michael, each of which has its officer (coroner), whose functions are similar to those of a sheriff.

The land is rich in minerals, lead, iron, blende and slate, and exports large quantities of agricultural produce. Fifty miles of railway have been constructed, and about 23 miles of electric tram road.

Man is governed by a separate Legislature, called the Tynwald, consisting of two branches—the Governor and Council and the House of Keys. The House of Keys (possibly from the Scandinavian *keise*=chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the male and female owners and occupiers of property, 3 from each *sheading*, 3 from Douglas, and 1 each from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys.

CAPITAL, Douglas. Pop. (1921), 20,192 (Castletown is the ancient capital); the other towns are Peel and Ramsey.

## THE CHANNEL ISLANDS

situated off the north-west coast of France (at distances of from ten to thirty miles) are the only portions of the Dukedom of Normandy now belonging to England, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (25,654 acres), and the following dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (339), Herm (320), Jethou (44), and Lithou (38), a total of 47,083 acres, or 73½ square miles.

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1916 was 49,678 vergées (2¼ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes, and wheat, and of Guernsey green crops and oats, fruits and tomatoes. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The islands being all but exempt from imperial taxation they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, where there is excellent sea-bathing; the principal town of Guernsey is St. Pierre Port, on the east coast.

# THE CORPORATION OF THE CITY OF LONDON.

LONDON was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it is said it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (i.e., possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1191, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times, A.D. 1397, 1398, 1406, 1419); and many modern cases have occurred. The title of *Lord Mayor* is said to have been first bestowed in 1354 by Edward III. The Lord Mayor is elected at Michaelmas; he is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the *Lord Mayor's Show*.

*Aldermen* were first appointed by a charter of Henry III. in 1242, and were elected annually between 1377 and 1394, when a charter of Richard II. directed them to be chosen for life. The *Common Council* was at an early date substituted for a popular assembly called the *Folk-mote*. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four. *Sheriffs* (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but they appear in ancient records as early as A.D. 1130. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue as heretofore to choose the Sheriffs of the City of London. They are appointed on Midsummer Day, and enter on office at Michaelmas.

*Officers*.—The Recorder was first appointed in 1298. The Chamberlain is an ancient officer. There were at one time two Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance *circa* 1319. The first contemporary record of the office of City Chamberlain is 1276. The Town Clerk (called Common Clerk) and Common Serjeant (now appointed by the Crown) are mentioned as officers in the charter of Edward II., A.D. 1319, but the offices can be traced to a much earlier date than this.

\* The above is abstracted from the 288th "City's Cash Account" of the series extant—A D 1633 to 1920-21 (The Accounts earlier than A D. 1633 were believed to have been destroyed in the Fire of London; but two years' Accounts, temp. Queen Elizabeth, have been recently discovered among the Corporation Archives as exceptions to that belief). The Volumes are in full detail, signed by the Auditors, and in perfect preservation. The extract is from the 132nd Annual Printed Account of the Corporation, A D. 1794 to 1920-21. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June, 1903, and the 24th December, 1905, upon Reports of the Coal and Corn and Finance Committee, and they are printed in conformity with the 76th Standing Order of the Court of Common Council. The Accounts are issued in the form prescribed by these Orders, and show the Income and Expenditure applied to the year on the various Funds. The Accounts are made up to the end of March.

THE CITY GUILDS (LIVERY COMPANIES).

As will be seen from the following table, many of the London Guilds, or Livery Companies, are possessed of great wealth. Sixteen of the Companies have more than ten thousand pounds a year, and most of them are very liberal in their charities, especially in the way of education.

In the majority of cases the designation of the Company gives a clue to the trade which gave rise to the guild, the Broderers (Embroiderers), Cordwainers (cobblers), Fletchers (arrow makers), Loriners (bridle, bit, and spur makers), Poulters

(poulturers) Scriveners (legal writers), Upholders (upholsterers), and Vintners (wine sellers) retaining the ancient name of the trade.

The order of precedence is given in parentheses after the name of each Company. 8,203 Liverymen of the Guilds are entitled to vote at elections in *Common Hall* (see p. 565). The actual net number is, however, smaller, as many belong to more than one Guild; and only those who have residential or other qualification in the City have the *Parliamentary* vote in that district.

*Parliamentary Boundaries.*—In consequence of changes under the Representation of the People Act (1918) the Administrative County of London now includes the whole of the Metropolitan Parliamentary Divisions. It also comprises the 28 Metropolitan Boroughs and the City of London.

The Metropolitan Police District extends over a radius of 15 miles from Charing Cross, exclusive of the City of London, with an assessable value in 1920-21 of £58,036,581, and embraces an area of upwards of 699 square miles. The number of new houses built since 1879 up to and including the year 1917 is 602,362, with 34 in course of erection; the new mileage since 1879 being 1,655.

Meets on Tuesday at 2.30 p.m.

THE London County Council was constituted under the Local Government Act of 1888. London is an *administrative* county, covering an area of 117 square miles.

The City of London is an electoral division of the county. The County of the City of London is a county for *non-administrative* purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for *non-administrative* purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, 20 aldermen, and 124 councillors, together 145, or, if the chairman be also an elected member or alderman, 144. The term of office for aldermen is 6 years, and half retire every 3 years. The councillors are elected for 3 years. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of office.

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the reservation to the Council itself of all questions of principle, and to periodical reports of action taken.

The *Finance Committee* have important statutory powers. No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a net debt, according to the latest returns, of £47,083,000 (of which £12,949,000 represents debt incurred for revenue-producing undertakings), and an annual expenditure of over thirty millions, of which about fifteen millions are expended on education. The *Asylums and Mental Deficiency Committee* administer the duties falling on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913. The Council has mental hospitals with accommodation for over 20,000 patients. The *Housing Committee* perform the duties cast upon the Council by the Housing of the Working Classes Acts and the Housing, Town Planning, &c., Act, 1919, including the clearance of insanitary areas and the building of working-class dwellings. The total capital outlay up to 31st March, 1921, in respect of schemes carried out prior to the Act of 1919 was: Clearance of insanitary areas, £2,719,000, working-class dwellings, £2,983,000. It has always been the aim of the Council to make its working-class dwellings self-supporting, and in this, taking all the dwellings completed before 1919, it succeeded until the last two years. The returns for which showed deficiencies of £10,600 and £7,900 respectively. The total rent roll is now over £370,000. The increased rents now charged under the Increase of Rent and Mortgage Interest (Restrictions) Act, 1920, will, it is anticipated, be sufficient to restore the estates which were completed before 1919 to a self-supporting condition. In response to the appeal of the Government to local authorities generally, the Council prepared a scheme, which was approved by the Ministry of Health, to be carried out in 5 years, from 1919,

for the erection of 29,000 new dwellings to accommodate approximately 145,000 people. Owing to general financial conditions, however, the Government has intimated that it is necessary to reduce the number of houses to be erected under the scheme, and the Ministry of Health is now reviewing the whole situation. Any deficiency on this scheme, in excess of the produce of a penny rate, will be met out of moneys provided by Parliament. The total capital expenditure by the Council on the assisted scheme up to 31st March, 1921, was £1,905,000.

The *Improvements Committee* are responsible for the carrying out of street improvements and the construction of bridges (outside the City of London) and tunnels across the river Thames. The largest improvements carried out in recent years are the new streets between Holborn and the Strand, now known as Kingsway and Aldwych; tunnels under the Thames at Rotherhithe and Woolwich; and an extensive improvement at Westminster, including a new embankment of the Thames between the Houses of Parliament and Lambeth Bridge.

The *Metropolitan Main Drainage* system covers about 149 square miles, including certain districts outside the county, and comprises 370 miles of main, storm-relief, intercepting and outfall sewers, eleven pumping stations, two sewage precipitation stations, and six sludge vessels. The sewage is conveyed to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, and the sludge is taken out to sea. The Council is carrying out experimental work in connexion with other systems of sewage treatment. The total capital outlay on main drainage is upwards of £12,750,000, and further expenditure, amounting to several millions, is in prospect for a scheme to relieve certain districts from flooding after heavy falls of rain.

The Council is the *Tramway Authority* for London. The system extends over 150 street miles, of which 147 miles are electric lines (mostly underground conduit). Practically the whole of this great system is worked by the Council, and through running with various systems outside the County of London is now maintained, to the great advantage and convenience of the travelling public. The total capital outlay on tramways amounted, on 31st March, 1921, to £14,475,000, and the net debt outstanding to £8,349,000. The results of working for the year 1920-21 were gross receipts £4,904,427, surplus on working £65,134, net deficiency, after payment of interest on capital outlay and providing for repayment of debt, £590,580, which had to be raised in the rates. On 1st July, 1921, the Council took over the management and working of the Leyton tramways (about 9 street miles).

The *Education Committee* comprises thirty-eight members of the Council and twelve co-opted members, of whom not less than five are required to be women. In accordance with the Education Act, 1918, the Council has submitted to the Board of Education a scheme for the development of educational facilities of all kinds, but owing to the general financial situation it is practically in abeyance for the present, with the

exception of a modified scheme for day continuation schools.

Amongst the *Other Powers and Duties* of the Council may be mentioned the following:—Sanctioning of loans required by the councils of the metropolitan boroughs; acquisition and maintenance of parks and open spaces; the sanctioning of local sewers; controlling the building line, and the naming and numbering of streets; supervising buildings and district surveyors; dangerous structures; cattle diseases; controlling storage of explosive substances and petroleum; infant life protection; gas, gas-meter, and electric-meter testing; testing weights and measures; licensing of slaughter-houses and of cow-houses; supervision of common lodging-houses; the granting of music and dancing licences; public health, including treatment of tuberculosis and diagnosis and treatment of venereal diseases; historic buildings and monuments; inspection of factories and certain other buildings to secure means of

escape from fire; administration of the Shops Act, the Children Act, and the Midwives Acts; licensing and inspection of employment agencies; registration of massage establishments; licensing of premises under the Cinematograph Act; registration of motor cars; collection of duties on motor cars, dog and establishment and certain other local taxation licences; and registration of War charities. A *Motor Ambulance* service has been installed, with seven stations spread over the county and special facilities for calls by telephone. Under the Land Settlement (Facilities) Act, 1919, the Council has acquired the Shorne estate, near Gravesend, for the settlement of ex-service men upon the land. Any loss incurred up to 31st March 1926, will be defrayed by the Ministry of Agriculture and Fisheries.

The *Expenditure* of the Council, including loans to other local authorities, is met by two chief sources of supply—capital money raised by the issue of Stock, Bonds or bills, or by the use of

the Sinking Fund of the Council's debt, and current income raised in a county rate or by the revenue of undertakings. Certain contributions, including education grants, are also received from the Imperial Exchequer. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure generally within a period of 60 years (in a few cases the limit is 80 years). The total Stock outstanding at 30th Sept., 1921, was £77,778,194, out of total issues of £84,632,379. These figures are exclusive of the issues of Bonds, the amounts outstanding at 30th Sept., 1921, being £2,705,300 London County 5½ per cent. Bonds, and £3,224,370 6 per cent. Local Bonds for Housing. The Rating for the year 1921-22 was estimated

at the beginning of the year at the amounts shown in the statement given on p. 570, namely, *gs.* 2½*d.* in the pound over the whole county, including the City, and a further rate over the county outside the City of 4½*d.* in the pound, together *gs.* 7½*d.* Of the total rate, *gs.* 2*d.* was for education. A rate of *ss.* 10½*d.* was raised for the first half year. For the second half year, however, the rate, originally estimated at *ss.* 9½*d.*, was reduced by 2½*d.* in the pound, of which *sd.* was in respect of education, and this decrease, representing £500,000, must be borne in mind in connection with the figures in the statement. The Assessable Value of the County of London on 6th April, 1921, was £48,702,440—a *sd.* rate over the whole county producing £302,927.

# THE TENTH LONDON COUNTY COUNCIL.

## CATHEDRALS AND CHURCHES.

**ST. PAUL'S CATHEDRAL**, City of London, E.C. 4.—The masterpiece of Sir Christopher Wren (1675-1710). Splendid architecture; monuments to celebrated men; famous music. The cross on the dome is 365 ft. above the ground level, the inner cupola 228 ft. above the floor. "Great Paul" in S.W. tower, weighs 17 tons. Organ by Father Smith (enlarged by Willis) in case carved by Grinling Gibbons (who also carved the choir stalls); fragments of rock from Mount Calvary and carved stones from the Temple at Jerusalem affixed to wall of south choir aisle. Nave and transepts free; Fees to the following parts (on week-days only): Library, whispering gallery, and stone gallery, 6d.; golden gallery, 1s.; crypt, 6d.; ball, 1s.; total, 3s. Service on Sundays at 8, 10.30, 2.15, and 7. Week days at 8, 10, 2.15, 4. (\*Services are choral.) Among the distinguished statesmen, warriors and artists buried in the crypt or commemorated in the Cathedral are Nelson, Wellington, Napier, St. Vincent, Rodney, Cornwallis, Abercrombie, Moore, Gordon, Wolseley, Roberts, Brock, Ross of Bladenburg, Fakenham, Gibbs, Dundas, Wren ("si monumentum requiris, circumspice") Reynolds, Donne, Turner, Benjamin West, Abbey, Leighton, Sullivan, and many others. In 1902 a bust of George Washington, presented by American subscribers, was placed in the crypt. The garden contains in S. portion an ornamental device with legend varied from year to year. At the N.E. corner of the Cathedral is St. Paul's Cross, erected in 1520, on the site of a cross and open-air pulpit removed by order of the Long Parliament. To the S. of the Cathedral are remains of the Chapter House and Cloisters of "Old St. Paul's," destroyed by the Fire of London in 1666. Cut into the paving-stones at the foot of the steps at W. entrance is an inscription commemorative of Queen Victoria's thanksgiving in 1897.

**WESTMINSTER ABBEY**, near the Houses of Parliament, S.W. 1 (built A.D. 1050-1760).—Open on week-days at 8 a.m. Admission to Royal Chapels by fee of 6d., except on Mondays (open free); wax effigies, 6d. Norman undercroft, 3d. Open on Sundays for service only: Holy Communion at 8; Morning Prayer and Holy Communion at 10.15. Evening Prayer at 3. Litany and Sermon at 6.30. Daily—Holy Communion at 8 a.m.; School Service at 9.30; choral services at 10 and 3. Chapel of Henry VII., Chapter House, and Cloisters; King Edward the Confessor's shrine, A.D. 1269, tombs of kings (Edward I., Edward III., Henry V., Mary, Queen of Scots, Queen Elizabeth), and many other monuments and objects of interest, especially the grave of "An Unknown Warrior" at the W. end of Nave (1900), and Poets' Corner. The Coronation Chair encloses the "Stone of Scone," brought from Scotland by Edward I. in 1297. Graves of Gladstone, Isaac Newton, Charles Darwin, Charles Dickens, Lord Macaulay, Dr. Johnson, Chaucer, Tennyson, Browning, Handel; memorial to Viscount Howe (killed before Fort Mifflin in 1758); the memorial to Major John André, Adjutant-General of the British forces in America; the tombs of General John Burgoyne and of Colonel Enoch Mearns; memorials to Wolfe (Quebec) and Col. Townshend (Blenheim); bust of Longfellow; coloured window

and tablet to Lowell, in vestibule of Chapter House.

**SOUTHWARK CATHEDRAL**, south side of the Thames, S.E. 1.—Finest medieval building in London after the Abbey, and mainly 13th century. Known as St. Mary Overie previous to 1540. Burial place of Gower, Massinger, and Bp. Andrews, &c. Open 7.30 a.m. to 6 p.m., free. Sunday services, 7.30, 8, and 11 a.m. (choral) and 6.30 p.m. (choral). Week-days: 7.30, 8, and 5 p.m. (choral). The tomb of John Gower (1330-1408) is between the Bunyan and Chaucer memorial windows, in the N. aisle; the altar screen (erected 1500) has been partly restored. The Early English Lady Chapel (behind the choir) is the scene of the Consistory Courts of the reign of Mary (Gardiner and Bonner). Shakespeare memorial in S. aisle, with recumbent figure and window above, the gift of British and American subscribers. The chapel of St. John the Divine, in the north transept, once used as a magistrate's court, was restored at the cost of Harvard students, as a memorial of their founder, John Harvard, who was baptized in the Church Nov. 29, 1607 (part of Harvard's estate was derived from the sale of the Queen's Head Inn, Southwark, inherited from his mother).

**ALL HALLOWS, Barking-by-the-Tower**, E.C. 3.—15th century church, containing a very fine series of brass effigies; Jacobean pulpit with Sussex ironwork and font cover ascribed to Grinling Gibbons. William Penn, Quaker, was christened here, and a tablet has been erected by the Pennsylvania Society of New York. John Quincy Adams, sixth President of the United States, was married here in 1797.

**ALL SAINTS**, Margaret Street, W. 1.—Built by Butterfield in 1859. Ritualistic and noted for its music.

**BOW CHURCH** (ST. MARY-LE-BOW), Chapside, E.C. 4.—Rebuilt by Wren (see p. 575), after the Fire, with beautiful steeple (225 ft.). 12th century crypt and church open daily (except M.) 10 a.m. to 5 p.m. Since 17th century anyone born within sound of the bells of Bow Church has been designated a "Cockney." The 12th century church was built on stone arches or "bows."

**CHRIST CHURCH, GRETFRARS**, E.C. 1.—The church of the former Greyfriars Monastery was destroyed in the Fire, and Christ Church was rebuilt by Wren. The organ (repaired 1902) is by Benatus Harris, and the marble font is attributed to Grinling Gibbons. Until removal to Hortham (1902) the boys of Christ's Hospital (Blue Coat School), the site of which is now occupied by the G.P.O., attended services at Christ Church and the galleries contain seats with raised benches for the "Grecians." Blue Coat School boys still attend annually on St. Matthew's Day (Sept. 21). "Spital Sermon" is preached at Christ Church at Easter.

**CHRIST CHURCH**, Westminster Gate, S.W. 1.—Rev. R. J. Campbell, D.D.

**GUARDS' CHAPEL**, Wellington Barracks (Birdcage Walk, St. James's Park, S.W. 1).—Chapel redecorated in 1878. Open to visitors Tuesdays, Wednesdays, Thursdays and Fridays, 10 to 12 and 2 to 4. Parade service on Sundays at 11 a.m. (tickets of admission can be obtained on application to the Chaplain, R.M. Chapel, Wellington Barracks); evening service (open to the public) at 6 p.m.

**HOLY TRINITY, Minories, Aldgate, E. 1.**—(Dis-mantled and now a Sunday school). Contains a mural monument with the arms of the Earls of Dartmouth and of a member of that family (Legge) in which the arms of George Washington are quartered with those of the Legges.

**MARYLEBONE CHAPEL, High Street, Marylebone, W. 1.**—The former Parish Church of the village of Marylebone (now replaced by St. Marylebone Church), was rebuilt in early 18th century. In the churchyard lie Allan Ramsay (poet), Hoyle (whist), Ferguson (astronomer), Charles Wesley (hymn writer) and his son Samuel Wesley (musician).

**ST. ALBAN, Brooke Street, Holborn, E. C. 1.**—A brick building by Butterfield (1858). Ritualistic and noted for its music; organ by Willis. *Vicar, Rev. H. Ross.* Services on Sundays: Holy Eucharist at 7 and 8; choral at 9.15; solemn, with sermon, at 11; matins, 10.30; litany, baptisms, and churchings at 1.15; children's service and catechising, 3.15; evensong at 6; mission service at 7 p.m. Open daily, 6.45 a.m. to 9 p.m.

**ST. ANDREW BY THE WARDROBE, Queen Victoria Street, E. C. 4** (near the site of the King's Wardrobe). Rebuilt by Wren.

**ST. ANDREW UNDERSHAFT, St. Mary Axe, Leadenhall Street, E. C. 3.**—An early 16th century church, contains a monument of Stow, the London antiquary, and a memorial of Holbein. The organ is by Renatus Harris, the rival of Father Smith.

**ST. ANNE'S, Wardour Street, Soho, W. 1.**—Built in 17th century and noted for its music. Monument of William Hazlitt in the churchyard.

**ST. BARTHOLOMEW'S Priory Church, Smithfield, E. C. 1, the oldest church in London (A.D. 1223).**—*Rector, Rev. W. F. G. Sandwith, M.A.* Fine old Norman building, with tomb of the first prior, Rahere. N. transept restored and reopened in June, 1903. Crypt and Lady Chapel open; cloisters opened Dec. 1, 1905. Services daily 12.30 p.m. (except Sat. 11 a.m. and Thurs. 1.15 and 7 p.m.); Open free daily (Sundays for service only, 8.15; 11.0; 6.30.)

**ST. BENET, Paul's Wharf, Upper Thames Street, E. C. 4.**—Rebuilt by Wren, 1683; Inigo Jones, 1573-1582, and his father and mother, were buried in former church. St. Benet is the Metropolitan Welsh Church.

**ST. BRIDE'S CHURCH, Fleet Street, E. C. 4.**—Rebuilt by Wren, with beautiful spire (226 ft.). Samuel Richardson, the novelist, is buried in the nave. In the old church Lovelace, Sackville and Walsingham de Worde were buried, and Samuel Pepys was baptised.

**ST. CLEMENT'S DUNES, Strand W. C. 2.**—Rebuilt by Wren on site of earlier church assigned to the Danish settlers. The traditional burial place of Harold Harefoot (King Harold I., see p. 123) son of Canute. The organ is by Father Smith; the bells are those celebrated in the familiar nursery rhyme "Oranges and Lemons," and the air is among those played on the chimes (since 1900). Owing to the historical association of this church with the kingdom of Denmark, Danish ceremonies are now and then performed there. Dr. Johnson's pew in gallery and monument outside E. end.

**ST. CLEMENT'S, Clement's Lane, Lombard Street, E. C. 3.**—Rebuilt by Wren, contains handsome carvings on pulpit and font, and some chained books.

**ST. DUNSTON IN THE MARK, Jdol Lane, Lower Thames Street, E. C. 3.**—Rebuilt by Wren with

fine tower and spire; rest of church rebuilt, 1817-1821; contains many monuments.

**ST. EDMUND, KING AND MARTYR, Lombard Street, E. C. 3.**—Rebuilt by Wren, with altar at north end; organ by Renatus Harris. Restored and re-opened 1929, after damage by Air Raid, July 7, 1927.

**ST. ETHELBURGA'S, Bishopsgate, E. C. 2** (14th and 15th century).—On April 19, 1607, Henry Hudson (the navigator who gave his name to Hudson's Bay and to the Hudson River), his son John, and his ten sailors took communion in St. Ethelburga's, "purposing to goe to sea foure days after."

**ST. GEORGE'S, Hanover Square, W. 1** (18th century; famous for fashionable marriages).—"George Elliot," Mr. Asquith, and Theodore Roosevelt were among those married here.

**ST. GEORGE'S, Southwark, S. E.**—(Rebuilt 1736) contains the tombs of Bishop Bonner (1497-1569) and Edward Cocker (1631-1675), the author of Cocker's "Arithmetick." (The expression, "according to Cocker," refers to this book.)

**ST. GILES'S, Cripplegate, E. C. 1** (14th century).—Contains the graves of John Milton, John Foxe, and Sir Martin Frobisher, the Elizabethan seaman, who attempted to discover a north-west passage to Cathay, and commanded the *Princess* as vice-admiral to Drake in his expedition to the West Indies.

**ST. HELEN'S, Bishopsgate, E. C. 2.**—The "Westminster Abbey of the City" from its numerous monuments; building dates from 13th century. Contains a Shakespeare memorial window presented by Mr. William Prentice, an American.

**ST. JAMES'S GARLICKHITHE, Garlick Hill, E. C. 4,** has four stained glass windows, one of which was seriously damaged by a bomb by a German air raider on June 13, 1917. It is proposed that the window should not be completely replaced, and that year by year on the anniversary of the outrage the congregation should assemble for a service of thanksgiving for merciful preservation from sudden and violent death. The "Bomb" Sermon will be a modern counterpart of the "Lion" Sermon (see St. Katherine Cree, below).

**ST. JAMES'S, Piccadilly, W. 1.**—Built by Wren, with font and wood carvings by Grinling Gibbons. Lord Chesterfield and Lord Chatham were baptised in St. James's.

**ST. JOHN'S, St. John's Square, Clerkenwell, E. C. 1.**—Built in early 18th century, includes part of the ancient priory of St. John (12th century crypt).

**ST. KATHERINE CREE, Leadenhall Street, E. C. 3.** Rebuilt in early 17th century and ascribed to Inigo Jones. Contains a catherine wheel E. window, an organ by Father Smith, Archbishop Laud's prayer book and bible, and a monument of Sir Nicholas Throgmorton. The "Lion" sermon is preached here annually before the Lord Mayor and Corporation of London to commemorate the escape of a Lord Mayor (Sir John Gayer) from a lion in Algeria (Oct. 26, 1630).

**ST. MAGNUS THE MARTYR, Lower Thames Street, E. C. 3.**—Rebuilt by Wren, with steeple (125 feet) and lantern of great beauty, contains the tomb of Miles Coverdale (1488-1568), translator of the Bible, who was rector of St. Magnus (1564-1566) and Bishop of Exeter (1568-1577).

**ST. MARGARET, Lothbury, E. C. 2.**—Rebuilt by Wren, contains Grinling Gibbons carvings (font, chancel screen, and pulpit).

**ST. MARGARET'S**, Westminster, S.W. 2.—Founded 11th or 12th century; buildings date from 15th century, with frequent "restorations." The parish church of the Dominions beyond the Seas, and perhaps the most American spot in all London. The window over the western door was put up in 1882, at the cost of Americans, to the memory of Sir Walter Raleigh, who was executed in Old Palace Yard hard by, and whose headless body, and the body of his son Carew, lie in the chancel. The quattrain below is by James Russell Lowell. (*See also* Tower of London.) The Milton window, at the west end of the north aisle, was the gift of Mr. G. W. Childs, of Philadelphia, and bears an inscription by Whittier. Below the window is a tablet to Sir Peter Parker, who sailed the *Menelaus* up the Chesapeake during the war of 1812-14, and was killed while leading a landing party. On the south wall is a memorial window to Phillips Brooks, Bishop of Massachusetts; and over the vestry door is a window erected to Lady Arabella Stuart by an American lady. The church also contains the grave of Elizabeth, daughter of Robert Dinwiddie, Governor of Virginia.

**ST. MARGARET PATTERNS**, Rood Lane, Eastcheap, E.C. 3.—Rebuilt by Wren, with a leaden spire, contains two canopied pews and other curious survivals and relics.

**ST. MARY**, Aldermanbury, E.C. 2.—Rebuilt by Wren, contains the tomb of Judge Jeffreys and a marble monument to Lieutenant John Smith, "drowned off Staten Island in 1782" (John Heminge and Henry Condell (Shakespeare's editors) were buried in the older church).

**ST. MARY WOOLNORTH** (above the City and South London Tube Station), King William Street and Lombard Street, E.C. 3.—Built by Hawksmoor early 18th century, organ by Father Smith, contains a memorial to Sir Wm. Phipps, Governor of Massachusetts, who died in London in 1695.

**ST. MICHAEL PATERNOSTER ROYAL**, College Hill, Upper Thames Street, E.C. 4.—Rebuilt after the Fire by Strong (a pupil of Wren's), contains the tomb of "Dick Whittington" (*see* p. 565) and a Grinling Gibbons altarpiece.

**ST. OLAVE**, Hart Street, Mark Lane, E.C. 3.—A 15th century church, which survived the Fire of London, contains the tombs of Samuel Pepys and his wife, and a monument of John Waits, "President of the Council of New York;" also a memorial (formerly in All Hallows Staining) to Monks House Davison and Abram Newman, the exporters of the chests of tea which were thrown into Boston Harbour, Dec. 16, 1773. On Trinity Monday the Master and Brethren of Trinity House (q.v.) attend service here.

**ST. PAUL'S**, Covent Garden, W.C. 2.—Built by Inigo Jones. The tombstones round the exterior of the church record the burial places of Samuel Butler (Hudibras), Sir Peter Lely (Painter), Wycherley (Dramatist), Grinling Gibbons (Wood Carver), Dr. Arne ("Rule, Britannia"), and Macklin (Actor).

**ST. PETER'S**, Cornhill, E.C. 3.—Rebuilt by Wren, contains a carved choir screen also ascribed to him. The organ is by Father Smith.

**ST. SEPULCHRE**, Holborn, E.C. 1.—Part of this church escaped the Fire (*see* footnote, col. 2). The organ is by Benatus Harris, in a case attributed to Grinling Gibbons. Memorials in the church to Roger Ascham (Queen Elizabeth's tutor) and Capt. John Smith, "sometime Governor of Virginia and Admiral of New England,"

who would have been put to death but for the intercession of Pocahontas. (Princess Pocahontas is buried in Gravesend, *see* p. 567).

**ST. STEPHEN'S**, Coleman Street, E.C. 2.—The Rev. John Davenport, who, with other refugees, landed at Boston in 1637, and founded the colony of New Haven, Connecticut, in the following year, was vicar of this church from 1644 to 1653. The colony was composed in part of former residents of this parish. The tablet in the church to Davenport's memory was erected by one of his American descendants.

**ST. STEPHEN'S**, Walbrook, E.C. 4.—Rebuilt by Wren (and considered, with Bow Church, q.v., and St. Bride's, q.v., one of his greatest successes), contains the tomb of Sir John Vanbrugh (architect and dramatist), and a painting by Benjamin West.

**SAVOY CHAPEL**, Savoy Street, Strand, W.C. 2 (re-built about 1505, on site of 13th century Savoy Palace, restored after disastrous fire in 1864).—A Chapel Royal since 1780. Graves of Gavin Douglas and George Withers, and memorials of D'Oyley Carte. Sunday services at 11.15 and 6.

**ST. SWITHIN'S CHURCH**, St. Swithin's Lane, E.C. 4 (rebuilt by Wren after the Fire of London, but since modernised).—Contains embedded in its external (S.) wall *London Stone*, the milliarium from which in Roman times the miles (*millia passuum*) were measured. This stone is mentioned in King Henry VI., Pt. II.

**THE TEMPLE CHURCH**, south side of Fleet Street, E.C. 4.—The largest of the four remaining round churches in England, the other three being the Churches of the Holy Sepulchre at Cambridge, Northampton, and Little Maplestead (Essex). The Norman church, restored 1830-1840, is open to the public on week-days, 10.30 a.m. to 4 p.m., Saturdays excepted. Organ by Father Smith. Church service (famous music) on Sunday afternoons at 3 without orders; orders for service on Sundays at 11 a.m. may generally be obtained by writing to the Master of the Temple, E.C. 4. Service is discontinued in Aug. and Sept. *Master of the Temple*, Rev. W. H. Draper, M.A.

**WREN'S CHURCHES**.—Many of the "Churches in the City of London were destroyed by the Fire of London (Sept. 2-6, 1666). Fifty of these were rebuilt by Wren during the rebuilding of St. Paul's Cathedral, and many of them contain wood carvings attributed to Grinling Gibbons. The total cost of the fifty churches was £263,766 10s. 4½d., the most expensive being St. Mary-le-Bow, £15,456 6s. 8½d. (£7,388 8s. 7½d. for "Bow Tower"), and the cheapest, St. Vedast-Foster (£1,853 15s. 6d.).

**HOLBORN VIADUCT**, E.C.1, was constructed in 1867-1869 by order of the Corporation of the City of London from the designs of William Haywood, to carry the roadway over the valley of the Fleet river (the "Hole-bourne"). The Holborn Valley Viaduct is 1,400 ft. long, and is mainly of iron construction. The cost (£1,571,000) was borne by the City of London, the loan raised for the purposes of the improvement being secured on the Coal and Corn dues; these dues were abolished in 1889 and 1902, and the loan is otherwise discharged.

**HONOURABLE ARTILLERY COMPANY'S HEAD-QUARTERS**, City Road, E.C.1.—The H.A.C. received its charter of incorporation from Henry VIII. in 1537, and has occupied its present ground since 1642. Four of its members—Duncan Keayne, Sedgwick, and Spencer—who emigrated in the seventeenth century, founded in 1638 the Ancient and Honourable Company of Boston, U.S.A. American soldiers and sailors may view the armoury, on request.

**HORSE GUARDS**, Whitehall, S.W.1.—Archway and offices built about 1750. The headquarters of the Commander-in-Chief until 1904. The mounting of the guard (1st or and Life Guards, or Royal Horse Guards) at 11 a.m. (10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into Horse Guards Parade. *Horse Guards Parade*, where the Colour is "trooped" on the King's Birthday, is to be enlarged to 300,000 sq. ft. (Trafalgar Square is 168,850 sq. ft.; Parliament Square, 136,000 sq. ft.; Leicester Square, 100,000 sq. ft.).

**HOUSES OF PARLIAMENT**, Westminster, S.W.1.—The "Palace of Westminster" was rebuilt in 1260-1280 from the designs of Sir Charles Barry and Augustus Pugin, at a cost of about £3,000,000.—Open to visitors on Saturdays, and on Easter

and Whit Monday and Tuesdays, if neither House be sitting. Admission at the Norman Porch, House of Lords, on the above-mentioned days, from 10 a.m. to 3.30 p.m. Admission to the Strangers' Gallery of the House of Commons, during session, by member's order, or order obtained on personal application at the Admission Order Office in St. Stephen's Hall. The Victoria Tower (House of Lords) is 336 ft. high, and when Parliament is sitting the Union Jack flies by day from its flagstaff. The Clock Tower of the House of Commons is 300 ft. high and contains "Big Ben" (15½ tons), named after Sir Benjamin Hall, First Commissioner of Works when it was hung in 1856. A light is displayed from this tower when Parliament is sitting.

**INNS OF COURT.**—The *Inner* and *Middle Temple*, S. of Fleet Street, E.C. 4, and N. of Victoria Embankment, to which the gardens extend, occupy (since early 14th century) the site of the buildings of the Order of Knights Templars, the *Temple Church* (q.v.) surviving. Middle Temple Hall is Elizabethan, and in Middle Temple Gardens Shakespeare (Henry VI, Pt. I) places the incident which led to the "Wars of the Roses" (1455-1485). *Lincoln's Inn*, from Chancery Lane to Lincoln's Inn Fields, W.C. 2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. It was founded early in the 14th century. The new Hall is modern, the Library is 15th century, and the old Hall early 16th century, the Chapel (Inigo Jones) early 17th century. *Lincoln's Inn Fields* contains many fine old houses with handsome interiors. *Gray's Inn*, Gray's Inn Road, W.C. 1, was founded in late 14th century. The Hall is 16th century (the "Comedy of Errors" was performed there in 1594); the Gardens were laid out (according to tradition) by Lord Chancellor Bacon (died 1626). No other "Inns" are active, but *Staple Inn* is worth visiting as a relic of Elizabethan London; it has a picturesque gabled front on Holborn (opposite Gray's Inn Road), and the Hall, with hammer beam roof, is intact; in rear of the hall is a picturesque Dutch garden, restored by the present owners of Staple Inn (the Prudential Assurance Company). *Clement's Inn* (near St. Clement Dane's Church); *Clifford's Inn*, Fleet Street and Thavies Inn, Holborn Circus. *Serjeants' Inn*, Fleet Street, and another (now demolished) of the same name in Chancery Lane, were composed of Serjeants-at-Law, the last of whom died in 1899.

**KENSINGTON PALACE**, W. 8.—Enlarged by Christopher Wren for King William III. (1691), and continued as a royal residence until 1762. The birthplace of Queen Victoria in 1819. Closed to the public. *Kensington Gardens* (q.v.) adjoin.

**LAMBETH PALACE**, S.E. 1.—The official residence of the Archbishop of Canterbury, on south bank of Thames; the oldest part is 13th century, the house itself is early 15th century. For leave to visit the historical portions, applications should be made by letter to the Archbishop's Secretary.

**LAMBETH PALACE LIBRARY.**—Open to readers on Mondays, Wednesdays, Thursdays, and Fridays, 10 to 4; May to July, 10 to 4.30, and forenoon of Tuesday. A large collection of Kentish books, prints, and Diocesan history. Closed at Christmas and Easter, in September, and early part of October.

**LAW COURTS**, Strand, W.C. 2.—The Royal Courts of Justice were erected from the designs

of G. E. Street (completed by Sir A. Blomfield and A. E. Street) in 1874-1882 at a cost of £1,000,000 (the site cost £1,500,000 in addition). Until they were occupied by the Supreme Court of Judicature (established in 1875 by the fusion of High Court, Chancery, Queen's Bench, Common Pleas, Exchequer, Probate, Divorce, and Admiralty) the Courts met in Westminster Hall (q.v.). The Central Hall is 150 ft. long.

**LITTLE BRITAIN**, Smithfield, E.C. 1.—Benjamin Franklin lived in Little Britain on his first coming to London. It was then a centre of the bookselling and printing trade, and Franklin is reputed to have set type in the works which extended into the Lady Chapel of St. Bartholomew's Church (q.v.).

**LIVERY COMPANIES' HALLS.**—The "Twelve Great Companies" (see p. 545) have magnificent halls, but admission to view them has generally to be arranged beforehand.

**LONDON HOSPITAL**, Whitechapel High Street and Road, E. 1.—Founded 1759. Hospital contains 930 beds.

**LONDON MONUMENT** (commonly called "The Monument"), Pudding Lane, Eastcheap, E.C. 3.—Built from designs of Wren, 1671-1677, to commemorate the *Great Fire of London*, which broke out in Pudding Lane, Sept. 2, 1666. The fluted Doric column is 302 feet high (the flames of fire 42 feet in addition), and is based on a square plinth, with fine carvings on W. face. Splendid views of London from gallery at top of column. Admission 3d., 9 to 6 (Oct.-April to 4).

**LORD'S CRICKET GROUND**, St. John's Wood Road, N.W. 8. The headquarters (since 1814) of the Marylebone Cricket Club, the premier cricket club in England and the governing body of cricket. Oxford and Cambridge, and Eton and Harrow matches at beginning of July. Lord's is also the Middlesex County Cricket Club headquarters, and the scene of some of the principal matches of the season. Admission to ordinary matches 2s., to special matches 2s. or 3s. (including tax). Tennis Court in building behind members' pavilion, where interesting games are played.

**MANSTON HOUSE**, City, E.C. 4.—The official residence of the Lord Mayor; the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

**MARKETS.**—The London markets (administered by the Corporation of the City of London) provide foodstuffs for 2,500,000 to 3,000,000 people. The dead meat market at Smithfield is the largest in the world, the supplies marketed amounting to nearly 500,000 tons annually. *Central Meat, Fish, Fruit, Vegetable, and Poultry Markets*, Smithfield; *Leadenhall Market* (Meat and Poultry); *Billinggate* (Fish), Thames Street; *Spitalfields*, E. 1 (Vegetables, Fruit, &c.); *Cattle Market* (Mon. and Th.; and Fri. for Horses) and *Abattoirs*, Caledonian Road, N. 1; *Foreign Cattle Market*, Deptford (temporarily closed). Other markets are—*Covent Garden*, W.C. 2, established under a charter of Charles II. in 1662 and *Borough Market*, S.E. 1, for Vegetables, Fruit, Flowers, &c.

**MARLBOROUGH HOUSE**, Pall Mall, S.W. 1. (Not open to the public).—Built by Wren for the great Duke of Marlborough about 1710, and purchased as a London residence for the Prince of Wales in 1862. Now the London house of Queen Alexandra.

**MAYFAIR.**—A fashionable district of London, north of Buckingham Palace and east of Hyde Park, extends from Oxford Street (N.) to Piccadilly (S.), and from Bond Street (E.) to Park Lane (W.). Includes Curzon Street and Grosvenor and Berkeley Squares. The most fashionable shopping centres of London are included in Mayfair in Old and New Bond Street and Oxford Street. Regent Street almost adjoins Mayfair.

**MONUMENTS.**—VICTORIA MEMORIAL in front of Buckingham Palace; ALBERT MEMORIAL, South Kensington; BEACONSFIELD, Parliament Square; BELGIAN, Victoria Embankment; BOADICÆ (more correctly "Boudicca"), Queen of the Iceni, E. Anglia, Westminster Bridge; BURNS, Embankment Gardens; BURGHERS OF CALAIS (replica of Rodin's statue), Victoria Tower Gardens, Westminster; CAVELL, St. Martin's Place; CENOTAPH, Whitehall; CHARLES I. (erected Jan. 29, 1678), Trafalgar Square; CHARLES II. (Grinling Gibbons), inside the Royal Exchange; CLEOPATRA'S NEEDLE (68½ ft. high, erected 1876), Thames Embankment (the Sphinx, W. of pedestal, and the surrounding stonework, bear scars from an Air Raid); CAPTAIN COOK (Brock), the Mall; CRIMEAN, Broad Sanctuary; OLIVER CROMWELL (Thornycroft), outside Westminster Hall; DUKE OF CAMBRIDGE, Whitehall; DUKE OF YORK (224 ft.), St. James's Park; EDWARD VII., Waterloo Place (Mackennell); GEORGE III., Cockspur Street; GEORGE IV. (Chantrey) riding without stirrups, Trafalgar Square; GLADSTONE, facing Australia House, Strand; GUARDS', Waterloo Place; IRVING (Brock), N. side of National Portrait Gallery; JAMES II. (Grinling Gibbons), The Mall; ABRAHAM LINCOLN (St. Gaudens), facing Westminster Abbey; LONDON TROOPS, Royal Exchange; MILTON, St. Giles's, Cripplegate; MONUMENT, THE (see above), NELSON (124 ft.), Trafalgar Square; FLORENCE NIGHTINGALE, Waterloo Place; "PETER PAN" (Frampton), Kensington Gardens; RICHARD CŒUR DE LION (Marochetti), Old Palace Yard; ROBERTS, Horse Guards Parade; ROYAL ARTILLERY, The Mall; ROYAL MARINES, The Mall; SCOTT (Antarctic), Waterloo Place; SHAKESPEARE (Fontana), Leicester Square; GEORGE WASHINGTON (Houdon) Trafalgar Square; WELLINGTON, Hyde Park Corner; WELLINGTON (Chantrey) riding without stirrups, Royal Exchange; JOHN WESLEY, City Road; WOLSELEY, Horse Guards Parade.

**PATENT OFFICE AND LIBRARY.** 55 Southampton Buildings, W.C. 2 (built 1864).—The library (177,100 volumes) is open daily, from 10 a.m. to 5 p.m. (In 1920 the Patent Office sealed 14,191 patents, registered 7,222 trade marks, and 13,071 designs, and made a profit of £96,507.)

**PEOPLE'S PALACE.** Mile End, E. 1.—Recreation Room and Winter Gardens, Concerts, Swimming and Private Baths, Billiard Tables, &c. Concerts every Sunday, 3.30 p.m. Admission free. Evening, 7 p.m. (small charge).

**PORT OF LONDON.**—The administration of the Port of London is under the "Port of London Authority" (see p. 264), whose offices adjoin Trinity House, Tower Hill, and extend to Crutched Friars. The offices were designed "on a really grand scale" by Edwin Cooper; the square building of Portland stone has a facade facing the estuary and is surmounted by a "temple of Neptune." The River Thames has a total length of 220 miles from its

source in Gloucestershire to its mouth at the Nore. The tidal portion below Teddington Lock (70 miles) forms the Port of London, where one-third of the commerce of the United Kingdom is carried on. The value of the trade of the port was stated at £819,872,130 for 1919 and at £1,003,276,386 for 1920. The Port is served by the following Docks:—*St. Katherine's Dock*, E. 1 (23 acres), handling marine shells, spices, tea, marble, etc.; *London Docks with Eastern Dock and Shadwell Basin, Wapping*, E. 1 (200 acres), ivory, spices, rubber, wine, wool, tinned goods, etc.; *Surrey Commercial Docks, Rotherhithe*, S.E. 16 (350 acres), timber, grain and Canadian produce; *West India Docks*, E. 14 (241 acres), rum, sugar, grain, timber and frozen meat; *Millwall Docks*, Poplar, E. 14 (231 acres), the principal centre of the grain trade of London; *East India Docks*, Poplar, E. 14 (68 acres), Cape and American traffic; *Royal Victoria and Albert Docks*, E. 16 (1,100 acres), frozen meat, grain and tobacco; *King George V.*, North Woolwich, E. 16, opened in 1921 (68 acres), provides accommodation for the largest steamers afloat. *Tilbury Docks* (296 acres), about 26 miles below London Bridge, for Australasian and Eastern routes.

**POST OFFICE.**—The "General Post Office" is in King Edward Street, E.C. 1, a handsomely-fronted, ferro-concrete building (Tanner), with marble inlaid hall, opened in 1920. The public Hall is open for usual postal business from 6.45 a.m. to 9 p.m. (Sat. 8 p.m.). In the neighbourhood are G.P.O. North and G.P.O. West (the Central Telegraph Office).

**PRINCE HENRY'S ROOM**, 17, Fleet Street, E.C. 4 (bought by the L.C.C. in 1900, and open free to 4 or 5) is in a timbered 17th century house, and contains a Jacobean plaster ceiling and Jacobean and Georgian panelling.

**PUBLIC RECORD OFFICE**, Chancery Lane, W.C. 2 (built 1851-1866).—Contains a collection of the National Records since 1200, brought together from various repositories (the Tower, State Paper Office, etc.). Search rooms open daily, with certain exceptions, from 10 to 4.30; Saturdays, 10 to 2. The *Public Record Office Museum* (open Mon. to Fri., 2 to 4 p.m.) contains *Domesday Book* (a vellum volumes) made by order of William the Conqueror in 1086, and "Domesday Chest"; letters patent of John Balliol swearing fealty to Edward I. (1292); receipt book of Henry VII.; letters of Nelson (and the log of *H.M.S. Victory*); Wellington's Waterloo dispatch; petition to George III. from Congress; letter from Washington to George III.; autographs of Chaucer, &c.; Lord Montague's anonymous warning concerning the Gunpowder Plot (1605); bull of Pope Clement VII. confirming Henry VIII. as "Fidei Defensor" (1534); and many other documents of permanent interest; also monuments from the old Rolls Chapel (1377), part of an arch of which is preserved.

**ROMAN LONDON.**—Traces of the Roman occupation of London from the 1st century B.C. to the 5th century A.D. may still be seen *in situ*. There are remains of Roman baths at No. 3 Strand Lane, Strand, W.C. 2, and at the Coal Exchange, Lower Thames Street, E.C. 3. Portions of the Roman Wall which encircled London are still visible, including a bastion below the pavement of the yard of the General Post Office (fronting Giltspur Street). Other pieces of the wall may be seen in the disused churchyard of St. Alphage,

Aldermanbury, E.C. 2; in the churchyard of All Hallows on the Wall, London Wall, E.C. 2; in Roman Wall House, Jewry Street and Crutched Friars, Aldgate, E.C. 3; below Leadenhall Market; and near the S.E. corner of the White Tower of the Tower of London. Many relics of Roman London may be seen in the Guildhall, British and London Museums (q.v.).

**ROYAL EXCHANGE**, Cornhill, E.C. 3, founded by Sir Thomas Gresham, 1566, opened by Queen Elizabeth 1591, rebuilt 1667-9 and 1842-1844.—Admission free. Statues of Queen Elizabeth, Charles II., Queen Victoria, Sir Thomas Gresham, Wellington (Chantrey, riding without stirrups), Peabody, and others; frescoes in the ambulatory by Leighton, Abbey, Brangwyn, Wyllie, and others. Change, the busy time from 3 to 4 p.m. The chimes of the Royal Exchange (re-cast 1901) play English, Scottish and Irish melodies at 9 a.m., 12 noon, and 3 and 6 p.m.

**ROYAL MINT**, Tower Hill, E.C. 1 (building erected 1820), where gold, silver, and bronze are coined. Admission by order only, application for which should be made to the Deputy Master of the Mint, about 4 weeks in advance of intended visit.

**ST. BARTHOLOMEW'S HOSPITAL**, Smithfield, E.C. 1.—Founded A.D. 1123 by Rahere (see St. Bartholomew's Priory, p. 574). Present buildings mainly 18th and 19th centuries; main entrance 1702. The Great Hall contains a series of portraits including Henry VIII., Harvey, Abernethy, Pott, Radcliffe, &c. Hospital for 700 beds. The Church of St. Bartholomew the Less (rebuilt 1823) is within the hospital precincts; Inigo Jones was baptised in former church.

**ST. GEORGE'S HOSPITAL**, Hyde Park Corner, W. 1.—Founded in 1733. Hospital for 340 beds. Present buildings date from 1829.

**ST. JAMES'S PALACE**, in Pall Mall, S.W. 1.—(Not open to the public). Built by Henry VIII. (according to tradition, from designs by Holbein); the Gatehouse and Presence Chamber remain, and part of the Chapel Royal. A royal residence from 1568 to 1837. *Royal Levees* held here during the season. Representatives of Foreign Powers are still accredited "to the Court of St. James's," and (by the King's permission) the Conference of the Allies was held there in February, 1921.

**ST. JOHN'S GATE**, Clerkenwell, E.C. 1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Priory of that Order, of which the gate (early 16th century) and Church (crypt 12th century) alone survive. The gatehouse may be inspected by written permission of the Secretary of the Chancery.

**ST. THOMAS'S HOSPITAL**, Albert Embankment, S.E. 1.—Founded 1223. Present buildings (7 red brick houses) by Currey, 1868-71. 1,000 beds.

**SMITHFIELD**, E.C. 1.—Sir William Wallace was executed there (1305) in the reign of Edward I., and Wat Tyler was "despatched" by Lord Mayor Walworth (1381) in the reign of Richard II. Anne Askew, a Protestant martyr (1540), was burned there in the reign of Henry VIII.; and under Mary I. (1553-1558) many suffered there for the Protestant faith. (A memorial is affixed to the W. wall of St. Bar-

tholomew's Hospital.) The last to suffer for religion at Smithfield was Bartholomew Leggatt, Unitarian (1622), in the reign of James I. At the corner of Cook Lane (W. side of West Smithfield) is a small gilt figure commemorating the spot where the Fire of London was finally checked by the demolition of houses, Sept. 6, 1666. Smithfield Market occupies the W. side of West Smithfield.

**SOMERSET HOUSE**, Strand, W.C. 2, and Victoria Embankment, W.C. 2.—The beautiful river facade (600 feet long) was built at the close of the 18th century from the designs of Sir W. Chambers; the remainder of the building is early 19th century. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until about the close of the 17th century. The building is now occupied by the *Board of Inland Revenue* and by the *Principal Probate Registry* and the office of the Registrar-General of Births, Marriages and Deaths. In the Probate Registry (Central Hall) are the wills (*inter alia*) of Shakespeare, Milton, Newton, Van Dyck, Pitt, Dr. Johnson, Nelson, Wellington and Burke.

**STOCK EXCHANGE**, E.C. 2. (Strangers not admitted).—Known in the City as the "House," was founded in 1773 and now consists of about 4,000 members. A "jobber" does business only with other members; a "broker" is the intermediary with the public. Speculators for a rise in prices are "bulls"; those for a fall are "bears." *Chairman of the Stock Exchange*, Sir Wilfrid Atlay; *Secretary, General Purposes Committee*, Edward Satterthwaite, C.B.; *Secretary, Trustees and Managers*, R. M. Brydone; *Office*, 23, Throgmorton St., E.C. 2.

**THAMES EMBANKMENTS**.—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Bazalgette for the Metropolitan Board of Works, 1860-1870 (the seats, of which the supports of some are a kneeling camel, laden with epicroy, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, M.P., in 1874); the Westminster to Vauxhall section, on the S. (Surrey) side, 1860-1869; the Chelsea Embankment, 1871-1874. The total cost exceeded £2,000,000. Sir Joseph William Bazalgette (1819-1891) also constructed the London main drainage system, 1859-1865, at a cost of £4,600,000. A medallion has been placed on a pier of the Victoria Embankment to commemorate the engineer of the Thames waterside improvements ("Flumini vincula posuit"). The County Hall scheme of the L.C.C. (now under construction) includes an embankment on the Surrey side giving a river approach to the County Hall.

**THAMES TUNNELS**.—The *Rotherhithe Tunnel* (foot passengers and vehicles), constructed by the L.C.C. and opened in 1908, connects Commercial Road East, with Lower Road, Rotherhithe; the total length is 1 mile 440 yards, of which 520 yards are under the river. The cost of the tunnel and its approaches was £1,560,042. The *Blackwall Tunnel* (foot passengers and vehicles) was constructed by the L.C.C. and opened in 1897, connects East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The total length of the tunnel is nearly 1½ miles, of which 407 yds. are under the river. The cost of the tunnel with its approaches was about £1,406,000.

\* The "Sword of St. Paul" appears in the west quarter of the City Arms, not "Walworth's dagger" as once commonly believed.

**Greenwich Tunnel** (foot passengers only) constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 465 yards, and the cost was about £120,000. The **Woolwich Tunnel** (foot passengers only), constructed by the L.C.C. and opened in 1902, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E. 16, to High Street, Woolwich, S.E. 18. The length of the subway is about 300 yards, and its cost was £85,362. The **Thames Tunnel** (1300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (S.). In 1866 it was closed to the public, and purchased by the East London Railway Company. The **Tower Subway** for foot passengers was opened in 1870, and has long been closed.

**TOWER HILL, E.C. 1 and E.C. 3**, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square.

**TOWER OF LONDON, E.C. 3** (built by William the Conqueror, A.D. 1066-1087).—Admission to Jewel House, on all week days, 6d.; White Tower and Armouries, including Vaults, 6d.; to Bloody Tower, on all week days, 6d. Free on Saturdays (except Jewel House and Bloody Tower) by tickets issued at the office at gateway. Open from 2 May to 30 Sept., 10 a.m. to 6 p.m.; 1 Oct. to 30 April, 10 a.m. to 5 p.m. Not open on Good Friday, Christmas Day, or Sunday. *Constable, Field-Marshal Lord Methuen, G.C.B., G.C.M.G., G.C.V.O.; Lieutenant, Gen. Sir G. F. Milne, G.C.M.G., K.C.B., D.S.O.; Major and Resident Governor, Major-Gen. H. Pipon, C.B.; Keeper of the Jewel House, Major-Gen. Sir George J. Young, husband, K.C.M.G., K.C.I.E., C.B.; Curator of the Armouries, Charles Foulkes, F.S.A.* The Yeoman Warders ("Beefeaters") retain their picturesque Tudor uniforms. During the Great War the use of the Tower as a prison was revived. Sir William Wallace, King David II. and King James I. of Scotland, the "Little Princes" (Edward V. and his brother), Anne Boleyn, Katherine Howard, Lady Jane Grey, Queen Elizabeth, Cranmer, Ridley and Latimer and many others were imprisoned in the Tower. Sir Walter Raleigh was first committed to the Tower in July, 1592, and again in James I.'s day, after being condemned to death. The fruit of his many years' imprisonment in the Bloody Tower was his "History of the World"; and here he spent the last days before his execution in Old Palace Yard. William Penn was another famous Tower prisoner. While there he wrote his famous "No Cross, no Crown" and "Innocency with her Open Face."

**TRAFALGAR SQUARE, S.W. 1**.—This space was laid out in the second quarter of the 19th century. In the Square are the *Nelson Monument* 145 feet high, with Landseer's lions round the base, and statues of *Havelock, Napier, and Gordon*. The plinth of the Nelson Monument was badly damaged by fire during the (unofficial) celebrations on Armistice Day (Nov. 11, 1918). In the façade of the N. Wall of Trafalgar Square are metal standard measures.

**WESTMINSTER HALL, S.W. 1** (built by William Rufus, A.D. 1087-1100 and altered by Richard II., 1377-1399), adjacent to and incorporated in the House of Parliament.—Westminster Hall is part of the Palace of Westminster and survived the fire, which destroyed the remainder of the Palace (Oct. 26, 1834). The Hall is 200 feet long, 88 feet wide, and 90 feet high. The hammer

beam roof of carved oak, dating from 1399, is one of the principal attractions. King Charles I. was tried in the Hall. For admission, see regulations as to Houses of Parliament.

**WHITEHALL**, opposite Horse Guards, S.W. 1.—Erected by Inigo Jones as a banqueting-house for the projected Whitehall Palace. King Charles I. was beheaded here.

## PARKS AND GARDENS.

**HYDE PARK**.—From Park Lane, W. 2, to Kensington Gardens, W. 8 (350 acres), containing the Serpentine. Fine gateway at Hyde Park Corner, with Apuley House, the Achilles Statue, Rotten Row and the Ladies' Mile. To the north-east is the *Marble Arch*, originally erected by George IV. at the entrance to Buckingham Palace and re-erected in present position in 1850.

**KENSINGTON GARDENS, W. 8**.—From western boundary of Hyde Park to Kensington Palace (440 acres), containing the Albert Memorial and "Physical Energy" (G. F. Watts), and the Round Pond. There is a sunk garden with pleached alleys, near Kensington Palace.

**ST. JAMES'S PARK, S.W. 1** (93 acres).—From Whitehall to Buckingham Palace. An ornamental lake of 5 acres is spanned by a suspension bridge built in 1857, from which a magnificent view is obtainable towards Westminster eastwards and westwards to Buckingham Palace, but this view is now impeded by unsightly buildings erected for War purposes. The *Mall* leads from the Admiralty Arch to the Queen Victoria Memorial and Buckingham Palace. *Birdcage Walk* from Storey's Gate, past Wellington Barracks, to Buckingham Palace.

**GREEN PARK, W. 1**.—Between Piccadilly and St. James's Park (60 acres) with *Constitution Hill*, leading to Hyde Park Corner. The arch at the western entrance is surmounted by a quadriga by Capt. Adrian Jones.

**REGENT'S PARK, N.W. 1**.—From Marylebone Road to Primrose Hill (475 acres) surrounded by the Outer Circle and divided by the *Broad Walk* (fine flower beds and shrubs) leading to the Zoological Gardens.

**BATTHESEA PARK, S.W. 8 to S.W. 11** (200 acres) with *Sub-tropical Garden* (4 acres) and large artificial lake.

**VICTORIA PARK, E. 2** (275 acres), a great boon to the poor of East London. The *Beithal Green Museum* (a branch of the Victoria and Albert Museum) is close by.

**RIVERSIDE GARDENS**.—On the north side of the Thames are the Temple Gardens and the Embankment Gardens, E.C. 4, the latter containing the *Wateryate* of York House (Inigo Jones), a small lily pond and sunk garden, and numerous statues. West of the Victoria Tower of the Houses of Parliament are Victoria Tower Gardens, S.W. 1.

Beautiful forest scenery.

**EVON COLLEGE.**—2 miles from London. The most famous of English schools, founded by

Henry VI. in 1440, the scholars numbering over 2,000. Buildings date from 1523.

**GRAVESEND, a borough and river port, 22 miles from London (S.E. & C.R.).** A favourite resort for Londoners. St. George's Church (1727) contains a pulpit of Virginian wood, erected in 1624, and a stained glass window (the gift of ladies of Virginia) in memory of Princess Pocahontas, who was buried in the former church in 1617. Gravesend was formerly considered to be the entrance to London (Tilbury fort and docks are on the opposite bank), and King Edward VII. received Queen Alexandra there, March 7, 1883 (three days before their wedding).

**GREENWICH, S.E. 10.**—A south-eastern metropolitan borough (*see p. 564*) with a frontage of 4½ miles on the Thames. *Greenwich Hospital* (since 1873, the Royal Naval College) was built by Charles II., from designs by Inigo Jones, and by Queen Anne and William III., from designs by Wren, on the site of an ancient royal palace, and of the more recent *Placentia*, an enlarged edition of the palace, constructed by Humphrey, Duke of Gloucester (1391-1447), son of Henry IV. Henry VIII., Queen Mary I. and Queen Elizabeth were born in the Royal Palace (which reverted to the crown in 1447) and King Edward VI. died there. The Painted Hall of Greenwich Hospital (Thornhill), Nelson Relics, &c., free on weekdays (except Friday) from 10 (and on Sundays from 11) till 4 or 6, according to time of year. In the principal quadrangle is a marble statue of George II., by Rysbrack. *Naval Museum*, interesting Collection of Models, &c., open daily, except Friday and Sunday, from 10 till 4 or 6. *Chapel* open daily except Sundays and Fridays, and after 4 p.m. on Saturdays. *Greenwich Park* (283 acres) was enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II., from the designs of Le Notre. On a hill in Greenwich Park is *Greenwich Observatory* (founded 1675) the centre of longitude and of "Greenwich Time." Admission to the Observatory only by permission of the Astronomer Royal. The parish church of Greenwich (*St. Afege*) was rebuilt by Hawksmoor (Wren's pupil) in 1712, and contains a pulpit and other carvings attributed to Grinling Gibbons. General Wolfe (Heights of Abraham) and Tallis ("the father of Church Music") are buried in the church. Henry VIII. was christened in the former church. The Ministerial *Whitebait Dinner*, held for many years at the "Ship" Hotel, was last held in 1894.

**HAMPSTEAD HEATH, N.W. 3 (250 acres), with *Golden's Hill* (36 acres) and *Parliament Hill* (265 acres), open to the public.** "Belmont," Rosslyn Hill, was the residence of Sir Harry Vane, Governor of Massachusetts, and later of Bishop Butler, who is said to have written parts of his "Analogy of Religion" there. Hampstead Church contains a bust of Keats, who lived for a time at Lawn Bank (formerly called Wentworth Place).

**HAMPTON COURT.**—Sixteenth century Palace built by Cardinal Wolsey, and enlarged by Sir Christopher Wren for William and Mary, 15 miles from London. Fine view of river. Beautiful gardens with maze and prolific grape vine (planted in 1768). Old Royal Apartments and collection of pictures. Tennis Court, built by King Henry VIII. in 1530. Open every week-day (except Friday) and on Sundays. Hours: Jan., Feb., Nov., Dec., 10 to 4, Sun. 2 to 4; Mar., Apr., Oct., 10 to 4.

5. Sun. 2 to 5; May, June, July, Aug. and Sept., 2 to 6, Sun. 2 to 5. Admission, Mon., Wed. and Thur., 6d.; Tues., 2s. (children half price); Sat. and Sun. free. *Bushy Park* adjoins the Lion Gates of Hampton Court Palace.

**HARROW-ON-THE-HILL**.—22 miles by Metropolitan and other railways. Large public school (see to 300 scholars), founded by John Lyon in 1571. The "Fourth Form Room" dates from 1608.

**HIGHGATE HILL AND HIGHGATE WOODS**, the scene of the Dick Whittington legends, with *Waterlow Park* (30 acres) and *Lauderdale House*, formerly occupied by Nell Gwynne.

**JORDANS AND CHALFONT ST. GILES**, near Beaconsfield, Bucks, contain the *Old Quaker Meeting House* (1688) at Jordans, in the burial ground of which lies William Penn (Pennsylvania); a barn in the farm ground is believed to have been built out of the timbers of the *Mayflower* by the 17th century owner of Jordans (Gardener). At Chalfont St. Giles is the cottage where Milton lived during the Great Plague (1665-1666).

**KINGSTON-UPON-THAMES**, Surrey (about 25 miles from London), is the ancient place of coronation of the Kings of Saxon England. The Coronation Stone (hence the name "King's Stone") is preserved within railings in the market place.

**RICHMOND**, S.W. 14, contains the red brick gateway of *Richmond Palace* (Henry VIII, 1485-1509) and many buildings of the periods of Queen Anne (1702-1714) and George II. (1727-1760), including *White Lodge* in Richmond Park, the residence of George II. and the home of Queen Mary's mother (the Prince of Wales was born there June 23, 1804). *Richmond Park* (8,450 acres) contains herds of fallow and red deer. From the *Terrace Gardens*, Richmond Hill, can be obtained a wonderful view of the Valley of the Thames. Rugby football matches are played at the Athletic Ground (Richmond F.C.) and Old Deer Park (London Scottish F.C. and Rosslyn Park F.C.).

**RUNNIMED**.—A meadow of about 200 acres, on S. bank of Thames (part of the Crown Lands), between Windsor and Staines. From June 15-23, 1215, the hostile Barons encamped on this meadow during negotiations with King John, who rode over each day from Windsor. The 48 "Articles of the Barons" were accepted by the King on June 15, and were subsequently embodied in a charter, since known as *Magna Carta*, of which several copies were sealed on June 15. About half a mile N.E. of the meadow is the privately owned *Magna Carta Island*, which is claimed as the actual site of the sealing of the charter.

**RYE HOUSE**, at Hoddesdon, on the River Lee. Scene of the celebrated plot. Old castle and dungeons, pictures, oak fireplaces, chests and panels; Queen Elizabeth's bed; the Great Bed of Ware (mentioned in "Twelfth Night").

**ST. ALBANS**.—A city in Hertfordshire, on the river Ver, 22 miles N.W. of London. The abbey church, built partly of materials from the old Roman city of Verulamium by Paul of Caen, was consecrated in 1225. Parts still remain of the Norman structure, which was "restored" in late 19th century. The city was the scene of the overthrow of Henry VI. in 1455, and of the Earl of Warwick in 1461. On a printing press set up in the abbey the first English translation of the Bible was printed. Ruins of ancient City

of Verulam; St. Michael's Church, with tomb of Lord Bacon.

**STOKEN POMES** (2 miles from Slough station on G.W. Ry.) contains the 14th century Church with the Churchyard of Gray's "Elegy" and "Ode on a Distant Prospect of Eton College." The poet was buried in the church in 1771. There is an eccentric "Bicycle" Window (1643) in an external cloister. (See also "Burnham Beeches.")

**TWICKENHAM**, Middlesex. — On left bank of Thames, opposite Richmond, contains Pope's Villa (rebuilt) and the poet's tomb in the parish church, near which is York House, where Queen Anne was born. At Strawberry Hill is Horace Walpole's house with ornamental garden. International and other Rugby football matches (Harlequins) are played at Twickenham.

**WALTHAM ABBEY** (or **WALTHAM HOLY CROSS**), 12 miles from London (G.E. Ry.).—The Abbey ruins, Harold's Bridge (11th century), the Nave of the former cruciform Abbey Church (the oldest Norman building in England, and the traditional burial place of King Harold II., 1066) and a Lady Chapel of Edward II., with crypt below. At Waltham Cross, 1 mile from the Abbey, is one of the crosses (partly restored) erected by Edward I to mark a resting place of the corpse of Queen Eleanor on its way to Westminster Abbey. (Ten crosses were erected, but only those at Geddington, Northampton and Waltham remain; "Charing" Cross originally stood on the spot now occupied by the statue of Charles I. at Whitehall).

**WINDSOR CASTLE** (built by William the Conqueror, A.D. 1066-1087).—22 miles from London, by Great Western and South Western Railways. When the Court is not in residence, the State Apartments of Windsor Castle are generally open to the public, during His Majesty's pleasure, on Mondays, Wednesdays, Thursdays and Saturdays. When open, as to which due notice is given in the Press, the Lord Chamberlain's tickets can always be obtained at the Inspector's Office in the Castle Yard. The charges for admission on Wednesdays, Thursdays and Saturdays are: Adults, 2s.; children, 6d., excepting to charitable societies, when the charge for admission will be one-half in each case, the proceeds to go, by the King's command, to local charities. On Mondays and on Bank Holidays no charge is made. An authorised guide book can be obtained at the ticket office, price 6d. The hours of admission to the State Apartments are from 1 April to 30 Sept., between 11 and 4; and from 1 Oct. to 31 March, between 11 and 3. The Albert Memorial Chapel and the Round Tower are open on the same days and at the same hours as the State Apartments, except that the Round Tower is closed during the winter. The royal stables and riding school may be viewed daily between the hours of 1 and 2.30. St. George's Chapel may be viewed on week-days (Fridays excepted), between 12.30 and 4.

**WOOLWICH**.—9 miles from London; S.E. & C.R. Dockyard Station for Barracks, Rotunda, &c. *Old Dockyard*; *Extensive Barracks for Royal Artillery*, *Royal Army Service Corps*, &c. Common for military evolutions. *Rotunda* daily, free, from 2 April to 30 Sept., 10 a.m. to 12.45 p.m. and from 2 p.m. to 5; 1 Oct. to 31 March, from 10 to 12.45 and from 2 to 4; Sundays, April to Sept., 2 to 5; Oct. to March, 2 to 4 p.m.

**THEATRES IN 1920-21.**—There was an anniversary performance of Gay's *Meggar's Opera*, revived after about two centuries (1757), at the Lyric Opera House, Hammersmith, in June 1920, and it was played for the 500th time on Aug. 17, 1921. The most notable new productions were *A Bill of Divorcement* (Clemence Dane), *The Betrothal* (Maeterlinck), *If* (Lord Dunsany) and *Heartbreak House* (G. B. Shaw); a G. B. Shaw Repertory season at the Old Drill Hall, Hampstead; and Opera in English and Shakespearean and other classical works at the "Old Vic," while *Abraham Lincoln* (Drinkwater) was brought to West End Theatres and achieved a 500th performance.

**Record Runs.**—The "record run" at a London theatre, in pre-war days, was held by *Charley's Aunt* (1,466 consecutive performances). The present record is 2,238 consecutive performances of *Chu Chin Chow*, which was produced at His Majesty's on Aug. 31, 1916, reached its 1,467th performance on Oct. 19th, 1919, and was withdrawn after its 2,238th performance (having brought in over £700,000) on July 22, 1921.

**London's First Theatre.**—A tablet has been affixed by the Records Committee of the London County Council on 24 Curtain Road, Shoreditch, to commemorate the site of "The Theatre" Shoreditch, the first theatre in London.

**CINEMATOGRAF THEATRES.**—It has been stated that there are upwards of 4,000 Picture Palaces and Cinematograph Theatres in the United Kingdom. The latest tendency is for first-rate authors and artists to co-operate for the production of high-class work, and the general level of the productions shows an upward movement. The following are the principal "Cinemas" and "Picture Theatres" in London:—

*Broadway Garden Cinema*, Waltham Green, S.W. 6.  
*Cinema de Paris*, Bear St., Leicester Sq., W.C. 2.  
*Cinema House*, 225, Oxford Street, W. 1.  
*Cinematograph Theatre*, 21-25, Oxford St., W. 1.  
*Coronet Theatre*, Notting Hill Gate, W. 11.  
*Holborn Cinema*, 220, High Holborn, W.C. 1.  
*Kilburn Grange*, High Road, Kilburn, N.W. 6.  
*King's Picture Playhouse*, King's Road, Chelsea, S.W. 3.  
*Leicester Square Cinema*, Leicester Square, W.C. 2.  
*Maida Vale Palace*, 140, Maida Vale, W. 9.  
*New Gallery Cinema*, 121A, Regent Street, W. 1.  
*Palais de Luxe Cinema*, 17, Great Windmill Street, W. 1.  
*Palace Theatre*, Cambridge Circus, W. 1.  
*Pavilion*, Marble Arch, W. 1.  
*Pavilion*, Shaftesbury Avenue, W.C. 2.  
*Picture House*, 165, Oxford Street, W. 1.  
*Polytechnic*, Regent Street, W. 1.  
*Scala*, Charlotte Street, Fitzroy Square, W. 1.  
*Stoll Picture Theatre*, Kingsway, W.C. 2.  
*Strand Cinema*, Agar Street, Strand, W.C. 2.  
*Terry's*, Strand, W.C. 2.  
*Victory Cinema*, Bloomsbury, W.C. 2.  
*West End Cinema*, 3, Coventry Street, W. 1.

## THE WORLD'S LITERATURE.

**BOOKS.**—It is estimated that over 155,000 books, pamphlets and magazines are published annually in the various countries of the world, and that over 14,000,000 separate works have been published since printing was invented in the fifteenth century. The three largest libraries in the world are the *Bibliothèque Nationale*, Paris, which contains over 5,000,000 volumes, the *British Museum Library*, London, where there are 40 miles of shelves, and an estimated total of about 5,000,000 volumes, and the *Library of Congress*, Washington, D.C., which contains 2,000,000 volumes. In most countries one or more libraries are entitled to have sent to them a free copy of every published book. In the United Kingdom, under an Act of 1835, a copy of every book published in the country must be sent to the British Museum, the Bodleian,

Oxford, the University Library, Cambridge, the Advocates' Library, Edinburgh, and the Library of Trinity College, Dublin, while a sixth copy was added for the National Library of Wales by the Copyright Act of 1921.

**NEWSPAPERS.**—It has been stated that over 60,000 newspapers are published at daily or weekly intervals in the various quarters of the globe. Of these considerably over one-half are in the English language, there being 23,000 in the United States, and over 13,000 in the British Empire. The most celebrated newspaper in the world is *The Times*, founded in London in 1788. The greatest circulation is that of the *Daily Mail*, founded in London on May 4, 1866. During the newspaper strike in Paris, *La Presse* sold 4,120,000 copies in one day (Nov. 28, 1919).

**In the Metropolitan Police Area Motor Cabs** are fitted with a taximeter, which records the fare by a combination of time and distance. The Secretary of State has authorised the addition of *50 per cent.* to the charges shown on the taximeter, the increase being operative from March 1, 1900, and applying also to the charges for luggage and extra persons. In addition to the legal fare and charges for luggage and extra persons, the Secretary of State has authorised an additional charge of *6d.* for every hiring of a *Horse Cab*. Notice in relation to the increased charges must be conspicuously displayed inside Motor and Horse Cabs unless the vehicle is fitted with a meter showing the correct fares.

**MOTOR CABS.**

**FARE** payable for the hiring of a *Motor Cab* fitted with a *Taximeter*, including the increases noted in the leading paragraph:—

(a) Not exceeding one mile, or for a period *s. d.*  
of time not exceeding ten minutes... *x 0*

(b) Exceeding one mile or ten minutes:—  
(1) For each quarter of a mile, or for a period of time not exceeding two and a half minutes ..... *0 3*

(a) For any less period or distance..... *0 3*

In addition to the above the driver is entitled to charge the following extra payments:—

(1) Luggage:—Whether hired by distance or by time—for each bicycle, child's mail cart, or perambulator, *6d.*; for each package carried outside ..... *0 3*

(a) Extra persons:—When licensed to carry more than two persons—for each additional person beyond two, the whole journey..... *0 9*

Provided that one child or two children under the age of ten years shall count as one person.

**HORSE VEHICLES.**

*Exclusive of the extra 6d. noted in the leading paragraph.*

**FARES BY DISTANCE** (Cabs either with or without a Distance Recorder, but without a Taximeter): If hired and discharged within the Four-Mile Radius, for any distance not exceeding two miles ..... *x 0*

The driver may notify, by means approved by the Commissioner of Police, that he is willing to accept a fare of *6d.* for any journey not exceeding a mile. *s. d.*

For every additional mile or part of a mile *0 6*

If hired outside the Four-Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile ..... *x 0*

If hired within, but discharged outside the Four-Mile Circle, whole distance not exceeding one mile, *1s.*; exceeding one mile, then for each mile ended within the circle, *6d.*; and for each mile or part of a mile ended outside ..... *x 0*

**FARES BY TIME: Inside the Four-Mile Circle.** Four-wheeled Cabs, for one hour or less, *1s.*; two-wheeled Cabs..... *x 6*

If above one hour, for every quarter hour of the whole time and for any less period, four-wheeled Cab, *6d.*; if two-wheeled Cab *0 8*

If hired outside the Circle, wherever discharged, for one hour or less ..... *x 6*

If above one hour, then for every quarter hour of the whole time and for any less period ..... *0 8*

If hired within, but discharged outside, the Four-Mile Circle, the same.

**EXTRA PAYMENTS.**—Hirers of Cabs should particularly notice these regulations, as disputes generally arise from their not being clearly understood.

Whether hired by DISTANCE OR BY TIME.

**LUGGAGE.**—For each bicycle, child's mail cart, or perambulator, *6d.*; for each package carried outside the carriage ..... *0 3*

**NOTE.**—Luggage carried on the footboard of a hansom-pattern cab so that the doors do not close over it is deemed to be outside within the meaning of this clause.

**EXTRA PERSONS.**—For each above two (one child or two children under 10 years of *s. d.* age count as one person) ..... *0 6*

**WAITING.**—When hired by distance, and at the request of the hirer made to wait: for every 15 minutes completed—if hired within the Four-Mile Circle, 4 wheels, *6d.*;

2 wheels ..... *0 8*

If hired without Circle, 2 or 4 wheels ... *0 8*

**GENERAL REGULATIONS.**

**GENERAL REGULATIONS.**—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares for horse-drawn cabs are according to distance or time, at the option of the hirer, expressed at the commencement of the hiring; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

**DRIVER**, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

**AGREEMENT** to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is *40s.*

The driver of every cab shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing cab number, name and address of Proprietor, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty *40s.*, if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare; or, fraudulently endeavours to avoid payment of a fare; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of *40s.*

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no

conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard; but inquiries as to property left in a cab or stage carriage should be made at the Lost Property Office, New Scotland Yard. Office hours, 10 to 4.

#### LAMPS TO BE LIGHTED.

The following regulations apply to lighting and carrying of lamps on vehicles:—

**Motor Cars.**—A white light placed on the extreme off-side, and visible within a reasonable distance toward which the car is proceeding or intended to proceed. This lamp should show a red light to the rear unless a red light is fixed on the rear of the vehicle. To be lighted one hour after sunset and kept till one hour before sunrise.

A lamp for the illumination of the rear number plate to be lighted *half an hour* after sunset.

**Motor Cycles.**—A white light to the front, but if it has a side-car attached a red light to the rear must also be shown.

The lamp need not be placed on the extreme off-side unless the side-car is attached or projects beyond the off-side of the motor bicycle.

The front or rear plate must be illuminated *half an hour* after sunset.

**Horse Drawn.**—If only one lamp is carried it must be on the extreme off-side to show a white light to the front visible for a reasonable distance. If a light is shown to the rear it must be red.

**N.B.**—In certain localities a red light or red reflex light is requisite.

#### STREET ACCIDENTS IN U.K., 1900.

In addition to the accidents on the various railways of the U.K., there were no fewer than 57,747 accidents caused by vehicles on streets and roads in 1900. Of this number 2,837 were fatal and 54,910 non-fatal, compared with 2,628 fatal and 48,698 non-fatal accidents in 1912.

#### HACKNEY CARRIAGE STATISTICS.

During 1900 there were licensed public carriages:—Hansom, 34; clarences—animal 487, mechanical 6,025; omnibuses—animal 28, mechanical 3,347; tramway cars—mechanical 2,740; total, 12,651. Drivers and conductors:—Cab drivers—animal 721, mechanical 2,934; stage drivers—animal 7, mechanical 10,633; composite licences (stage driver and conductor)—animal 11; mechanical 2,305; conductors, 11,593; total, 34,201.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1900, of 614 men examined, 451 were successful. The proportion of drivers to hackney carriages is 147 drivers to 20 carriages.

#### LOST PROPERTY.

Of lost property, 70,802 articles were deposited, of which 30,675 were claimed by the owners. The number of awards paid to drivers, &c., was 28,128.

#### BANKRUPTCY STATISTICS.

##### England and Wales.

The total proceedings begun in all courts during 1918 was 488,925, as compared with 666,715 in the preceding year, a decrease of 177,757, or 27 per cent. As in previous years, the falling-off is almost wholly in proceedings commenced in county courts, these declining from 609,526 to 438,128, a decrease of 171,344, or 28 per cent. If the county court figures are excluded from the total of proceedings commenced, the decrease in the other courts was only 6,413, or 11 per cent.

Both bankruptcy petitions and companies winding-up proceedings have steadily diminished, the former since 1908 and the latter since 1922. Bankruptcy petitions fell from 3,333 to 1,276 during the war, a decrease of 62 per cent. Actions in county courts decreased from over 1,000,000 in 1914 to under 500,000 in 1918. On the other hand, the average amount claimed per plaint rose from £3 in 1913 to £4 7s. 6d. in 1918.

## TITHE RENT CHARGE.

THE Tithe Rent Charge is based on the septennial average price of wheat, barley, and oats, the basic price per imperial quarter being taken at 36s. 6d. for wheat, 31s. 8d. for barley, and 22s. for oats (the Charge being £100 when based on these figures). The Charge for 1913 was £74 14s. 9½d.; for 1916, £83 2s. 6½d.; for 1917, £92 12s. 0½d.; and has been fixed until Jan. 1, 1926, by the Tithe Act (1918) at £109 3s. 12d.

## COMMUNISM IN EUROPE.

THE Moscow *Pravda* states that fifty-one Communist parties, with 2,800,000 members, have joined the Communist International. Russia, with 500,000 Communists, occupies the first place, Germany and Czechoslovakia, with 350,000 each, coming second, followed by France with 120,000, Norway with 97,000, and Italy with 70,000. The Young People's Communist International has 800,000 members.

### THE CHILTERN HUNDREDS.

**RESIGNATION OF MEMBERS OF PARLIAMENT.**—No duly elected member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement, 1707 (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the Chiltern Hundreds, or of the Manor of Poyning, or Northstead, or the Exchequer of Munster, whereupon the seat is declared vacant (under the Place Act of 1742, which expressly permitted acceptance of such offices to serve as an excuse for resignation) and a new writ is issued by the Speaker.

### PRIME MINISTER'S RESIDENCE.

**DOWNING STREET, Whitehall, S.W. 1.**—Named after a politician of Charles II.'s reign. No. 10 is the official town residence of the Prime Minister. No. 12 is the office of the Chancellor of the Exchequer, and No. 12 is the office of the Government Whip. *Chequers*, a country residence for Prime Ministers (from Jan. 1, 1921), was accepted by Mr. Lloyd George in 1917 (from an endowment to maintain the estate, &c.) from Lord and Lady Lee of Fareham. In 1921 the Chequers Estate of 700 acres was added to the gift by Lord Lee. Chequers is a Tudor mansion in the Chilterns, about 3 miles from Princes Risborough, Bucks, and contains a collection of Cromwellian portraits and relics.

NOTE.—WHITAKER'S ALMANACK was first published in 1868 (for the year 1869), and since 1887 there have been two editions. For 1922 the Popular Edition (in paper cover with Zodiac design) consists of 602 pages, and is sold for 3s. net; the Half-Bound Edition (in red and green cloth cover), consists of 900 pages, and is sold for 6s. 6d. net.

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any officer subordinate to him; while "India" means British India, together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or any officer subordinate to him (Act 52-8 Vict., c. 68, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

**Boundaries.**—The political boundary of India marches with Persia from the Gulf of Oman to near Zulfikar on the Harirud; then with the former Russian Empire along the frontier laid down by agreement in 1885; as far as the Oxus at Khamiab; thence along the Oxus by the Panjah branch up to the Victoria lake, and from the east end of that lake by the line demarcated in 1895 up to Povalo Schveikovski on the Taghdumbash Pamir, where three empires—the British, Russian, and Chinese—meet. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire, mainly along the crests of the Mustagh (Karakoram) range and the Himalayas, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden and Perim, besides protectorates over Socotra, Bahrain, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Delhi, the new capital, lies in 77° E. long.

**Area and Population.**—The total area of India proper is about 1,803,000 square miles, with a population of over 319 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States, comprise 61 per cent. of the area, and nearly 78 per cent. of the population. The details are as follows:—

\* Districts and Administered Territories.

*Physical Features.*—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

*The Himalayas.*—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 15,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

*The Great Plain.*—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *khari* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

*The Deccan.*—Just as the Himalayas on the N. and the Hindu Kush and Suleiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghats all but complete this environing triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghats, we find the Nerbudda and the Tapi flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghats lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapi; all the rivers flow eastwards, through defiles in the Eastern Ghats, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the

Kistna (800 m.), and the Canvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its history: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghats, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

*Burma.*—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs; while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

*Climate.*—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

*Population.*—The fifth general census of India was taken on the 18th March, 1921. The provisional census returns gave a population of 319,075,132, as compared with 315,156,396 in 1911 (for details see p. 603), an increase in the ten years of about 1 1/2 per cent. The census total of 1921 is divisible into 247,138,396 (or over 77 per cent.) for British India, and 71,936,736 (or over 22 per cent.) for Indian States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1921 30 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the total population.

*Caste.*—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet.

*Religions.*—The population by religions in 1911\* includes 217,586,892 Hindus (69 per cent. of the total), 66,647,299 Muhammadans (21 per cent.), 10,721,453 Buddhists (3 per cent.), nearly all in Burma, leaving 7 per cent. for all other religions, including 3,876,203 Christians (three-fifths of whom are in Madras, Travancore, and Cochin), 3,014,466 Sikhs (a large increase), 1,248,182 Jains (a decline, ascribed to plague), 100,006 Parsis, and 10,295,168 described as Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are infected with the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly threefold since 1872.

*Occupations.*—Over 72 per cent. of the population was in 1911\* dependent on pasture and agriculture. Industrial occupations support 35,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of whom depend on hand-weaving. The public services support over 5,000,000 persons.

*Sex.*—Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1911\*

\* Census figures for 1921 not yet available.

over 26,400,000 widows in India. The males outnumbered the females in 1921 in the proportion of 1,000 to 945.

**Languages.**—India has 220 vernacular languages, of extraordinary variety. The languages spoken by 312,912,624 persons in 1911 are grouped in four families; and 23 languages belonging to these families are spoken by not less than one million persons each. The principal languages are Hindi (spoken by 82,003,235 persons), Bengali (48,367,915), Telugu (23,544,861), Marathi (19,806,636), Tamil (18,128,365), Punjabi (15,876,758), Rajasthani (14,067,590), Western Hindi (14,037,882), after which come Gujarati, Kanarese, Oriya, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the *lingua franca* of India. English is understood by many.

### India under the Crown.

For a brief sketch of Indian History from 326 B.C. the date of Alexander's invasion of India, to 1858, see WHITAKER'S ALMANACK for 1917, page 566 et seq.

IN 1857, during Earl Canning's administration, a mutiny of sepoys broke out on the 10th May at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, and the Central India campaign stand out among the stirring events of that momentous time. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN.—The "Act for the Better Government of India" established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of

Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established. Lord Canning was succeeded in 1862 by Lord Elgin, who, however, died in Nov., 1863.

Sir John (Lord) Lawrence (1861-69) reformed the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation.

Lord Mayo (1869-72) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of Lord Northbrook (1872-76) the late King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In

The principal publications relating to India presented to Parliament in the past year were:—Statistical Abstract, 1909-10 to 1918-19 (Cmd. 1245); Moral and Material Progress Report, 1920 (H.C. 202); Indian Financial Statement for 1921-22 (H.C. 133); Home Accounts, 1919-20 (H.C. 119); Explanatory Memorandum regarding the Accounts and Estimates of 1921-22 (Cmd. 1,517); Return of Net Income and Expenditure, 1917-18 to 1919-20 (H.C. 126); Estimate of Revenue and Expenditure, 1920-21 (H.C. 118); Constitutional Reforms in Burma (Cmd. 1,194); Elections in India (Cmd. 1,261); Report of Jails Committee (Cmd. 1,302); Indians in Kenya and Uganda (Cmd. 1,311); Proposed Settlement of Indian Agriculturists in Tanganyika Territory (Cmd. 1,322); Report of the Indian Railway Committee (Cmd. 1,312); Report of Standing Joint Committee on Indian Affairs (H.C. 86, 125, 177, 180); East India Press Acts—Report of Committee (Cmd. 1,299). They can be purchased through any Bookseller, or direct from H.M. Stationery Office, Imperial House, Kingsway, W.C.2.

One-inch Ordnance Survey Maps are published by the Survey of India, and can be obtained from the India Office Sale Agents, Messrs. E. Stanford, Ltd., 12 to 14 Long Acre, London, W.C.2 (12. to 18. 6d. each).

1875 the reigning Gackwar of Baroda was deposed for misrule and disloyalty.

Lord Lytton's administration (1876-80) was made eventful by a terrible famine in Southern India and by the Second Afghan War. In 1877 the Queen assumed the title of *EMPERESS OF INDIA*.

The peaceful term of the *Marquess of Ripon* (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms.

His successor was the *Marquess of Dufferin* (1884-88). In 1885-6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The first Indian National Congress met in 1885.

The *Marquess of Lansdowne* (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters.

The viceroyalty of Lord Elgin (1894-99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms. with a population of 70 millions, was visited by a grievous famine. In 1897 the border tribes from Chitral to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

Lord Curzon (1899-1904 and 1904-5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions. Lord Curzon's term of office was a period of reform and reconstruction. He appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money-lenders. The famine codes were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. Educational policy was reviewed and reforms introduced. A much-needed reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. During Lord Curzon's absence in England for a few months in 1904 Lord Ampthill occupied the post of Viceroy. Lord Curzon was reappointed in Dec., 1904. In 1905

the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905. The Prince of Wales (now H.M. King George) made a tour in India during the winter of 1905-6. For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907. In his Budget speech in 1907 the Secretary of State, Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people more closely with the Government. He nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council. He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing presses, was passed.

Lord Hardinge succeeded in Nov., 1910. The Indian Legislative Council in June, 1911, prohibited indentured emigration from India to Natal after 1 July, 1912, and a new Seditious Meetings Act was passed. A great Durbar was held at Delhi on 12 December, 1911, by H.M. King George, to announce his Coronation. On this occasion the King-Emperor also made announcements of new and far-reaching steps in Indian policy, viz., the transfer of the seat of Government from Calcutta to Delhi, and the creation of a Governorship for the presidency of Bengal, of a Lieut.-Governorship for Bihar, Chota-Nagpur, and Orissa, and of a Chief Commissionership for Assam. Delhi was chosen as the capital on geographical, historical, and political grounds. The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam, created in 1905. Bengal as reconstituted is a compact Bengali-speaking province, placed under a Governor in Council. A new province, Bihar and Orissa, was formed, including Chota-Nagpur and the Sambalpur district. Assam again became a separate province, under a Chief Commissioner. The reconstituted provinces came into existence on 1 April, 1912. In pursuance of recommendations by the Decentralisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi-permanent provincial settlement. Moreover, greater permanency was arranged for in financial settlements with the provinces, the control of the Government of India being relaxed. A Royal Commission was appointed in 1912 to inquire into the public services in India. In Dec., 1912, the Viceroy took formal possession of the new headquarters at Delhi. The State entry was marred by an

attempt on the life of the Viceroy. A Royal Commission was appointed in April, 1912, to examine and report on Indian Finance and Currency. The outbreak of war in Europe in August, 1914, was the signal for a great outburst of loyalty and devotion to the King-Emperor on the part of the princes and peoples of India. Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government, and large forces of Indian troops were despatched for service in Europe, Asia, and Africa.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, 1915. Several tribal risings on the North-West Frontier were promptly and rigorously suppressed. Lord Hardinge's term of office as Viceroy was extended from November, 1915, to March, 1916. The Viceroy announced in March, 1916, that it had been decided eventually to abolish the system of indentured emigration from India. Lord Hardinge put forward proposals for post-war constitutional reforms.

Lord Chelmsford succeeded in April, 1916. A strong Commission was appointed to examine and report on the possibilities of further industrial development in India. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India."

The Mesopotamia Commission strongly criticised the administration from India of the early stages of the campaign. The Public Services Commission, appointed during Lord Hardinge's administration, reported. Three leading Indians attended the Imperial War Cabinet. As regards indentured Indian labour in the Colonies, the Dominions' representatives accepted the principle of reciprocity of treatment. Action was taken against the Mahads and Mohmands on the North-West Frontier. The Lahore and Burma conspiracy trials were concluded and the leaders sentenced. During the year the Viceroy made the following important announcements.—The grant of King's Commissions to Indians, a contribution of £100,000,000 towards the cost of the war, and further grants towards the improvement of education. The special conditions arising from the war induced the Government of India to anticipate the findings of the Commission by organising at once, as far as was possible, the resources of the country, with a view to making India more self-contained. It also devoted itself to the supply of essential stores for the armies in the field, and a Munitions Board was created for the purpose of mobilising the resources of India for the war.

Towards the end of 1917 the Secretary of State visited India in connexion with a development of constitutional progress, for some time under consideration by the Home and Indian Governments.

The year 1918 was marked by some symptoms of unrest; the Bowlett Committee, appointed in 1917, reported, and revealed evidence of the appointment of the Bengal seditionists with German plots; and Moslem riots broke out in Berar, and Mohammedans organised agitation leading to disturbances in Madras and Calcutta. Recruiting for the Army broke all records; the

operations against the Maris were closed; a War Conference was held at Delhi with the object of stimulating India's efforts in the war. The Bombay Government took the first steps towards obligatory primary education; a policy of more complete local self-government was decided on by the Government of India. Reckless speculations in Broach cotton prevailed, and a certain amount of discontent due to high prices was manifested. The Home Rule League continued its activities. The influenza epidemic spread to India, and it is estimated that over 7 million deaths in British India and Indian States resulted. The Industrial Commission, appointed in 1916, issued a report; its broad general conclusions were that—India is rich in raw materials and in industrial possibilities, but poor in manufacturing accomplishment. The deficiencies in her industrial system are such as to render her liable to foreign penetration in time of peace and to serious dangers in time of war. Her labour is inefficient, she relies almost entirely on foreign sources for foremen and supervisors; and her educated people have yet to develop a right tradition to industrialism. Her stores of money lie inert and idle. The necessity of securing the economic safety of the country, and the inability of the people to secure it without the co-operation and stimulation of Government impose on Government a policy of energetic intervention in industrial matters. Two representatives of the Indian people, appointed by the Government of India, attended the Imperial War Cabinet in London. In 1919 a bill was introduced into Parliament embodying the proposals of the "Montagu-Chelmsford Joint Report," and eventually passed. During the year considerable distress occurred in consequence of the partial failure of the 1918 autumn crops throughout Northern India and the Peninsula, and relief measures were undertaken. A strike, of brief duration, of mill-hands, due partly to economic and partly to political causes, occurred in Bombay. Serious disturbances in the Punjab and Delhi, resulting in many deaths, followed on a "passive resistance" movement, inaugurated by Mr. Gandhi against the "Rowlatt" Bills, introduced by the Government of India, on the recommendation of the "Rowlatt" Committee, for renewing some of the powers which the Government had provided themselves during the War to deal with sedition. The movement spread to Bombay, and the local government was forced to disport Mr. Horniman, the Editor of the *Bombay Chronicle*. A Commission was appointed to enquire into the whole matter of the disturbances and the steps taken to suppress them. The murder of the Amir and the subsequent events in Afghanistan were followed by an invasion of Afghanistan and some frontier tribes into India, necessitating prompt military action by the Government of India. Hostilities were terminated in August and a treaty of peace concluded (see p. 632). The attitude of the frontier tribes was, however, on the whole good. Committees were appointed (1) to enquire into the organisation and procedure of the civil secretaries of the Government of India; (2) to enquire into the administration and organisation of the Army in India, whose conduct of the campaign on the North-West Frontier, following the troubles with Afghanistan, was much criticised; and (3) to advise in regard to the future of currency and

exchange: (a) to investigate the system of prison administration. The "Sadler" Commission on the Calcutta University reported during the year, and made drastic proposals for recasting the Indian secondary and university educational system. After the publication of the report, the Government of India, in October, introduced a Bill for the establishment of the proposed University at Dacca. A scheme for the amalgamation of the three Presidency banks was formulated; the recommendations of the Indian Cotton Committee, appointed in 1927, for the extension and improvement of cotton cultivation in India, aroused much interest; there was an awakening of interest in industrial enterprise in India, attended, however, by some reckless speculation; and, as elsewhere, the rise in prices necessitated improvement of pay in the various branches of the public service. The Union Government appointed a Commission to enquire into the Indian question in South Africa. Noteworthy features in the progress of India during the year were the appointment of an Indian, Lord Sinha, as Under-Secretary of State for India in the Home Government, and the representation of India at the Peace Conference by two Indians, H.H. the Maharajah of Bikanir and Lord Sinha. The policy underlying the Government of India Act, 1919, mainly based on the recommendations of the "Montagu-Chelmsford" Report, viz., the increasing association of Indians in every branch of the Administration, with a view to the progressive realisation of responsible government, was carried forward a further stage in 1920 by the Home Parliament, which, by rules, laid down the details of the constitution of the new Central and Provincial Governments (see pp. 613-4), and in furtherance of which elections were held during the year, preparatory to the inauguration of the new Councils early in 1921 by H.R.H. the Duke of Connaught. One section of the India Home Rule for India party, dissatisfied with the Act, threatened non-co-operation with the Government in the future working of the reforms, and with the assistance of some Muhammadans, Mr. Gandhi, a Hindu, commenced a movement to carry out the threat, but the support of the "Moderate" wing of the party, including that of Mrs. Besant, was given to the Government. A prominent and distinguished Indian, Lord Sinha, was designated as the first Governor of Bihar and Orissa. In consequence of the agitation in support of more lenient Peace terms for Turkey, some Muhammadans, estimated to number over 20,000, emigrated to Afghanistan, but many of these *Muhajirins* returned greatly disabused by the reception accorded to them. The Amir's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations. Bolshevik propaganda created an unhealthy political atmosphere in some quarters. Fighting with the Mahands on the North-West frontier continued throughout the year, in consequence of which the Viceroy announced Government's intention to occupy Central Waziristan, and to continue the railway from Jamrud towards the Khyber. Unrest, due in some measure to labour trouble, evidenced by an unprecedented number of strikes, and partly to unsatisfied political aspirations, was prevalent during the year. Government, in pursuance of its policy of making India commercially more self-support-

ing, instituted several inquiries into various trades and industries, and appointed a committee to inquire as to whether the adoption of a system of preferential tariffs would be beneficial. Further steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both European and Indian members of the same were taken. Several large works' programmes were sanctioned. A committee was appointed to inquire into the administration of the railways. The recommendation of the Exchange and Currency Committee for the linking of the rupee to gold and the adoption of an exchange rate equivalent to one-tenth of the gold contents of the sovereign, i.e., an exchange rate of Rs. 20 to the £, was adopted. With a view to increasing banking facilities steps were taken to establish a large Imperial Bank. A *High Commissioner for India* in London, with a separate establishment, responsible to the Government of India for certain agency work, previously performed by the India Office, was appointed. The Army in India and the Medical Services Committees respectively reported. The Army in India Committee attempted to determine the part to be played by the Army in India in a scheme of Imperial Defence and to analyse the steps which must be taken to make the Army, both in its administration and its personnel, more efficient and more attractive to the right type of soldiers.

The recommendations of the Army in India Committee postulate:—(1) control by the Government of India over Indian military affairs; (2) giving to India a voice in Imperial defence; and (3) allowing to the Imperial General Staff a considered influence on Indian military policy. To ensure uniformity of military policy between Great Britain and India the Committee recommended,—a diminution of detailed control by the India Office; abolition of the Military Member of the Council of the Secretary of State for India; the Chief of the Imperial General Staff, either directly or through the Military Secretary at the India Office (appointed on his recommendation) to be the sole military adviser of the Secretary of State for India; the attendance of the Chief of the Imperial General Staff at meetings of the India Council; the attendance of the Military Secretary of the India Office at meetings of the Army Council; the Commander-in-Chief in India to be the administrative and executive head of the Army, subject to the control of the Governor-General in Council; the appointment of Commander-in-Chief on the recommendation of, and with the right of communicating with, the Chief of the Imperial General Staff; a Military Council of high staff and other officers to assist the Commander-in-Chief in India; the abolition of the Secretary to the Government of India in the Army Department; decentralisation of responsibility by the creation of four commands. A majority of the Committee recommend the placing of production and supply under a Civilian Member of the Viceroy's Executive Council, instead of under a Surveyor-General, responsible to the Commander-in-Chief, as recommended by the Minority. The Committee also recommend:—Closer relations, co-operation in training, distribution of high appointments, and adjustments of pay, between the British and Indian Armies; a corps of officers fitted to serve with either British or Indian

troops; the amalgamation of certain Corps; the removal of grievances, more sympathetic treatment of all ranks; re-organisation of existing, and the development and equipment of new, services.

In January, 1922, the new Indian Legislature, Provincial Councils, and the Chamber of Princes, were inaugurated by the Duke of Connaught.

Lord Reading succeeded in April, 1921. The battle between constitutionalism and revolution continued. Unrest, riots, agrarian disturbances, strikes, and movements designed to embarrass the Government were prevalent. A conflict between Sikhs at Nankana resulted in many deaths. Mr. Gandhi, the Ali brothers, and their associates, continued to advocate non-co-operation with the Government and boycott of the reforms. The utterances of the Ali brothers forced Government to order their arrests. The Moplahs, Muhammadan fanatics of Malabar, resisted the ordinary processes of law, and a widespread outbreak of violence ensued, directed against Government, civil officers, and Hindus, forced the authorities to take strong military measures for its suppression. Frontier disturbances and fighting continued. Failure of the crops in some parts necessitated the opening of relief works. The deficit in the Budget, due mainly to war commitments, compelled Government to impose additional taxation (see p. 623). Special missions were sent to Afghanistan and Tibet. The Railway Committee reported and recommended drastic changes, including the termination of the system of management of railways by Government companies domiciled in England. The Sugar Commission, appointed to examine conditions of sugar growing and manufacture in India, reported. A Fiscal Commission was set up to examine, among other questions that of Imperial Preference; its appointment marked, in Lord Reading's words, "the recognition of India's advance towards fiscal autonomy." The Jails Committee reported, and Government announced its intention to abolish the Andaman penal settlement. Large development and irrigation schemes were sanctioned.

**IMPERIAL LEGISLATION.**—Legislation for India in England is chiefly of a constitutional or financial character. *The Regulating Act (1773)*, which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. *Pitt's India Act (1784)* left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1800 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. Under this Act, as amended by Acts of 1860, 1867, 1885 and 1890, at least one-half of the members of

Council must have served in India for 20 years, and must not have left India more than 3 years prior to their appointment. The number of members may be 12 and must not be less than 8, and is at present 8. Their term of office is now 5 years, with power of extension. There are now 3 Indian members. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1909) the imperial and provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut. Governors. The Government of India Act (1919) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners. The Indian High Courts Act (1911) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1925. The Government of India Act, 1929, confers on provinces a larger measure of independence of the Government of India; it distinguishes the functions of local governments and local legislatures from the functions of the Governor-General in Council and the Indian Legislature; it provides for the devolution of authority in respect of provincial subjects to local governments, for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects; it provides for the transfer of some provincial subjects to the administration of the Governor acting with Ministers. It gives borrowing powers to local governments. It lays down that the 8 major provinces shall be governed, in relation to reserved subjects by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. It confers extended powers on local legislatures. For the Supreme or Central Government, it provides that the Legislature shall consist of the Governor General and two Chambers, viz., the Council of State and the Legislative Assembly. It provides for the appointment of an Auditor General and a Public Services Commission on India. A Statutory Commission is to be appointed 10 years after the commencement of the Act for the purpose of enquiring, among other matters, as to the desirability of a further extension of the principle of self-government in India.

**INDIAN LAW.**—The law administered in the Indian courts consists mainly of: (a) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (b) statutes of the British Parliament applicable to India; (c) the Hindu and Muhammadan laws of inheritance and domestic law; (d) the customary law affecting particular castes and races.

## The Government of India.

EMPEROR OF INDIA—H.I.M. GEORGE V.

Secretary of State—The Rt. Hon. EDWIN SAMUEL MONTAGU, P.C., M.P.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Secretary of State can impose his orders on the Government of India. In matters requiring secrecy (e.g., foreign policy and the affairs of Indian States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India (see pp. 120, 124).

The King-Emperor appoints the Governor-General, the Governors of the 9 major Provinces (Bengal, Madras, Bombay, the United Provinces, Bihar and Orissa, the Punjab, the Central Provinces, Assam and Burma), the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of Governors, and the Judges of the High Courts. The term of these appointments, except judgeships, is usually 5 years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains 8 members including the Commander-in-Chief (three of whom must have served in India 10 years), as well as himself. Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. In accordance with the Government of India Act, 1858, and rules thereunder, the *Indian Legislature* consists of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly (see pp. 613-4 as to their constitution). Except as otherwise provided by or under the Act, a Bill is not deemed to have been passed unless agreed to by both Chambers. The Act confers powers on the Governor-General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council; of returning Bills for reconsideration, and of vetoing proposed legislation affecting the safety or tranquillity of British India. The Indian Budget is submitted to both Chambers, and is voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor-General in Council can act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and he may authorise expenditure necessary for the safety and tranquillity of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the purpose. Although the Government does not command a majority in the Indian Legislature, it is necessarily given the power to reject adverse votes, since its responsibility is not to the Indian Legislature, but to Parliament.

The seat of the Supreme Government is at Delhi, the summer headquarters being still at Simla.

Business is conducted by 11 Departments—Finance, Foreign and Political, Home, Legislative, Revenue and Agriculture, Public Works, Commerce, Industry, Education, Army, and Railway. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign and Political Department. The *Finance Department* deals with public accounts, loans, taxation, opium, currency, banking, mints, &c. The *Foreign and Political Department* conducts relations with Afghanistan, Nepal, and other neighbouring countries, and, through its Political Residents and Agents in the various native States, supervises their administration and regulates their relations with the paramount Power. The *Political Residents* in the Persian Gulf, Muscat, and Turkish Arabia look after the commercial and political interests of India in those quarters. The *Home Department* deals with the civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connexion with the *Legislative Department*. The most important subjects that come before the *Revenue and Agriculture Department* are land revenue and surveys, forests, agricultural development, famine, and meteorology. The *Public Works Department* deals with irrigation, roads, buildings, &c. The department of *Commerce* deals with trade and shipping, customs, excise, ports, post-office, telegraphs, &c. The department of *Industries* deals with munitions, industries, stores, factories, &c. The Army is under the *Army Department*, of which the Commander-in-Chief has charge in Council. The *Education Department* has the control of education, local government, sanitation, &c. Railway administration is entrusted to a *Railway Department*, which is in the charge of the Commerce Member of Council.

British India is divided into 15 *Local Governments and Administrations*, viz.:—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, and Assam; under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, the North-West Frontier Province, British Baluchistan, Delhi, Ajmer-Merwara, Coorg, and the Andaman and Nicobar Islands. Burma will be, in future, under a Governor.

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who

## PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.\*

Under the Government of India Act, 1919, and rules made thereunder, the local governments are given a large measure of independence of the Supreme Government. The Act distinguishes the functions of local governments and local legislatures of the Provinces from the functions of the Governor-General in Council and the Indian Legislature. The Supreme Government is given authority over certain subjects, classified as "Central," such as defence, political relations, railways, tariffs, etc. Other administrative heads, classified as "Provincial"—viz., local self-government, public health, education, public works, water supply, land revenue administration, famine relief, agriculture, excise, administration of justice, etc., are wholly or partly handed over to Provincial Governments with responsibility, subject to certain limitations, within their own areas, for administering them. In the nine major or "Governors' Provinces"—i.e., Madras, Bengal, Bombay, the United Provinces, Bihar and Orissa, the Central Provinces, the Punjab, Assam and Burma—provincial subjects are further divided into "reserved" and "transferred subjects," the administration of, and responsibility for, which rests with the Governor and his Executive Council and with the Governor and Ministers respectively. Ministers are chosen from among the elected members of the Legislative Council by, and hold office during the pleasure of, the Governor. They are directly responsible to the Legislative Council

for the administration of the "transferred" subjects, but can be overruled by the Governor if he considers their policy inconsistent with the discharge of his responsibilities.

The Act legislates for a transition from a bureaucratic to a self-government system and for the gradual transfer of more subjects to the Ministers. Matters of departmental or minor importance are dealt with, as a rule, by the Governor, his Council, and the Ministers sitting in conclave, but the decision on reserved subjects rests with the Governor in Council, and that on transferred subjects with the Ministers, subject to the Governor's intervention and control.

Legislative Councils have an elected majority, and normally a life of three years, but may be sooner dissolved by the Governor. The previous sanction of the Governor-General in Council is required to the introduction of certain classes of Provincial Bills. The Governor has powers of veto in regard to proposed legislation affecting the safety or tranquillity of his Province or any part of it, or of another Province, and can secure legislation essential to the discharge of his responsibilities for reserved subjects. Such Bills must be sent to the Governor-General for the signification of His Majesty's pleasure, but in emergencies the Governor-General may assent to them, subject to disallowance by His Majesty in Council. The Governor has powers of assenting to, of withholding assent to, or of returning for reconsideration, other Bills, but must in certain circumstances send them for consideration to the Governor-General, who may reserve them for His Majesty's pleasure.

\* The areas and populations of the separate provinces are for British territory only. The populations are according to the Census of 1921.

Provincial Budgets are voted on by the Legislative Councils, but the Governor has power to act, in respect of a demand for reserved subjects, notwithstanding a refusal or a reduction of grants, if the demand is essential to the discharge of his responsibilities for the subject, and in cases of emergency he can authorise such expenditure as may be necessary for the safety or tranquillity of his Province. Certain heads of expenditure do not require an annual vote: a deadlock is thus avoided in case of irresponsible action by the Legislative Council in the matter of supply.

Of the members nominated to the Indian Legislature and Provincial Legislative Councils some represent certain communities and interests. Males over 21 years of age possessing certain qualifications (residence within the constituency and the possession of certain property qualifications, the payment of land revenue, rent, local taxes, income-tax or municipal rates) are eligible for the franchise. Women are not qualified for registration, but the disqualification may be removed in certain circumstances in any Province, or in all. The franchise is low, and gives the vote to small cultivators and some wage earners. The electorate of 1921 comprised over 5,000,000 persons.

(1) **MADRAS** (area, 142,330 sq. miles; pop. 42,322,270) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801. With a coast-line of 1,730 miles the province has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense. The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 90 per cent. of the people are Hindus. There are about 1,200,000 native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burma and Ceylon, some only temporarily. The languages principally spoken are Tamil and Telugu. Madras (128,894) and Trichinopoly (110,521) famous for their Hindu temples, are the chief cities after the capital.

(2) **BOMBAY.**—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The province (including Sind, but not Aden and Perim, which are also attached to it) contains 122,977 square miles (about equal in size to the British Isles), with a population of 19,383,763. Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 75 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis, who are very prominent in trade, are mainly found in Bombay. Marathi, Gujarati, Sindhi, and Kanarese are the principal languages. Millet and other food-grains and oilseeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the Indian Midland) eastwards; south-eastwards is the Madras and Southern Mahratta system; while Karachi (Sind) is the port for the extensive North-Western Railway system. Ahmedabad (274,202), Poona (276,671), Surat (212,299), and Karachi (215,721), the capital and chief port of Sind, are the most important cities. For Aden and Perim, see p. 619.

(a) **BENGAL** (area of newly-constituted province, 78,699 sq. miles, with population of 46,523,177) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa, and Chota-Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. About 53 per cent. of the population are Muhammadans and 45 per cent. Hindus. The principal languages are Bengali and Hindi. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, jute, oilseeds, sugra, tobacco, silk, tea, and coal. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal-Nagpur, south, from Calcutta, are also important. Important cities are Dacca (127,304), now the second capital, and Howrah (192,738), a great jute-manufacturing centre adjoining Calcutta.

(a) **THE UNITED PROVINCES OF AGRA and OUDH**, called "North-Western Provinces and Oudh" until 1902 (area, 127,267 sq. miles; pop. 45,500,046), forms the upper part of the great Ganges plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. Originally (excluding Oudh) it formed part of the Bengal Presidency, but in 1825 a separate administration was formed under a Lieutenant-Governor. OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief products are wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and 14 per cent. Muhammadans. Hindi and Western Hindi are the chief tongues. The province is served by the East India, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. In 1874 a Legislative Council was established. Among the important cities may be named the ancient city of Agra (125,000), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (225,000), the great manufacturing centre, Cawnpore (123,044), Bareilly (127,620), and Meerut (122,267).

(g) The PUNJAB (area, 99,222 sq. miles; pop. 20,678,393) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849. Up to 1853 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Timber is scarce. More than half the population are Muhammadans, and more than a third are Hindus. The Sikh number about 2,000,000 in the Punjab and Frontier States, to which they are mainly confined. Punjabi and Hindi are the chief languages. The various branches of the North-Western and

Southern Punjab Railways serve the province. Amritsar, the sacred city of the Sikhs, has 260,000 people.

(6) BURMA is bounded by Tibet on the north, by China, French Indo-China, and Siam on the east, and by Assam, Bengal and the sea on the west. It is the largest province, having a total area of 230,839 sq. miles, about equal to Spain and Portugal, with a population of 13,205,364. These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China. Tenasserim and Aracan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States are administered by local sawbaws, or chiefs, under the superintendence of a political officer. The province is thinly peopled; but, owing to remarkable prosperity, the population has increased 9 per cent. in 20 years. The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Karen are the chief languages. Buddhism, now almost confined to Burma, so far as the Indian Empire is concerned, is the religion of 85 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Frome there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overlaid from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jade-stone, and

wolfman. The Irrawaddy and its chief tributaries, the Chindwin, the Salween, and the Myittha, form important waterways. The main stream is navigable beyond Bhamo, 600 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burma Railways have reached Myitkina on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salween basin. Burma is to be constituted a Governor's province.

(9) BIHAR AND ORISSA (area of new province, 83,181 sq. miles, with pop. of 33,998,778). This province, which came into existence on 1 April, 1902, comprises Bihar, Orissa, and Chota-Nagpur, hitherto forming part of Bengal, as well as the Sambalpur district transferred to Bengal from the Central Provinces in 1905. Bihar is liable to extreme temperatures. The population is exceedingly dense. Orissa and Chota-Nagpur are ill-watered and liable to drought. Orissa has a variety of races and a considerable seaboard. The highlands of Chota-Nagpur are thinly peopled and contain a large aboriginal population. The Patna High Court came into existence on March 1, 1906. Bihar and Orissa yields the greater part of India's output of coal and mica. Rice, wheat, oilseeds, sugar, and tobacco are cultivated. The bulk of the people are Hindus, and the great Hindu temple of Juggernaut is at Puri, in Orissa. There is a variety of languages, Hindi and Oriya being the chief. The railway systems are the East Indian, Bengal and North-Western, and Bengal-Nagpur.

(8) THE CENTRAL PROVINCES AND BERAR (area, Central Provinces alone, 82,077 sq. miles; pop. 20,827,302). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. The country, hilly and forest-clad, contains a large population of aboriginal tribes. The people are mostly Hindus, and they speak mainly Hindi and Marathi. The province, which is served by the Indian Midland, Great Indian Peninsula, and the Bengal-Nagpur Railways, possesses coal and manganese ore, and produces rice, wheat, millet, pulse, oilseeds, and cotton. There are cotton mills at Nagpur.

Since 1st October, 1902, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,766 sq. miles; pop. 3,681,222), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in 1903 incorporated in the Indian Army). In 1902 Berar was leased in perpetuity to the Government of India on payment of £169,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

(9) **ASSAM** (area, 52,035 sq. miles; pop. 7,288,842), was constituted a separate administration in 1874 out of certain Bengal districts, most of which had been ceded by Burma in 1826. It was combined in 1892 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Sylhet and Gauhati respectively. The people are mainly Hindus and Muhammadans, and the chief languages are Bengali and Assamese. The Assam-Bengal railway serves the province. Tea and rice are the principal products. Assam contains nearly 600,000 immigrants from other parts of India, chiefly coolies for tea-gardens. Seat of Government, Shillong.

(13) **BRITISH BALUCHISTAN** (area, 94,008 sq. ms.; pop. 421,679) was constituted a separate administration in 1883, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the native States of Baluchistan up to the Persian frontier. The districts it comprises (Sibi, Quetta, Fishin, Thal-Chotiali, Nushki, Zhob, Chagal, Nasirabad, and the Bolan) were acquired partly from Afghanistan by the treaty of Gundamuk (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large part of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans. The Afghan-Baluch frontier was demarcated in 1896-7. To Chaman, on this frontier, a railway runs *via* Quetta and is continued to Mirjawa. The Khan of Kalat, the head of a loose confederacy, receives about £19,000 per annum for quit-rents, subsidy, &c. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

(14) **DELHI**.—This province (area, 537 sq. miles; pop. 486,742) was constituted on October 1, 1912, out of the Punjab division of Delhi, in pursuance of the policy announced by H.M. the King-Emperor at the Delhi Durbar in December, 1911, to move the capital of India and its seat of Government from Calcutta to Delhi.

**Chief Commissioner**, Hon. C. A. Barron, C.S.I., C.I.E. ....Rs. 3,000

(15) **THE ANDAMANS AND NICOBARS** (area, 3,143 sq. miles; pop. 26,833) form a chain of islands in the eastern part of the Bay of Bengal. Since 1858 Port Blair, in South Andaman, has been used as an Indian penal settlement. Much valuable timber, worked by convict labour, is obtained. The *Nicobar Islands*, almost due south of the Andamans, were first occupied by the British in 1800. They comprise 19 islands. The principal products are coco-nuts.

**Chief Commissioner**, Lt.-Col. H. C. Beadon, C.I.E., Rs. 3,000

The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 20,600 in 1911.)

**Aden and Perim.**—From old time the peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, has been an important trade centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling-station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian

The Kuria Kuria Islands, to the S. of Omias, have been in British possession since 1824. In 1834 the East India Company occupied Sokoto (area, 1,400 sq. miles), 150 miles from Cape Guardafui, which has a pastoral Muhammadan population roughly estimated at 5,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign Power.

The patronage of the *Secretary of State for India* is small, and is now chiefly dependent on the requirements of the Government of India in the Judicial Department. Some appointments to the *Indian Educational Service*, which includes teaching and inspecting posts, are made on the recommendation of a Selection Committee, constituted by the Secretary of State for India, from among candidates who must have received a liberal education and who seem to be most suitable by the Board of Education or the Scottish Education Department. The age is usually from 23 to 25. Appointments are

in the first instance for two years, the salary beginning at Rs. 400 a month, rising by annual increments of Rs. 50 a month to Rs. 1,250, with prospects of promotion if service is extended. Officers of non-Indian domicile receive additional ("Overseas") pay of Rs. 50 per month during the first few years, but the amount is increased later. Initial salary and date of increments will be ordinarily determined in future by age. Appointments of *Chaplains* of the Church of England and the Church of Scotland to the Indian Ecclesiastical establishments are normally made, on the occurrence of vacancies, by the Secretary of State for India from amongst candidates nominated by the Indian Chaplains Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between 27 and 34 years of age, and Church of Scotland candidates must be under 34 years of age. On appointment chaplains are on probation for two years and receive a salary of Rs. 600 per month, rising by annual increments to Rs. 1,300 per month.

The superior Engineer establishment of the *Indian Public Works Department* is engaged on the construction and maintenance of the various public works undertaken by the State in India. In 1922 the Europeans appointed by the Secretary of State for India were selected from among candidates who had served in His Majesty's forces during the war and who were in possession of certain University engineering degrees or diplomas, or, not being able to produce one of the recognised degrees or diplomas, had received a general education high enough to fit them to receive proper professional training and to become members of the engineering profession, had received some technical education in engineering, and had some practical training and experience in engineering as civilians and in military or quasi-military service. In 1922 only those who had been born on or after Aug. 2, 1894, and on or before Aug. 1, 1899, were considered. The pay and allowances of Europeans so appointed commence at Rs. 325 a month in case of men under 24 years of age, but candidates, if above 24, are credited with service as though they had been appointed in their 24th year. The pay rises by annual increments to Rs. 1,425 per month, with possibilities of promotion to higher posts. There is a prospect of pension, and there is also a Provident Fund. Appointments are usually made in June in each year. From time to time appointments to the Locomotive, Carriage, Wagon and Traffic Departments of Indian State Railways are made, full information regarding which can be obtained from the Public Works Secretary, India Office, London.

*Indian Forest Service.*—The date of the next recruitment may possibly be about July, 1923. No information can be given at present as to what regulations will be in force for this recruitment, but it is expected that further details will be available about March or April, 1923. The ordinary regulations, under which appointments were made in 1922, were briefly as follows:—

The Regulations apply to all candidates, other than those eligible under Regulation 2 of the Special Regulations for Officers and Men who have served in His Majesty's Forces during the war. In making appointments, the Secretary of State for India in Council acts with the aid of a Selection Committee. Applications for appointment must be made on a printed

form to be obtained from the Secretary, Revenue Department, India Office, Whitehall, London, S.W. 1. Candidates must be not less than 22 but under 32 years of age on the 1st January. Applicants whose course of study has been interrupted owing to the War, but whose total war service is not sufficiently long to enable them to qualify under the special regulations, will be admitted as candidates, at the discretion of the Secretary of State, subject to the condition that their age does not exceed by more than one year the limit fixed above. No person will be deemed qualified who shall not satisfy the Secretary of State that, save as provided in the Regulations, he is a British subject. A European candidate must be prepared to give an undertaking, if selected, that he will not marry before he reaches India. If he marries, after giving such an undertaking, he forfeits his appointment. Every candidate must be of good physique, and must produce evidence of character to satisfy the Secretary of State for India in Council that he is suited for the Indian Forest Service. Candidates must have obtained a degree *with Honours* in some branch of Natural Science in a University of England, Wales, or Ireland, or have passed the Final Bachelor of Science Examination in Pure Science in one of the Universities of Scotland. A degree in Applied Science will not be considered as fulfilling these conditions. Candidates are required to produce evidence that they have a fair knowledge of either German or French. Weight will be attached to the possession of a diploma or degree in Forestry. Should there in any year be more candidates considered to be qualified in every respect than vacancies to be filled, the Secretary of State reserves the right to require them to pass a competitive examination conducted by the Civil Service Commissioners, on the results of which their final selection would depend. Selected candidates are required to undergo a strict examination by a Medical Board at the India Office. Candidates who do not satisfy the Secretary of State for India that they are physically fit for appointment to the Indian Forest Service are not admitted to the examination, and before appointment a probationer is required to undergo a special course of instruction and to pass examinations in special subjects. The period of probation is in ordinary cases two years. The probationers are required to defray all expenses of lodging, board, tuition, and excursions to forest centres in the United Kingdom while at the University. The Secretary of State for India in Council makes payments to each probationer at the rate of £200 a year, not exceeding a total of £400. The grant of the allowances is subject to certain conditions. On appointment to the Indian Forest Service a probationer's salary commences at Rs. 325 (plus an overseas pay of Rs. 120 in the case of officers in non-Indian domicile) per mensem, and rises by increments to Rs. 1,400, with prospects of promotion.

Further information regarding these and other Indian appointments, viz., to the Indian Agricultural, Civil Veterinary, Geological, Finance, Medical, Queen Alexandra's Military Nursing, Royal Indian Marine and Bengal Pilot Services, can be obtained, on application, from the Under-Secretary of State, India Office, Whitehall, London, S.W. 1. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, which can be consulted at the India Office.

In 1915-16 there was a deficit of Revenue as compared with expenditure of £1,222,662, in 1916-17 a surplus of £7,478,720, a surplus of £3,067,000 in 1917-18, a deficit of £3,280,000 in 1918-19, a deficit of £13,768,000 in 1919-20, an estimated deficit of £2,622,000 in 1920-21.

Under the Government of India Act, 1919, provision was made for the definite assignment to each of the Provincial Governments of a part of the revenues of India. The revenues so allocated consist, in the main, of the receipts accruing from provincial loans and from those provincial subjects which are revenue producing, the principal heads of which are land revenue, irrigation, stamp duties and excise. In addition, a local government is given a share in any expansion of income tax due to an increase of the assessed incomes within the Province. This division of the sources of revenue leaves the Central Government, under present conditions, insufficiently provided. It has, therefore, been arranged that an annual contribution shall be made by eight of the nine local governments to the Central Government. The annual contributions fixed at the outset aggregate 983 lakhs of rupees (Madras 348, Bombay 66, Bengal 63, United Provinces 240, Punjab 175, Burma 64, Central Provinces 22, Assam 15, Bihar and Orissa nil), but these contributions will cease at the earliest possible moment. The revised financial arrangements came into force from 1 April, 1921, as from which date all "provincial" revenue and expenditure ceased to be included in the estimates and accounts of the Central Government.

**CAPITAL EXPENDITURE.**—The following statement shows capital outlay, not charged to Revenue, on State Railways, Irrigation Works and the new capital at Delhi.

**BURDEN OF TAXATION.**—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Indian States, the burden in 1918-19 was 2s. 3d. per head, or, if land revenue (which is akin

to rent) be added, 2s. 20d. per head. The Budget for 1917-18 introduced a super-tax on large incomes, enhanced the export duties on raw jute, increased the import duties on cotton manufactures, and imposed, as a war measure, a surcharge on railway goods and traffic. The Budget of 1919-20 introduced a duty of 50 per cent. on excess profits, but this tax was discontinued in 1920-21. The Budget for 1920-21 amended the super-tax law. The Budget for 1921-22 imposed additional taxation under the heads of postal charges, railway surcharge, import duties and taxes on income.

**DEBT AND ASSETS.**—On 31 March, 1921, the debt of India amounted to Rs. 57,351 lakhs (sterling and rupee debt having been combined at the rate of Rs. 10=£1). Miscellaneous obligations (Savings Bank balances, &c.) amounted to about Rs. 8,056 lakhs, besides a charge of Rs. 363 lakhs for various railway annuities. Its advances to Native States, corporations, agriculturists, &c., stood at Rs. 874 lakhs. Other assets were the Gold Standard Reserve of £38,921,000, and the cash balances in England and India, £7,093,000 and Rs. 1,367 lakhs respectively.

**LAND REVENUE.**—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindari*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam, and most of Madras) the *ryotwari* tenure prevails, and each ryot, or peasant proprietor, holds direct from the State. In temporarily settled *zamindari* districts the land revenue usually amounts to about 50 per cent. of the rental paid to the landlord by the cultivating tenant, while in temporarily settled *ryotwari* districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State in 1919-20 amounted to £24,555,000, of which £1,945,000 was due to irrigation and credited under that head.

**THE OPIUM REVENUE.**—Poppy may now be grown only in parts of the United Provinces (Bengal opium) and in the Central Indian (Malwa) native States. Except in these States the manufacture is a Government monopoly. In 1919-20, 3,600 chests of Bengal opium were sold for export, in addition to 7,797 chests sold direct to Governments of Hong Kong, Straits Settlements and Netherlands (Indies), &c. The gross revenue from Bengal opium, including the value of opium sold by the Excise Department for consumption in India, was £3,037,422. The expenses of production, &c., were £266,000. Formerly, most of the opium exported from India was consumed in China; but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth

and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from 31 March, 1909, export of Indian opium to China is prohibited.

**LICENCE.**—Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opium, and other drugs. The revenue, owing partly to stricter administration, and partly to enhanced duties, has greatly expanded in recent years, and amounted to £12,554,000 net in 1919-20.

**CUSTOMS.**—The net revenue was £14,297,000 in 1919-20. (For tariff see page 627.) The export duty on rice yielded £248,000, and the countervailing duty on Indian cotton goods £1,034,000 in 1919-20. New and enhanced duties were brought into effect on 1 March, 1912, 1 March, 1917, and 1 March, 1921.

**INCOME TAX** is levied on non-agricultural incomes at the following rates:—

| Annual Income.           | Rate of Tax.<br>Per Rupee * |
|--------------------------|-----------------------------|
| Ra. 2,000 and over ..... | 5 ples                      |

\* 24 ples = 1 anna, 26 annas = 1 rupee; 10 rupees = 1 (statutory rate), but at present the rupee has a fluctuating value.

Super-tax is leviable in addition to ordinary income tax on incomes of individuals and registered firms above Ra. 50,000, of Hindu undivided families above Ra. 75,000, at 1 to 4 annas in the rupee, and on the taxable incomes of companies above Ra. 50,000 at a flat rate of 1 anna in the rupee.

**STAMPS.**—Stamps yielded £7,194,000 (net) in 1919-20. About two-thirds of the revenue is from court fees and one-third from commercial stamps.

**SALT.**—The salt duty was reduced from Ra. 2½ to Ra. 2 a maund (Salb.) in 1903, to Ra. 1½ in 1905, and to R. 1 in 1907. It was increased to Ra. 1½ with effect from 1 March, 1916.

**FORESTS.**—About 99,000 square miles of forests are reserved and scientifically worked by the State, while about 190,000 square miles besides are under State control. A third of the revenue comes from Burma.

**POSTS AND TELEGRAPHS.**—The Post Office in 1919-20 conveyed 1,323 millions of letters, postcards, newspapers, &c., and issued 20 millions of money orders. Inland letter rates are the lowest in the world. The length of telegraph wires in India on 31 March, 1920, was 359,000 miles, and the number of messages sent in 1919-20 was over 25 millions. Their capital cost to the end of 1919-20 was £9,795,000. The Indian Postal and Telegraph services were amalgamated on 1 April, 1914. The combined services yielded for the year 1919-20 a net income of £1,321,000. The Indo-European Telegraph Department yielded a profit of 21½ per cent. on its capital expenditure of £1,231,000.

**RAILWAYS.**—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and worked by companies. The mileage open for

traffic on 31 March, 1920, was 36,722, while the mileage under construction was 1,222. Of this mileage open about 90 per cent. was on the standard gauge (5½ ft.), and about 10 per cent. on the metre gauge. On the 31st March, 1920, the total capital at charge was £418,462,000. The net earnings of the railways in 1919-20 amounted to £29,664,000. The number of passengers increased to 533 millions, and the goods traffic dropped to 65 million tons. Rates are very low, third-class passengers travelling on the average over four miles for a penny. The net working profit from State railways was £9,207,000 in 1919-20. The total capital expenditure on State and other railways in 1919-20 was about £6,586,000.

**IRRIGATION.**—The total capital outlay on State irrigation works up to 31st March, 1920, was £1,447,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £1,275,000. The area irrigated by Government irrigation works was over 25 million acres, while the annual value of the crops raised is estimated at over 150 per cent. on the capital outlay. Two-fifths of the irrigation revenue comes from the Punjab.

**HOME CHARGES.**—The net expenditure in England, chargeable to Revenue, amounted in 1919-20 to £21,043,000: Interest on Railway Debt and Annuities, £9,336,000; Interest on Irrigation Debt, £5,000; Interest on Ordinary Debt and Management of Debt, £1,223,000; other Debt Services, £1,895,000; Stores, £3,303,000, of which £1,217,000 was for Marine and Military Stores; payments for British forces, troop service, &c., £1,070,000; Army non-effective charges, £2,978,000; Civil annuities, pensions, &c., £1,263,000; Furlough payments, civil and military, £1,274,000; home administration, £387,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

**CURRENCY.**—The principal coin in use is the silver rupee, containing 165 grains of fine silver and 13 grains of alloy, and weighing in all 178 grains troy. Up to 1823 the Indian Mints were open by law for the unrestricted coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and between 1898 and 1902 was practically stable at 1s. 4d. The Act of 1899 made the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount, but the ratio was altered to 20 rupees in 1900. In 1907 it was decided that half the profit on silver coinage should be applied to capital expenditure on railways; the other half of the profit, and the whole of the interest, being added to the gold standard reserve. In June, 1921, it was decided that no portion of the profit was to be used for railway purposes until the total sterling assets of the Gold Standard Reserve amounted to £25,000,000. The total receipts from profit on coinage, interest and discount, and profit by

exchange up to 31 March, 1921, amounted to £42,075,000. Of this sum £1,121,655 has been used for capital expenditure on railways; the remainder has been paid to the Gold Standard Reserve, for the purpose of maintaining the rate of exchange between England and India. On 31 March, 1921, the investments of this fund in sterling securities amounted to £38,951,000 (estimated value), while £4,883 was held in cash in England. India has a paper currency. The 1, 2½, 5, 10, 50, and 100 rupee notes are legal tender everywhere in India, but other notes only within their circles of issue. In 1921 a branch of the Royal Mint was established at Bombay for the minting of gold coins.

**ARMY.**—In peace time, the Army in India consists, first, of British troops, about 75,000; and, secondly, of Indian troops (largely Muhammadans), about 180,000. In addition, the native Army Reserves number nearly 40,000 men, and the Imperial Service Troops furnished by native States contribute 21,000, including cavalry, transport corps, and sappers. Further, there are 38,000 European and Eurasian volunteers (efficients). For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (1905-9) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On 1 June, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about £30,000,000 in 1912-13 to about £57,985,000 in 1919-20. During the war of 1914-18 the Government of India recruited on a voluntary basis over 800,000 combatants and more than 400,000 non-combatants, giving a grand total of about 1·3 million men. 1,215,000 officers and men were sent on service overseas from India; the total Indian casualties were 205,000. In 1917 the bar hitherto precluding the admission of Indians to King's Commissions was removed; the pay and pensions of the Indian soldiery were improved. It is proposed to form an Auxiliary Force on a volunteer basis. The "Escher" Committee, appointed in 1919, reported in 1920, and made various recommendations (see p. 609), which are now under consideration. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The ROYAL INDIAN MARINE consists of ten sea-going vessels, and numerous smaller steamers and launches.

Director R.I.M., Bombay, Rear-Admiral H. L. Mawbey, C.B. .....Rs. 2,500

**EDUCATION.**—The main features of the Indian educational position are:—A middle class widely instructed in those arts which qualify for the learned professions; a proletariat, of which only a fraction is literate; a whole sex almost totally devoid of any education whatever. Elementary education is based, so far as possible, on an adaptation of indigenous institutions and traditions. Higher education is an imported product. It is popular, and has undoubtedly been attended with beneficial results. As is natural with an imported product, its development is marked by some crudities, and its influence has to some extent been unsettling. It has appealed to the natural intellectuality of the people, and has succeeded only partially

in stimulating practical application. There are eleven Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, Benares, Patna, Dacca, Aligarh (Muhammadan), Lahore, Hyderabad and Mysore. In State institutions education is secular. The institutions in 1919-20 numbered 202,000 and the scholars 8,206,000, including 1,377,000 females. Of the institutions, about 28 per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in 1919-20, £9,926,000, £1,459,000 came from fees, and £5,631,000 from provincial revenues or local and municipal funds. The census of 1921 showed that only 106 males and 10 females per thousand can read and write.

**LOCAL SELF-GOVERNMENT,** municipal and rural, in its present form, is a product of British rule. The municipalities at the end of 1919-20 numbered 739, controlling a total population of nearly 17½ millions, and receiving an income of £4,968,000 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and £2,639,000 from other sources (excluding loans). Out of 10,187 members of municipal bodies 9,389 were Indians, and 8,967 were non-official. In almost all districts in British India there are local district boards, partly representative. Nearly one-half of their total expenditure of about £5,918,000 in 1918-19 was devoted to civil works, one-fourth to education, and the remainder largely to sanitation and hospitals.

**JUSTICE, POLICE, AND PRISONS.**—There are about 11,000 officers exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In 1918, 2,150,000 civil suits were instituted; 1,930,000 persons were tried, and 919,000 convicted, in criminal cases, of whom 454 were sentenced to death, 2,149 to transportation, and 163,724 to imprisonment. The strength of the police in 1918 was 14,385 officers and 188,973 men. There were 774 prisons, with a daily average of 127,000 prisoners, in 1919. At the convict settlement of Port Blair (Andamans) there were 11,553 prisoners on 31 March, 1920.

**VITAL STATISTICS.**—The reporting of vital occurrences is still defective, and proposals have been formulated with a view to securing more complete and accurate vital statistics. The recorded death rate for British India in the decennium ended 1913 ranged between 38·5 per 1,000 in 1908 and 28·7 in 1913; it was 25·9 per 1,000 in 1919. There were over 7 million deaths from influenza during 1918. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhoea, smallpox, and (since 1896) plague being other chief causes. The reported deaths from plague up to the end of 1919 were about 10,540,000 in India as a whole. Over 20,000 people were killed by snakes in 1919. In 3,248 hospitals and dispensaries, maintained mostly from public funds, 35,970,000 patients were treated in 1919. The number of persons vaccinated in 1919 was 10,740,000. According to the census of 1921 there were 120,000 lepers.

**SURVEYS.**—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, botanical, and archaeological surveys are in operation. The Meteorological Department is of great service in forecasting rainfall.

**TRADE OF INDIA.**—Among the countries constituting the British Empire, India comes second to the United Kingdom itself in the volume of its sea-borne trade, which almost equals that of Canada and Australia combined. During the five years ending 1917-18 both imports and exports were, on the average, twice as great as they were 25 years ago. The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure, but in 1920-21 there was an excess of imports. The table below exhibits the leading figures for the last five years in thousands of pounds sterling (Rupees being converted at the rate of 15 to the £).

In 1917-18 both imports and exports of merchandise were of unprecedented magnitude, but the outbreak of war during the course of the year 1914-15 brought the figures for the year down to the level at which they stood five or six years earlier. There was, however, a recovery in 1916-17. The rise in prices was a very potent factor in the increase in values. During the year 1920-21 as compared with 1919-20 the value of the imports increased by £53,743,000 and the exports decreased by £36,366,000. These figures exceed all previous records. In imports the principal articles showing increases were:—cotton goods (£22,548,000), iron and steel (£9,980,000), machinery (£8,906,000), railway plant (£6,366,000), cotton yarn (£6,146,000), motor cars, &c. (£5,610,000), paper, &c. (£3,906,000), hardware (£3,148,000), woollen goods (£2,681,000), instruments (£2,304,000), haberdashery, brass, and dyes. There were decreases in amber (£2,993,000), grain (£2,023,000), silk goods and seeds.

In the export trade grain and pulse increased by £4,997,000, opium by £317,000, lac by £222,000, metals by £1,122,000. The other principal items show considerable decreases.

As will be seen, the bulk of the imports consists of manufactured articles, while two-thirds of the exports consist of food, tobacco, and raw materials.

The following statement shows the chief articles of the foreign trade of India in 1920-21:—

**CUSTOMS DUTIES.**—The Indian Tariff (Amendment) Acts, 1916 and 1927, and the Finance Bill of 1928, introduced new and enhanced Customs duties with effect from 1 March, 1916, 1 March, 1927, and 1 March, 1928, respectively. The general import tariff, which stood at 5 per cent. *ad valorem* since 1854, was raised to 7½ per cent. in 1916, and to 11 per cent. in 1928. The principal exceptions to the general rate are as follows:—Cotton yarn and thread are exempt, but the duty on other cotton goods is 11 per cent., an Excise duty of 3½ per cent. being levied on those woven in Indian mills. Arms and ammunition, and certain "luxury" articles, including silver manufactures, pay 20 per cent., sugar 15 per cent., cigars and cigarettes 75 per cent., spirits generally Rs. 18 As. 12 a gallon, salt Rs. 1½ a maund (84 lb.), silver plate, silver thread and wire 20 per cent., refined petroleum As. 1½ a gallon (with an additional As. 6 per gallon on motor spirit; an excise duty of As. 6 per gallon is levied on motor spirit produced in India), coal As. 8 a ton. Iron and steel goods, grain, tea-chests, printing materials, machinery, railway materials, and a few other articles pay 1½ per cent. The duty on manufactured tobacco is Rs. 3 As. 4 per lb., matches As. 12 per gross, beer As. 6 p. 6 per gallon, perfumed spirits Rs. 30 a gallon. Gold, living animals, raw hides, skins, raw cotton and wool, certain agricultural requisites, quinine, and a few other articles are free. There are export duties of As. 3 a maund on rice, Rs. 1½ per 100 lb. on tea, Rs. 4½ per bale of 400 lb. on raw jute other than cuttings, in the case of which the rate is Rs. 1½ per bale; Rs. 20 per ton on jute sacking, Rs. 32 per ton on hosiery, and 15 per cent. *ad valorem* on raw hides and skins, with a rebate of two-thirds of the duty on hides and skins exported to countries within the British Empire.

**SHIPPING.**—In 1929-30 the number of vessels engaged in the foreign trade which entered and cleared at ports in British India was 8,222, with a tonnage of 12,000,000. Of this tonnage, 84 per cent. was under the British flag.

**PORTS.**—The chief ports are Calcutta, Bombay, Karachi, Rangoon, and Madras. These ports are administered by port trusts having wide powers, but subject to Government supervision.

**FOREIGN LAND TRADE OF INDIA.**—The most important countries in the land trade are Nepal and the Shan States. The imports of merchandise and treasure in 1929-30 were £12,072,000, and the exports £10,544,000.

**AGRICULTURE** is by far the most important occupation of the people of India. In British territory in 1929-30, 255 million acres were cropped, an increase of 27 million acres as compared with 1918-19. Of the total area cropped about 9 per cent. was under wheat, 31 per cent. under rice, and 28 per cent. under other food-grains and pulses, 5 per cent. under oilseeds, and 7 per cent. under cotton, jute, and other fibres. Jute cultivation has been extraordinarily profitable. Sugar, tea, and tobacco are other important crops. The total area under irrigation was 49 million acres. The agricultural departments (central and provincial), which have been much developed since 1906, supply information as to crop prospects, new staples, manures, crop experiments, implements, cattle-breeding, &c., and distribute seeds. There is also a civil veterinary department.

**BANKS AND CO-OPERATIVE CREDIT SOCIETIES.**—Besides the three Presidency Banks, closely associated with the Government, there are joint-stock banks, European and Indian, and many small native banks. Much success has been achieved in rural districts by co-operative credit societies. In 1929-30 there were in British India and Indian States 1,394 central, 36,728 agricultural and 2,662 non-agricultural societies, with a total membership of 1,521,148 and a capital of £14,270,000.

**MINERALS.**—The output of coal in India in 1929 was 22,628,000 tons. The production has much increased in recent years. Nine-tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from 19 million gallons in 1897 to 306 millions in 1929. The production of salt is about 1,292,000 tons. The production of manganese ore in 1929 was about 538,000 tons, and of saltpetre 18,000 tons. The yield of gold (nearly all from Mysore) was about 507,000 oz. in 1929. There is a considerable output of mica and a fluctuating output of rubies and jade. Monazite and wolfram have now taken an important place in the list of minerals of economic value produced in India. The output of the former in 1929 was 2,024 tons, and of the latter 3,577 tons.

**MANUFACTURES.**—In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods. Cotton-weaving is by far the most important hand industry. Power mills have grown up under European auspices, but are now largely owned by natives. The 623 cotton mills at work in British India and Native States in 1929-30, mostly in Bombay and Ahmedabad, contained 6,724,000 spindles and 128,000 looms. Up-country cotton mills have increased. The production in 1929-30 was 626 million lb. of yarn (mostly of low counts) and 354 million lb. of woven goods. There is a tendency to produce finer yarns and to pay more attention to weaving. The 76 jute mills, mostly situated in or near Calcutta, contained 840,000 spindles and 40,000 looms. There were, in 1929, 3 woollen and 9 paper mills, 25 breweries, and various other factories.

## STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

THE States in India whose chiefs are in subordinate alliance with, or under the suzerainty of, the King-Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misrule the Supreme Government can dethrone the chief or temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Tributes aggregating £594,000 (£222,000 from Mysore) were paid to the Government of India in 1919-20. Generally speaking, the States are governed by their Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a

group of States. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Indian Legislature or the Provincial Legislative Councils cannot legislate; and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Indian States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the Indian States have a combined area of 709,583 square miles, and a population of 71,938,736. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Imperial Service troops. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 19th century. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is nearly as large as Great Britain, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and

elsewhere, where family custom has led to minute sub-division, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over an Indian State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the Indian States, large and small, number 693, only about 200 are of any real importance. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1920, when a new Indian State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the Indian princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 628-9 are the names of 73 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. Some well-known Indians of title, such as H.H. the Agha Khan, G.C.S.I., G.C.I.E., the Maharaja of Darbhanga, G.C.I.E., and the Maharajah of Burdwan, K.C.S.I., K.C.I.E., are not ruling chiefs. The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, Gwalior, Indore, and Travancore and Cochin.

The Indian States may be thus classified:—  
1. *Hyderabad*, the premier State in India (capital, Hyderabad, pop. 404,533—the fourth city in India). This State is in the centre of the Deccan or central plateau of Southern India. The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1722, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. 2. *Mysore*. This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 1923, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chiefs of India. Kanarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3. *Baroda*, situated in Western India in Gujarat and Kathiawar and much interlaced with British districts. The reigning Gaekwar was the adopted

heir of the ruler deposed in 1875 for misgovernment and misconduct. 4. *The Himalayan Hill States*, west of Nepal, including Kashmir. The important frontier State of *Kashmir* (capital, Srinagar, pop. 241,631) was granted to Gholab Singh by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. A British force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border. 5. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention. 6. *The Sikh States*, in the Sirhind plain, south of the Sutlej. The most important of these is *Patiala*. 7. *Rajputana*, comprising the ancient sovereignties lying between Sind and the United Provinces. *Rajputana* (pop. 9,857,012) extends some 460 miles from north to south, and is 230 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises 20 States of varying size and importance. Of these 17 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), and *Jaipur*. The Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. *The States of Central India*, lying to the north of the Nerbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chiefships. The most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. The 31 minor States of *Bundelkhand* (largest, *Rewa*) are in political relation with the Central India Agency. *Bhopal*, one of the principal Muhammadan States in India, is now for a fourth generation under female rule. 9. *The Malayalm States of Travancore and Cochin*, lying together in S.W. India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. 10. The three northern Muhammadan States of *Khalpur* (Sind), *Bahawalpur*, and *Rampur*. 11. *Kalat* (including *Makran* and *Kharan*) and *Las Bela*, with tribal areas in the possession of the Marri and Bugti tribes. 12. *Gujarat*, including *Kutch* and the numerous petty chiefships of *Kathiawar*. 13. *The Southern Marhatta States*. 14. The numerous *Afghan* and *Baluch* tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the *Suleiman range*, a distance of 800 miles. The names of some of these tribes, *Waziris*, *Orakzais*, *Afridis*, &c., have become familiar owing to the many expeditions against them. 15. The aboriginal *Gond* and *Kol* tribes, under petty princes of aboriginal or Rajput blood, in *Chota-Nagpur*, *Orissa*, the *Central Provinces*, and the *Jaipur* (*Vijaspotam*) Agency. 16. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontiers.

Nepal (area, about 54,000 sq. miles; pop. 5,629,000) lies between British India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest (29,121 ft.). Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. In 1900-1 its exports to British India were £4,112,000, while its imports amounted to £1,923,000. The chief trade route is that between Kathmandu and the Bengal frontier (56 miles). Nepal exports rice and other grains, hides, oilseeds, *ghí*, cattle, jute, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religion is Buddhism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly. The policy of seclusion is, however, consistently followed by the native rulers. The real political power rests with the Prime Minister, who paid a most successful visit to England in 1908. The British Envoy does not interfere in internal affairs. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments.

**CAPITAL**, Kathmandu (pop. 50,000) — *British Envoy at the Court of Nepal*, Lieut.-Col. E. L. Kennion, C.I.E. ....Rs. 3,000

## BHUTAN.

Bhutan (area, about 30,000 sq. miles; pop. about 350,000, mainly Buddhists) also lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1905 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongsa Penlop, the chief councillor and virtual ruler, Sir Ugyen Wangchuk, K.C.S.I., K.C.I.E., was chosen hereditary Maharaja in 1907. He has a salute of 15 guns in British territory. The estimated annual revenue is £73,000. Bhutan's total trade with India in 1900-1 was £129,474. There is no British Resident.

**CAPITAL**, Punakha.

## AFGHANISTAN.

*Amir of Afghanistan and its Dependencies*, H. H. Amir Amanulla Khan; *etc.* 1909. Salute in British territory, 21 guns.

Afghanistan (called Khorassan by the natives) lies on the N.W. frontier of India.

Estimated area, 250,000 sq. miles, and pop. 4,600,000. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1895-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1903. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Afghans (or Duranis) have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashs, who belong to the Shiite sect. The national tongue is Pushtu.

Afghanistan is divided into six provinces, Kabul, Kandahar, Herat, Turkestan, Farrah, and Badakshan (with Kafiristan and Wakhan), which are under governors, with subordinate nobles and judges, police, and revenue officers. Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. It comprises about 90,000 regulars and irregulars, but lacks discipline and cohesion. Considerable quantities of rifles and artillery have been purchased in Europe under arrangements made with the Government of India. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the Amir, who is the Court of Appeal. The law is bulky and the criminal law severe. Recently steps have been taken to develop education, hitherto controlled by the mullahs. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There is excellent irrigation and all profitable soil is utilised. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits, sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khaibar Pass, from Kabul to Peshawar (191 miles), along which a motor service was established by the late Amir, and the road from Kandahar to Quetta (225 miles). The Sialkot railway is now completed to the Baluchistan-Persian frontier. The trade of

Afghanistan with India in 1900-01 was over £1,014,000. The exports to India are mainly fruits and nuts, raw wool, and *ghis*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. The Afghan customs duties are heavy. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £750,000. There are taxes on land, a grazing tax, customs duties, stamps, fines, poll-taxes, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 1900-01 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of 21 March, 1901. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence.

His Majesty the late Amir Habibullah Khan was assassinated on February 10, 1919; his brother, Nusrulla Khan, by a *coup d'état* thereupon seized and temporarily held the reins of government at Kabul, but the Amir's third son, Amanulla Khan, soon after declared himself, and was recognised as, Amir. Afghan troops crossed the Indian frontier on May 2, on which the Indian Government took immediate steps to expel them; fighting followed and Dacca was occupied by British troops, but overtures were made by the Amir and a treaty of peace was signed in August.

The treaty provided that the privilege enjoyed by former Amirs of importing arms and ammunition through India should be withdrawn; the arrears of the late Amir's subsidy were confiscated, and no subsidy is to be granted to the present Amir; the British Government expressed willingness, conditionally, to receive another Afghan mission, after six months, for the discussion and settlement of matters of common interest and the re-establishment of the old friendship on a satisfactory basis; the Afghan Government agreed to the Indo-Afghan frontier accepted by the late Amir and agreed to the early demarcation by a British Commission of the West Khyber where the Afghan aggression happened, and to accept such boundary as the British Commission may lay down. By this treaty Afghanistan is left officially free and independent, both internal and external. All previous treaties have been cancelled by the war. Representatives of the Indian Government and of the Amir met at Mussoorie in 1902 to discuss questions affecting the relations between the two governments, and further negotiations are now proceeding at Kabul.

**CAPITAL.** *Kabul* (about 180,000). The chief commercial centre is *Kandahar* (80,000). Other provincial capitals are *Herat* (20,000) and *Tashkurgan* (17,000). *British Agent* (vacant), Rs. 1,000.

**MESOPOTAMIA AND THE PERSIAN GULF.**—For three centuries England has taken the lead in the Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gun-running. England and India still have the lion's share of the trade, the bulk of which is conducted by

Indians, who make Bombay their *entrepôt*. The Arabian shores are low-lying deserts, the Persian coasts mountainous; at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few. The British Government have been entrusted with the mandate for Mesopotamia. Municipal Councils, representative divisional councils, and a Council of State have been set up. Emir Feisal was elected King in 1921. The port of Basra has been greatly developed and a large capital expenditure has been incurred on railways during the British occupation. *High Commr.*, *Mesopotamia*, Maj.-Gen. The Hon. Sir P. Z. Cox, G.C.I.E., K.C.S.I.

*Bahrain* (capital, Manama), governed by Sheikh Isa bin Ali and under the protectorate of the Indian Government, is the largest of a group of islands half-way up the Gulf, near the Arab coast (El Katr). It is the headquarters of extensive pearl fisheries, and a distributing centre for the adjacent mainland. Pearls are the only notable export; rice, cotton goods, dates, sugar, and spices the chief imports. In 1918-19 the value of the exports was £1,328,000, and of the imports £1,330,000. The people (about 200,000) are Muhammadans. The Sheikh has been in treaty relations since 1820 with the Government of India, who have a Political Agent at Bahrain. In 1880 he engaged not to make treaties with any other State.

The Sultan of *Oman* (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at his Court.

The independent tribes on the *Pirate* (Arab) Coast from Ras-el-Kheima to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1820 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India *via* Lingah and Bahrain.

Important caravan routes converge at *Koweit*, which has an excellent harbour. The Sheikh is under treaty obligations with the Indian Government.

**PERSIA** (g.v.) borders on Baluchistan and Afghanistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1878 and 1893, was completed in 1905.

**ASIATIC RUSSIA.**—A portion of what was once the Russian Empire is continuous with Persia and Afghanistan. The Trans-Caspian Railway runs, *via* Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kushk on the Afghan frontier, opened in 1898, brings the Russian railways within 20 miles of Herat, and within 400 miles of the Chaman terminus of the Indian railways.

Another important strategic line connects Tashkent directly with Orenburg. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers.

CHINA.—India is in contact with two dependencies of China, Chinese Turkistan and Tibet, and one province, Yunnan.

Chinese Turkistan is surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkistan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkistan has not been officially defined. There is a British consul-general at Kashgar (Lt.-Col. P. T. Etherton). Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) via Ladakh, in Kashmir.

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas. India imports from Tibet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. The total trade in 1900-1 was about £700,000. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung; but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on 3 August, 1904. A new Convention was signed (7 Sept.), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec., 1909, the ruler of Tibet, the Tashi Lama, visited India. The Dalai (or Sacred) Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1910. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1910, the Dalai Lama again fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1912, the

British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese, and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries. A convention, the terms of which have not been made public, was initiated by the three representatives, but the Chinese Government have so far refused to ratify it.

Yunnan is a Chinese province to the N.E. of Burma. By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma. The direct trade was about £1,552,000 in 1901-2. Burma imports from Yunnan hides, raw silk, &c., and exports cotton goods, &c. Têng-yueh and Saumao, near the Burma frontier, are treaty "ports." There are British consuls at Têng-yueh and Yunnan-fu.

SIAM (S.E.) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier, mainly with Chienmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. In 1900-1 the value of the total trade was about £627,000. The boundary of Burma and N.W. Siam was demarcated in 1893-3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands as within the British sphere of influence.

## PHYSIOGRAPHY.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 40° North latitude to the Arctic seas, and from the Pacific to the Atlantic Ocean. The boundaries between the Ungava district of the Labrador peninsula (transferred to Quebec in 1912) and the Labrador coast region of Newfoundland are expected to be settled shortly by a Judicial Commission.

*Relief.*—From a physical point of view Canada may be divided into an eastern and a western division, the Red River Valley, in long. 97°, forming the separating line. The eastern division comprises three areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 40° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Hooker, 15,700 feet) and the Gold and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded.

*Climate.*—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

## GOVERNMENT.

Canada is a self-governing Dominion within the British Empire, its constitution resting on the British North America Act of 1867, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign and aided by a Privy Council.

## THE LEGISLATURE.

Parliament consists of a Senate and a House of Commons. The Senate consists of 87 members, nominated for life by the Governor-General, distributed between the various provinces thus: 24 for Ontario, 24 for Quebec, 10 for Nova Scotia, 10 for New Brunswick, 4 for Prince Edward Island, 3 for British Columbia, 4 for Manitoba, 4 for Alberta, and 4 for Saskatchewan; each nominee must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the King, and the owner of a property qualification amounting to \$4,000. The Speaker of the Senate is chosen by the Government of the day. The House of Commons is chosen every five years at longest, and the 1917-1922 Parliament consists of 234 members, elected as follows: 82 for Ontario, 65 for Quebec, 16 for Nova Scotia, 11 for New Brunswick, 15 for Manitoba, 13 for British Columbia, 3 for Prince Edward Island, 12 for Alberta, 16 for Saskatchewan, and 1 for Yukon. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, and its members are elected upon a very wide suffrage. For electoral purposes each province is divided into districts, returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Members of the Upper and Lower Houses receive \$4,000 per Session, with travelling expenses and deductions for non-attendance.

The Houses of Parliament were destroyed by fire in 1916, the new buildings being started the same year; the foundation stone was laid by H.R.H. the Duke of Connaught (Gov. Gen.), Sept. 1, 1917, and the corner stone of the main tower by H.R.H. the Prince of Wales, Sept. 1, 1919. The Speaker's Chair in the new House of Commons (a replica of that at Westminster) was presented in 1921 by Viscount Ullswater (ex-Speaker of the House of Commons of the United Kingdom) on behalf of the Empire Parliamentary Association of the Houses of Lords and Commons.

### THE JUDICATURE.

*The Judiciary.*—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

### DEFENCE.

Service in the Militia is universal and compulsory on all male citizens from 18 to 60. Service in the *Active Militia* is for 3 years with 8-16 days' annual training. The *Peace Effective* consists of a Permanent Force of 7,000 officers and men, and about 100,000 Active Militia. The *War Effective* consists of four classes: the unmarried men 18 to 30; the unmarried men 30 to 40; the married men 18 to 45; and, finally, the remaining male citizens of 18 to 60, a total of 2,200,000.

*Expeditionary Force.*—The number enlisted up to the cessation of hostilities was 595,441, of whom 428,052 were sent overseas. Up to Nov. 30, 1918, the total outlay for the War was \$1,068,607,000.

### Militia Council.

### Royal Canadian Navy.

There are Naval stations on the Atlantic and Pacific, and H.M.C.S. *Aurora*, *Niobe*, and *Rainbow* (cruisers), and *Patriot* and *Patrician* (t.b.d.) are maintained and used as training ships for the Royal Canadian Navy.

### EDUCATION.

Education is under the control of the Provincial Governments, the cost being met by local taxation, aided by grants from the several Provincial Governments. There are (1917) 28,007 elementary and secondary schools (attendance at the former being compulsory except in the Province of Quebec), with over 1,385,722 pupils; and 65 universities and university colleges with about 24,050 students. The 22 universities had about 16,000 students in 1917.

**Agriculture and Live Stock.**—The total area is 234,163,030 acres, and in 1920 the area of cleared land was 14,897,839 acres, of which 10,108,972 acres were under crops. The total value of the agricultural production in 1929 was \$297,238,400. In 1920, 885 cheese factories produced 68,847,769 lb. of cheese valued at \$24,615,290, and 195 creameries made 37,148,898 lb. of butter valued at \$21,245,664. In 1920 there were 704,640 horses, 2,881,827 cattle, 1,120,084 sheep, 1,614,356 pigs, and 11,005,645 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms, orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and financial assistance for returned soldiers, both Imperial and Canadian. There is always a demand for farm workers.

**Log Products.**—The total production of log and timber products and wood pulp amounted in 1926 to \$42,260,053, or 24 per cent. of the lumber and pulp trade of the whole Dominion.

**Manufactures.**—Ontario is the chief manufacturing province of Canada. The total value of its manufactures in 1925 was \$715,431,839, an increase since 1920 of \$136,000,000. There were, in 1925, 6,538 factories with nearly 250,000 employees, an invested capital of \$946,619,114, and an annual wage bill of \$140,609,691.

**Minerals.**—Ontario is the leading mineral Province in the Dominion, the mines yielding \$68,436,781 in 1920, and non-metallic minerals \$22,227,954. The principal metals are: gold, output in 1920 \$11,665,735, silver, \$10,819,678, nickel, \$15,690,131, and copper, \$2,928,750.

**Hydro-Electric Power.**—One of the greatest Government-owned public utility organisations in the world is the Ontario Hydro-Electric Commission, supplying light and power from Niagara and elsewhere. These works are now developing 237,733 horse-power, and a further development of 300,000 horse-power is now under construction.

**Principal Cities.**—CAPITAL, TORONTO, population (1919) 499,278, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Birmingham of Canada" (1908, 143); Ottawa, the Federal capital (1917, 738), with a large lumber trade and woodenware manufactures; London (1910, 120); Brantford (1919, 139); Kingston (1912, 121); Peterborough (1919, 139); Windsor (1919, 139); Port William (1919, 139); Kitchener (1919, 139); Guelph (1919, 139); St. Thomas (1919, 139); Stratford (1919, 139); Owen Sound (1919, 139); St. Catharines (1919, 139); Port Arthur (1919, 139); Sault Ste. Marie (1919, 139); Chatham (1919, 139); and Galt (1919, 139).

## QUEBEC.

**Area and Population.**—The Province of Quebec contains an area estimated at 703,653 square miles, with a population (1920) of 2,350,000, an increase since the last census of 547,000. In 1921 the Province was enlarged by 251,780 square miles by the addition of the greater part of the Labrador Peninsula, known as Ungava (or New Quebec).

**Government.**—The Government of the Province is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of

24 members appointed for life, and a Legislative Assembly of 81 members elected for five years to represent the same number of electoral districts in the Province.

*Finance*.—The actual revenue for the year 1919-20 was \$14,498,661 and the actual expenditure \$13,520,740. The Debt is stated at \$44,153,714.

*Production and Industry*.—The total value of manufactured products in 1915 was \$387,900,585 (\$200, \$158,287,994), the principal manufacturing centres being (1915): Montreal (\$443,237,575), Quebec (\$18,933,777), Hull (\$6,737,774), Maisonneuve (\$5,033,541), and Lachine (\$3,257,812). The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organize an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 150,000,000 acres, of which 45,000,000 are under licence to cut timber. The wood-pulp industry is assuming great im-

portance; several large factories have recently been built, and the value of the output, which was only \$2,516,683 at the Census of 1921, was, in 1916, \$6,840,489. Improved farms may often be obtained in the eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1917, was 7,297,471 acres. In 1920 there were 1813 cheese and butter factories. The total value of dairy industry products was \$35,708,621.

*Education*.—The Superintendent of Instruction, assisted by a Council of 44 members, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1919-20, 7,589 schools with 516,968 scholars, including the high and superior schools and 24 normal schools supported by the State. There are also Schools of Agriculture, Commercial and Classical Schools, and four Universities—two Protestant, McGill College, Montreal, and Bishop's College, Lennoxville; and Laval University (Quebec) and Montreal University, Roman Catholic.

*Principal Cities*.—CAPITAL, QUEBEC (population, 116,000), with a large export timber trade, and the great seaport town of Canada; and Montreal (population, 775,000), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal. Other important cities are Hull (30,586), Sherbrooke (23,212), Westmount (19,000), Trois Rivières (26,000), Verdun (28,310), St. Hyacinthe (12,491), Sorel (9,229), and Lévis (9,672).

#### NOVA SCOTIA.

*Area and Population*.—NOVA SCOTIA is a peninsula between 43° 25'–47° N. lat. and 59° 40'–66° 25' W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 20,907 square miles (one-fifth of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1921, of 544,579, an increase since the last census of 32,241 persons.

*Government*.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of 21 members, and a Legislative Assembly of 43 members.

*Lieut.-Governor*, Hon. MacCallum Grant.

#### Executive.

*Provincial Secretary*, Hon. G. H. Murray, LL.D., K.C. (Premier).

#### The Legislature.

**President, Legislative Council**, Hon. J. M. Mack, K.C.  
**Speaker, House of Assembly**, Hon. Robert Irwin.

#### The Judiciary.

**Chief Justice**, Hon. R. E. Harris.  
**Judge in Equity**, Hon. J. J. Ritchie.  
**Petition Judges**, Hon. Benjamin Russell, J. W. Longley, A. Drysdale, J. A. Chisholm, H. Mellish.  
**Judge, Vice-Admiralty Court**, Hon. H. Mellish.

**Agent-General for Nova Scotia in England**, John Howard, 57 Pall Mall, S.W.

**Agriculture and Live Stock**.—About 10,000,000 acres are fit for tillage, and the soil is of good average fertility. The climate is delightful, the winter being less severe than in most of the other parts of the Dominion. In 1920 there were 5,260,455 acres of land occupied, of which 2,093,633 acres were under crop, 3,166,822 acres in pasture and partially wooded lands, of which about 70,000 acres were in gardens and orchards. Hay is the most important crop of the Province. Fruit is extensively cultivated, and Nova Scotia apples are claimed to be the best in the world. The principal fruit belt being the Annapolis Valley. The total returns from the agricultural industry in 1920 were \$49,456,500. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at \$80 per 100 acres, or 80 cents per acre for any additional quantity. Through the Land Settlement Act, the Government gives practical assistance to skilled farmers. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax.

**Manufactures**.—In 1917 there were 2,127 industrial establishments with a capital of \$236,521,655, paying 31,298 wage-earners' salaries amounting to \$23,533,090. The value of the total output in 1917 was \$76,766,008 (1900, \$23,529,513).

**Fisheries**.—Up to March 31, 1918, the sum of \$6,695,812 represented the amount invested in

the fisheries. The total value of the fish marketed in 1920 was \$13,890,000 and the number of persons employed was 35,000.

**Minerals**.—The coal deposits are extensive and of quality ranging up to 14,000 B.T.U.; 5,687,970 gross tons were produced in 1920; 249,993 tons limestone, 174,520 tons of gypsum, and 5,069 tons of calcined gypsum. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines, Cape Breton.

**Principal Cities**.—CAPITAL, HALIFAX (population 57,674), one of the terminals of the Intercolonial Railway, with a magnificent harbour, is the principal winter port of Canada, and the entrepôt of a large trade with the West Indies and South America. A shipyard for the building of large ocean-going steamers is one of the leading industries. Other towns are Sydney (22,527); Glace Bay (16,992); Amherst (9,975); Sydney Mines (8,328); Truro (7,651); Yarmouth (7,062); New Glasgow (8,959); Spring Hill (4,955); North Sydney (6,780); and Dartmouth (11,700).

#### CAPE BRETON ISLAND.

**Cape Breton Island**, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles, with a population of 230,000 inhabitants. The chief city, Sydney (pop. 22,527), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. The plate mill recently erected will supply the steel plates required by the various steel shipbuilding plants of Canada. The Canadian Government Railway connects the island with the mainland.

#### NEW BRUNSWICK.

**Area and Population**.—NEW BRUNSWICK is situated between 45°—48° N. lat. and 63° 47'—69° W. long., and comprises an area of 27,985 square miles, with a population in 1921 of 358,092 (179,867 males and 178,025 females in 1911), an increase since the last census of 6,203 persons. It was first colonised by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

**Government**.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

**Lieutenant-Governor**, Hon. Wm. Pugsley, D.C.L., LL.D., K.C. .... \$9,000

*Agriculture and Live Stock.*—In 1920, 29,485 acres were under wheat, 309,071 under oats, and 66,366 under buckwheat, with 8,177 acres under barley. The produce in 1920 was 464,400 bushels of wheat, 9,177,600 bushels of oats, and 1,509,800 bushels of buckwheat. 78,335 acres of potatoes produced 15,510,300 bushels, and 20,030 acres of turnips 7,070,600 bushels. The total value of the field crops in 1920 was \$47,257,290. The live stock (1920) included 232,983 cattle, 280,090 sheep, 92,925 pigs, and 76,737 horses. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon, cod, mackerel, herring, and shad; the capital invested in this industry is upwards of \$5,000,000, giving employment to 22,000 persons. In 1920 there were 23 cheese factories in operation, producing 1,107,964 lb., value \$308,496, and from 17 creameries 1,064,563 lb. of butter.

*Manufactures.*—The value of the total output of manufactured goods in 1920 was \$35,422,302 (1900, \$20,972,470), the principal manufacturing centre being St. John (\$10,082,667). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

*Principal Cities.*—CAPITAL, FREDERICTON; population (1921) 7,208. St. John (pop. 52,000) is one of the principal winter ports of Canada, and is connected by C.P.R. and Intercolonial Railways with Montreal; Moncton (12,260); Chatham (4,666).

*MANITOBA.*

*Area and Population.*—Manitoba, formerly the Red River Settlement, is situated in about the centre of the continent, between 49°—60° N. lat. and 95°—102° W. long., with a total area of 251,832 square miles and a population (1916 Census) of 553,860 (294,609 males and 259,251 females), an increase since the last census of 200,403. The population was estimated at 625,000 in 1921.

*Government.*—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 7 members and a Legislative Assembly of 55 members.

*Agriculture.*—The soil is fertile and productive; immigration is invited and encouraged, and liberal grants of land are made to settlers. In 1920 6,000,310 acres were cultivated, of which 2,705,622 acres were under wheat, and 37,542,000 bushels of wheat were produced. 1,873,954 acres were under oats, 839,000 under barley, 328,000 under flax, rye, and peas, &c., and 27,000 under potatoes. *Dairy Products* (1920): 17,200,000 lb. butter, value \$2,320,000; cheese, 226,000 lb.; total value, including milk and cream, \$12,940,000. In 1920 there were 356,800 horses, 758,000 cattle, 157,000 sheep, 213,000 pigs, and 3,373,000 turkeys, geese and chickens. The production of honey was 1,000,000 lb.

*Manufactures.*—The value of the total output in 1920 was \$90,000,000 (1900, \$12,927,439), the principal manufacturing centres being Winnipeg and St. Boniface.

*Principal Cities.*—CAPITAL, WINNIPEG; population (1919), 186,000 (with suburbs, 276,000), the third largest city in Canada. Brandon (15,215), St. Boniface (11,021), Portage La Prairie (5,892).

*BRITISH COLUMBIA.*

*Area and Population.*—British Columbia has a total area estimated at 390,344 square miles, with an estimated population in 1920 of approximately 718,000; the Census of 1921 gave 302,480 (151,619 males and 150,861 females), an increase since the former census of 213,823.

*Government.*—The Government consists of a Lieutenant-Governor and an Executive Council, together with a Legislative Assembly of 47 members.

**Production and Industry.**—The total value of the output of manufactures in 1917 (estimated) was \$68,500,000 (1900, \$19,447,778), the principal manufacturing centres being Vancouver and Victoria. The yield of the other industries in 1910 was: minerals, \$35,580,645; lumber, \$92,628,807; fisheries, \$22,320,161; fruit and farm products, \$68,926,090. There are extensive coal measures, and a vast and compact area of merchantable timber; the mines have produced over \$670,650,000, and are still in the early stages of development. Only one-tenth of the available agricultural and fruit lands is at present settled, and there are acres of pulpwood as yet unexploited. There are undeveloped deposits of magnetite and hematite iron. The climate is healthful and temperate. Shipbuilding (1918) 145,000 tons, valued at \$25,000,000. The principal exports are fish, coal, gold, silver, minerals, and timber.

Revenue, 1920-21 ..... \$15,219,264

Expenditure, 1920-21 ..... 15,236,931

### PRINCE EDWARD ISLAND.

**Area and Population.**—Prince Edward Island lies in the southern part of the Gulf of St. Lawrence, between 46°-47° N. lat. and 62°-64° 30' W. long. It is about 130 miles in length, and from 4 to 24 miles in breadth; its area is 2,133 square miles (rather larger than that of the English county of Norfolk), and its population (Census, 1921) 88,536 (47,069 males and 45,659 females in 1911), a decrease since the last census of 4,808 persons. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1755, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756-1763) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

**Government.**—The Government is vested in a Lieutenant-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people.

**Lieut.-Governor.** Hon. Murdoch McKinnon (1919) ..... \$7,000

**Agriculture and Live Stock.**—There were (1918) 709,644 acres of improved land, of which 429,306 acres are under crops, 217,927 acres of pasture land, and 2,411 acres of gardens.

**Production and Industry.**—The value of the field crops in 1918 was estimated at \$17,000,000, including oats (5,839,000 bushels), \$4,535,200; wheat (606,000 bushels), \$1,344,000; potatoes (5,362,310 bushels), \$3,217,386; roots (5,008,800 bushels), \$1,023,370.

The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at from \$20 to \$60 an acre (including buildings), according to condition and locality. The breeding of silver black foxes in captivity, after passing through an experimental stage for over twenty years, has now become an established and profitable industry. There are about 450 fox ranches, conducted by about 300 incorporated companies and also a number of private partnerships or individuals.

**Manufactures.**—The total value of the manufactures in 1910 was \$3,136,470, against \$2,326,708 in 1900.

**Principal Cities.**—CAPITAL, CHARLOTTETOWN, on the shore of Hillsborough Bay, which forms a good harbour. Other towns are Georgetown, Summerside, Souris, Kensington, and Alberton.

### ALBERTA.

**Area and Population.**—The Province of Alberta has an estimated area of about 257,000 square miles, including about 2,500 square miles of water, with a population (1916) of 498,127, estimated at 650,000 in 1920.

### PHYSIOGRAPHY.

The Island of Newfoundland is situated between  $46^{\circ} 37' - 51^{\circ} 37' N.$  latitude and  $52^{\circ} 44' - 59^{\circ} 30' W.$  longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 370 miles long and 250 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.), and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tolts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from  $70^{\circ}$  to  $80^{\circ}$ .

### GOVERNMENT.

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortereal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1708, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses. The *Legislative Council* is appointed by the Crown and consists of 24 members; the *House of Assembly* consists of 36 members, elected by the people, every male British subject aged 21 being entitled to the franchise.

### GOVERNOR.

## DEFENCE.

Newfoundland contributed 11,000 men to the fighting forces of the Empire during the War, in addition to 3,000 enlisted in Canadian and other forces.

## EDUCATION.

Education is denominational, and is assisted by Government. Primary schools were attended in 1919 by 51,217 pupils, and Secondary schools by 1,776 students. The Government grants in 1919 amounted to \$544,637.

## RELIGION.

At the Census of 1901 and 1911 the following statistics were obtained:—

| Religion.              | 1901.  | 1911.  |
|------------------------|--------|--------|
| Roman Catholics.....   | 75,989 | 81,177 |

| 1915-16 | 4,728,000 | 4,250,000    | 35,450,000   |
| 1916-17 | 5,206,648 | 4,554,891    | 34,489,705   |
| 1917-18 | 5,528,540 | 6,197,876    | 35,445,785   |
| 1918-19 | 9,535,725 | 6,766,389    | 42,032,786   |

## EXTERNAL TRADE.

The external trade of the island for the five years ending June 30, 1920, is stated as follows:—

| Year.       | Imports.   | Exports.   | Total.     |
|-------------|------------|------------|------------|
|             | \$         | \$         | \$         |
| 1915-16 ... | 16,833,500 | 19,466,400 | 36,379,900 |
| 1916-17 ..  | 21,318,310 | 22,381,762 | 43,700,072 |
| 1917-18 ... | 27,640,000 | 30,990,000 | 58,630,000 |
| 1918-19 ... | 33,297,184 | 36,784,616 | 70,081,800 |
| 1919-20 ... | 39,982,947 | 34,391,688 | 74,374,635 |

The trade was chiefly distributed in 1919-20 as under:—

| Country.             | Imports from. | Exports to. |
|----------------------|---------------|-------------|
| United Kingdom ..... | \$4,637,074   | \$6,411,967 |
| United States .....  | 13,414,067    | 4,426,148   |
| Canada .....         | 18,767,238    | 2,602,859   |

The principal imports in 1918-19 were flour, textiles, coal, hardware, and provisions; the principal exports were codfish, value \$4,316,830; cod and seal oil, value \$3,128,251; pulp and paper, \$2,080,522; herrings, \$2,535,534; seal-skins, \$258,575; tinned lobsters, \$102,334; copper, copper ore, iron pyrites, and other minerals, \$723,844; total value of the fishery products in 1918-19 was upwards of \$26,784,612.

## PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly 10,000 being engaged in fishing—for cod in summer, a large proportion of which is exported to South America—and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. The larger portion of the interior is practically in a state of nature, but the railways have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. A valuable discovery of copper has been made at Little Bay, about 200 miles from St. John's.

## COMMUNICATIONS.

**Railways.**—There were 904 miles of railway open in 1919. The trans-insular line runs to Port-aux-Basques, via Exploits River and Bay of Islands, with branch connexions to Placentia, Bonavista, Bay de Verde, Hearts Content, Trepassay, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay).

**Posts and Telegraphs.**—There were 891 post-offices in 1919, dealing with 4,000,000 letters and post-cards, 3,600,000 newspapers and books, and 248,123 parcels. There are 4,600 miles of telegraph line and 665 of telephone wire.

**Shipping.**—On Dec. 31, 1919, the Mercantile Marine of Newfoundland consisted of 3,226 sailing vessels of 149,197 tons, and 136 steam vessels of 22,205 tons. In 1918-19 the tonnage of vessels entered and cleared at Newfoundland ports was 1,711,668 tons, of which 1,315,704 tons were British.

## TOWNS.

The CAPITAL, ST. JOHN'S (population 34,650), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (4,279), Bonavista (3,911), Carbonear (3,540), and Twillingate (3,348).

## HIGH COMMISSIONER.

High Commissioner in London, Hon. Sir Edgar R. Bowring (1918).

Secretary, Capt. Victor Gordon, 58 Victoria Street, S.W. 1.

## LABRADOR.

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits (or to Cape Wolstenholme), on the north; the boundaries between Quebec and Labrador being a matter of keen controversy which is expected to come up for settlement before the Judicial Committee of the Privy Council. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the world is provided by the Great Falls of Labrador, on the Hamilton River. The inhabitants of this 850 miles of coastal America are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian Mission stations at Makkovik, Hopedale, Nain, Okak, Hebron, and Killinek. Pulp and paper mills have been founded at Sandwich Bay and Hamilton Inlet to deal with the almost inexhaustible supply of timber.

## PHYSIOGRAPHY.

The territory of the Commonwealth includes the Continent of Australia, the Island of Tasmania, Norfolk Island, Lord Howe Island, and part of the island of New Guinea (Papua).

Australia (mainland) is probably the oldest of all land surfaces in either hemisphere, and may be regarded as the largest island or the smallest of the Continents, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West*, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between  $10^{\circ} 41' - 39^{\circ} 8'$  South latitude and  $113^{\circ} 9' - 153^{\circ} 39'$  East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a rich grazing country, admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which fall into the sea on the south coast: on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascayne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c.

*Climate*.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

## GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Executive Council of nine Ministers of State and such honorary Ministers who may be appointed thereto. The Constitution rests on the fundamental law of March 16, 1898, ratified by the Imperial Parliament on July 9, 1900; and the Commonwealth was inaugurated on Jan. 1, 1901. Under the Constitution the Federal Government possesses limited and enumerated powers as surrendered by the federating States, the residuum of legislative power being in the Governments of the various States. Briefly stated, the enumerated powers include authority over commerce and navigation, finance, defence, posts and telegraphs, census and statistics, and conciliation and arbitration in extra-State industrial disputes; with authority to assume the control of railways and lighthouses, marriage and divorce, emigration and immigration, currency and banking, and weights and measures.

*Governor-General*, His Excellency the Rt. Hon. Lord Forster, P.C., G.C.M.G. (1920) £10,000

*Military Secretary*, Brig.-Gen. Leonard L. Wheatley, C.M.G., D.S.O.

*Aide-de-Camp and Private Secretary*, Lord Digby, D.S.O., M.C.

*Aides-de-Camp*, Capt. C. J. Traill, M.C.; Capt. A. Lawrence; Capt. G. Pitt-Rivers.

*Official Secretary*, J. H. Starling.

The Federal Parliament consists of a Senate and a House of Representatives. The Senate contains 36 members, six from each of the Original States, elected for six years by universal suffrage. The House of Representatives, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives, 1921, is made up of 27 for New South Wales, 21 for Victoria, 10 from Queensland, 7 from South Australia, and 5 each from Tasmania and Western Australia, and consists of members of the Liberal, Labour, and Country Parties. Members of the Upper and Lower Houses receive £1,000 per annum, with travelling expenses.

**President of the Senate, Hon. Thomas Givens.**  
**Speaker, House of Representatives, Hon. Sir Elliott Johnson, K.C.M.G.**

**THE JUDICATURE.**

There is a Federal High Court with a Chief Justice and 6 Judges, having original and appellate jurisdiction, subordinate to the final Appeal Court of the Empire, the Judicial Committee of the Privy Council.

**DEFENCE.**

On Dec. 31, 1920, there was a total membership of the Defence Force of 276,525. Military force in Australia 129,768 (57,797 riflemen and 69,950 cadets). The expenditure on Defence (excluding War expenditure) in 1919-20 was £2,257,274.

this does not include Navy expenditure, the Estimates for which in 1919-20 amounted to £1,825,000. The total expenditure on defence, including war expenditure, was estimated at £70,823,942.

### Navy.

Under the *Australian Defence Scheme*, the Commonwealth provides and maintains certain ships of war, which will form an Australian squadron of the Royal Navy, under the command of a Commonwealth officer in time of peace, and an integral part of the Eastern Fleet of the Royal Navy in time of war. Ships of the Royal Australian Navy are known as *H.M.A.S.* (*His Majesty's Australian Ship*), and served with the Royal Naval forces throughout the war. The Commonwealth fleet consists of the *Australia*, Melbourne (flag-ship), Sydney, Brisbane, 2 sloops, 6 destroyers, and 6 submarines. *H.M.A.S. Sydney* destroyed the German cruiser *Emden* at Cocos Island on Nov. 9, 1914. The personnel of the fleet is mainly Australian in character, although still supplemented to some extent by Imperial officers and men. The sea-going forces on June 30, 1918, consisted of approximately 400 officers and 4,500 petty officers and men. There is also a R.A.N. Brigade composed of members of the Citizen Naval forces, a section of the Commonwealth Compulsory Military Training System.

### Army.

By a Federal Law of 1910 military training is compulsory on all male citizens between the ages of 12 and 26—in *Cadet Corps* 12-18, and *Citizen Soldiers* 20-26, with short periods of training in the field. The *Peace Effective* is about 120,000 of all ranks; the *War Establishment* about 227,000 upwards. The Commonwealth had, up to the end of the Great War, enlisted no fewer than 415,809 men, fully equipped for service in the war: New South Wales, 164,030; Victoria, 122,399; Queensland, 57,705; South Australia, 34,959; West Australia, 32,231; Tasmania, 15,485. The Australian forces, who are unrivalled as mounted infantry, behaved with the greatest gallantry whenever engaged with the enemy. To Aug. 5, 1918, their War record was 36 V.C., 370 D.S.O. (14 bars), 1,258 M.C. (48 bars), 920 D.C.M. (10 bars), 5,206 M.M. (167 bars and 2 double bars), 248 foreign decorations. The *Total Casualties* in the A.I.F. from the outbreak of the War to July 31, 1920, were: killed, 59,302; missing, 1; prisoners of war, 4,087; wounded, 166,819; sick, 87,957; not specified, 218—total, 318,384.

The total cost of the War to the Commonwealth Government from August, 1914, to the end of March, 1921, was £473,390,950, of which amount upwards of £107,558,115 was charged against revenue.

### FEDERAL FINANCE.

| Years.  | Revenue.   | Expenditure | Balance repayable to States. |
|---------|------------|-------------|------------------------------|
|         | £          | £           | £                            |
| 1916-17 | 34,067,434 | 27,797,015  | 6,270,419                    |
| 1917-18 | 36,839,868 | 30,499,494  | 6,340,374                    |
| 1918-19 | 44,718,928 | 38,308,985  | 6,434,333                    |
| 1919-20 | 52,783,102 | 46,052,510  | 6,730,492                    |
| 1920-21 | 56,489,700 | 62,007,376  | ...                          |

The Customs and Excise Revenue is collected by the Commonwealth and partly repaid to the States at the rate of 95s. per head of the population.

### DEBT.

The Commonwealth has now undertaken responsibility for the Northern Territory Debt and the Port Augusta-Coodanatta Railway Debt, whose combined amounts were £4,015,397 at June 30, 1920. The other State Debts remain at the charge of the State Governments. The total of the Commonwealth Public Debt on March 31, 1921, was £402,795,667, including a War Loan from the British Government of £49,082,059, and a debt of £42,696,500 for expenses incurred by the Imperial Government for A.I.F. and Naval Services. Adding the indebtedness of the States to that of the Federal Government, the total public debts of Australia amounted (June 30, 1920) to about £770,000,000, or about £145 per head of the population.

### PRODUCTION AND INDUSTRY.

The estimated value of the products of the Commonwealth in 1918 and 1919-20 was:—

| Northern Territory | 199 —          |
| Total              | 25,927 (2,809) |

The gross earnings of all Government lines in 1919-20 were £32,109,319, working expenses £24,768,949, and net earnings £7,340,370, being at the rate of 2s. 2d. per train mile, and representing a return on the total cost (£31,115,722) of 31.8 per cent., as against 2.8 per cent. in 1918-19.

The great trans-continental railway from West to East, linking up Kalgoorlie in Western Australia with Port Augusta in Spencer's Gulf, a distance of 1,051 miles, was completed in 1917, and the first mail train made a successful run through on 22 October of that year. A scheme is under consideration to connect north and south by a line from Katherine River (Northern Territory) to Oodnadatta (S. Aust.), a distance of 1,011 miles.

**Shipping.**—The entrances and clearances of vessels engaged in overseas trade at the various Australian ports in the 6 years 1915-1920 were as follows (tonnage in brackets):—

| Year.   | Entered           | Cleared.          |
|---------|-------------------|-------------------|
| 1914-15 | 1,568 (4,174,955) | 1,643 (4,424,303) |
| 1915-16 | 1,654 (4,269,484) | 1,670 (4,268,838) |
| 1916-17 | 1,486 (3,851,292) | 1,500 (3,843,130) |
| 1917-18 | 1,079 (2,456,757) | 1,118 (2,574,993) |
| 1918-19 | 1,350 (3,239,060) | 1,264 (2,941,222) |
| 1919-20 | 1,476 (4,041,544) | 1,505 (4,044,963) |

Of the vessels entered (1919-20), 1,047 were under the British flag (Australia, 260, of 395,865 tons; U.K., 626, of 2,553,850 tons; N.Z., 117, of 147,585 tons); and 429 under foreign flags (Dutch, 26, of 70,966 tons; French, 93, of 121,899 tons; Japanese 130, of 307,896 tons; Norwegian, 16, of 39,760 tons; United States, 126, of 122,805 tons; other foreign, 38, of 104,543 tons).

**Posts and Telegraphs.**—In year ended June 30, 1920, there were 8,299 post and receiving offices, dealing with 768,000,000 letters, &c.; there were 6,251 telegraph stations, with 143,400 miles of wire, transmitting and receiving 24,000,000 cable and telegrams in 1919-20. **Telephones** are highly organised and generally used.

## TOWNS.

**CAPITAL.**—CANNBERRA, in the Federal District, transferred to the Commonwealth by the State of New South Wales on Jan. 1, 1911, is to be laid out as the capital of the Commonwealth, £150,000 being provided for that purpose in the Budget of 1910-11. Meanwhile the seat of Government is MELBOURNE.

## PHYSIOGRAPHY.

**Relief.**—The Eastern or coastal district is traversed by a mountain range known as the Great Dividing Range, which is called locally the Muntong Range in the south—the highest points being Mount Kosciuszko, 7,328 feet, and Townsend (7,260 feet)—in the centre the Main Range, and in the North the Liverpool Range, New England Range and Macpherson Range.

**Rivers.**—The eastern or coastal district is watered by the Tweed, Brunswick, Richmond, Clarence, Bellinger, Macleay, Hastings, Manning, Karuah, Hunter, Hawkesbury, George, Shoalhaven, Clyde, Moruya, Tuross, Bega, Tumbarumba, and Snowy Rivers. The western portion of the country is not well watered, but immense reservoirs are being constructed for irrigation purposes, and many artesian bores have been laid down. The Darling and the Murrumbidgee are both tributaries of the Murray, which has a total length of 1,719 miles, 1,250 miles forming the boundary between New South Wales and Victoria.

**Climate.**—The climate is dry and very healthy. At the capital (Sydney) the average mean shade temperature is 63°; the mean temperature in the shade for the north coast is 66° to 69°, south coast 57° to 62°, northern tableland 54° to 60°, southern tableland 56°. Western slopes, the mean annual temperature ranges from 69° in the north to 60° in the south; in the summer from 82° to 74°, and in the winter from 53° to 49°. Western Plains from 60° in the north to 60° in the south; in the summer from 82° to 74°, and in the winter from 53° to 49°.

## \* GOVERNMENT.

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1842. In 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. The executive authority is vested in a Governor (appointed by the King), assisted by a Council of Ministers.

## THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. Members of the *Legislative Council* (67 in September, 1921), are appointed by the Crown for life. Members are not entitled to remuneration, but travel free on the State railways and tramways. The *Legislative Assembly* consists of 90 members, representing 24 electoral districts. Each member of the Legislative Assembly receives £875 per annum, and members travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. With few exceptions all natural-born or naturalised persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise, which was conferred upon women in 1902, and was first exercised by them in 1904. At the last General Election in March, 1920, of 593,244 male electors enrolled and qualified to vote 363,115, or 61% voted, and similarly of 561,193 female electors 285,504, or 50% voted.

## EDUCATION.

*Education.*—Education is non-sectarian, compulsory between the ages of 7 and 14 years, and free, school fees in State, primary, and superior schools having been abolished in October, 1906. The total enrolment in 1919 in 3,326 State schools was 288,931, and the average daily attendance 225,790. The State expenditure on Education, Science, and Art was £2,670,593. The University of Sydney, with which 5 colleges are affiliated, including the Women's College, was incorporated in 1851. In addition to the State schools there were, in 1919, 677 private colleges and schools, with 74,306 scholars, exclusive of many business colleges and shorthand schools.

## FINANCE.

The Revenue and Expenditure and Public Debt of New South Wales for the five years ended June 30, 1920, are stated as under:—

| Year. | Revenue, including Advances repaid. | Expenditure, including Transfers and Advances. | Public Debt. |
|-------|-------------------------------------|--|--------------|
|       | £                                   | £  | £            |

| 1918  | 21,543,742                          | 21,519,918                                     | 152,584,693  |
| 1919  | 23,448,166                          | 23,233,298                                     | 147,174,536  |
| 1920  | 28,650,496                          | 30,310,013                                     | 152,776,082  |

To the total revenue during 1919–20, Railways and Tramways contributed £15,997,584; and other Business Undertakings, £1,967,459. A sum of £2,472,717—equal to £1 4s. 9d. per head of the population—was returned to the State by the Commonwealth Government, in lieu of Customs and Excise revenue collected by the latter. Revenue from Taxation amounted to £4,962,528. Included in the total Expenditure were the following:—Interest upon Public Debt, £1,074,896 (exclusive of £3,258,576 charged to Business Undertakings); Public Instruction, £2,503,483; Business Undertakings, £12,851,438.

*Banking, &c.*—There were (June 30, 1921) 17 banks within N.S.W., with total assets, £124,432,933, including advances, £104,709,314; coin, bullion, and Australian Government Notes, £21,954,366; and liabilities, £111,409,428, including deposits, £107,676,418. The savings bank deposits on March 31, 1921, amounted to £54,212,302, representing 1,111,222 depositors.

*Shipping.*—Excluding coastal trade, 3,039 vessels

entered ports of N.S.W. during 1900-01, the net tonnage being 7,157,639; the clearances were 3,056 vessels of 7,190,594 net tonnage. Sydney is the chief port. In 1900-01 the shipping entries, including coastal, were 8,698 vessels of 7,226,253 net tonnage. The dock accommodation includes four large graving docks, five floating docks, and six patent slips.

**Railways.**—The railways and tramways of New South Wales, with the exception of a few short lines, representing about 157 miles, are controlled by the State. At June 30, 1901, the mileage of the State railways open for traffic was 5,043, the capital cost amounted to £88,304,194, and the net earnings for the year 1900-01 to £3,234,528, or *as. 10d.* per train mile. There were also 227 miles of State tramways, the capital cost being £9,060,757, and the net earnings £528,486, or *4½d.* per train mile.

The population to each mile of railway line open was 406, and the area 61 square miles.

**Posts, Telegraphs and Telephones.**—The postal, telegraphic, and telephonic services are administered by the Federal Government. In 1900-01 there were 2,593 post offices in New South Wales. The postal matter carried included 256,062,161 letters, postcards, and registered articles, 61,407,865 newspapers, 28,080,399 books, packets and parcels, and 9,044,098 telegrams, including 528,199 cablegrams, were received and despatched. The telephonic line connections numbered 79,700.

#### TRADE.

The overseas imports into New South Wales during 1900-01 were valued at £78,129,934, and the overseas exports at £51,723,229.

#### PRODUCTION AND INDUSTRY.

**Agriculture** is one of the principal industries of the State; 3,773,577 acres, excluding areas double-cropped, were under cultivation during the year ended June 30, 1900, producing 4,388,022 bushels of wheat, 4,052,025 bushels of maize, 386,758 bushels of oats, besides other kinds of grain, with 49,986 tons of potatoes and 19,236 cwt. of dried leaf tobacco. The season was one of the worst ever experienced. Sugar-cane to the extent of 91,237 tons was crushed; and 717,893 gallons of wine, and 1,769,023 bushels of citrus fruit, and 322,266 cases of bananas; almost every kind of fruit and vegetable may be grown. The area sown for wheat for the year 1900-01 was 3,124,370 acres, which yielded 53,715,840 bushels. The total extent of land alienated and in process of alienation on June 30, 1900, was 63,125,561 acres, while the area of land leased for pastoral occupation and homestead, mining, and other purposes at the same date was 113,086,399 acres.

**Live Stock.**—The great plains are admirably adapted for sheep-farming, and several breeds of sheep, including the celebrated merino, were introduced in 1823. On June 30, 1900, there were 682,264 horses, 769,931 dairy cows, 3,314,401 all other cattle, 29,249,253 sheep, 253,910 pigs, and 1,272 camels. In 1900-01, 296,621,000 lb. (stated as in the grease) of wool were produced, in addition to 636,974 cwt. of tallow, 63,135,000 lb. butter, 6,762,467 lb. cheese, and 28,669,998 lb. bacon and hams. During 1900-01 there were 121,622 persons permanently employed in rural occupations, 226,509 being males, and 14,706 females.

**Minerals.**—The goldfields were discovered in 1821. Coal, coke, copper, silver, lead, zinc, blismuth, tin, iron, antimony, asbestos, platinum,

alunite, wolfram, scheelite, molybdenite, cobalt, marble, and kerosene shale, diamonds, rubies, opals, and other precious stones are also found. The total value of minerals raised during 1900 was £10,611,615, coal accounting for £7,723,355, silver, silver lead and ore £123,482 and gold £207,746. The mining industry gave employment to 29,163 miners during the year.

**Manufactories and Works.**—In 1900-01 there were 5,662 manufactories and works; the employees numbered 144,454, of whom 109,836 were males and 34,618 females, the amount of £21,681,196 being paid in salaries and wages. Male workers received on an average £18 12 *sd.*, and females £7 6s. 8d. The capital value of lands, buildings and fixtures amounted to £16,176,860, and of machinery and plant £25,366,083. The machinery in use represented 265,801 h.p., including steam, 171,590 h.p., electric, 78,287 h.p., and gas, 13,242 h.p. The value of goods manufactured and of work done was £123,213,480; materials used, £81,288,497, and fuel consumed, £2,720,666; the production, i.e., value added to raw materials, was £39,314,317.

The principal products of the factories during 1900-01 were:—

#### INDUSTRIAL ARBITRATION.

Matters relating to the conditions of industrial employment in New South Wales are determined by a Court of Industrial Arbitration, which is empowered to make awards fixing the lowest rates of wages, the hours and times of work, rates of payment for overtime, &c., and the proportionate number of apprentices and improvers in any industry, and granting preference of employment to members of any trade or industrial union of employees. Industrial agreements between employers and employees may be enforced as an award. Awards were formerly made by subsidiary tribunals known as Wages or Industrial Boards, constituted for each industry, but their functions are now absorbed by Judges of the Industrial Arbitration Court. At June 30, 1901, there were 271 awards and 215 industrial agreements in force. The industrial laws provide for the registration of industrial unions of employers and employees, and for mediation in industrial disputes. Under certain conditions strikes may be recognised as lawful, except strikes by Government employees, or by persons engaged in military or naval contracts, or by employees in an industry of which the conditions are regulated by award or industrial agreement; but when an award has been in operation for twelve months, the employees may decide by secret ballot to withdraw from its conditions.

When a strike occurs or is contemplated, the Minister for Labour may order a secret ballot to ascertain if the majority of the employees favour a strike.

A "Board of Trade of New South Wales" was constituted in 1928 with extensive powers regarding industrial matters, one of its functions being to declare annually the rate of living wage for adult employees of each sex, to be used as a standard by the Court in determining rates of wages.

Industrial matters which extend beyond the limits of one State are determined by the Commonwealth Court of Arbitration and Conciliation.

#### LOCAL GOVERNMENT.

For purposes of Local Government, with the exception of an area of 125,009 square miles in the sparsely-populated western division, the State is divided into 184 municipalities and 136 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jetties, wharfs, &c., to make regulations regarding cattle slaughtering, maintenance of public places, traffic, street and road lighting, public health and safety, management of parks, &c.

The basis of rating is almost wholly on the unimproved capital value of land, which in 1929 was £96,792,615 for municipalities, including the city of Sydney, and £120,881,306 for shires.

#### Religion.

There has been no State aid to religion since 1875. Members of the Church of England in 1921 numbered 451,087, "Protestants" 24,116, Presbyterians 234,553, Methodists 176,662, Baptists 31,244, Church of Christ 16,511, Independents 16,464, and Roman Catholics 286,432.

#### PHYSIOGRAPHY.

*Relief.*—The Australian Alps and the Great Dividing Range pass through the centre of the state, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys.

*Rivers.*—The Murray River forms the northern boundary of the State, and has many Victorian tributaries. The capital stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

*Climate.*—The mean temperature over a period of 65 years was 59° 4" Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for three nights in the year) below 32° F. The average number of days on which rain fell was 137; and the average yearly rainfall was 25·60 inches.

## GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor appointed by the Crown, aided by an Executive Council of 12 members.

## EDUCATION.

Primary Education is compulsory, secular and

free between the ages of 6 and 14, there being

235,292 children on the registers in 1919, the

average attendance being about 68 per cent.

Secondary Education is principally under private

control, 56,684 pupils being in attendance at the

465 schools in 1919. There is a State-aided

University at Melbourne, with four affiliated

colleges (Trinity, Ormond, Queen's, and Newman)

and a School of Mines at Ballarat.

## FINANCE.

The revenue and expenditure and State Debt

for five years are given as follows:—

| Year. | Revenue.   | Expenditure. | Debt.      |
|-------|------------|--------------|------------|
| 1916  | 11,470,875 | 11,683,353   | 75,294,562 |

**Banking, &c.**—There were (Dec. 31, 1920) 17 banks, with total assets £88,535,893, within the State, and Liabilities £68,049,730. The savings bank deposits at June 30, 1921, amounted to £43,653,735.

#### PRODUCTION AND INDUSTRY.

**Agriculture.**—Agriculture has of late years much improved, wheat and oats chiefly being cultivated; the dairy industry has also made marked progress. Of the 6,423,873 acres under cultivation in 1920-21, 2,295,865 were wheat crops and 443,636 oats, and 1,333,397 acres were cut for hay. In 1919-20, 1,634,680 gallons of wine were produced. The estimated value of production in 1919-20 was (including manufacturing values) £89,769,840.

**Live Stock.**—There were in 1921, 620,005 milch cows, producing 60,218,945 lb. of butter and 7,735,023 lb. of cheese; and 955,154 other cattle, 12,171,084 sheep, 175,275 pigs, and 487,503 horses.

**Minerals.**—Victoria is one of the leading gold-producing States in Australia, the amount produced in 1920 being 152,792 oz. (£648,969). Other minerals raised consisted principally of tin, copper, coal, and antimony.

**Trade and Industry.**—Wool, gold (including specie), wheat, flour, biscuit, and butter are the staple productions of the State; and the manufactures (6,038 factories, &c., employing 136,522 hands in 1919-20) are mainly for home consumption. The chief exports overseas are: wool, lead, butter, wheat, flour and biscuit, leather, skins and hides, tallow, live stock, jams and jellies, milk and cream and preserved and frozen meats. The principal overseas imports of the State are iron and steel, machines and machinery, metals and metal manufactures, silks, velvets, &c., apparel and attire, bags and sacks, tea, cottons and linens, woollens and timber.

#### TOWNS.

MELBOURNE, the chief city and seat of federal government, is an episcopal see, and is distinguished for its university, museum, mint, public gardens, observatory, public library, hospital, its churches and other institutions. #### Increase of the People.

| Year. | Births. | Deaths. | Marriages. |
|-------|---------|---------|------------|
| 1916  | 11,857  | 5,077   | 3,600      |
| 1917  | 11,326  | 4,365   | 3,252      |
| 1918  | 11,357  | 4,390   | 3,190      |
| 1919  | 11,060  | 5,475   | 3,825      |
| 1920  | 12,008  | 5,083   | 4,081      |

Birth rate 25.45, death rate 10.76, marriage rate 10.33 per 1,000 of population. Infantile mortality, 67.09 per 1,000 births, being one of the lowest rates in the world.

#### Religions.

Religion is free and receives no State aid. At the Census, 1921, the persons belonging to the principal religious denominations were as follows:—Church of England, 113,781; Methodists, 100,402; Congregationalists, 13,357; Baptists, 21,863; Lutherans, 26,681; Roman Catholics, 50,964; Presbyterians, 22,567; and Church of Christ, 9,324.

#### PHYSIOGRAPHY.

**Relief.**—The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South latitude (the northern boundary since the transfer to the Commonwealth of the Northern Territory), is also unpromising in comparison with the fertile land that surrounds the hill country of the east.

**Rivers.**—Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

**Climate.**—The mean annual temperature at Adelaide is 63°, the winter temperature (July-August) averaging 53°, and the summer (November-March) 71°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight.

The average annual rainfall at Adelaide, derived from 82 years' record, is 21.03 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland.

In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

#### GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

#### GOVERNOR.

## EDUCATION.

*Public Education (Primary, Secondary and Technical)* is provided by the State, and controlled by a responsible Minister; it is secular, compulsory, and free; there are 1,010 State schools, with 2,856 teachers and 75,991 scholars; the expenditure in 1920-21 was £450,000. The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University. Private schools number 172, with 775 teachers and 14,121 scholars. There is an endowed *University at Adelaide*, founded in 1874, with 774 undergraduates, and 1,054 other students; all classes are open to women. A State School of Mines and Industries has also been established with branches at 5 country centres, and technical education is also provided. There are 5 Vocational Schools for the training of discharged soldiers. The public library, museum, art gallery and local institutes are supported or assisted by the State.

## FINANCE.

The Revenue and Expenditure and Public Debt for the five years ended June 30, 1917-1921, are stated as follows:—

| Year. | Revenue.  | Expenditure. | Debt.      |
|-------|-----------|--------------|------------|
|       | £         | £            | £          |
| 1917  | 4,874,603 | 5,190,453    | 39,364,280 |
| 1918  | 5,526,226 | 5,500,419    | 40,621,480 |
| 1919  | 5,798,313 | 5,876,811    | 42,650,206 |
| 1920  | 6,582,788 | 6,457,039    | 43,753,146 |
| 1921  | 7,142,800 | 7,540,000    | ...        |

Most of the revenue is derived from inland revenue, railways, and territorial receipts, while most of the expenditure is on account of public works and railways, and interest on public debt.

**Banking.**—There are 9 banking institutions in Adelaide, in addition to the Commonwealth Government Bank, with 279 branches and agencies, and £32,468,875 authorised capital, having a total liability of £23,186,867 and assets £17,717,783 in June, 1920. The Savings Banks on June 30, 1920, had 377,432 depositors with £15,494,143 to their credit. Nearly 80 per cent. of the population have Savings Bank accounts. The total banking deposits, £37,925,789, averages over £80 per head of population.

## PRODUCTION AND INDUSTRY.

**Agriculture.**—Of the total area about two-thirds are farmed or grazed, and 5,000,000 acres cultivated—under wheat 2,200,000 acres, hay 600,000, oats 200,000, barley 200,000, orchards 30,000, and potatoes 4,000 acres, with 1,500,000 acres lying fallow. During the last ten seasons the quantity of wheat produced has averaged 24,000,000 bushels. English fruit, oranges, lemons, almonds, and olives are successfully grown, and fruit drying is profitable. There were 33,000 acres of vines, with an average annual production of about 5,500,000 gallons of wine; 60,000 cwt. of currants, and 45,000 cwt. of raisins. Considerable quantities of fruits (fresh and dried) and also wine are annually sent to overseas countries, principally the United Kingdom. Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

**Live Stock.**—There were 6,014,565 sheep in 1920, cattle number 349,562, horses 264,901, pigs 60,205, and goats 8,202.

**Minerals.**—Copper and gold, silver, lead, manganese, bismuth, iron, gypsum, salt, phosphate rock, coal, &c., are found, the total annual mineral output being valued at £1,200,000. Over £32,000,000 of copper has been produced since the foundation of the State.

**Manufactures.**—In 1920 there were 1,368 factories, employing 20,442 hands, the gross value of the output being £20,454,539, and the wages paid £3,988,662. Plant, machinery, land, and buildings were valued at £7,008,661. A Department of Chemistry has been established for the purpose of fostering new industries by the utilisation of products at hand, and there is also an Advisory Board of Science and Industry.

**Value of Production, 1919-20.**—Crops, total value, £13,728,224, average per head, £29 (cereals, hay, &c., £11,559,029; orchards, vineyards, and gardens, £2,169,195); manufactures, £7,375,484; pastoral, £5,224,577; minerals and quarries, £2,277,427; dal-ying, £1,706,624; poultry,

&c., £924,986; fisheries and game, £422,726; forestry, £431,197. Total value of production, £30,683,388, average £65 per head.

**Exports of Produce.**—A considerable quantity of the produce of South Australia is exported to Great Britain and other overseas countries, the average annual value being about £13,000,000. The main items are wheat, flour, wool, meats, skins and hides, butter, tallow, leather, minerals, wines, fruits (fresh and dried), jams and jellies, honey, manures.

**Communication.**—There are 3,342 miles of railway in South Australia, 114 miles of electric tramways, 44,000 miles of roads and several good harbours. The River Murray is used for conveying the produce grown on the irrigation settlements along its banks. There are 792 post offices in the State, which transmit annually 59,000,000 letters, 11,000,000 newspapers, 6,000,000 packets and parcels, and also 2,200,000 telegrams.

Ships entered and cleared number annually about 2,000. The large part of the trade is with the U.K. and other British possessions, besides the U.S., France, Italy, and Japan. The export trade is equal to about £50 per inhabitant.

## TOWNS.

ADELAIDE, the chief city and capital, population (1921) 255,328, inclusive of suburbs within 20 miles radius. Other towns are Moonta (4,000), Kadina (3,000), Wallaroo (5,500), Port Pirie (13,000), on the east and Port Augusta (3,000) on the west of Spencer Gulf, and Kapunda (2,500), Gawler (4,500), and Peterborough (2,500) on the line from Adelaide to the north, Strathalbyn (1,200) in the south, and Mt Gambier (4,500) in the south-east.

Transmission of mails, approximate, 29 days.

## IV.—QUEENSLAND.

This State, situated in lat. 10° 40'—29° 8. and long. 138°—153° 30' E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 670,500 square miles (i.e., equal to more than 5½ times the area of the United Kingdom).

## POPULATION.

| Census | Males.  | Females. | Total.  |
|--------|---------|----------|---------|
| 1881   | 125,325 | 88,200   | 213,525 |
| 1891   | 223,779 | 169,939  | 393,718 |
| 1901   | 277,003 | 221,126  | 498,129 |
| 1911   | 329,506 | 276,307  | 605,813 |

The estimated population on Dec. 31, 1920, was 725,220.

## Increase of the People.

| Year | Births. | Deaths. | Marriages. |
|------|---------|---------|------------|
| 1914 | 19,883  | 6,731   | 5,895      |
| 1915 | 20,165  | 7,560   | 6,141      |
| 1916 | 18,926  | 7,514   | 5,808      |
| 1917 | 19,764  | 6,550   | 4,866      |
| 1918 | 19,560  | 7,158   | 4,821      |
| 1919 | 18,699  | 8,860   | 5,431      |

## Religion.

Since 1861 no State aid has been afforded to religion. At the Census of 1911 there were 222,702 Church of England, 127,086 Roman Catholics, 75,560 Presbyterians, 59,220 Methodists, 24,222 Lutherans, 13,715 Baptists, and 47,394 other Christians, with 5,528 Muhammadans and Pagans, besides "Indefinite," "No religion," &c.

## PHYSIOGRAPHY.

**Relief.**—The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the *Kirby's Range* divides the land into a northern and southern watershed.

**Rivers.**—The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

**Climate.**—At Brisbane the average temperature for 1919 was 69° 5', the maximum and minimum shade temperatures being 99° 4' and 38° 4'; mean barometer, 30° 045. The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty. The rainfall during 1919 was 19'353 inches, and there were 98 wet days.

## GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 10 members.

## EDUCATION.

**Primary Education** is compulsory, secular, and free. In 1919 there were 1,574 State schools and six High Schools in operation, with 4,194 teachers and an average daily attendance of 99,569 children; and 195 private and 10 grammar schools, with 1,011 teachers and an average attendance of 19,783. A State-aided University was established during 1919.

## FINANCE.

The revenue, expenditure, and debt of Queensland for the five years ended June 30, 1916-20, are stated as follows:—

| Year       | Revenue.   | Expenditure. | Debt.      |
|------------|------------|--------------|------------|
|            | £          | £            | £          |

| 1919 ..... | *9,415,000 | 9,587,000    | 65,581,122 |
| 1920 ..... | 11,293,743 | 11,266,910   | 69,680,764 |

**Banking**—The banking assets (1919) £28,904,262; liabilities £28,385,843. The deposits on Dec. 31, 1919, were £27,017,576, apart from the £14,567,608 (equal to an average of £53 18s. 3d. to each depositor) in the hands of the State Government Savings Bank, and Commonwealth Savings Bank deposits, an average of £33 0s. 4d. per head.

## PRODUCTION AND INDUSTRY.

**Agriculture and Live Stock.**—Of the total area of 429,120,000 acres the Government have parted with the fee simple of 16,806,983 acres; under a system of deferred payment, 9,004,089 acres more are in process of alienation, and an additional area of 211,030,440 acres leased out for sheep and cattle runs, 76,437,428 acres for grazing farms and homesteads, 36,590,950 acres are held under occupation licence, 333,834 acres under gold-mining and mineral lease, 210,201 for special purposes, and 2,005,357 acres perpetual lease, and scrub selections 166,899 acres, leaving 76,379,195 practically unoccupied. Wheat, oats, and barley flourish on the Darling Downs, while a still larger area is devoted to maize, which yields an average crop of about 25 bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pine-apples, grapes, bananas, coco-nuts, mangoes, plums, and various English fruits. India-rubber and sisal hemp plantations have also been recently started. In the year 1919, 162,126 tons of sugar were produced. The live stock in 1919 included 5,940,433 cattle, 17,379,332 sheep, 731,705 horses, and 99,593 pigs. Wool, meat, and butter are the principal products.

**Forestry.**—There are many varieties of fancy timber which are much utilised by cabinet-

\* Including net amount received from Commonwealth on a per capita basis.

makers, &c.; among them may be mentioned "silky oak," largely used in furniture and office fittings; maple, a timber with a handsome grain and capable of taking a very high polish; "bean" is also much in demand for furniture; black walnut, penda, beech, crows' ash, quandong, bally gum, as well as many varieties of the eucalypt, pine, cedar, and sandalwood, the latter being mainly exported to China.

**Minerals.**—The total mineral output in 1919 was £2,472,027. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in 1919 was valued at £514,103; silver, £23,772; copper, £952,501; tin, £143,167; coal, £614,307; wolfram, £40,556; molybdenite £52,834.

**Commerce.**—The chief articles of export overseas, the produce of the State, in 1918-9 were: Wool, £6,765,217; meat, including extract, and bacon, hams, and pork, £3,882,720; hides and skins, £264,562; tallow, £640,612; butter, cheese, and milk, £693,447.

## TOWNS.

**CAPITAL, Brisbane.** Population (1921), 209,699. The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane, Rockhampton (24,128), Maryborough (12,500), Townsville (17,200), Port Douglas, Mackay, Thursday Island, Cooktown, and Bundaberg (10,122). Other places of importance are Ipswich (20,526), Toowoomba (24,200), Charters Towers (17,268), Gympie (12,419), and Cairns, Mt. Morgan (12,023).

Transmission of mails, approximate, 32 days.

## V.—TASMANIA.

Tasmania is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, about 120 miles wide, in which are situated the Furneaux Group and King Island, included within the State. It lies between 40° 33'—43° 39' S. lat. and 144° 39'—148° 23' E. long., and contains an area of 26,215 square miles.

## Religion.

All religions are free. In 1921 there were 28,000 members of the Church of England, 20,000 Roman Catholics, 25,000 Methodists, 16,000 Presbyterians, and 11,000 Independents and Baptists.

## PHYSIOGRAPHY.

The surface of the country is generally undulating forest land, with mountains from 1,500 to 3,000 feet in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not reach the Island. At Hobart in 1900 the mean annual temperature was 55° F., the mean temperature for Dec., Jan., and Feb. being 60° F., and that of June, July, and Aug. 48° F. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from 20 inches to 100 inches in different parts.

## GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1854. In 1855 a partly elective legislature was inaugurated, and in 1896 Responsible Government was added. In 1901 Tasmania became a State of the Australian Commonwealth, *q.v.* The State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of responsible Ministers.

Banking.—Dec. 31, 1900, the banks of issue had total deposits £6,954,726; the savings bank deposits were £3,783,052.

## PRODUCTION AND INDUSTRY.

**Agriculture and Live Stock.**—Of the total area of 16,778,000 acres in 1900-01, there were 297,323 acres under crops. The live stock included 208,202 cattle, 1,270,122 sheep, 38,116 pigs, and 39,117 horses. The wool clip was estimated at 9,503,048 lb. The butter produced amounted to 4,014,402 lb.

**Timber.**—Timber cut is chiefly hardwood, from Eucalyptus, Blackwood (Acacia) and Myrtle (Beech). The native softwood pines are excellent in quality, but are being cut out and not replaced. Tasmanian timbers offer large possibilities, for the most part unexplored, for cabinet making, tool handles, and other special purposes. The amount of timber milled in 1900 was 65,000,000 super ft., valued at £527,200. This is expensive of the timber used for piles, poles, telegraph, and for practically all sleepers. Exports beyond the Commonwealth are chiefly for harbour works and sleepers.

**Minerals.**—The chief minerals produced are copper, tin, silver, lead, coal and gold, the

value of all minerals produced in 1900 being £1,227,692.

**Manufactures.**—The chief factories for export are metallurgical, fruit preserving and woollen mills. Tasmanian blankets command very high prices on account of their excellent quality.

#### TOWNS.

**CAPITAL, Hobart.** Population (1901), 52,385. Other towns are Launceston (pop. 24,318), Devonport, Ulverstone, Burnie, and Queenstown. Transmission of mails, approximate, 31 days.

#### VI.—WESTERN AUSTRALIA.

Includes all that portion of the continent west of 129° E. long., the most westerly point being in 122° 52' E. long., and from 32° 30' to 35° 8' S. lat. Its extreme length is 1,900 miles, and 1,000 miles from east to west, and its total area 975,920 square miles.

**Physical Features.**—Large portions of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north-west division or the Stirling Range (3,640 ft.) in the south-west. The greater part of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which consists partly of large areas of sand-dunes, partly of wide stretches of clayey soils. Long, straggling rivers, broken during the summer into a series of pools, cross the country as far inland as the hills extend, widening in many cases nearer the coast into large sea-estuaries. Of the area of Western Australia, which is equal to more than half that of European Russia, probably about two-thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so. Some 60,000 square miles at least are equally fitted for agricultural purposes, more especially for the production of wheat, wine, and fruit, and considerable areas are already under cultivation. Gold, coal, and other minerals in abundance are found in many parts, and wide stretches of land are covered with forests of great commercial value.

#### POPULATION.

| Year.            | Males.  | Females. | Total.  |
|------------------|---------|----------|---------|
| 1906 (Estimated) | 159,998 | 148,806  | 308,806 |
| 1917 ..          | 159,701 | 150,722  | 309,423 |
| 1918 ..          | 161,464 | 151,983  | 313,447 |
| 1919 ..          | 176,902 | 154,758  | 331,660 |
| 1921 (Census)... | 175,096 | 154,172  | 329,268 |

The apparent decrease in the male population after 1914 existed, of course, only in a technical sense, since it was mainly due to enlistment of volunteers for the war. The total number of men who enlisted in the State during the course of the war was 24,353, and of these 23,670 returned. The settlement of the soldiers in suitable occupations has been vigorously pushed on since the end of the war. The tide of immigration from the United Kingdom and elsewhere has again set in, and in view of the unlimited scope Western Australia offers for further settlement, the Government is doing its utmost to encourage it. It is confidently expected that a better knowledge of the great resources of this as yet very meagrely peopled part of the Empire will more and more

attract large numbers of suitable settlers from Great Britain and other populous countries, particularly as the Western Australian Government is again offering every inducement to the bona fide immigrant.

#### Natural Increase of the People.

| Year.      | Births. | Deaths. | Marriages. |
|------------|---------|---------|------------|
| 1916 ..... | 8,563   | 3,085   | 2,365      |
| 1917 ..... | 7,882   | 2,769   | 1,621      |
| 1918 ..... | 7,106   | 2,823   | 1,612      |
| 1919 ..... | 6,037   | 3,590   | 2,194      |
| 1920 ..... | 8,149   | 3,328   | 2,931      |

#### Religions.

There is no State aid to religions. At the Census of 1911 there were 109,435 persons belonging to the Church of England, 56,616 Roman Catholics, 34,328 Methodists, and 26,627 Presbyterians.

#### PHYSIOGRAPHY.

The coastal regions of the west and of the north are undulating, with an interior slope to the central desert of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the Leopold range into the Indian Ocean, and the Drysdale and Ord into the Timor Sea.

**Climate.**—The average temperature of Perth (lat. 32° S.) for the past 23 years was 65°, while the mean for the barometer for 36 years was 30.02 inches. There are wet and dry seasons, the former lasting from May to October. The total rainfall at Perth during 1920 was 37.02, during 1921 31.38, during 1922 27.85, during 1923 36.28, during 1924 20.21, during 1925 43.51, during 1926 35.16, during 1927 45.64, during 1928 39.56; during 1929 30.66, and during 1930 40.35; the average for the past 45 years being 33.75.

The climate is one of the most temperate in the world, especially in the south-western portion, where excessive cold is never and excessive heat very rarely known. The summer heat, which is mostly dry, with hardly any rainfall, is during the greater part of the hot season relieved by cool sea-breezes in the afternoon. The winters are rainy, but with occasional dry spells of perfect weather.

#### GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act, 1921; the Executive is vested in a Governor appointed by the Crown and aided by a Council of Ministers.

## THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 30 members elected for 6 years, and a *Legislative Assembly* of 30 members elected for 3 years by universal adult suffrage; the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.

*President of the Legislative Council, Hon.*

W. Kingsmill, B.A. .... £700

*Speaker of the Legislative Assembly, Hon.*

George Taylor ..... 700

## THE JUDICATURE.

There are magistrates' courts and general and quarter sessions, and a Supreme Court with a Chief Justice and three Puisne Judges.

*Chief Justice, Hon. Sir R. F. Macmillan ...* £2,000

*Puisne Judges, Hons. R. B. Burnside,*

J. A. Northmore, and T. P. Draper each 1,700

## EDUCATION.

*Education.*—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines and a Goldfields High School at Kalgoorlie, a modern school, and a University. The total amount expended on education during the year ended June 30, 1921, was £505,160 (including the University, £15,000).

It has been consistently the object of successive Governments to place within the reach of each child in the State every advantage of education, from the kindergarten to the university.

## FINANCE.

The revenue and expenditure and debt of the State for the 5 years ended June 30, 1917-1921, are stated as under:—

| Year. | Revenue.  | Expenditure. | Debt.      |
|-------|-----------|--------------|------------|
|       | £         | £            | £          |
| 1917  | 4,577,007 | 5,276,764    | 40,924,826 |
| 1918  | 4,662,536 | 5,328,279    | 42,304,001 |
| 1919  | 4,944,850 | 5,596,865    | 43,637,076 |
| 1920  | 5,863,501 | 6,531,725    | 46,822,003 |
| 1921  | 6,789,565 | 7,476,291    | 49,039,668 |

*Banking.*—There were, including the Commonwealth Bank of Australia, cheque-paying banks, formerly banks of issue, in the State on June 30, 1921, with total assets £16,362,224 and liabilities £12,823,922. The amount due to depositors in the State Savings Bank at June 30, 1921, was £5,245,227; in the School Savings Bank, £53,000; and in the Commonwealth Savings Bank the amount due to depositors in Western Australia on Dec. 31, 1920, was £1,776,604. The combined amounts due to State Savings Bank depositors and State School Savings Bank depositors, on June 30, 1921, averaged £17.72 per head of the population.

*War Funds.*—The public contributions in Western Australia to a variety of War Funds up to Dec. 31, 1920, totalled approximately £1,122,620, or between £2 12s. and £4 per head of the mean population during the war period.

## PRODUCTION AND INDUSTRY.

**Agriculture and Live Stock.**—Of the total area (664,522,800 acres) 1,804,999 acres were under crops in 1900-01, wheat for grain accounting for 1,775,675 acres; large areas of good wheat-growing land exist in the southern districts. The live stock included 849,803 cattle, 6,532,905 sheep, 60,581 pigs, 31,097 goats, and 178,664 horses. There were about 3,000 acres of vineyards.

**Land Settlement and Agriculture.**—It is only a few years since the immense capabilities of the State as one of the world's potential great wheat-producers were more generally realised. In those few years the area under wheat for grain has increased annually by leaps and bounds, the acreage in 1908 being only 279,609, whilst in 1926 it was 1,734,117. From 1916, owing to the war, a temporary retrogression has set in, the acreage in 1921 being 1,775,675. Fruit-growing, prior to the war, was rapidly creating a considerable export trade to foreign markets. Large numbers of English and other immigrants were then annually settled on the still unoccupied agricultural areas of the State. It is anticipated that, with the energetic policy of development now once more initiated by the Government, land settlement will progress even more rapidly than in former years, and that Western Australia will then absorb a constantly increasing stream of immigrants. A very large portion of the south-western division of the State, containing many millions of acres, is especially suitable for wheat-growing, whilst the hills of the Darling Range and many other portions of the State produce grapes and other excellent fruit in the greatest variety.

**Manufacturing Industries.**—There were on December 31, 1929, a total of 922 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed by them was 26,358, as against 18,799 in 1914, the highest number previously reached. The combined output of these establishments was computed at £10,286,732.

**Forestry.**—The forests are among the most extensive within the Commonwealth, and contain some of the very finest hardwoods in the world. Two of these, jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), have been largely exported, and, just prior to the war, their annual export value was over one million pounds. These two timbers are eminently suitable for every kind of constructional purpose and for use in all kinds of railway rolling-stock. They are already employed in these respects in Great Britain, India, South Africa, Egypt, and elsewhere. Their hardness and durability is remarkable, and the great size of the trees permits of beams and pieces of unusually large dimensions being obtained. For furniture and decorative purposes they are also extensively employed, the beauty of the grain when polished being equal to that of the best Honduras mahogany. Besides these trees the forests contain a wealth of hardwoods, one or other of them suitable for every purpose to which wood can be applied. The beauty of grain and delicacy of marking in nearly all of them recommend them to the furniture manufacturer. Sandalwood (*Santalum cynnorum*) is peculiar to the forests, and is exported very largely to the East, its essential oil being extracted locally. There are in the forests many

barks containing tannin. Some of these are exported, the trade in mallet bark prior to the war having been extensive. The forests are rich in gums and resins. An Act for their protection and management was passed in 1928, and a scheme is now being completed for the regeneration on scientific lines of cut-over areas.

**Minerals.**—The groups of the Coolgardie gold-fields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being constantly worked, the production of gold being 617,842 oz. in 1920, and 349,037 oz. in the first eight months of 1921. To the Coolgardie group belong the following gold-fields: North Coolgardie, Broad Arrow, North-East Coolgardie, East Coolgardie, and Coolgardie. The total amount produced in the State from 1886 to August 31, 1921, is 34,097,428 fine oz.; of this amount the greater portion was received at the Royal Mint, Perth.

Magnetic iron, lead, copper, and tin ores exist in large quantities, as also coal.

**Total Production.**—The total estimated value of Western Australian production during 1929 was £22,396,694, distributed as follows: Agricultural, £9,666,281; Pastoral, £4,614,546; Dairy, Poultry, and Bee-Farming, £243,719; Forestry and Fisheries, £1,363,972; Mining, £3,562,204; Manufacturing, £2,946,972 (value added to the raw material by the production of the industrial establishments).

**Industrial Legislation.**—Industrial legislation has for many years included industrial arbitration, with the result that wages are not subject to the frequent depreciation prevailing in the older countries.

**Trade.**—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The opening of the Trans-Australian Railway in Oct. 1927 has afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, beer, soap, machinery, ironmongery, clothing of various kinds, &c. The principal exports are of wool, gold, jarrah timber, silver, tin, copper ore, sandalwood, barks for tanning, pearls and pearl-shells, hides and skins, wheat, flour, fruit, &c. The principal exports for the year ended June 30, 1921, were:—Wool, £1,388,119; timber, £1,137,223; sandalwood, pearl shell, pearls, hides and skins, wheat, £2,930,179; and flour, £1,075,037.

During 1920-21 the total imports into Western Australia were valued at £14,839,242, including £3,411,884 from the United Kingdom, and £7,619,703 from other States of Australia. The exports totalled £11,816,856, including £6,328,778 to the United Kingdom and £5,338,415 to other States of Australia.

## TOWNS.

**CAPITAL, Perth.** Population (1921) of Metropolitan area, including Fremantle, 125,120.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. The King's Park (approximately 2000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty. Other towns are Fremantle (including suburbs, 25,523), Albany (4,000), Kalgoorlie and Boulder (over 19,000), Bunbury (about 4,000), Claremont (6,000), Geraldton (3,800), Midland Junction (5,000), and Northam (3,300).

Transmission of mails, approximate, 22 days.

## Territories.

## NORTHERN TERRITORY.

The Northern Territory occupies the centre of the Australian continent between  $12^{\circ}$ — $13^{\circ}$  East longitude as far as  $25^{\circ}$  South latitude, and its administration was taken over by the Commonwealth on Jan. 1, 1912.

The area is estimated at 527,600 sq. miles. The population on Dec. 31, 1912, was 4,761 (exclusive of aboriginals).

Part of the country is desert, but large portions of land are suitable for tropical and semi-tropical agriculture, and the Federal Government grants suitable areas rent free for the original settler's lifetime or for 21 years (whichever shall be longer). The staple industry is pastoral, and pigs and sheep thrive, while cattle and horses do well south of the 15th parallel. The chief grasses are Mitchell and Bindera. Many grants have been taken up, and a considerable area has been settled and improved. Extensive meat freezing works have been erected near Darwin, which will greatly enhance the value of locally bred cattle, which hitherto have been driven to other States for disposal. For the months of April to September the climate is delightful. From October to December it is hot and humid; from January to March is the wet season, when travelling becomes extremely difficult. There are thousands of square miles of first-class pasturage which will one day carry millions of sheep. The chief rivers are Victoria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable from 40 to 100 miles from their entrance for boats drawing 4 feet. Pearl fishing is carried on round the coast, the shell being of good quality. There are considerable mineral resources, gold, silver, lead and tin being indicated, and when communications are opened up, the industry will become important.

The only railway is from Darwin to Emungalan (200 miles). A further extension to the head of the Roper River (80 miles) will be proceeded with in the near future, the permanent survey having been completed. The policy of the present Government is to link up the Territory with the other States by means of a trans-continental railway.

Darwin, the seat of Government, occupies an elevated site 80 feet above high-water mark, overlooking Port Darwin, one of the finest harbours in Australia, and contains the offices of the Administrator and officials of the Territory. The cable owned by the Eastern Extension Company lands at Darwin from Singapore. The town is healthy and free from malaria. The Darwin Botanical Gardens are about  $1\frac{1}{4}$  miles from the town.

Administrator of Northern Territory, Frederick Charles Urquhart.

Government Secretary, R. McGregor Christie.

Director of Mines, T. G. Oliver.

Director of Land, H. M. Trower.

Acting Judge Supreme Court, His Honour Mr. Justice Herbert.

Special Magistrate, Major Gerald Hogan.

## PAPUA.

(British New Guinea.)

The total area of the island of Papua is about 525,000 sq. miles, with an estimated native population of 1,000,000. Of the total area in 1924, the N.E. portion (90,000 square miles, pop. 200,000) was a territory of the Common-

wealth, and the N.E. portion (90,000 sq. miles, pop. 200,000) was the German Colony of Kaiser Wilhelm's Land, while the W. portion (195,000 sq. miles, pop. 600,000) forms part of the Netherlands' E. Indies. An expedition of Imperial Australian troops took possession of the German territory (Kaiser Wilhelm's Land) in the north on September 24, 1914, and the former German possessions in Papua have been allocated to the Commonwealth. The area of the Commonwealth Territory of Papua is thus increased to about 160,000 sq. miles; estimated native population 300,000.

The island is the second largest in the world, and lies some 80 miles to the north of Queensland, between  $0^{\circ}$  and  $12^{\circ}$  S. lat. and between  $130^{\circ}$  50' and  $154^{\circ}$  30' E. long. Its greatest length is 1,400 miles, with a maximum breadth of 430 miles. The islands lying near Papua, some 200 in number, form part of the Territory.

The island of Papua was discovered in 1912, and was first claimed by the Dutch. The British portion was annexed by Queensland to the Empire in 1883, but it was not then ratified by the Imperial Government. A Protectorate was, however, proclaimed in 1884, on the guarantee of the Australasian Governments of £15,000 annually, to cover the cost of administration, and "British New Guinea" was annexed by the Crown in 1888.

The two largest rivers of the Territory are the Fly and the Purari. The land is mountainous generally, the highest point reaching 13,150 feet, and a large portion of the country consists of forest. The climate is favourable to the cultivation of all tropical products. The cultivated area is small. Tobacco is being cultivated and a factory is established at Moresby. Oil has been discovered, and the petroleum industry is likely to become important. The chief exports are copra, rubber, sisal hemp, gold and copper ore.

The ports of entry are PORT MORESBY, Samarai, Daru, and Bonagali.

There is an Executive Council of 6 members, who, with 3 non-official members, form also the Legislative Council.

Administrator, Brigadier-Gen. Evan A. Wisdom, C.B.

Lieutenant-Governor of Papua, John

## NORFOLK ISLAND.

This island is about 90 miles from Sydney and 400 miles from New Zealand. It is about five miles in length, by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of  $65^{\circ}$  and an annual rainfall of 55 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1826. The population in April, 1921, was 717.

Administrator, Maj.-Gen. J. W. Parnell, C.M.G. President, Exec. Council, C. E. Robinson.

## PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 34° 22' and 47° 18' South latitude and 162° East longitude - 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

**Geographical.**—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers, the Tasman (18 miles by 1½) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

**Meteorological.**—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages:—North Island, mean temperature 56° F., rainfall 48 in. (days with rain 159); South Island, mean temperature 52° F., rainfall 43 in. (days with rain 150).

## GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by a Council of Ministers, with a Legislature of two houses.

## THE LEGISLATURE.

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for 7 years only), at present consisting of 36 members; and a House of Representatives consisting of 80 members elected for 3 years. Four of the members are Maoris elected by the natives. Women are entitled to vote and to be elected Members of the House of Representatives (Women's Parliamentary Rights Act, 1919). Members of the Upper House receive £350 per annum and of the Lower House £500 per annum, in each case with travelling expenses and deductions for non-attendance.

**Speaker of the Legislative Council, Hon. W. C. F. Carnarross**..... £800  
**Speaker of the House of Representatives, Hon. Sir F. W. Lang**..... 1,100

## THE JUDICATURE.

The judicial system is similar to that of England, with magistrates' courts and quarter sessions, and a supreme court with a Chief Justice and 7 puisne judges.

**Chief Justice, Rt. Hon. Sir Robert Stout, P.C., K.C.M.G., LL.D.**..... £2,250  
**Puisne Judges, Hon. W. A. Sim, T. W. Stringer, J. H. Hosking, A. L. Herdman, Sir J. W. Salmond, F. V. Frazer (President of Arbitration Court), J. R. Reed, C.B.E., K.C., A. R. Adams**...each 2,000

In 1920, 28,999 civil cases were tried in Magistrates' Courts, while summary convictions in criminal cases were 35,517. In 1920 convictions (or sentences) in Supreme Courts were (Europeans) 328. Civil cases to number of 420 were tried, judgment being entered for a total amount of £96,027.

## POLICE.

On March 31, 1920, the strength of the Police Force was 926 of all ranks, equivalent to 1 for every 1,325 of the population. Average cost of police protection per inhabitant was, in 1919-20, 4s. 11½d.

## LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road and harbour boards. Electors are adult ratepayers of both sexes.

Revenue of local bodies, 1919-20 ..... £7,630,795  
 Indebtedness, March 31, 1919-20 ..... 26,492,420

## PASSPORTS.

With certain exceptions, no person over 15 years is permitted to land unless in possession of a passport issued by a competent British authority.

## DEFENCE.

## Army.

The New Zealand Defence Forces consist of the Permanent Force, the Territorial Force and the Senior Cadets.

Units of the N.Z. Permanent Force are the New Zealand Staff Corps, the Royal New Zealand Artillery, the New Zealand Permanent Staff, the New Zealand Army Ordnance Corps and the New Zealand Army Pay Corps. These are

responsible for the training of all branches of the New Zealand Forces and for all administrative matters connected therewith. The Territorial Force consists of 9 regiments of Mounted Rifles; 20 batteries of Artillery; 2 Depôts of Engineers (Field); 2 Depôts of Engineers (Railway); 2 Depôts Corps of Signals; 2 Brigades of Infantry; 2 Depôts Army Service Corps; and 2 Depôts Medical Corps. The Dominion, for purposes of defence, is divided into 3 Commands, each of which produces one-third of the above Units. The Force is capable of producing, on mobilization, 1 Division and 3 Brigades of Mounted Rifles, and also produces the machinery for the duplication of this Force, and the provision of the necessary requirements to maintain it in the Field. The Senior Cadets are re-organised in Battalions and receive physical and elementary military training. There are a large number of Rifle Clubs in the Dominion established for the encouragement of rifle shooting. Military training is compulsory on all male citizens between the ages of 14 and 25; in the Senior Cadets from the age of 14 to 18, and in the Territorial Force from the age of 18 to 25, and in the Reserve from the age of 25 to 30.

During the South African War, New Zealand despatched 10 Contingents, totalling 6,500 men, to the assistance of the Imperial Forces in South Africa. On the outbreak of the Great War, the Dominion contributed a Force which captured and garrisoned German Samoa, and an Expeditionary Force for service in Europe. The latter force was engaged in Egypt and Gallipoli, and being subsequently expanded to a Division and a Brigade of Mounted Rifles, continued to operate on the Western Front and in Palestine until the termination of hostilities. During this period of service the Expeditionary Force absorbed 100,000 men, and 10,000 more were ready for embarkation or under training when the Armistice was signed. Seventeen thousand of the Dominion's soldiers lost their lives on service, and the cost of this Force to the Dominion has exceeded £79,000,000. The New Zealand Troops established a very high reputation for their gallantry and general behaviour under all circumstances. The tremendous amount of transport work involved in the conveyance of the Forces to Egypt, France, Britain, Gallipoli and Samoa was carried out with extraordinary success, not one New Zealand Transport having been lost while conveying troops.

#### Navy.

In 1909 New Zealand presented the battle-cruiser *New Zealand* to the Imperial Government.

The Naval Defence Act, 1913, provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a prescribed period of not less than two years, members on discharge to be drafted into the New Zealand Royal Naval Reserve for such period as may be prescribed for service only in time of war: the ships and personnel forming the Force to pass under the control and to be at the disposition of the Imperial Government in time of war. A commencement was made with the formation of a New Zealand Division immediately prior to the war, when H.M.S. *Philomel* was commissioned with ranks and ratings lent from the Royal Navy to serve as a training ship for the formation of a small Naval Force. The *Philomel* was employed under the orders of the British

Admiralty throughout the war and no opportunity was afforded for the commencement of a scheme of training. This vessel has now been placed in commission again. In 1919 Admiral of the Fleet Viscount Jellicoe of Scapa, G.C.B., O.M., G.C.V.O., visited New Zealand in H.M.S. *New Zealand* and presented his report, making recommendations and suggestions for the Naval Defence of the Dominion. In 1920 H.M.S. *Chatham* was presented to New Zealand by the Imperial Government and was commissioned on 1st October with officers and men of the Royal Navy. The *Chatham* flies the broad pennant of Commodore Alan G. Hotham, C.M.G., R.N., appointed in command of that ship, as Commodore Commanding the New Zealand station, and as Naval Adviser to the New Zealand Government. A commencement was made with the recruiting of New Zealand boys and youths for training as seamen and stokers in May, 1921, fifty-six of whom had been entered by the middle of July. A Naval Board was constituted by Order-in-Council of the 14th March, charged with the control of all matters relating to the Naval Forces, upon the policy directed by the Minister, and vested with the executive command of the Naval Forces: the Board to be composed of the Minister of Defence (President) and the following members: the Commodore Commanding New Zealand Station (1st Naval Member); the Chief Staff Officer to the Commodore (temporarily, as and Naval Member); the Secretary to the Commodore Commanding (Secretary to the Board). By Order-in-Council of the 20th June, 1921, it was provided that the ships and personnel comprising the New Zealand Naval Forces shall be described respectively as forming and belonging to "The New Zealand Division of the Royal Navy," which shall be the official designation of the Force. H.M.S. *Veronica* (Sloop) was commissioned on 23rd March, 1920, as an Imperial unit for service on the New Zealand station.

*Banking.*—At the end of 1920 there were six banks of issue doing business, two of which were New Zealand banks. Total assets (average of four quarters of year), £61,361,827; liabilities,

£57,828,459; value of notes in circulation, £7,828,459.

Post-office and private savings banks had, at the close of 1919, 719,985 depositors, having £41,944,660 to their credit.

### EDUCATION.

The State system of education is free, secular, and compulsory. There were (December, 1919) 2,400 public primary schools, with 5,606 teachers and 196,099 scholars; there are also (Dec. 1919) 300 private schools, with 26,237 scholars, and, in addition, 134 schools for the Maoria. The higher education of boys and girls in the cities and large towns is carried on in 33 endowed colleges and grammar schools. The University of New Zealand (to which are affiliated Auckland University College, Victoria University College, Canterbury College, and the University of Otago, the four colleges having 2,961 students in 1919) has power to confer degrees.

### PRODUCTION AND INDUSTRY.

**Agriculture and Forestry.**—The total area of the Dominion (excluding annexed and outlying islands) is 66,101,760 acres, and 43,473,079 acres of this were in occupation in 1919, this acreage representing 81,592 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1919-20 was 139,611 acres, giving a yield of 4,559,934 bushels. An area of 179,800 acres of oats was threshed, the yield totalling 6,067,866 bushels; while 328,174 acres were converted to chaff, hay, or ensilage. Other acreages were: barley, 22,907; rye-grass, 39,350; and potatoes, 24,933. An area of 542,310 acres was sown in turnips. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

**Live Stock.**—The cattle in 1920 numbered 3,101,945; sheep, 23,919,970; pigs, 266,829; and horses, 346,407. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

**Minerals.**—Coal-mining is one of the largest industries, the output in 1919 being 1,847,848 tons, the approximate total output to the end of 1919 being 30,040,688 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of iron sand, has been found in Taranaki, and in the form of brown hematite at Farapara, near Nelson.

### EXTERNAL TRADE.

The total imports and exports of the Dominion are valued as follows, for the 5 years 1916-20:—

| Year.   | Imports.    | Exports.    | Total.      |
|---------|-------------|-------------|-------------|
| 1916... | £26,330,283 | £33,286,937 | £59,616,220 |

### COMMUNICATIONS.

**Railways.**—In March, 1921, there were 3,009 miles of Government railway lines in working order, and more under construction; and 137 miles of private lines, together with an excellent coaching system. The number of passengers carried in 1920-21 was 15,315,640 (exclusive of 464,691 season ticket holders), while goods carried amounted to 6,487,279 tons. Revenue and expenditure were £6,908,531 and £5,636,601 respectively.

**Shipping.**—During 1920 the vessels entered inwards numbered 744 (tonnage, 2,062,370), and those entered outwards 707 (tonnage, 1,976,255), exclusive of coasting vessels.

**Posts and Telegraphs.**—The annual postal circulation was (1919) 254,436,105 letters and postcards, 35,498,263 newspapers, 44,320,385 books and packets, and 6,193,475 parcels, and the work is effected by 3,315 post-offices. There are 13,728 miles of telegraph line, with 51,027 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 14,957,615.

### TOWNS.

#### CAPITAL, WELLINGTON, in the North Island.

The population of the chief cities and towns at the Census, 1921, was as follows:—Wellington,\* 107,428; Auckland,\* 127,740; Dunedin,\* 73,837; Christchurch,\* 104,272; Invercargill,† 19,058; Napier,† 16,921; Gisborne,† 14,477; Palmerston North,† 16,863; Nelson,† 20,622; Timaru,† 16,413; Wanganui,† 23,586; New Plymouth,† 24,623; Grey Valley Boroughs,† 8,349; Hamilton, 11,439; and Hastings, 9,262.

† Suburban area.

**THE ISLANDS OF NEW ZEALAND.**

**NOTE.**—The following islands form part of the Dominion proper:—*North Island* and adjacent islets; *South Island* and adjacent islets; *Mercer Island* and adjacent islets, and *Chatham Islands*, between 43° 30' S. lat. and 175° 40'–177° 15' W. long. Chatham Islands have a population of 209 Europeans and 245 Maoris and half-castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847:—*The Three Kings* (discovered by Tasman on the Feast of the Epiphany), in 34° 0' S. lat. and 174° 8' 8" E. long. (uninhabited). *Auckland Islands*, about 200 miles south of Bluff Harbour, in 50° 32' S. lat., and 166° 13' E. long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (uninhabited). *Antipodes Group* (49° 41' 15" S. lat., and 178° 43' E. long.) uninhabited, and *Bounty Islands* (47° 43' S. lat., 179° 0' 30" E. long.) uninhabited.

The following islands have been annexed to New Zealand:—

*The Kermadec Group*, between 29° 10' to 31° 30' S. lat., and 177° 45' to 179° W. long., includes Sunday, Macaulay, Curtis Islands, and L'Esperance, and some islets. The group is uninhabited.

*Cook Islands*, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Manake, Mitikaro, The Herveys (Manuae and Aoutu), and Takutea. The population at the Census of 1916 numbered 12,777, all except 265 being Natives. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, pearl-shell, and hats (Niue). The trade is chiefly with New Zealand and the United States of America. The exports (1919) were valued at £163,706, and the imports at £164,708. Rarotonga is the chief island, with a native population of 2,253, and a European population of 211. The government is administered locally under the direction of New

Zealand. The Federal Council of the Cook Islands is under the direction of the Resident Commissioner at Rarotonga. The six Arfiks of Rarotonga are of equal rank and are all members of the Federal Council. Rarotonga is a place of call for the mail steamers between Sydney, N.S.W., and Wellington, N.Z., and San Francisco, U.S.A.

*Resident Commissioner, Rarotonga, J. G. L.*

*Hewitt* ..... £800  
*Resident Comm., Niue, J. C. Evison* ..... 500  
*Niue (or Savage) Island; Palmerston Island;*  
*Penrhyn (or Tongareva) Island; Maua Niki*  
*Island; Rakaanga Island; Fūkāpuka (or*  
*Danger) Island, and Suwarrow Island.*

The Mandated Territories are:—

*Western Samoa*, consisting of the islands of Savaii, Manono, Apolima, Upolu, Fanuatapu, Namua, Nuntele and Nuuua (the remaining islands of the Samoan group belonging to the U.S.), have a total area of 1,090 square miles and a population estimated at 29,500. The largest islands are Savaii (660 square miles) and Upolu (340 square miles). Upolu contains the harbours of Apia and Saluafata, of which the former is the capital. In 1899 a disastrous tidal wave wrecked three U.S.A. warships and the "Eber" and "Adler" of the German Navy, *H.M.S. Calliope*, of the British Navy, effecting its escape. The disaster is recorded in "A Footnote to History," by R. L. Stevenson, whose home was at Valima (near Apia), where also he is buried. The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mormons). Coco-nuts (copra), coconuts and rubber are the chief products of the islands, and *Nauru Island*, just South of the Equator, was captured by an Australian Expedition in 1914, and is administered by the United Kingdom, the Commonwealth of Australia and the Dominion of New Zealand. The island has a population of about 1,000. There are valuable deposits of phosphates on the island.

**THE UNION JACK CLUB, Waterloo Road, S.E. 1. Tel.: Hop. 2511.**

*Patron-in-Chief:* His Majesty the King.

*Patroness-in-Chief:* Her Majesty the Queen.

**Patrons:**

H.R.H. The Prince of Wales, K.G., etc.;

H.R.H. The Duke of Connaught, K.G., etc.

*President:* Colonel Sir Edward W. D. Ward, Bt., G.B.E., K.C.B., K.C.V.O.

*Vice-President:* Colonel Sir Walter E. Lawrence, Bt., G.C.I.E., G.C.V.O., C.B.

*Hon. Treasurer:* Sir G. J. Marjoribanks, K.C.V.O.

*Comptroller of Club:* Brig.-General E. F. O. Gascoigne, C.M.G., D.S.O.

This is one of our great National Institutions, where Sailors, Soldiers and Airmen can go when on leave or passing through London; a place where they may deposit their kit and valuables, where they may obtain at moderate charges good meals and comfortable bedrooms to themselves, and where they find the usual amenities of a club, including Library and Writing Room, Baths, Barber's Shop, and also a Club Shop in which articles of everyday use, from clothing to cigarettes, can be purchased, under their own roof and feel really at home.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and other campaigns, and was opened on July 2nd, 1907, by His late Majesty King Edward VII. Membership is limited to those serving on the

Active List of the Regular Forces, below the rank of Officer, but during the War all mobilised men, including those from the Overseas Dominions and Allied Countries, were made Honorary Members. The Club is managed by a Council and General Committee, which includes representatives elected by the members. Already firmly established before 1914, the Union Jack Club was an inestimable boon to Service men in the Great War, during which period alone sleeping accommodation was provided for no fewer than 1,121,328 men and 3,054,809 meals were served, whilst many millions of whom no record was kept passed through its doors for rest and refreshment, many of them straight from the trenches in France. Open day and night, the capacity of the Club was taxed to the uttermost.

Work was commenced late in 1906 on a considerable extension of the Club with funds raised in all parts of the Empire to commemorate the services of our gallant fighting forces in the Great War of 1914–18 and to provide the increased accommodation which is so much needed. By permission of His Royal Highness, the new building will be known as "The Prince of Wales's Wing."

### PHYSIOGRAPHY.

**Boundaries.**—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, i.e., from 34° 50' – 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

**Relief.**—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwaarte Bergen* and *Lange Bergen* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nieuweveld* to the north is the Great Karoo Plateau, which is bounded on the east by the *Sneeuberg*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensberg* (11,000 feet), between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magalies* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooë Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the *Drakensberg* and the coast, the interior rising in terraces as in the southern provinces.

**Rivers.**—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the *Drakensberg* and flowing into the Atlantic between the Protectorate of South-West Africa and the Cape of Good Hope. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

## HISTORICAL SKETCH.

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

*Delville Wood*.—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France during the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

## GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively.

The Union Government is seized of all State property, and the Railways, Ports, Harbours, and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

**THE LEGISLATURE.**

The Senate consists of 40 members. For ten years after the establishment of Union eight are nominated by the Governor-General in Council and 32 are elected, eight for each Province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy will be filled by the choice of the Provincial Council in respect of whose Province a vacancy occurs.

The House of Assembly consists of 134 elected members, 51 of whom represent the Cape of Good Hope, 17 Natal, 49 Transvaal, and 17 the Orange Free State. Members of both Houses must be British subjects of European descent.

**LOCAL GOVERNMENT.**

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator, with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly, unless that number is less than 25 (as in the cases of Natal and the Orange Free State), when the number is 25. Each Council exists for a period of three years. Direct taxation is permitted for Provincial purposes, and legislation is authorised on certain specified subjects.

**DEFENCE.**

The South Africa Defence Act, 1922, became law on June 24, 1922. This Act provides

for the establishment of Defence Forces comprising (1) a Permanent Force; (2) a Coast Garrison Force; (3) a Citizen Force; (4) a Royal Naval Volunteer Reserve; and (5) Special Reserves.

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 21 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number. Citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a rifle association. Provision is also made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas where facilities can conveniently be arranged.

The Permanent Force—South African Mounted Riflemen—was established on the 21st April, 1923.

The Union has been divided into 15 Military Districts. To each Military District has been allotted various Units of different Arms, to which the citizens entered for Peace Training in their 20th and 21st years are posted. The first Training Camps began in September, 1923.

A cadet organization is also in existence, and Rifle Associations have been formed.

**EDUCATION.**

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils." For practical purposes it has been provisionally determined that all post-matriculation instruction shall be deemed to constitute higher education. The Department of Education, under the Minister, is therefore concerned with:—

(1) The University of South Africa, established April, 1922, as successor to the University of the Cape of Good Hope, with the following constituent Colleges—(a) Rhodes University College, Grahamstown (1904). (b) Hugenoot College, Wellington (1907). (c) Grey University College, Bloemfontein (1920). (d) Transvaal University College, Pretoria (1920). (e) Natal University College, Pietermaritzburg (1909). (f) The University of Cape Town (1922—in succession to the South African College—1829). (g) The University of Stellenbosch (1922—in succession to the Victoria College). (h) The University of the Witwatersrand (1922—in succession to University College, Johannesburg—1920). The Department is further charged with the Teachers' First Class Certificate examinations.

The total number of students at these Colleges in 1920 was 2,947. The State expenditure on higher education in 1920 was £120,271.

Provision is made on the Vote of the Department of a grant-in-aid to the Potchefstroom University College (37 matriculated students in 1921) and to the South African Native College at Alice, Cape Province, an institution for the higher education of natives, which was formally opened in February, 1924, and has present accommodation for 48 students.

**Primary Education and Education other than Higher Education.**—The central direction of public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cape Province practically all the schools are State-aided. In Natal they are partly State-schools, and partly State-aided. In the Transvaal and Orange Free State they are in the main State-schools. In all Provinces primary education is free.

**Number of Schools in the Union in 1919.**—For white scholars, 4,752; for coloured scholars, 3,046; total, 7,798.

**Number of Scholars and Teachers in 1919.**—White scholars, 292,682; coloured scholars, 221,783; total, 514,465. Teachers, 18,689.

**Expenditure from State Funds in 1919.**—Cape, £1,679,688; Natal, £520,084; Transvaal, £1,655,287; Orange Free State, £675,375; total, £4,530,534.

In all Provinces Normal Colleges and other institutions for the training of teachers are maintained by the Education Departments.

**Superintendent-General of Education, Cape,** W. J. Viljoen, M.A., Ph.D.

**Supt. of Education, Natal,** H. R. Dukas.

**Director of Education, Transvaal,** J. E. Adamson, M.A.

**Director of Education, Orange Free State,** C. F. Schmidt, B.A.

### UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of Railways and Harbour Administration) for the four years ended March 31, 1920, are stated as under:—

| Year           | Revenue.   | Expenditure. |
|----------------|------------|--------------|
|                | £          | £            |

|          | £158,486,960 | £15,477,858    |

### PROVINCIAL FINANCE.

Prior to the passing of the Provincial Relations Act the four Provincial Administrations (Cape of Good Hope, Natal, Transvaal, and Orange Free State) received no revenues beyond the

amount voted by Parliament by way of subsidies for the performance of the services and duties assigned to them. On the passing of the Act (April 1, 1913) certain revenues were transferred and assigned to the various provinces, and, in addition, subsidies were voted by Parliament equal to half the normal or recurrent expenditure. The Cape Province receives an additional amount equal to one-half the expenditure by local bodies; Natal and Orange Free State Provinces receive additional grants of £100,000 each; and Natal receives a special grant in lieu of trading and liquor licences payable to local authorities.

The ordinary Revenue and Expenditure for the five years ended March 31, 1920, were as follows:—

| Financial Year. | Revenue transferred or assigned | Subsidies | Total Ordinary Revenue. | Total Ordinary Expenditure. |
|-----------------|---------------------------------|-----------|-------------------------|-----------------------------|

**Manufactures.**—The development of local industries has been most marked during the last three years, the scarcity of overseas supplies, with the consequent increase in prices, having served as a very effective measure of protection, under which enterprise has flourished to a degree previously unknown. New industries have sprung up in the principal centres of trade, and existing industries have largely extended their operations. From the recently published returns of manufactures in the Union, the total output during the year 1917-18 was £60,806,910 sterling; 1918-19, £70,934,098; and 1919-20, £92,913,844. Amongst the new industries which have been established during the period of the war may be mentioned the following:—Wattle extract; industrial alcohol (motor fuel) from molasses; calcium carbide; sulphate of ammonia; bottle-making; starch from maize; iron smelting (still in the initial stage); arsenic production; detinning of scrap tin; copper manufacture, &c. As indicating the production during 1919-20 of certain specified industries, the following figures may be of interest:—

Silver.

There are no silver mines in the Union. The output, valued at £245,871, represents silver contained in gold bullion and base metal ores.

Copper.

(Tons of 2,000 lb.)

2,288 tons of matte and concentrates, valued at £163,122, were shipped from the Transvaal, and 7,892 tons of matte and ore, valued at £225,257, from the Cape. The figures for 1919 are 4,620 tons (£226,726) and 276 tons (£17,428) respectively.

Tin.

(Tons of 2,000 lb.)

2,452 tons of tin concentrates, valued at £433,366, were shipped from the Transvaal, and 11 tons, valued at £2,324, from the Cape. The Union figures for 1920 are 2,463 tons, valued at £435,680.

Other Minerals.

The value of the Union's production for 1920 of other base minerals, such as asbestos, graphite, magnesite, lead, &c., was £153,177, and of miscellaneous products, such as bricks, cement, pottery, &c., £1,358,340, compared with £95,072 and £1,076,364 respectively for 1919.

EXTERNAL TRADE.

The total value of the Imports and Exports in the six years 1915-1920 (exclusive of specie) was as follows:—

### COMMUNICATIONS.

**Railways.**—The first railway in South Africa was commenced in April, 1859, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey. This was very ably followed by Natal, who started the construction of a line running from Durban. Another two lines finally linked up at Heidelberg in 1895. The Cape line was opened for public traffic to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynberg was opened to traffic in 1864. Little progress was however made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on the Jan. 2nd, 1893, and in 1896 Natal followed by acquiring the railways in that colony. Increased working at once took place, and the construction of four lines was pushed inland from Cape Town,

Durban, Port Elizabeth, and East London. Bloemfontein was reached in 1890, and two years later a line to Germiston linked up with the system already established in the Transvaal.

The total open mileage of Government-owned lines at the end of March, 1920, was 9,542 miles (comprising Cape 4,254, Orange Free State 1,322, Transvaal 2,650, and Natal 1,302), of which 5,561 miles are 3 ft. 6 in. gauge and 391 miles 2 ft. gauge. The capital expenditure on Government railways up to March 31, 1920, amounted to £96,408,435. The gross earnings for the year ending March 31, 1920, were £19,169,786 and the net loss, after payment of interest, £559,941. Working expenditure (excluding renewals) amounted to £13,651,836, or 71·2 per cent. of the gross revenue, as compared with £10,239,275, or 67 per cent. of the gross revenue for the previous year.

**Posts and Telegraphs.**—On March 31, 1920, there were in the Union 2,684 post and telegraph offices open. 340,069,444 letters and cards, 157,761,292 newspapers, books, and circulars, 9,607,676 parcels, 6,049,992 registered articles, 29,016,780 official letters and other articles, and 7,624,423 telegrams were received and despatched during the year ended March 31, 1920. The number of money orders issued during the year ending March 31, 1920, was 444,060, while 425,881 were paid; 3,347,766 postal orders were issued, and 3,002,910 paid. The revenue of the post and telegraph department was £2,369,627, and the expenditure £2,367,362; the revenue of the telegraph and telephone service being £908,872, and the expenditure £978,819; 12,822 miles of telegraph line, carrying 43,932 miles of wire, were open, and 7,603 miles of telegraph-telephone wire. The number of depositors in the Government Savings Bank on March 31, 1920, was 307,486, the amount to their credit being £7,079,789.

**Shipping.**—In 1920, 3,732 vessels (9,762,955 net tons) entered and 3,685 vessels (9,778,493 net tons) cleared at the ports of the Union of South Africa.

### RAILWAYS AND HARBOURS BOARD.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board. The constitution of the Board at date is as follows:—

**Chairman,** Hon. J. W. Jagger, Minister of Railways and Harbours.

**Members,** Hon. T. Orr, C.M.G., The Hon. J. F. B. Risak, Sir A. Stockenström, Bart.

**Secretary,** G. W. Pilkington.

#### Chief Officers.

**Gen. Manager,** Johannesburg, Sir W. W. Hoy, C.B.  
**Acting Asst. do. and Chief Rly. Storekeeper,** Johannesburg, R. B. Gettiffe.

**Acting Asst. do., Johannesburg,** R. R. Perrott, D.S.O.

**Asst. do., Bloemfontein,** J. W. Carr, D.S.O.

**Asst. do., Cape Town,** H. Salmon.

**Asst. do., Durban,** J. R. Moss, M.L.C.E.

*Chief Civil Engineer, Johannesburg, R. C. Wallace, A.M.I.C.E.*

*Chief Mechanical Engineer, Pretoria, D. A. Hendrie.*

*Chief Accountant, Johannesburg, G. A. Reid.*

*Chief Railway Storekeeper, Johannesburg, R. B. Gettcliffe.*

*Catering Manager, Johannesburg, A. H. Simmons.*

### South-West Africa.

Administered under Mandate as an integral part of the Union of South Africa.

*Administrator, Gijssbert Reitz Hofmeyr, Esq., C.M.G.*

*Secretary, J. F. Herbat, Esq., C.B.E.*

SOUTH-WEST AFRICA lies between S. lat. 17° 35' and the Orange River. There is in addition a narrow strip lying between 18°-18° 30' S. lat. extending from 21° to 25° E. long. This is known as the Caprivi Zipfel, and gives access to the Zambesi river. The estimated area of the country is 322,440 square miles, and the population of the civilised portions amounts to 102,823, of whom 19,147\* are Europeans. In these figures no account is taken of the Ovambo natives on the Northern border, nor of the Bushmen and other tribes in the outlying portions of the country, such as the Kaokoveld, Sandveld, and Kalahari. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. The country between these mountains and the coast is barren desert except towards the North, and is known as the Namib. Towards the East from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau. The Northern and Southern boundaries are the Okavango and Cunene, and the Orange Rivers, all perennial streams of considerable volume, and on the Orange are the *Great Falls*, twice the height of Niagara. All the other rivers in the country are dry except occasionally in the rainy season, but in most of them water can always be obtained at suitable places by sinking a shallow well. Of these the most important are the Kuiseb, Swakop, Omaruru, Ugab, and Hoarusib in the West, Great and Little Fish Rivers in the South, the Elephant, Black and White Nosob in the South-East, and in the North are broad sandy beds named by the natives Omurambas. The townships are dependent almost entirely for their water on wells or springs. At such places as Windhoek and Grootfontein in the latter give a strong supply. Along the Auob River, in the Gibeon District, artesian water has been discovered in such quantity as to have converted what was formerly a dry river bed into a stream running for 70 miles before it disappears into the sand. Sink-hole lakes occur in the "Kart" region extending from Grootfontein to Outjo. The Etoscha Pan, which lies across Lat. 19 and its intersection with Long. 28, and is about 70 by 40 miles in extent, is a geographical feature of great interest. In the summer during the rainy season it sometimes becomes filled with water partly from the Cunene River, 200 miles away, which then overflows its banks. In the winter it is dry and is frequented by game of all

kinds in large numbers. Except by means of pumping, the waters of the Orange River are not available for agricultural purposes so far as South-West Africa is concerned, as the stream flows in a deep valley with precipitous sides and can only be crossed at one or two places. In 1919, Professor E. H. L. Schwartz, F.G.S. (Professor of Geology at Rhodes University College, Grahamstown), propounded a scheme for making permanent use of the waters of the Cunene by building across it a small dam which would ensure that the Etoscha Pan was continuously filled. His scheme also embraced the Okavango, most of the waters of which at present drain away into the Zambesi, but which in former times ran into Lake N'gami and the Makalakari Lake, both situate in the Bechuanaland Protectorate. He advanced the theory that if these waters are turned to their original purpose the whole of South Africa will benefit by increased rainfall. Among the mountain features of the country, which is geologically of great interest, are the Chaukaib (3,500 ft.) near Luderitz, the Khomas Highlands (6,000) near Windhoek, the Onyati (7,198), 40 miles N.E. of Windhoek, the Anas (6,500), just south of Windhoek, the highest peak of which is the Molteblikk (8,148 ft.), the Omatako in the North (8,790 ft.), the Gansberg (7,662) in Great Namaqualand, the Krongo, the Waterberg, the Brandberg and many others, including the large extinct volcano near Berseba named Gelsi Gubib. The climate is dry. Rain falls only in the shape of thunderstorms and in the later summer months. The actual rainfall varies from nothing at the coast to 4 inches in the southern portion of the interior and so in the northern. Very little agriculture can be undertaken, and except at one or two places such as on the Auob river and in the Grootfontein neighbourhood, few cereals are grown. Apart from mining the staple industry of the country is stock raising, and it is remarkably well suited for this; in the South for small stock and in the centre and North for cattle. Horse breeding is also undertaken successfully. Except in the desert the veld is for the most part of the thorn-bush type so prevalent in many parts of North, East and South Africa. After the annual rains grass of good food value grows plentifully, and when ripe retains its nutritive qualities as hay for some three years, even though remaining in the soil. In the far North palms and some useful trees are to be found. Though somewhat hot in summer, in winter the climate is magnificent. At Swakopmund, owing to the influence of the Benguela current, the temperature varies but little throughout the year, and this town compares not unfavourably with any other watering place in South Africa. The principal source of revenue lies in the diamond fields of Luderitz. The existence of diamonds in this area was discovered on April 12th, 1908, by a Cape coloured boy who had formerly worked in the Kimberley mines, and they are now worked in considerable quantities. In 1920 the output was 665,423 carats, valued roughly at two and a half millions. About half of this goes to the Administration as revenue. Recently all the important German companies were bought out by the Consolidated Diamond Mines, Limited, a company with its headquarters in Capetown, and in which various Johannesburg, British and American financiers are interested. The deposits lie on or near the surface, and working is easy,

\* 1919 preliminary and unaudited figure of Census, 2/5/20.

save for the absence of water and fuel. Electricity is furnished from a central station at Luderitz. An electric railway has been built to serve the fields and runs as far as Bogenfels, 70 miles to the South. Copper mining is also carried on to a considerable extent, the principal mine being at Taumeb in the North, and producing about 5,000 long tons a month. Game abounds throughout the whole country. Guineafowl are to be found practically everywhere, and there are many other game birds, and every variety of small buck and also kudu and gemsbok exist throughout the land, while in certain places hartebeest, wildebeeste and eland run in considerable numbers. The species of lesser bustard known as Ruppell's korhaan is believed only to be found in this territory. In the less frequented parts of the northern portion of the country elephant, rhinoceros and giraffes exist, and on the Cuene and Okavango many varieties of game are met with.

The native races are:—In the South, Hottentots. In the centre, Hereros and Bergdamaaras, with the exception of the Rehoboth district which is occupied by a mixed race known as the Bastards; and in the North, Ovambos. To the North and East there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokoveld (the North-Western area) is very scantily inhabited by Hottentots and Ovatyimbas, and contains no white inhabitants with the exception of a few trek Boers from the Boer Settlement in Angola. It is very mountainous, and in many places well supplied with water.

The Administration of the country is vested in the Government of the Union of South Africa by mandate, and is actually exercised by the Governor-General, who has, however, delegated most of his powers to an Administrator appointed by the Union Government. The seat of the Administration is Windhuk, which lies practically in the centre of the country and is 5,390 ft. above sea level. The Territory is divided into 17 Districts ruled over by Magistrates as the representatives of the Government. The Territory of Walvis Bay, which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South-West Africa, and its magnificent harbour will undoubtedly in the future prove of great benefit. The only other harbour which can be made use of is at Luderitz. A regular service of steamers from Capetown to these two ports has now been in existence for some time, as also a monthly service direct from Rotterdam of passenger and cargo boats. The system of administration is at present somewhat autocratic in form, though subject to control from the Union and indirectly by the Union Parliament. There is no Parliamentary representation in the country, but an Advisory Council has been appointed to assist the Administrator in his task of governing the country. It consists of six members, representatives of all classes and interests in the country, and one is specially appointed on behalf of the natives. Among other industries than those already referred to are the export of fish, seal-skins, guano, horns, hides, wool, ostrich feathers, marble, lead and other ores. A brisk trade with the Union has sprung up in slaughter cattle, and a scheme for the establishment of Cold Storage with a view to creating an export trade with Europe in meat is under consideration. The

country is sparsely inhabited by Europeans, and large tracts of Crown land are available on easy terms for settlement by persons of moderate capital as farmers.

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 344 miles), comprises:—

**Census, 1918 (whites only)** 121,931 (62,745 males, 59,186 females).

In 1920 the European births registered numbered 3,256, the deaths 1,446, and the marriages 1,354. The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour.

**Education.**—A University College has been founded at Pietermaritzburg, and there are 4 Government high schools, a preparatory school, 179 primary schools for white children, 1 art school, 1 agricultural and trades school. There are also 2 Technical Institutes, 49 Asiatic schools, 472 native schools, and 12 coloured schools, which receive Government aid, and a large number of private schools.

**Administration.**—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

**Administrator,** Hon. G. T. Plowman, C.M.G.

**Executive Committee,** F. C. Hollander, J. Dyson, J. McAuslin, J. P. Whyte.

**Provincial Secretary,** John M. Hershensohn.

**PIETERMARITZBURG**, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (white and coloured), 35,077 in 1921.

In Durban (population, 1921, 140,324), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth at the entrance, the bar being no longer existent, for 1908 being 33 ft. 7 in.

Natal, 6,800 miles; transit, 20 days.

#### ZULULAND.

**Zululand**, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The *Amatutaland Protectorate*, created by proclamation of Nov. 22, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The *Northern Districts* territory (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paulpietersburg, and Babanango) was annexed to Natal on January 27, 1903.

#### THE TRANSVAAL.

The Province of the Transvaal has a total area of 120,426 square miles, about 20,000 square miles lying within the tropics. The Census of 1921 showed a population of 2,085,837, of whom 1,158,306 were males and 927,531 females; the population comprised 544,486 Europeans or whites, 1,496,689 natives, and 44,666 other coloured races. In 1920 there were 21,143 births (16,768 European), 16,043 deaths (6,040 European), and 8,396 marriages (5,432 European).

**Education.**—There were 1,029 schools for white children in 1919, with a total enrolment of 200,734 and an average attendance of 90,121, and 3 normal colleges. There were also 389 native schools, 1 Asiatic school, and 22 coloured schools, with 39,583 pupils.

**Administration.**—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

**Administrator,** Hon. A. G. Robertson.

**Executive Committee,** B. D. G. Plenaar, G. H. Kretzschmar, Dr. H. Reitz, T. C. Stoffberg.

**Provincial Secretary,** D. E. van Velden.

The Capital is PRETORIA, pop. 1921, 73,770 (white 45,163, coloured 28,607). Pretoria, which is also the seat of the Union Government, is pleasantly situated on the River Aaples, and has wide, shady streets and magnificent buildings. The principal town is JOHANNESBURG, 5,500 feet above sea level, about 35 miles S.W. of the capital. Johannesburg is the centre of the Witwatersrand goldfields, and possesses magnificent buildings. Among its other industries are printing, brickmaking, brewing, tobacco manufactures and iron foundries. The population in 1921 was 224,191 (white 149,678, coloured 134,513).

Pretoria is distant from London 7,200 miles; transit, *via* Capetown, 19 days.

#### ORANGE FREE STATE.

The Province of the Orange Free State has a total area of 50,389 square miles, and is divided into 24 districts. The population at the last five censuses was:—

| Year       | White.  | Coloured. | Total.  |

## Races and Religions.

**Native Population.**—There are three distinct elements in the native population of Egypt. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *Fellâhîn* (*fellâh* = ploughman, or tiller of the soil). The *fellâhîn* have been mainly Muhammadans since the conquest of the country in the 7th century, but 834,474 Coptic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasantry numbered 12,404,897 in the total of the Census of 1917. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts (32,663 Bedouins and 107,360 Sudanese and Bertarin), of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley, between Aswân and Wadi Halfa, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

**Foreign Population.**—At the Census of 1917 the foreign residents were 205,998, of whom 30,796 were Turks, 56,735 Greeks, 40,198 Italians, 24,356 British, 21,270 French and Tunisians, 2,789 Austro-Hungarians, 4,225 Russians, 157 Germans, 23,976 other Europeans, and 1,496 Persians.

**Religions.**—At the Census of 1917 there were 11,623,743 Muhammadans, 1,026,115 Christians, 59,581 Jews and 2,814 other religions.

## PHYSIOGRAPHY.

**Boundaries.**—Egypt occupies the north-eastern corner of the African continent, between  $22^{\circ}$  and  $32^{\circ}$  N. lat. and  $24^{\circ}$ – $37^{\circ}$  E. long. The northern boundary is the Mediterranean, and in the south Egypt is continuous with the Anglo-Egyptian Sudan. The western boundary runs from a point on the coast, N. of Sollüm (long.  $25^{\circ}$  E.), inland in a south-westerly direction for some distance and then turns S. along a meridian line approximately in long.  $24^{\circ}$  E. until it meets the parallel of  $22^{\circ}$  N. lat., which forms the N. boundary of the Anglo-Egyptian Sudan. The E. boundary follows a line drawn from Rafa on the Mediterranean ( $34^{\circ} 15'$  E. long.) to the head of the Gulf of Aquaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aquaba and the Red Sea.

**Coast.**—The Mediterranean coast of Egypt is flat and sandy, except to the westward of A'lexandria, where low rocky cliffs in places approach the sea. Along the Red Sea coast a sloping sandy and gravelly plain mostly intervenes between the mountains and the sea, but the mountains rise generally to great heights at only a short distance inland, while in certain places, notably in the Gulfs of Suez and Aquaba, they approach so closely to the sea that their feet are washed by its waters. Coral reefs are conspicuous almost everywhere along the Red Sea coast, and there are numerous outlying shoals. Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollum and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safage, Qosseir and Halaib on the Red Sea.

**The Nile Valley.**—The principal feature of Egypt is the Nile Valley, where the river runs through cliffs, which, with the exception of a stretch of granite in the neighbourhood of Aswan, are chiefly of sandstone from Wadi Halfa to near Esna, while further north from Luxor to Cairo limestone predominates. The valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to its mouths. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. The water of the Nile is carried in artificial canals for the purpose of irrigation, only the surplus being allowed to flow into the sea. The great dam at Aswan serves to impound some of the waters of the river in the early and more rapid part of its falling stage, so that they may be released during the summer to mitigate the deficiency which would otherwise occur at the lowest stages. Smaller barrages have been built at Esna, Assiut, Zifta, and at the head of Delta to control the supply of water into the great canals. West of the river, about 60 miles south of Cairo, is the fertile province of Fayum, with an area of about 500 square miles. This province, which is separated from the river by a narrow strip of desert, is watered by a great canal over 100 miles long called the Bahr Yusef, which takes its water from the river at Deirut.

**The Libyan Desert.**—Westward from the Nile Valley into Tripoli stretches the vast limestone plateau of the Libyan Desert. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the *Oases*, of which the principal from S.E. to N.W. are known as Kharga, Dahkla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long.

**The Eastern Desert of Egypt.**—The country between the Nile and the Red Sea, known as the Eastern or Arabian Desert of Egypt, though likewise on the whole a very waterless region, presents a marked contrast to the Libyan Desert. Instead of being a vast monotonous plateau like the country on the other side of the river, the Eastern Desert presents a great diversity of physiographical features, the most marked one being the great back-bone of high and rugged mountains, mostly of igneous and metamorphic rocks, which extends north-westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. The principal peaks of the Egyptian portion of this mountain chain are (from N. to S.) *Gebels* (Mounts) Gharib 5,760 feet, Abu Dokhan 5,450 feet,

Sheyib 7,150 feet, Hamata 6,490 feet, Faraid 4,480 feet, Gerf 4,650 feet, Shendib 6,271 feet, and Elba 4,680 feet. Flanking the mountain chain on the west, between the axis of the range and the Nile are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The mountain-axis being much nearer to the Red Sea than to the Nile, the slopes of the eastern side are as a rule much steeper than those facing westwards, and the sedimentary flanking-plateaux are absent for long distances along the Red Sea coast. Wells and springs are more frequent in the south parts of the Eastern Desert than in the north, owing to the southern tracts approaching more closely to the tropical rain-zone. The roads through the Eastern Desert follow as a rule the course of the main *wadis* from well to well, and here and there are to be found small encampments of the wandering Arabs who form the scanty population of the region. The breeding of fast-trotting camels is carried on chiefly by the Bisharin tribes who inherit the south parts of the Eastern Desert, especially in the neighbourhood of Gebels, Gerf and Elba. The Eastern Desert is the source of most of the limited mineral wealth of Egypt; petroleum is worked at Jemsa and Hurgada, on the coast of the Gulf of Suez, and phosphates are mined on a considerable scale in the neighbourhood of Safaga and Qosseir, while at a few spots gold and emeralds have been extracted, though as a rule with very little commercial success. Peridot is mined at St. John's or Zeberged Island (in the Red Sea, lat.  $23^{\circ} 36' N.$ ).

*The Sinai Peninsula.*—The north (Mediterranean) coast of Sinai is flat and sandy like that of Egypt. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tih; in some parts this scarp rises to over 5,000 feet above the sea-level. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains, intersected by deep ravines. The highest peaks of these mountains, such as *Gebels* (Mounts) Katherina, 8,680 feet, Um Shomer, 8,530 feet, Eth Thebt, 8,030 feet, are higher than any of those in Egypt proper. Springs and wells occur in fair abundance, mostly in the *wadis*, and running water (mostly brackish) is found at a few points. The mineral wealth of Sinai is not great, but manganese-ore is mined on a considerable scale in the mountains east of Abu Zenima, and oil has been struck in borings on the Sinai side of the Gulf of Suez, though not as yet in payable quantities.

### GOVERNMENT.

From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the eighteenth century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. From 1802-1804 French troops occupied the country, with the ostensible object of suppressing the Mamelukes and restoring the authority of the Sultan, and after their evacuation of the country, *Mohammed Ali*, who was appointed governor in 1805, exterminated the Mamelukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of Feb. 13, 1841. Mohammed Ali was succeeded before his death by his son *Ibrahim* (1848), whose nephew *Abbás I.* ruled from 1848-1854. During the reign of *Said* (1854-1863), a son of Mohammed Ali, the concession for the Suez Canal was obtained, and his successor *Ismail* (1863-1879), a son of Ibrahim, was granted (by *firman* of May 14, 1867) the title of *Khedive*, the previous rulers having held the title of *Vali*, or Governor. In the early years of Ismail's reign the Egyptian dominions were very largely extended, until in 1875 its territories comprised an area of nearly 1,500,000 sq. miles, with a population of about 16,000,000. The wild extravagance of Ismail drove him to raise enormous loans in Europe, which plunged the country into such financial embarrassment that the Governments of France and Great Britain intervened and forced Ismail to abdicate, appointing his son *Tewfik* (1879-1892) to succeed him.

*Dual Control.*—By a Khedivial decree of November 10, 1879, two Comptrollers-General were appointed for the reorganisation of the administration and re-establishment of financial equilibrium, Major Evelyn Baring being the British and M. de Blignières the French representatives. The Dual Control governed Egypt for two years, and a series of reforms was initiated, but further progress was interrupted by a military revolt, headed by an officer of the Egyptian Army (*Ahmed Arâbi Pasha*). The revolt assumed alarming proportions, but the French Government declined to intervene, and a British expedition was despatched to re-establish the authority of the Khedive.

**British Occupation.**—The Dual Control was abolished by a decree of the Khedive (January 18, 1883), and a British financial adviser was appointed in place of the Comptroller-General. In January, 1884, Sir Evelyn Baring (who had previously served as Comptroller-General) was appointed Consul-General for the United Kingdom, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam. This revolt led to the temporary abandonment of the territory now known as the Anglo-Egyptian Sudan. In 1892 Tewfik was succeeded by his elder son *Abbás II.*, who was deposed in 1914. Sir Evelyn Baring (created Earl of Cromer) resigned the post of British Agent and Consul-General in 1907, and was succeeded by Sir Eldon Gorst, upon whose death (1911) the post was filled by the appointment of Viscount Kitchener.

**British Protectorate.**—In 1914 Egypt was a semi-independent tributary State of the Ottoman Empire, occupied by British troops. At the outbreak of the Great War the Khedive, *Abbás II.*, who was absent from the country, declared himself an adherent of the Central Powers and was deposed, *Hussein Kamil Pasha* being appointed in his stead. On November 18, 1914, a British Protectorate was declared over Egypt, which was therefore taken from the suzerainty of the Sultan of Turkey, and the Khedive assumed the title of Sultan. Sultan *Hussein Kamil* died October 9, 1917, and was succeeded by his brother, the present Sultan. In December, 1919, a Commission (under the Presidency of Lord Milner) conducted an investigation into the affairs of Egypt, with a view to reporting on the introduction of fuller measures of self-government and of reforms in the judicial system. The recommendations of this Commission were the subject of negotiations in London during the summer and autumn of 1921, but the result of the negotiations had not been published at the date of going to press (Nov. 1921).

#### Sultan of Egypt.

*His Highness FUAD I.*, G.C.B. (Ahmad Fuad), Sultan of Egypt; born March 26, 1868; succeeded his brother October 9, 1917; married May 24, 1919, to the daughter of Abdel Rahim Sabri Pasha.

#### Son of the Sultan.

H.H. Prince Faruk; born Feb. 11, 1920.

#### THE LEGISLATURE.

By the Organic Law of 1883 were created (1) a *Legislative Council* of 30 members, and (2) a *General Assembly* consisting of the Legislative Council, the Ministers of State, and 45 members elected by the people. These bodies were mainly consultative (except in respect of the imposition of new direct, personal, or land, taxes, on which questions the General Assembly's vote was decisive), the legislative power resting with the Khedive and his Ministers. By a Law of July, 1899, these two bodies were merged into one called the *Legislative Assembly*, consisting of (a) the Ministers as *ex-officio* members, (b) 66 elected members, and (c) 17 members nominated by the Government, 15 of these to represent certain minorities. The elected members are chosen in each district by the electors-delegate, each of whom represents 50 electors on the principle of mandate and recall. Their term of office is for 6 years, but a third of both nominated and elected members retire biennially. The Assembly can initiate legislation and must be consulted on laws initiated by the Govern-

ment, as also on public loans and important modifications of the railway and irrigation systems. The Government is not bound by the resolutions of the Assembly, although the legislative procedure laid down ensures that the Government shall act in full knowledge of the views of the Assembly. The Assembly has a right of veto only on questions of new direct, personal or land taxation.

#### THE JUDICATURE.

Justice is administered under four distinct systems, all except the Consular Courts being supervised by the Ministry of Justice, to which a British judicial adviser is attached. The systems are (1) *Mekkemas*, or Courts of the Qaddis, who are chosen from the students of Azhar University and administer Muhammadan Law following the Hanafite Rite. (2) *Native Tribunals*, containing Egyptian and foreign judges, and dealing with criminal charges against natives, and with civil cases in which both plaintiff and defendant are local subjects. (3) *Mixed Tribunals*, founded in 1876 to deal principally with civil actions between foreigners of different nationality and between foreigners and natives. (4) *Consular Courts* (of the 15 powers possessing rights to them by treaty) with criminal jurisdiction over foreigners, and judging civil cases between foreigners of the same nationality.

##### *Mekkemas*

*Sheikh-el-Azhar*, Mohamed Abu El Fadle el Gizawi.

*Grand Mufti*, Abdel Rahman Korra'a.

##### *Native Tribunals.*

*President of the Court of Appeal*, Ahmed Talaat Pasha.

*Vice-President*, John Hope Percival.

*Procureur-Général*, Mohamed Ibrahim Bey.

##### *Mixed Tribunals.*

*President of the Court of Appeal*, M. Francis Laloe.

*Vice-President*, M. Ernest Eeman

#### LOCAL GOVERNMENT.

The chief towns constitute governorships (*muhafzas*), and the remainder of the occupied country is divided into provinces (*mudiriats*), which are subdivided into districts (*markaz*), each under a *mamur*, who controls the head man (*omda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each *markaz*, under the presidency of the *mudir* (or governor) of the province. These councils were reorganized in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

#### DEFENCE.

The *British Forces* in Egypt and Palestine since the outbreak of the Great War have undergone many changes, and until the situation in the East has been cleared up its ultimate strength cannot be determined. The Commander-in-Chief in Egypt is Field-Marshal Viscount Allenby, G.C.B., G.C.M.G. (the High Commissioner); the G.O.C., Egyptian Exp. Force, is Lieut.-Gen. Sir W. N. Congreve, V.C., K.C.B., M.V.O.

Service in the *Egyptian Army* is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot; but certain classes (professors, students, Government employees, &c.) are exempt, and exemption may also be purchased for £250, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army. The Sirdar is appointed by the Sultan with the consent of the British Government.

*Sirdar of the Egyptian Army*, Major-Gen. Sir L. O. F. Stack, K.B.E., C.M.G.  
*Chief Staff Officer and Adjutant-General*, Col. L. K. Smith, D.S.O.

There is no *Navy* in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The *Egyptian Police* (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 262 officers, 396 constables, and 5,103 men (443 Europeans), the latter 342 officers and 5,261 men. There are also 54,422 *ghafirs*, or native night-watchmen.

#### EDUCATION.

Education on native lines has long been given in elementary vernacular schools; some of these are under native management, and the rest are partly under the direct control of the Ministry of Education and partly under its inspection for grants-in-aid. The native system of education is completed by the more promising pupils at the Ashar University in Cairo, the principal University of the Moslem world. In 1920 there were 134 *Elementary Schools (Maktabe)* under Government supervision, with about 18,300 pupils, and about 3,290 *Maktabe* under inspection for grants-in-aid with 202,386

pupils; there were also 42,864 pupils in other elementary schools. The government primary schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There were also 7 government *Secondary Schools* with 2,505 pupils and 34 *Secondary Schools* under inspection for grants-in-aid with 4,528 pupils; other *Secondary Schools* (about 30) had 1,645 pupils in 1920. There are *Colleges of Medicine, Law, Education, Engineering, Commerce, Veterinary Science and Agriculture* at Cairo. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. A National University, under entirely Egyptian management, was founded in 1908 at Cairo. Proposals are under consideration for the establishment of a State University and for the generalising of education among the masses of the people.

### THE EGYPTIAN DEBT.

The reckless financial administration under Isma'il, 1863-1879, led to the bankruptcy of the country in 1876 and to a Franco-British investigation and settlement of the national finances. For the protection of the bondholders there was instituted a *Caisse de la Dette*, a body representing the creditors of the Egyptian Treasury with considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. By an agreement of April 8, 1904, between Great Britain and France, subsequently ratified by all the Powers, the restrictions which hampered the liberty of the Egyptian Government in financial matters were abolished. Though the *Caisse de la Dette* still exists, its duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund, the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April 1, 1919 and 1920:—

| Debt                               | 1919.       | 1920.       |

### PRODUCTION AND INDUSTRY.

**Irrigation.**—The total area of Egypt is estimated at approximately 222,100,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only that portion of them which can be irrigated from the waters of the Nile—this portion amounts at present to 5,400,000 acres (1919), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. King Mena (B.C. 4000, approximately) is said to have been the founder of the first scientific system of using the Nile water for irrigation purposes; he employed what is known as the *basin* system, which is still used for the irrigation of all the land lying to the south of Deirüt in Upper Egypt. By this system the land is divided into rectangular areas varying in size from 5,000 to 50,000 acres and surrounded by banks; water is admitted to these basins during the flood season (August) to an average depth of 3 feet, and is left on the land for about 40 days; it is then run off and the seed is sown broadcast on the uncovered land. Since the British occupation the basin systems have been improved and provided with numbers of important masonry works; they have also been insured against an insufficient flood by the construction of barrages at Eena and Assiut, of which the former was built during 1906-08, and

the latter in 1908-1909; they are situated in lat. 25° 28' N. and 27° 22' N. respectively.

About 1880 Mohammed 'Ali Paasha introduced the system of *perennial* irrigation by digging deep canals in which the water could flow all the year round, by which means it was possible to grow two (or more) crops in one year, and to introduce the cultivation of cotton on a large scale. During his reign the barrages across the Delta were begun, under the direction of Mougel Bey, in 1843 and 1847 respectively, but by 1863 they were found to be unworkable. Since the British occupation they have been restored and greatly improved (1886-91), and a vast storage dam has been constructed at Aswan (lat. 24° 2' N.) at a cost of £Ea.740,000, which was opened on December 10, 1902: its height has since been raised so as to increase the capacity of the reservoir thus formed to a total of 85,460,000,000 cubic feet. A barrage has also been built at Zifta in Lower Egypt.

By these works, and by the construction of a vast network of canals with controlling masonry works, a small part of the excess waters of the river have been stored and distributed at all seasons of the year, and perennial irrigation has been extended throughout Middle and Lower Egypt. The increase in the value of the land has been enormous, and some a million acres have been added to the cultivable land of Egypt.

**Agriculture and Live Stock.**—Although nearly the whole population is directly or indirectly connected with agriculture, the total given in the census return of 1917, under the headings of proprietors, tenants and labourers, &c., amounts to 4,012,000 persons employed, representing only 30·5 per cent. of the population. The land is held as to 4,773,050 *faddans* by 1,666,803 native owners, and as to 5,486,155 *faddans* by 8,242 Europeans. Of the native landholders 1,044,371 owned up to 1 *faddan*, 476,950 up to 5 *faddans*, and 141,528 from 5 to 50 *faddans* (1 *faddan* = 1·038 acres).

The agricultural land is of two kinds. The first is that which is under the basin irrigation system, by which the land receives one watering only. This watering consists of a flooding at high Nile: as the flood decreases, the seeds of the various crops are sown, and the basin fields are left without further watering. Harvests of wheat, barley, beans, clover, vetches and lentils are gathered in due course. The second kind of land is that which is perennially irrigated by means of canals, and receives waterings according to rotations laid down by the Irrigation Department. In these lands, which are for the most part in Lower Egypt, cotton, maize, wheat, rice, beans, barley, sugar cane, clover, vegetables and fruit are the chief crops.

**Cotton Prices.**—The abnormal nature of the rise and fall of cotton prices that occurred between the beginning of the 1919-20 season and the end of 1920 is clearly shown by the resulting ruinous margin of difference between futures and the spot prices which eventually prevailed during the months corresponding thereto. Thus spot prices for Fully Good Fair Sakellarides opened on September 3, 1919, at \$57.50, and rose by leaps varying from \$6 to \$38 at a time, to \$127 on February 14, 1920. By March 5 it had dropped to \$137, and although it rose again a week later to \$165, the downward tendency had set in for good, and it fell by August 27 to \$124. At this figure it also stood on September 3, i.e., at the beginning of the 1920-21 season, but it had dropped to \$31 by December 31. As regards futures and spot prices, the highest quotation for November delivery, 1920, was \$145.50 made in the preceding April, while the spot price in November dropped from \$72 to \$38. In August, 1920, quotations for delivery of the current crop in January, 1921, reached \$118.50, whereas spot prices in the latter month varied between \$30.60 and \$35.85.

**Minerals.**—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the

local industrial classes have had very little hand in the existing enterprises, whose capital and organisation is chiefly foreign. In 1919 the value of the principal minerals produced was phosphates, £196,730; salt, £266,023; metallic ores, £26,023; gold ingots, £230,023; and kerosine, £27,921.

The following minerals, metals, and precious stones are at present being exploited or developed on a commercial scale:—building stones, clays, gypsum, gold, manganese ores, natron, petroleum, phosphate of lime, peridots, salt, alum, magnesia and ochres. Besides those mentioned above, there are known to exist, in quantities more or less important, copper ores, emeralds, granite, iron ores, nickel ores, ornamental stones and sulphur. Enquiries respecting the geology of Egypt should be addressed to the *Geological Museum*. Applications concerning mining and quarrying and the issue of licences and leases should be made to the *Department of Mines, Dawarim Post Office, Egypt*.

**Oil.**—The production of crude oil from the Egyptian Oil Fields was 281,885 metric tons in 1918 and 224,300 metric tons in 1919.

**Manufactures and Industries.**—The principal articles of Egyptian manufactures are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery, and cigarettes. These and other articles of Egyptian manufacture are on view at the permanent Exhibition of Egyptian Arts and Crafts attached to the Bureau of Commerce and Industry in Cairo, from which all information can be obtained. The principal Egyptian Industries are dyeing and tanning.

## EXTERNAL TRADE.

The imports and exports of merchandise (the produce or manufacture of Egypt) for the 6 years, 1915-1920, are stated as follows:—

| Year.      | Imports.    | Exports.   | Total.      |
|------------|-------------|------------|-------------|
|            | £E          | £E         | £E          |

### COMMUNICATIONS.

**Railways.**—There is a network of railways in the Delta, the principal lines radiating from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connexion runs to Wadi Halfa, connecting the Egyptian State system with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollum, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1920, was 1,990 miles. 26,212,988 passengers and 4,820,702 tons of merchandise were carried during 1917-8, the net receipts being £2,920,874. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oases of Kharga with the Nile Valley. In addition to the Government lines, there are 818 miles of light railways exploited by public companies. By the completion of a swing bridge over the Suez Canal at Kantara (March, 1918) direct railway communication from Cairo to Palestine was established; the swing bridge was removed in 1921 and is to be replaced by a tunnel under the Canal.

**Caravan Routes.**—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arabain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

**Shipping.**—The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depot at Suez; the majority of the Egyptian pilgrims to Mecca now travel by it. The principal port is Alexandria, where 326 vessels (1,338,702 tons) entered and 733 vessels (1,324,431 tons) cleared in 1920.

The traffic through Port Said amounted in 1920 to 326 vessels entered and 326 cleared, the remainder being dealt with at Suez.

**Posts and Telegraphs.**—There were in 1920 2,301 post offices and stations, dealing with a total inland correspondence of 60,936,000 (including letters, post-cards, newspapers, &c.), and a total foreign correspondence of 30,177,000. There were on December 31, 1918, 4,612 miles of telegraphs, with 18,930 miles of wire, over which 2,155,443 messages were transmitted during 1918. A system of rural savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in each district by the *sarraf* (village tax-collector).

### THE SUEZ CANAL.

**The Suez Canal.**—The *Compagnie Universelle du Canal Maritime de Suez* is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1920, £23,192,000).

The Suez Canal was opened in 1869. The total length of the canal is 101 miles, with a width of 45 metres (147 ft. 8 in.), having cost 761,522,220 francs to construct and enlarge; the maximum draught of water allowed for vessels using the canal is 9.14 metres (30 feet). The average time for the transit through the canal is 16 hours 28 minutes. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 20 are British (three representing H.M. Government and seven the shipowning interest).

**British Directors.** Sir Thomas Sutherland, G.C.M.G. (Vice-President of the Company); Sir Fredk. Green, K.B.E.; T. Harrison Hughes; Lord Inchcape, G.C.M.G., K.C.S.I., K.C.I.E.; Oswald Sanderson; Sir E. Wyldbore-Smith; Sir Owen E. Phillips, G.C.M.G.

**Representing H.B.M. Govt.,** H. T. Anstruther, Sir Ian Malcolm, K.C.M.G. (and one vacancy).

The transit receipts in 1870 were 5,718,756 fr., and in 1920, 151,917,267 fr.

The rate of transit dues as from Oct. 1, 1921, is 8 fr. per ton, and 5 fr. 50 c. for vessels in ballast.

The net dividends for the year 1921 amounted to 120 fr. on the ordinary 500 fr. shares, and 97.915 fr. on the Actions de Jouissance. In 1920, the dividends were 243.851 fr. and 218.091 fr., respectively.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1914, with the percentage of British vessels :—

| Year. | No. of Vessels. | Net Tons.  | British Tonnage. |

## TOWNS.

CAIRO, the capital, stands on the E. bank of the Nile, about 24 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân-el-Khalil, the Hamzawi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDRIA, founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt. Its great Pharos, or lighthouse, was one of the "Seven Wonders of the World." It now contains two palaces of the Sultan's, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. The principal towns (with their population in 1917) are as follows:—

## WEIGHTS, MEASURES, AND CURRENCY.

## Weights and Measures.

The Metric System of Weights and Measures and the foot and pound and their multiples, are legal in Egypt. The foot and pound are rarely used and the Metric System is little known except in the large towns.

The Weights and Measures in common use, with their English equivalents, are given on pp. 464-5.

## Currency.

The Egyptian monetary system prescribed by the Law of October, 1926, is on a gold mono-metallic basis, the unit being the Egyptian pound of 100 piastres, or 1,000 millimes, weighing 8.5000 grams, 0.875 fine, or 7.4375 grams of fine gold.

The Legal tender qualities of the coins are: Gold—the Egyptian pound and 50 piastre pieces full legal tender. Silver—pieces of 20, 10, 5 and 2 piastres up to a sum of 100 piastres. Nickel—pieces of 10, 5, 2 and 1 millimes up to a sum of 10 piastres. Bronze—pieces of ½ millieme up to 10 piastres.

The respective values of the new Egyptian coins are designated thereon in both Arabic and English characters.

The pound sterling is also legal tender in Egypt at the fixed rate of 97½ piastres. The 20-franc piece and equivalent coins of the Latin Union circulate at the fixed rate of 77½ piastres. The gold circulation consists almost entirely of British sovereigns, the Egyptian pound and the other legal tender gold coins being comparatively rare; the British sovereign is, therefore, the real basis of the monetary system, and the foreign exchanges, expressed in piastres, are based, not on the Egyptian pound of 100 piastres, but on the British sovereign of 97½ piastres. The rate of exchange at certain dates in 1927 will be found on p. 467.

The National Bank of Egypt issues notes for (£E.) 100, 50, 10, 5 and 1, and (piastres) 50 and 25; and the Government Currency Notes for (piastres) 10 and 5.

CAIRO is 2,520 miles from London; transit via Marseilles or Trieste, 6 days.

Remains of the Seven Wonders of the World.—The Pyramids (see p. 692) may be visited from Cairo. The "Nephesa" room at the British Museum, Bloomsbury, contains the remains of the Temple of Artemis (Diana) at Ephesus (the Temple of "Diana of the Ephesians" of Acts xix. 36); the "Mausoleum" Room at the British Museum contains the remains of the tomb built at Halicarnassus for Mausolus, in the 4th century B.C.

The inhabitants of the Anglo-Egyptian Sudan are partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 3,000 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. Before 1884 the population was believed to be between 8,000,000 and 10,000,000, but by 1898 they had been reduced to about 1,500,000 by war, repression, and disease.

### PHYSIOGRAPHY.

*Boundaries.*—The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern shore of the Albert Nyanza, 2° 19' N. lat., and reaches from the French Sahara about 18° 15' E. (to 22° N.) to the north-west boundary of Eritrea (Italian) in 38° 30' E. (at 18° N.). The greatest length from north to south is approximately 1,400 miles, and from east to west 1,200 miles. The northern boundary is the 22nd parallel of North latitude; on the east lie the Red Sea, Eritrea and Abyssinia; on the south lie the British Protectorate of Uganda and the Belgian Congo; and on the west the French Congo.

*Northern Region.*—The greater portion of the region between 16° N. and 22° N. consists of the Nubian Desert on the east and the Libyan Desert on the west, divided by the fertile valley of the Nile, which is nowhere of great width. The Nubian Desert is bounded on the south by the rivers Atbara and Gash, the latter of which loses its annual flood in a fertile delta north of the town of Kassala. It is traversed from south to north by the continuation of the Abyssinian highlands, which constitutes the Nile-Red Sea water parting, and forms a series of parallel rocky ranges rising to a height of 5,000 feet, the lower slopes and valleys of which are clothed in vegetation and comparatively well watered. The maritime plain lying between these mountains and the Red Sea is covered with low bush, and at Tokar the Baraka (a mountain torrent) waters sufficient of it to produce excellent cotton.

*The Central Region,* between 16° N. and 10° N., contains on the east the co-called "Island of Maroë," the ancient seat of civilisation in the Sudan, situated between the Atbara and the Blue Nile rivers. It is now almost uninhabited save for the natives who visit it with their herds, and to raise a precarious crop after the annual rains. The districts bordering on the upper reaches of the Blue Nile are covered with forests of large trees.

*Southern Region.*—From 16° N. to the southern boundaries are extensive tracts of

cultivable lands enclosed by a semi-circle of forests and swamps, through which a multitude of streams flow into the main river.

*Darfur* is mainly an elevated plateau about 3,000 feet above sea level, with occasional summits in the *Jebel Marra* and *Jebel Medob* of 6,000 feet, one peak (*Jebel Marra*) rising to a height of approximately 10,000 feet, with summer torrents in the *khors*, which flood much of the southern districts and vanish in the winter. The *Lado* *enclave*, which had been leased to Leopold II., King of the Belgians, reverted at his death to the Anglo-Egyptian administration, and now forms part of *Mongalla*. The total area of the *enclave* is estimated at 15,000 sq. miles, with a Negro population of about 250,000. The *Gambela* *enclave* (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post.

*Hydrography*.—The Nile basin covers a total area of nearly 1,100,000 sq. miles, and while part of the basin lies in Abyssinia and Eritrea, its course from the Central African Lakes to the Mediterranean is within the British Protectorates of Uganda and Central Africa, and the Egyptian and Sudanese dominions. The main stream issues from the Victoria Nyanza at the Ripon Falls and flows through Lake Choga, whence it diverges to the Albert Nyanza and enters the plains of Lado, in the Mongalla Province of the Sudan, as the *Bahr el Jebel*. At Lake No the stream effects a confluence with the *Bahr el Ghazal*, from the south-west, and further east with the *Sobat*, from the south-western highlands of Abyssinia. From the junction with the *Bahr el Ghazal* the stream is known as the *Bahr el Abiad*, or *White Nile*. At Khartoum, 535 miles above the Sobat confluence, the river is reinforced by the *Bahr el Azrak*, or *Blue Nile*, from the south-east, and near El Damer, 200 miles further north, by a confluence with the *Atbara*, from Abyssinia. Thence the river flows north-west to Abu Hamed, and makes a great south-westerly bend, across the Nubian Desert, before resuming its northward course through the Dongolas to the northern frontier at Wadi Halfa. From the Atbara confluence to the Mediterranean the Nile has a course of close on 1,600 miles, and from its sources to the confluence its length may be reckoned at 2,400 miles, giving a total waterway of 4,000 miles. From the Ripon Falls (on the northern shore of Victoria Nyanza) to Rosetta (on the Mediterranean) the length of the waterway is stated to be 3,475 miles. Between Khartoum and Wadi Halfa occur five of the six *cataracts*, the remaining (sixth) cataract being in Egypt at Assuan. The sixth occurs at the Shabluka Gorge, below Khartoum; the fifth below Berber, at El Solimanieh; the fourth in the Nubian bend, between Monastir and Merowé; the third between New Dongola and the 20° N. lat.; the second ends just above Wadi Halfa; the first (in Upper Egypt) has been greatly diminished in vehemence by the construction of the dam and locks at Assuan.

#### GOVERNMENT.

The Sudan is administered by a Governor-General, aided, since 1910, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. The Civil and Criminal Codes are based on those of India and Egypt. The boundaries correspond in general with the territory obtained by conquest from the indigenous tribes by the armies of Mohammed Ali, the first Khedive of Egypt, and of his successors up to Ismail Pasha, between 1820 and 1875. At one time the authority of the Khedive extended along the western shore of the Red Sea as far as the Somali coast, but these outlying portions were gradually given up, and in 1884 the Mahdist rebellion, culminating in the fall of Khartoum and the death of General Gordon on Jan. 26, 1885, compelled the Egyptian Government to withdraw from the whole of the Sudan, with the exception of Wadi Halfa on the Nile and Suakin on the Red Sea, which were held as frontier posts. An invasion of Egypt by the Mahdist hordes under Wad El Nejjumi was defeated at the battle of Toski on Aug. 3, 1889, but from 1885, until the final overthrow of Mahdism in the campaign of 1896-98, the country was entirely under the oppressive rule of the Dervishes, and suffered a set-back from which it will take many years to recover, the population decreasing from about 9,000,000 to less than 2,000,000 through famine and the spread of disease due to misgovernment. Mohammed Ahmed, the original Mahdi, died a natural death on June 22, 1885, but was succeeded by the Khalifa Abdullahi, who ruled until his final overthrow by the Anglo-Egyptian army at the battle of Omdurman on Sept. 2, 1898. He escaped from the battle and remained at large until he, and most of his remaining Emirs, were killed at the battle of Gedid on Nov. 24, 1898. After the reconquest of the Sudan an agreement, signed on Jan. 19, 1899, between Egypt and Great Britain, defined the boundary between Egypt and the Sudan, and provided for its administration. The British and Egyptian flags fly together and the territory is administered by a Governor-General appointed by Egypt with the consent of the British Government. No duties may be levied on imports from Egypt and duties on imports *via* the Red Sea ports may not exceed those levied in Egypt. The import and export of slaves is prohibited.

**LOCAL GOVERNMENT.**

The Sudan is divided into 15 provinces (*mudiriya*) under governors (*mudirs*), subdivided into *mamuriyas*, or districts. The governors (see p. 699) are all British. In some provinces there are High Courts or Provincial Judges; in others the Governor acts as Provincial Judge. District Judges have been appointed in many instances, and where no appointments have been made the Provincial Inspectors and District Officers act in their stead.

**DEFENCE.**

Several regiments of the Egyptian Army (see Egypt) are stationed in the Sudan, which forms an excellent recruiting ground, and the *Sirdar* (Commander-in-Chief) is Governor-General of the Sudan. A detached body of the British army of occupation in Egypt is quartered at Khartoum, under the command of the *Sirdar*. The police and the locally recruited irregulars (*jehadiya*) are under provincial administration.

**EDUCATION.**

In addition to *kuttabs* (vernacular schools) there are 6 primary schools at Khartoum, Omdurman, Wad Medani, El Obedi, Soukin and Atbara, where instruction is given in English as well as Arabic, attended by about 1,300 pupils; a secondary school at Khartoum (Gordon College),

and a training college (also at Gordon College); and technical or trade schools at Khartoum and Omdurman. The central authority is the Education Department.

**FINANCE.**

The revenue and expenditure of the Sudan for the seven years 1914-1920 are stated as follows:—

| Year. | Revenue.    | Expenditure. |
|-------|-------------|--------------|
| 1914  | £E1,543,350 | £E1,531,350  |
| 1915  | 1,495,530   | 1,463,040    |
| 1916  | 1,857,860   | 1,745,530    |
| 1917  | 2,195,360   | 1,901,940    |
| 1918  | 2,774,690   | 2,336,315    |
| 1919  | 2,992,793   | 2,790,513    |
| 1920  | 4,426,340   | 3,964,848    |

The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services. The deficits of the early years were met by a contribution from the Egyptian exchequer, the total sum so paid by Egypt from 1901-1911 amounting to £3,435,000. In addition, nearly £5,000,000 has been advanced by Egypt for public works in the Sudan.

**PRODUCTION AND INDUSTRY.**

The Sudan is the chief source of the world's supply of gum arabic and ivory, the exports of gum arabic being 12,209 tons (£E566,925) and of ivory 45 tons (£E76,819) in 1920. Egyptian and improved American cotton are grown, the cultivation of the former having been successfully established in the Gezira, lying between the Blue and White Niles, adjoining the main Nile in Khartoum Province, at Kassala and at Tokar in the Red Sea Province. Long staple American cotton is grown commercially in Berber and Dongola Provinces.

The Gezira Irrigation Project (by means of a dam on the Blue Nile at Makwar, about 120 miles south of Khartoum) will enable 100,000 acres to be put under cotton in a few years' time with unlimited scope for extension. Cotton area 1920, 59,006 Feddans; Crop 1920-1921 estimated at 93,000 Kantars. Other products include sesame, sesna leaves and pods, groundnuts, dates, hides and skins and gold. The principal grain crops are dura, a kind of millet used for making bread, and dukhn. Estimated yield of dura 1920, 472,000 tons. The Cattle Trade in the Sudan shows remarkable growth in recent years and the number exported is increasing yearly, the reason being that while it is easy for the native to raise cattle, the Government on their part, through an efficient and well-organised Veterinary Department, is endeavouring to foster the trade, to eliminate cattle disease, and to improve the quality of live stock. For some years Egypt has depended almost entirely on the Sudan for its meat supply, but recently (1920) since the collapse of the cotton market and the scarcity of money, the Egyptian Fellah has been selling his own stock for slaughter purposes at very cheap prices, and, in consequence, the export of animals from the Sudan to Egypt has come to a stop. The stoppage is only a temporary one, however, as the slaughter of animals in Egypt cannot continue indefinitely.

The forests which line the river bank, rich in fibre and tanning material, extend to the frontiers of Abyssinia. On the White Nile the

forests contain valuable trees—the ebony tree, the gum acacia, the bamboo, and the rubber creeper. The finest gum forests are in Kordofan, and the best rubber in the Bahr el Ghazal.

Gold is the only mineral at present being successfully exploited in the Sudan, a mine being worked at Gabait.

#### EXTERNAL TRADE.

The principal exports are gum, ivory obtained by elephant hunters, cattle, sheep, sesame, dums, dates, cotton and cotton seed, hides and skins. The principal imports are cotton goods, sugar, machinery and metals, coal, food-stuffs, tobacco and spirits. The total trade for the eight years 1913-1920 is stated as follows:—

| Year. | Imports.     | Exports.     | Total.       |
|-------|--------------|--------------|--------------|
| 1913  | £Ea, 109,476 | £Ei, 185,186 | £E3, 294,662 |
| 1914  | 1,891,494    | 1,020,860    | 2,912,354    |
| 1915  | 1,704,250    | 1,577,991    | 3,282,241    |
| 1916  | 2,661,468    | 2,288,403    | 4,949,871    |
| 1917  | 2,102,117    | 2,490,565    | 4,592,682    |
| 1918  | 4,084,582    | 3,923,771    | 7,998,353    |
| 1919  | 4,805,745    | 2,740,759    | 7,546,504    |
| 1920  | 7,006,865    | 4,712,652    | 11,719,517   |

The import figures include Government stores; the export figures exclude re-exports, specie and merchandise in transit. The re-exports in 1920 were valued at £E63,319; the imports of specie in 1920 were valued at £E99,661, and the re-exports at £E12,224. The transit trade in 1920 was valued at £E68,307. In 1920 57 per cent. of the import and 53 per cent. of the export trade was via Port Sudan.

#### COMMUNICATIONS.

*Railways, &c.*—In 1915 about 1,500 miles of rail-

ways were open for traffic. The Sudan Railway reached Khartoum in 1899; a line from Atbara to the Red Sea at Port Sudan and Suakin, and a branch to the Halfa-Khartoum line from Abu Hamed to Kareima to tap the Dongola Province, were opened in 1906. A bridge has been constructed over the Blue Nile at Khartoum, and the railway now runs to El Obeid, the chief town of Kordofan Province, crossing the White Nile by another bridge near Hillet Abbas. Since the opening of the eastern railway the Red Sea ports of Port Sudan and Suakin receive much of the trade which formerly passed northwards. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and Bahr-el-Ghazal, and inland chiefly by camels and donkeys.

*Telegraphs.*—All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 4,353 miles in 1920. There are 65 stationary and 11 travelling Post and Telegraph offices, and 11 wireless telegraphy offices.

#### TOWNS.

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town has been rebuilt and now contains a large mosque for Muhammadana, a cathedral, and the Gordon College, with extensive government buildings. Population about 23,000. Opposite Khartoum, on the Blue Nile is Khartoum North (16,000), and on the White Nile is Omdurman (60,000), the former Mahdist capital. Other towns are Berber, El Damer, Atbara, Abu Hamed, Merowé, Dongola, Wadi Halfa, Port Sudan, Suakin, Sinkat, Kassala, Kamilin, Sennar, Singa, Makwar, Wad Medani, Roseires, Gallabat, Gedaref, El Obeid, El Dueim, El Fasher (Dartur), Kodok, Mongalla, Kosti and Rejaf.

### The League of the Empire (FOUNDED 1901).

THE League is entirely non-political and non-sectarian. Its practical work has been to promote co-operation between the different Countries and Colonies of the Empire, mainly in affairs connected with education, and to afford full and correct information regarding them, so that the duties of citizenship may be better understood and appreciated, and personal and active interest inspired in the great problems connected with our Empire's conditions and progress. The relation of the League to the Education Departments and Government throughout the Empire has been regularised (a) through the recommendation of its work to the Governments concerned by the Colonial Office of the Imperial Government and by the Agents-General in 1902-3; (b) by the active and widespread acceptance of its schemes by the different Educational Authorities and Governments. In 1907 the League carried through the first Conference between the Education Departments of the Home and Colonial Governments. One of the effects of this Conference was that the Imperial Government undertook to call the Imperial Conference on Education in 1911. In 1912 the first Imperial Conference of Teachers' Associations was held by the League, and in 1913 was inaugurated the Imperial Union of Teachers. In 1914 the second Imperial Conference of Teachers' Associations was held in Toronto, by invitation of the Government of Ontario. An annual meeting of the Imperial Union of Teachers takes place each July. The League, through the liberality of the late Mr. Louis Spitzel, has published a series

of text-books on the Empire, under the editorship of Professor A. F. Pollard: (1) "The British Empire—Its Past, Its Present, and Its Future" (a book of reference); (2) "The British Empire and Its History" (for Secondary Schools); (3) "The Story of the British Empire." In 1907 the League helped to establish a lace industry in St. Helena. With the co-operation of the Overseas and Home Education Authorities a Scheme for the interchange of Teachers throughout the Empire is now in active operation, over 150 interchange appointments were arranged last year. The School Affiliation and Comrades' Correspondence Sections were established in 1902-3. Other work undertaken are the giving of lectures, the establishment of a bureau of information, essay competitions, exhibitions, and the furthering of the keeping of Empire Day.

During the War the League distributed from its depot over a million articles to the hospitals and troops, besides helping prisoners and others in distress. The League has also given colours and shields to all the overseas contingents who fought for the Empire.

The League also held a Conference of 350 Overseas Soldier-Teachers in 1919.

### ASCENSION.

an isolated Island in the North Atlantic (3,477 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,800 feet, situated  $7^{\circ} 55' 55''$  S lat., and  $14^{\circ} 25' 5''$  W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is  $7\frac{1}{2}$  miles, and extreme breadth 6 miles, with an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1825, when the English took possession of it. The island is under the Board of Admiralty, by whom an officer is appointed as commandant. The inhabitants consist of officers and their families, seamen, marines, and Kroomen; a limited number of men also have their families with them, the full complement of the island being about 250 (exclusive of 40 members and servants of the Eastern Telegraph Co.), with about 35 women and children. Georgetown, the garrison settlement, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand, 58 being "turned" during 1900, their weight being from 500 to 800 lb. The sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month, their eggs being much appreciated by the inhabitants.

### BAHAMAS.

The Bahamas (or Lucayas) are an archipelago of the British West Indies, lying between  $21^{\circ} 45' - 27^{\circ} 34'$  N. lat. and  $70^{\circ} 40' - 79^{\circ} 5'$  W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1917 of 59,928, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Islands, Watlings Island, Rum Cay, Long Cay, Ragged Island, and Bimini. Originally settled by Englishmen, the Bahamas were, in 1782, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1928 being valued at

£107,628. The fruit trade is principally with the United States, bananas, coco-nuts, fruit and vegetables being exported. Tomatoes are being cultivated in large quantities for shipment to the United States. Mahogany, lignum-vitæ, mastic, ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established, the land under the fibre plant being about 20,000 acres, and the value of Bahamas hemp fibre exported in 1900, £148,488. The imports are chiefly food-stuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members, and an elective Representative Assembly of 29 members.

### BARBADOS.

the most windward of the West India Islands, is situated in  $13^{\circ} 4' N.$ , and longitude  $59^{\circ} 37' W.$  It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 166,470 acres (about 166 square miles), about 100,000 acres being cultivated. The estimated population, Jan. 1, 1921, was 298,563. The principal exports are sugar, molasses, rum, and cotton, and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. Liberal provision is made for elementary education, and Harrison's College provides for higher education. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1626. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of

Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop. 12,225, 18,648), on the shores of an open roadstead (Carlisle Bay).

### BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (13 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 30° 15' N. lat. and 64° 51' W. long, comprising an area of about 29 square miles, and containing a population (1921) of 21,087 (7,507 white, and 14,478 coloured). These islands derive their name from Bermuda, a Spaniard, who sighted them in 1507; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also commander-in-chief of the military forces. He is advised by an Executive Council of 6 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members.

The climate is mild and healthy. There are no streams or wells, and the inhabitants are dependent on the rainfall stored and preserved in tanks. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onions,

potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to New York. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

### BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4' N. to 4° 20' S., and from long. 108° 50' to 119° 20' E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celébes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two-thirds of the island is included within "Netherlands India." The remainder of the island is under British protection.

### BRITISH NORTH BORNEO.

The territory of British North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of about 600 miles. The population is 227,000, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,435 feet) and is densely timbered. The two chief towns are Sandakan, on the north-east coast, and Jesselton, on the west coast. The jurisdiction is passed by the Legislative Council, which consists of 7 official and 5 unofficial members, who have the local title of

Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 5 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an Imam's Court for Muhammadan law.

The chief products are timber, tobacco, rubber, sago, rice, gums, gutta-percha, coco-nuts, rattans, and all varieties of jungle produce. The country is suitable for the cultivation of sugar, tapioca, rubber, pepper, and gambier on a large scale. Gold has been found. Coal of good quality is now being produced at the rate of 7,000 tons per month at Sebattik, in the south-eastern corner of the territory.

A railway runs from Jesselton, the chief port on the west coast, to Melalap in the interior, a distance of about 100 miles, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland; there is a branch from Beaufort to Weston on the coast (20 miles). There are wireless stations at Sandakan, Jesselton, Kudat, and Tawau. There is a State bank at Sandakan with a branch at Jesselton.

There is a native military force of 800 men under European officers, with one machine and four mountain guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

**BRUNEL**

*Sultan*, H. H. Mohamed Jessal-ul-alam, K.C.M.G., suc. May 21, 1906.

A native State on the north-west coast of the island of Borneo. The total area is about 4,000 square miles, the estimated population being 30,000 (1911). The territory was placed under British protection in 1886, and on Jan. 1, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunel, has a population of nearly 10,000, and is built entirely on the water, except the Chinese quarter which is on land, communication being possible only by boat.

*High Commissioner*, The Governor of the Straits Settlements.

*British Resident*, Brunel, G. E. Cator.  
*Executive Engineer*, P. W. D., Edmund Roberts (who also acts as *Officer-in-Charge*).  
*Treasurer & Supt. Customs* (vacant).

Brunel is 3 hours by steamer from Labuan, and communication is now regularly maintained.

**BRITISH GUIANA.**

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dec. 31, 1920, was estimated at 307,290, of whom 120,331 were East Indian immigrants. The colony is bounded on the south by Brazil, on the east by Dutch Guiana, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The climate is hot, but not unhealthy. The cultivated portion of the country, amounting to about 176,000 acres (of which 69,500 acres are in sugar-cane and 54,400 in rice), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like the Netherlands, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 8,740 feet above sea level, and on the Potaro River are the *Kaieteur Falls*, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The meteorological records taken on the coast-lands during a period of 74 years show, as regards temperature, that the climate is a very equable one. The mean temperature is 80° 3', its recorded extremes during this long period ranging between 66° and 92°, but these extreme temperatures are very rarely recorded, the usual extremes during a year being 72° and

80°. In the interior the mean temperature is higher—82°, its extremes ranging from 66° to 103°. The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being 94.4 inches distributed over 105 days of the year, and its range from 44.9 to 132.2 inches per year. In the interior the average recorded rainfall is 50.8 inches per year ranging from 45.3 to 57.9 inches per year. The birth-rate in 1920 was 34.9, and the death-rate 25.6 per 1,000. The chief product is sugar, which forms 76 per cent. of the export trade. The leading exports are sugar (£4,199,682 in 1920), rum, diamonds, timber, balata, and rice. There are about 13,000 aboriginal Indians; they are occupied largely in fishing, hunting, and raising crops of cassava.

The Government consists of a Governor and a Court of Policy of 15 other members, 7 official and 8 elected, and a Combined Court including the members of the Court of Policy together with six elected Financial Representatives; with an Executive Council, consisting of the Governor, 5 official and 3 unofficial members nominated by the Crown. There are 1,864 miles of post-office telephone wire and 556 of telegraph lines, with 74 post-offices. There are 95 miles of railway.

#### BRITISH HONDURAS.

British Honduras, in Central America, lies within 28° 29' 5" to 15° 53' 55" N. latitude and 89° 9' 22" to 88° 25' W. longitude. Its extreme length and breadth are 174 m. and 68 m. respectively; it is bounded on the north by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea. The total area is about 8,598 sq. miles, with a population (Census 1921) of 45,317—22,563 males and 22,754 females. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 95°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten or twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood. Sugar, rubber and cacao grow readily. Fruit, including bananas, plantains, coco-nuts, pineapples, oranges, and mangoes also grow well, while inland there are extensive regions of good pasturage. About 60,000 acres are under cultivation. The best description of cacao trees grow wild in the bush. There are 25 primary schools in the colony, and 4 schools with secondary departments in Belize. The shipping entered and cleared at the port of Belize in 1920 was 532,202 tons. There is a radio-telegraph station at Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 3 appointed members and a Legislative Council of 5 official and 7 appointed members. The Governor is President of both Councils.

# CAMEROON.

(Joint Franco-British Administration.)

The German Protectorate of Kamerun on the west coast of Africa between (British) Nigeria and French Congo (the Spanish Muni River Settlements occupying a small intervening area), was obtained by conquest by Franco-British forces during the War of 1914-18, and at the conclusion of Peace its administration was confided by the Supreme Council of the Allied Powers to Great Britain and France jointly.

The approximate geographical limits are between 2°-12° N. lat. and 8° 45'-19° E. long., and the area is about 295,000 square miles, containing a population estimated at 3,500,000. The coast line extends from the Rio del Rey to the Muni River. The south-eastern boundary (as re-arranged in 1912) is the confluence of the Sanga with the Congo River; the extreme northern limit is the southern shore of Lake Chad, and the extreme eastern limit (1912) is the Ubangi River. The territory occupies the north-west corner of the Central African Plateau, with Cameroon Peak (12,370 feet) near the capital, on the coast, and the Chebchi and Mandara Mountains on the north-west frontier. Access was obtained to the Congo and Ubangi Rivers by the Agadir compensation treaty with France (1912), under which the area of the colony was increased by 100,300 square miles. The Sanga is a considerable river flowing into the Atlantic opposite Fernando Po; the Sanga and Dscha (or Ngoko) are tributaries of the Congo, and the Logone-Shari flows into Lake Chad. The inhabitants are Bantus and Sudanese, with some Hausas and Fula tribes, of whom the latter are Mohammedans and the remainder pagans. Cocoa cultivation is a highly successful industry of recent origin, and the Protectorate is rich in forest produce. The exports (valued at £3,135,000 marks in 1912) are rubber, palm oil, palm kernels, cocoa and ivory; the imports (34,242,000 marks in 1912) are chiefly clothing and textile goods, meat, fish and provisions. There were 270 miles of railway open in 1912.

In 1900 the whole area was divided into a British Sphere and a French Sphere.

The British Sphere is a wedge-shaped strip, running with the Nigerian border, and containing an area of about 25,000 sq. miles. It is administered by the Nigerian Government, the capital being BUKA, on the slopes of the Cameroon Mountain. The principal port is Victoria (in Ambae Bay), which is connected by railway with the capital.

## CAYMAN ISLANDS.

The Cayman Islands, forming a dependency of Jamaica, are situated between the meridians 79° 44' and 81° 46' W., parallels of 19° 15' and 19° 46' N., and consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 200 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas." Population (1901) 5,253.

The principal town is Georgetown, in Grand Cayman, population (1901) 1,070.

Commissioner & Judge of the Grand Court, H. H. Hutchings (house and fees) £500

## CYPRUS.

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between

35° 55'-3° 50' N. lat. and 70° 45'-2° 55' E. long. Its area is (with outlying islands) 25,425 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 120 miles.

The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

The population (Census of 1901) was 4,200,669, the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but five years after, in 1802, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of paddy and dry grain. The principal exports are tea, products of the coco-nut palm, rubber, plumbago, cocones, cinnamon, cardamoms, ebony, and a little vanilla.

About one-fourth of the island is under cultivation, and the leading areas in 1900, in acres, were:—Rice, 757,043; other grain, 154,900; tea, 502,645; coffee, 938; coco-nuts, 945,057; rubber, 412,000; cinnamon, 34,668; cocoa, 35,750; and tobacco, 19,700. The live stock in 1900 included 1,508,833 horned cattle, 57,497 sheep, 155,570 goats, 59,070 pigs, and 3,210 horses. Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and for the pearl fishery in the Gulf of Mannar, off the N.W. of the island. The manufacture of salt is a Government monopoly.

There are 728 miles of railway open, 611 being 5 ft. 6 in. gauge and 117 miles a ft. 6 in.; and the post and telegraph offices numbered 727, there being 7,258 miles of telegraph wire.

The government of Ceylon is administered by a Governor, aided by an Executive Council of 6 members, and a Legislative Council of 37 members. The Legislative Council contains representatives of the various territorial divisions of the island, and special safeguards provide for the representation of minorities and unrepresented interests. Of the 37 unofficial members 16 are elected and 7 nominated by the Governor.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities or local boards; and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

The MALDIVIVE ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Male, the seat of government, is about 600 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muhammadans. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coconut oil, and tortoiseshell.

Colombo, distant from London 6,300 miles; transit, 16 days.

**CYPRUS**

is an island in the Mediterranean Sea, between N. lat. 34° 33' and 35° 41', and E. long. 32° 17' and 34° 25'. It is about 40 miles distant from the nearest point of Asia Minor; and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal,

is 298 miles. The larger part of the island is an irregular parallelogram, 200 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,584 square miles. The population at the census of 1921 was 320,709, of whom about 80 per cent. were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal productions are grain of various kinds, sesame, hneeseed, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, grapes, oranges, pomegranates, asbestos, aniseed, sponges, sumac leaves, terra umbra, gypsum, and salt. The fertility of the soil has for centuries been proverbial. In 1920 the wine export was 1,253,128 gals., and that of spirits 28,210 gals., the bulk of the wine and spirits going to Egypt. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus was formally annexed to the British Empire in 1924. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of 18 members, 6 being official and 12 elected. The island is divided into three electoral districts, each returning one Muhammadan and three Christian members.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner; and each has a Court of Law presided over by an English judge, who is assisted by two native judges, one being a Christian and the other a Muhammadan. There is also a Supreme Court for the whole island, consisting of two English judges.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 121,98 in 1921; the other principal towns are Larnaca (population 9,768), Limassol (12,291), Famagusta (7,276), Kyrenia (1,123), Paphos (4,112), and Morphou (3,500).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow-gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and was extended to Morphou, 25 miles, in 1907, and to Erythrou, 15 miles, in 1915. There is a regular service of steamers from Egypt.

#### FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15'—53° S. lat. and 57° 40'—62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 200 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,400 sq. miles, and a population in 1919 of 2,250. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. After having successively belonged to France and Spain, they were given up to Great Britain about 1771, but not actually occupied. In 1820 the Argentine Republic established a settlement in these islands, which was destroyed by the Americans in 1831. In 1833 they were again taken possession of by the English for the protection of the whale-fishery, and colonised, being the most southerly organised colony of the British Empire. On Dec. 8, 1914, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Falkland Islands. The climate, though somewhat bleak, is usually considered healthy, and the temperature is on the whole equable, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65°. The islands are chiefly bog-land, and have proved suitable for sheep ; kitchen-gardens occupy the only cultivated part, with the exception of one station situated in a sheltered position on the West Falkland, where a considerable crop of hay is grown. The population is mainly British, and is principally engaged in sheep-farming and sea-faring industries. The chief exports are whale-oil and guano, wool, tallow, hides and sheepskins. The only important settlement is Port Stanley,

at the head of Port William, on the coast of East Falkland.

SOUTH GEORGIA, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is a dependency of the Falkland Islands. Among other dependencies are the *South Shetlands* ; the *South Orkneys* (on which the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later) ; the *Sandwich Group* ; and a part of the mainland of the Antarctic, known as *Graham's Land*.

#### Fiji.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45'—21° 10' S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,083 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans ; the average temperature in the shade in the cool season is 72°, rising to 82° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief productions being the bread-fruit tree, banana, plantain, pea-nuts, yams, and dalo (taro), coco-nut, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra, bananas, trocas shell, molasses, rubber, maize, hides and pelts, and bêche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 6 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 12 nominated members (one specially representing Indian interests), 7 elected members, and a native members, appointed by the Governor. Native administration is carried on through the chiefs under the Governor's supervision. The population (Dec. 31, 1917) was estimated at 165,997.

(91,013 native Fijians, 61,153 East Indian immigrants, 4,824 Europeans, and some Polynesians and others).

## GAMBIA.

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1628 an effort to do so was made, but it was not successful. In 1661 a fort was built upon a rocky island, and in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the Treaty of Versailles, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, at the Census of April 2, 1912, was 7,700, and that of the Protectorate 128,402. The climate is unhealthy during the rainy season, viz. from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which

form seventy per cent. of the total exports. They were sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil, but, since the outbreak of war, the export trade has been mainly with the U.K. Beeswax, palm kernels, hides, and calabashes are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are cotton goods, kola nuts, rice, soap, spirits, hardware, sugar, wine, and tobacco. A Company of the W.A.F.F. (4 officers and 200 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering 92 men), which performs both civil and military duties. The government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and 3 unofficial members, nominated by the Crown.

## GIBRALTAR.

a rocky promontory, 2½ miles in length and ¼ of a mile in breadth, and 1,366 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1797-98, when General Elliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1900 6,496 vessels entered, with a total tonnage of 11,614,287. The chief sources of revenue are the

port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, and beer. There is an enclosed harbour with an area of about 400 acres, three graving docks, and docking accommodation for the largest battleships in the British Navy. The civilian population (Census of April, 1911) was 29,120.

The Governor is in command of the garrison, and exercises all the functions both of government and legislation, there being no executive or legislative council.

# GOLD COAST.

The Gold Coast Colony comprises a portion of the coast of the Gulf of Guinea from about 3° 7' W. to 1° 14' E. of Greenwich, with a protectorate extending inland to an average distance of 440 miles, or to the 11° of N. latitude, bounded on the west and north by the French colonies of the Ivory Coast and French Soudan, and on the east by Togoland. The total area is estimated at 80,225 sq. miles. The population (Census of April 1, 1911) was: Gold Coast Colony, 857,526;

Ashanti, 287,814; Northern Territories, 357,519; total, 1,503,365, of whom about 1,000 are Europeans. The natives are almost all Pagans, but the number of Muhammadans and Christians is steadily increasing.

The trade is principally with the United Kingdom. Gold is found in considerable quantities, and diamonds were discovered in 1919; there are also large deposits of high-grade manganese. The principal product is cocoa, more than half the world's supply being produced in the Colony; rice plantations have been started and steps have been taken to improve the coco-nut industry, and to develop the kola and sisal hemp plantations. The principal exports in 1920 were: cocoa, £10,056,298; gold and gold dust, £889,248; palm kernels, £222,468; and kola nuts, £452,245. The chief imports are textiles, building materials, provisions, kerosine, and hardware. The climate, generally, is hot and moist, but is becoming annually less unhealthy by the aid of medical science and sanitation. The Government assists the missionaries in educational matters, and has established schools of its own. Great efforts are being made to improve the sanitary condition of the coast towns. The principal towns are lighted and policed. The total tonnage of shipping entered and cleared in 1920 was 2,328,224 (British 1,767,492). 2,600 miles of telegraphs have been established in the colony, of which 250 miles are in Ashanti and 203 miles in the Northern Territories. There is a wireless telegraph station at Accra. A Government railway runs from Sekondi through Tarquah, the centre of the gold-mining industry, to Kumasi (168 miles). Another line runs from Accra to Anyinam (65 miles), and construction from Anyinam to Coomassie is proceeding rapidly from both ends.

The seat of government is Accra (population 19,588). The other principal towns are: Cape Coast (11,269), Addah (1,572), Elmina (5,079), Secondee (9,122), Tarkwah (2,426), Quittah (3,630), Axim (3,285), Coomassie (18,853), Saltpond (3,540), and Winnebah (5,840). The government of the Colony is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 12 official and 9 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

## ASHANTI.

Ashanti was placed under British protection on Aug. 7, 1896, and a English Resident was appointed to Coomassie. Under Orders in Council of Sept. 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast being appointed Governor of Ashanti, though the laws and Ordinances of the Gold Coast do not apply to the annexed territory. It is divided into two provinces under Commissioners. The Eastern Province, with headquarters at Coomassie, and the Western Province, with headquarters at Sunyani. The population (census 1911) was 287,814. Coomassie, the chief town, has about 20,000 inhabitants. There are Government schools at Coomassie, Sunyani and Juaso, and a number of mission schools. Agriculture is extending, cocoa and rubber plantations are being formed. Gold output (1918) £421,731. In the Western parts of the Gold Coast Colony and especially of Ashanti are rich forests with excellent timber trees (mahogany, cedar, &c.), trees yielding fruits, rich in oil, rubber-bearing plants, and species yielding gum copal. The country is well watered, and with proper restraints on wasteful native farming and on over-exploitation, would contain inexhaustible supplies of valuable forest products. On the Eastern side the forests are sparser, though timber and oil trees are common and game plentiful; the products there are chiefly maize, kokoyams, bananas, ground-nuts, and cocoa, the plantations of which are rapidly extending.

## NORTHERN TERRITORIES.

“In 1901 the Northern Territories lying to the north of the parallel of 8° N lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection. They are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale. The country is divided into two provinces under Commissioners; the Southern Province, with headquarters at Tamale, and the Northern Province, with headquarters at Navarro. By the census taken in 1911 the population was about 360,000. The Mohammedans have substantial mosques; there are Roman Catholic and other missions. Government schools have been established at Tamale, Gambaga, Lorha, and Wa. Good permanent roads are being made. The Northern Territories are capable of producing various agricultural crops (cereals, shea-butter, ground-nuts, indigo, tobacco), and are said to contain wide auriferous areas.

## HONG KONG.

The Crown Colony of Hong Kong consists of a number of islands situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 10'–22° 34' N. lat. and 113° 54'–114° 30' E. long., and of a portion of the mainland.

Hong Kong is an island about 10 miles long and from 2 to 6½ miles broad, with a total area of 32 square miles; it lies close to the mainland, being separated at one point by a narrow strait (Lycemoon) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842; British Kowloon was subsequently acquired by the Peking Convention of 1860; and the New Territories, being a peninsula in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 391 square miles, with a population (1911) of 622,000. The non-Chinese residents, excluding naval and military, numbered about 12,500.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. With the exception of liquor and tobacco the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1919) 17,807,585 tons; (1920) 20,061,264 tons. A railway, of which 13 miles belong to the Government, runs from Kowloon to Canton; the length north of the Sham Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. A light railway runs through the fertile valleys of the north-east portion of the New Territories from Fanling to Sha-Tau-kok, a distance of 7 miles. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 2,850 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 76° in July to 55° in February. The average annual rainfall is 84 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flour, gunnies, hides, iron and steel goods, leather, matches, oil, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1920 there were 692 schools subject to Government supervision, attended by 28,707 pupils. The University (opened in 1912) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 14 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls all sanitary measures.

CAPITAL, Victoria; population (1921), 320,400.

## JAMAICA.\*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 43'—18° 32' North lat. and 76° 11'—78° 21' W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,430 square miles, and a population, in April, 1921, of 857,921 (males, 401,923; females, 455,998). In 1911 the whites numbered 15,605; coloured, 163,201; blacks, 630,181; East Indians, 17,380; Chinese, 2,111; not specified, 2,905.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid*.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 200 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages; the number of accounts open in the savings banks was 40,303 (1918). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), and of such other persons, not exceeding 10, as the King or the Governor may appoint, called Nominated Members, and 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census, 1921) 62,562; the next in importance are Spanish Town, pop. 8,694; Montego Bay, 6,580; and Port Antonio, 6,272. Chief exports (1918): sugar, £613,522; fruit, £325,077; coffee, £217,526; cocoa, £154,191. 1918-19. 1919-20.

### KENYA.

Kenya Colony and the East Africa Protectorate include the whole of the coast from the Umba to the Juba River, as also the vast territories in the interior bounded in part by international conventional lines. The eastern boundary was defined along the Juba and north-east by an agreement with Italy (1901), and on the north by an agreement with Abyssinia in 1902. On the west the Colony adjoins Uganda, and on the south the mandated Tanganyika Territory.

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility on the coast, as well as in the interior. The Colony is divided for administrative purposes into eight provinces, which are subdivided into districts and sub-districts: (1) Seyidie, (2) Ukamba, (3) Tanaland, (4) Juha-land, (5) Kenya, (6) Naivasha, (7) Nyanza, and (8) Northern Frontier District, of which the

centres of administration are respectively Mombasa, Nairobi, Lamu, Kisumu, Nyori, Naivasha, Kisumu, and Moyale. Of the provinces Ukamba and Naivasha are best suited to colonisation by Europeans. There is also a considerable region still undeveloped, and not yet included in any administrative district. The population of the Colony has been estimated lately at 4,000,000, but no accurate census has ever been taken. Its area is approximately 200,000 square miles.

Kenya also includes the Witu Protectorate, a small tract of country at the mouth of the river Tana. Witu is regarded for administrative purposes as part of Tanaland.

Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population, about 30,000, of whom 300 are Europeans). There is also telegraphic communication along the coast between Mombasa and Lamu, and between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions radiating from the main Uganda Railway telegraph system to Taveta, Fort Hall, West Kenia, Archers Post, Southern Masai Reserve, Eldama Ravine, Kericho, Uasin Gishu, Machakos, Kisili and Mumias; also telegraph connexion between Mombasa and Tanga. Radio-telegraph stations exist at Mombasa and Kisumu. The Uganda Railway has its terminus at Mombasa, which is connected with the mainland by a railway bridge 1,732 feet in length. There are also about 40 miles (under Uganda Railway management) from Nairobi to the Fort Hall District, and about 90 miles from the main line at Uganda junction to the Magada Soda Lake. Nairobi, the capital of the Colony, and central station of the Uganda Railway, has a population of about 25,000, of whom 1,200 are Europeans. There are also some 400 European farmers in the immediate neighbourhood of Nairobi.

The principal exports are hides and skins, grain, rubber, fibre, and copra; the principal imports are piece-goods, rice, grain and flour, building materials, European provisions, &c.

The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits is also heavily checked.

## LEEWARD ISLANDS.

The Leeward Islands of the West Indies under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher and Nevis, with Anguilla; (3) Dominica; (4) Montserrat; and (5) the Virgin Islands, with Sombbrero, under Commissioners, all, except the latter, having their own local Legislature. These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate, and there is also a General Legislative Council, possessing concurrent legislative powers with the local Legislatures on certain subjects. The population of the federal colony at the Census of 1921 was 127,189. The General Legislative Council consists of 8 *ex-officio* and 8 elective members, with the Governor as President.

## (2) ANTIGUA (AND BARBUDA).

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in  $17^{\circ} 4' N.$  lat. and  $61^{\circ} 45' W.$  long., and is about 70 miles in circumference. Its area is nearly 108 square miles, equal to 68,980 acres, of which nearly 17,000 are under cultivation. The population (with Barbuda) in 1921 was 32,265, including 13,989 males and 18,276 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., the island has always been more distinctively English. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is being planted, and the island also exports molasses, tamarinds, and arrowroot. In March, 1898, the Crown Colony system of government was instituted.

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat.  $17^{\circ} 35' N.$ , long.  $61^{\circ} 45' W.$  Area, 60 square miles. Population, 1,000. The island is flat and fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables, and was formerly a possession of the Codrington family. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing.

Magistrate, Capt. G. Downing.

Redonda, a small island with a phosphate industry, has a population of about 20.

(a) ST. KITTS-NEVIS  
(WITH ANGUILLA).

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they had a population at the Census of 1921 of 38,212 and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from  $75^{\circ}$  to  $85^{\circ}$ .

St. Kitts, the principal island of the Presidency, and the oldest colony in the West Indies, is situated in lat.  $17^{\circ} 12' N.$  and long.  $62^{\circ} 48' W.$ , and comprises an area of 68 square miles, its greatest length being 26 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous

line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of 3,711 feet (Mount Misery). The capital, Basseterre, pop. (1921) 7,725, is a port of registry, and had 75 vessels of 1,425 tons in 1920.

*Nevis* (separated from St. Kitts by a strait some 3 miles wide) has an area of 50 square miles, with a population in 1921 of 11,569. Sugar-cane and cotton are grown. Its greatest elevation is 3,595 feet. Chief town, Charlestown. Pop. (1921), 2,158.

*Anguilla* is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. Population (1921), 4,230. Cotton is the principal product, and small stock are raised.

### (3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situated between 15° 20'–15° 45' N. lat. and 61° 13'–61° 30' W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 291 sq. miles, or 286,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coco-nuts, and fruit. The population was estimated at 37,000 on April 24, 1921; included in this total are 400 Caribs, of whom 100 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President, and 6 official and 6 non-official members nominated by the Governor. The principal towns are Roseau, on the south-west coast, population about 7,000, and Portsmouth, population about 1,000.

### (4) MONTserrat

is situated in 16° 41' N. lat. and 60° W. long., 26 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 2½ square miles, with a population (Census 1921) of 12,120. Discovered by Columbus in 1493, it was settled by Englishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1764. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. The chief exports during the year 1920 were cotton, cotton seed, limes and its products, sugar, papaine and animals of all kinds. The chief town is Plymouth, with a population (1921) of 1,709.

### (5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27' N. lat. and 64° 40' W. long., Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1921 was 5,022. There is good pasture for cows, sheep, and goats. Sugar, cotton and coconuts are grown in increasing quantity; fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda. The capital of the group is Road Town, on the south-east of Tortola; population (1921), 463.

### MALAYA.

#### (1) THE FEDERATED MALAY STATES

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the

High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,648 square miles, with a population in 1921 of 1,324,890. The principal towns are Kuala Lumpur (Sel.), pop. 80,424; Ipoh (Pk.), 38,860; Taiping (Pk.), 21,111; Kampar (Pk.), 12,325; Seremban (N.S.), 17,572; Klang (Sel.), 11,625; and Teluk Anson (Pk.), 10,859.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above-mentioned control.

There are 1,014 miles of railway, all constructed from revenue, including the Johore State Railway (120½ miles), which is leased from the Johore Government. There is through communication between Penang and Singapore. The West Coast Railway, through Kedah and Perlis, connects with the Southern Siamese Railways and affords direct communication with Bangkok. Eventually, the journey between Bangkok and Penang will take 36 hours by rail instead of 6 days by sea. The East Coast Railway (now under construction), through Pahang and Kelantan, will also connect the Federated Malay States and Siamese railway systems. There are 2,456 miles of road, and 1,695 miles of bridle-paths, while the principal rivers are navigable for small boats.

One of the regions contributing largely to the raw products of the British Empire is the Malay Peninsula, and the most productive portion of the peninsula is that embraced by the four Federated Malay States. The territory is greatly endowed by having tin and plantation rubber as its two richest products, but the figures given below show that it has other exports of great value.

With the growth of the rubber industry, there has been a tendency to neglect some of the older products of the country, such as indigo, coffee, sugar, and pepper; gold has always been found in small quantities, chiefly in Pahang, and the export in 1920 amounted to 11,485 oz.

The following table shows the relative importance of the exports from the Federated Malay States over a period of three years:—

#### (a) THE MALAY STATES NOT INCLUDED IN THE FEDERATION.

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 11, 1885, as amended by an agreement dated May 12, 1914, whereby the Sultan accepts, and acts upon, the advice of a British officer called the General Adviser. In respect of the other four States, the rights of Suzerainty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siamese Treaty of March 10, 1909.

In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Muhammadism.

JOHORE, with an area of 9,000 square miles and a population (Census, 1921) of 282,244, occupies the southern extremity of the Malay Peninsula. Capital: Johore Bahru, population, 15,122. The rubber estates and tin mines are important.

KEDAH, between  $5^{\circ} 5' - 6^{\circ} 35' N.$ , lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1921 was 338,000, and the approximate area 3,800 sq. miles. Rice is the principal crop in North Kedah, while coco- and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 12,000. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 46 British officials, employed in the Public Works, Survey, Police, and Medical departments.

### MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of  $91\frac{1}{2}$  square miles. The colony includes also the adjoining island of Gozo, with an area of  $24\frac{1}{2}$  square miles; COMINO—the site of the *Sultan's* disaster in 1889 and now a sanitary station—and several islets. The estimated civil population of the whole group, on April 1, 1920, was 224,859. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants of those who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe. They speak English and Italian. There is a Maltese order of nobility consisting of 29 families.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1919 (June, July, August and September) was  $75^{\circ} 7'$ . In winter the range is from  $50^{\circ} 6' - 58^{\circ} 8'$ . In 1919 the highest temperature in the shade was  $95^{\circ}$ , and the lowest  $40^{\circ}$ .

The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. The principal occupation of the people is in connexion with shipping, about 8,000 females being occupied in making lace.

The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Citta Vecchia, the former capital of the island contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to about 425, but its suburb, Rabato, had about 9,474 inhabitants in 1921. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566.

Malta possesses a University and Lyceum; 102 elementary and infant schools, a secondary schools, and 39 night schools, maintained at a total cost to the Government of £44,885 in 1919-20; in addition there are garrison schools, a Dockyard school, and 59 private schools which receive no grants-in-aid from the Government.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that

kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Valette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

The government is administered, as regards Imperial affairs, by a Governor, who is usually a distinguished General, assisted by an Executive Council. Under the Constitution of 1920 there is an elected Legislative Assembly for purely local affairs, which are controlled by a Ministry responsible to the Legislature.

In 1919-20 the Port of Valletta was entered by 1,519 vessels (tonnage, 1,893,850).

## MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 59° 27' 57" 46' E. long. and 8. lat. 19° 58'—20° 23', and comprising an area of 780 square miles. The permanent population at the Census of 1911 was 270,392, of whom 237,887 were Indians, the majority born in the Colony, and the remainder mainly of French or mixed descent.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 208,870 arpents, 179,240 are under sugar, 20,000 under fibre, and 9,630 under other crops; the necessities of life have all to be imported from abroad. Rice and grain are obtained from India, flour and frozen meat from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes almost entirely through Port Louis. The shipping entered and cleared, in 1920, amounted to 716,488 tons, of which 74.03 per cent. was British. In 1920 there were 143½ miles of railway (129½ of 4 ft. 8½ in. gauge and 24 of 2 ft. 6 in.), 60 post-offices, 57 telegraph and 42 Government telephone offices in the island, with 665 miles of telegraph, including block telegraph for the railway, and 124 miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of four official members, and of such other persons in the service of the Government as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being *ex-officio*, nine nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The total expenditure on education in 1929-30 amounted to Rs. 975,896. Of the pupils in the Government and aided schools, 59 per cent. are Roman Catholics, 2 per cent. Church of England, 1 per cent. other Christian denominations, 11 per cent. Muhammadans, and 27 per cent. Hindus and others.

#### DEPENDENCIES OF MAURITIUS.

(1) **RODRIGUES**, 330 miles almost due east of Mauritius. Population (Census 1921), 4,829. Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.

Magistrate, E. Duvivier..... Ra. 8,000 to 9,000

(2) **OTHER DEPENDENCIES**. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco-nut oil. The most important is Diego Garcia (pop. 1921, 517), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and,

as it possesses a good harbour, has been much used of late years as a coaling station. The total population of the "Other Dependencies" (1921) is 1,344.

Transit from London to Mauritius, 28 to 30 days.

#### MESOPOTAMIA (IRAQ).

King of Iraq, Feisal, elected King of Iraq, Aug. 10, 1921, acceded Aug. 23, 1921.

President, Council of State, the Naqib of Baghdad, G.B.E.

Iraq, or Mesopotamia, "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan\* on N. and N.E. to the Persian Gulf on the S. and S.E., and from Persia on E. to Syria and the Arabian Desert on W. the approximate position being between 37° 1/2° to 48° 1/2° E. long., and from 37° 1/2° to 30° N. lat. The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Peace with the Allies (1920) Turkey renounced the sovereignty over Mesopotamia and its future administration has been entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government was set-up by the High Commissioner in Nov., 1920, and in Aug., 1921, the Emir Feisal (son of the King of the Hedjaz) was elected King of Iraq, to be enthroned on Aug. 23, 1921.

The total area of the districts comprised within the British Mandatory Sphere is about 150,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately 500 miles. The sphere comprises the former Turkish vilayets of Mosul, Baghdad and Basra. At the Census of 1920 the population was ascertained to be 3,849,282, as under:—

|                       |           |
|-----------------------|-----------|
| Baghdad vilayet ..... | 1,360,304 |
| Basra vilayet .....   | 705,600   |
| Mosul vilayet .....   | 783,378   |

Total .... 3,849,282

The Baghdad vilayet include the Baghdad, Samarra, Diyala, Kut, Diwanlyah, Shamiyah, Hillah and Dulaim Divisions; Basra vilayet include Basra, Amara and Muntafik; and Mosul include Mosul, Arbil, Kirkuk and Suleimani. (Mosul covers a great part of the ancient kingdom of Assyria, the ruins of the Assyrian capital being visible on the banks of the Tigris, opposite Mosul.)

Of the total population there were in 1920 1,125,685 Sunni Muhammadans, 1,494,213 Shiite Muhammadans, 87,488 Jews, 78,723 Christians, and 43,200 other religions.

Mesopotamia is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1920 certain works were undertaken, following on the report of Sir W. Willcocks, and since the British occupation notable improvements have been effected; the Irrigation Department is at present confining itself to small and immediately remunerative schemes. The wealth of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans, and rice, peas and

\* Kurdistan.—The mountainous tract inhabited by Kurdish tribes is to be formed into a separate autonomous province.

Indian corn; wheat averages 45lb. per acre, barley 52lb., and rice over 1,000lb. In 1928-29 there were 1,547,000 acres (deriving their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent. on the previous year. Cotton growing is a developing industry and it is estimated that Mesopotamia could yield 300,000 bales annually if sufficient labour is forthcoming. The country is being opened up and existing communications improved and secured. Schools, hospitals and dispensaries have been established under British auspices. Basra was equipped with wharves, railway sidings, &c., for military purposes, and is thus suited for commerce. The chief imports are textiles, sugar, and tea, and the chief exports are dates and piece goods.

The *Euphrates* (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad, 80 (425 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north-west of Erzerum in the Dumlup Dag. The *Tigris* has a total length of 1,250 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the vilayets of Diarbekir, Van and Bitlis conjoin.

*The Baghdad Railway.*—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway), to the Persian Gulf at Koweit, *via* Baghdad, a total length of 1,250 miles, with a single track of 4 ft. 8½ in. gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Mesopotamia), and Mosul, and thence S. down the right bank of the Tigris to Baghdad and the Persian Gulf. As this scheme was under German control the British Government (on account of the paramount interests in the Persian Gulf of British India) declined to be a party to it, and a new financial scheme was substituted in which 40 per cent. of the capital was to be German and 60 per cent. French, while the Basra section of the line was to be under British control. The first section, Konieh-Eregli-Bulgurlu (124 miles), was opened in Oct. 1904, and at the outbreak of the War of 1914-18 about 1,200 miles (out of the total of 1,250 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the Mesopotamian desert W. & S. of Mosul). The line crosses the Euphrates on a wooden bridge at Jerablus. At Aleppo there is a connexion with the Pilgrims' line from Medina (through Damascus and Homs to Aleppo) and, if it is completed, the railway will be served by the port of Alexandretta (Iskanderun) in Cilicia. The first through train from Basra to Baghdad left Basra on Jan. 13, 1900. The total length of line open at that date was 945 miles compared with 1,112 miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey.

The chief city is Baghdad, the former capital of the Abbaside dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has an estimated

population of 170,000, other towns being Basra, 85,000, and Mosul (opposite the site of Nineveh), 90,000.

*High Commissioner*, Maj.-Gen. Sir P. E. Cox, G.C.I.E., K.C.S.I., C.M.G.  
*Civil Secretary*, C. C. Garbett, C.I.E.  
*Military Sec.*, Col. Gilbert R. Frith, C.M.G., D.S.O.  
*Oriental Secretary*, Miss G. L. Bell, C.B.E.  
*Judicial Adviser*, E. Drower.  
*Financial Adviser*, S. H. Slater, C.I.E.

*Commander-in-Chief*, Lt.-Gen. Sir J. A. I. Haldane, K.C.B., D.S.O.  
**CAPITAL**, Baghdad.

Baghdad is 840 miles by air from Cairo, Egypt. Official Mails between London and Baghdad are sent by fortnightly Air Mail Service *via* Cairo—Heliopolis—Ramleh—Amman—Kasr Asrak—Ramadla, with a saving of about 24 days in transit over the normal service.

## NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Right of Benin, between Dahomey on the west and the Kameruns on the east. The Protectorate is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group with the former Protectorate of Southern Nigeria. The headquarters of Government is at Lagos. The area of the whole territory is 336,000 sq. miles, and the population roughly 16,500,000.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The natural products exported are palm oil and kernels, gum copal, rubber, mahogany, shea-nuts, hides and skins, and the export of ground-nuts is steadily increasing. A considerable industry has arisen in connexion with tin-mining in the Northern Provinces. The Udi coalfields are of great extent and the coals of excellent quality. A railway is in operation between Lagos and Kano, a distance of 705 miles. Branch lines run from Minna to Baio (on the Niger), and from Zaria to Bukuru. Another railway line runs from Port Harcourt, at the head of the Bonny estuary, to the coal fields at Udi (250 miles) and further railway extensions are in progress. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Ilorin, Zaria, Kano, Onitsha, Lokoja, Warri, Bonny, Bapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports are cotton goods, provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, and haberdashery.

**NYASALAND PROTECTORATE.**

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambesi.

The population of the Protectorate is 1,202,519, including 1,427 Europeans and 561 Asiatics, and it has a total area of 99,996 square miles.

The principal exports are cotton, tobacco, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of cotton and tobacco are considerable. Ivory and rubber are also exported in small quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are seven steamers. There are also twenty-three steamers on the Zambesi and Shire rivers plying between Chinde and the railway terminus at Chindio. At Chinde, situated in Portuguese territory at the mouth of the Zambesi, is a piece of land leased from the Portuguese Government (known as the "British Concession") where goods intended for the Protectorate may be transhipped free of duty.

Chief towns:—Blantyre (population about 300 Europeans and 7,000 natives) and Zomba, the headquarters of the Government. A railway from Port Herald (the "inland port" of the Protectorate) to Blantyre (123 miles) is open for traffic. An extension from Port Herald to Chindio on the Zambesi (62 miles) was opened to traffic in 1915, and an extension to Beira is to be completed early in 1922. A further extension to Fort Johnston, on Lake Nyasa, is projected. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,300.

Mails to and from England are despatched every week via Cape Town and Beira. Between Chinde and Europe the means of communication are the Union-Castle Mail S.S. Co., Messrs. Rennie's Line via Natal, and the British India Steam Navigation Co. The Protectorate is connected by telegraph overland with the Cape via Salisbury, and, with the Portuguese wires, to Chinde and Quillimane. The African Trans-Continental Telegraph Company's line has now been extended northwards as far as Ujiji on Lake Tanganyika.

(In addition to £1,000 as C.J. of Fiji.)

(a) The British Solomon Islands, protected since 1893, and consisting of Guadalcanar, Malaita, San Cristoval, New Georgia, and other islands situated east of New Guinea, with a total area of about 51,000 square miles, and a population, 1919, of 675 Europeans, 75 Asiatics, and about 150,000 natives. The Santa Cruz Group and several other islands were incorporated in the Protectorate in 1893 and 1899; and in 1900 Choiseul and Yasabel, with the islands in Bougainville Straits and Lord Howe's group, were transferred by treaty from Germany. The revenue in 1918-19 was £29,476, and the expenditure £30,205; exports, 1918-19, £170,225; imports, £188,408. The seat of government is Tulagi.

Resident Commissioner, (and  
£50 allowance) £800 to 1,000

(c) The Gilbert and Ellice Islands, formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group, situated between 4° N. and 3° S. latitude and

172° and 177° W. longitude, consists of 26 islands, with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179° 30' W. longitude, consists of nine islands. Ocean Island (or Paanapa), in lat. 0° 52' S. and long. 169° 35' E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles; population (1919), 300 Europeans, 300 Asiatics, and 33,500 natives. Revenue (1918-19), £44,490; expenditure, £30,734; imports (1915-16), £108,783; exports (1915-16), £183,248. The Union or Tokelan Group, Fakaofu, Nukunono and Atafu, were included in the Protectorate in 1900, and annexed to H.M. Dominions in Feb. 1926 as part of the Gilbert and Ellice Islands colony.

**Fanning Island**, in lat. 3° 30' N., long. 199° 13' W., and Washington Island, 66 miles N.W. by W. of Fanning Island. Pop., 21 Europeans in connexion with Pacific cable station, and about 400 Gilbert Islanders in copra industry. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. 27, 1926.

**Resident Commissioner**, E. C. Elliot...£700 to 800 (and £50 allowance).

(3) *The Tonga or Friendly Islands*.—A protectorate over the Tonga Islands was proclaimed May 19, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and a population (1919) of 376 Europeans, 250 half castes, 22,669 Tongans, and 247 others—total 23,556. The limits of the group are between 15° and 23° 30' S. and 173° and 177° W. Tongatabu is the seat of government, the late King George Tubou II., who died in 1912, being the last of the independent kings in the Pacific. Soil generally is fertile; the principal exports are copra, fungus, green fruit, kava, and candle-nuts. Two of the smaller islands disappeared owing to a tidal wave, in June, 1919. Revenue, 1918-19, £66,908; expenditure £43,688; imports (1918), £177,151; exports, £169,737. The total shipping entered and cleared in 1917 was 47,180 tons, all of which was British.

**Agent and Consul**, Islay McOwan

(and entertainment allowance £100) £800

(4) *The Phoenix Islands* (Wilkes, Gardner, Birnie, Hull, Enderbury, Phoenix, and Sidney), between 2° 30' and 4° 30' S. and 171° and 174° W.

(5) *Pitcairn Island*, situate in lat. 25° 3' 30" S., long. 130° 8' 30" W. Pop. (April, 1907), 144, descendants of the mutineers of H.M.S. *Bounty*. Arrowroot is manufactured and exported.

**Deputy Commissioner**, Mr. W. T. Williams (H.M. acting Consul for the Society Islands).

**Chief Magistrate**, Parkin R. Christian.

(6) *The New Hebrides Group* lies west of Fiji and south-east of New Caledonia. In 1906 a Convention was signed under which the administration of the group was assumed by Great Britain and France. ### PALESTINE.

*Palestine*, extending from the Mediterranean on W. to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Tiberias, and from the Egyptian frontier on S. to the French Mandatory Sphere of the Great Lebanon on N., includes, in addition, a large area E. of the Jordan and S. of the Yarmuk.\*

Palestine is under British administration since the conquest of the country by the forces of General Allenby in 1918, and consists of a W. maritime lowland, the mountain region of Judah (which forms the backbone of the district) and, on the E., the depression through which the Jordan winds its way from the Sea of Galilee (Tiberias) to the Dead Sea. The *Dead Sea*, 1,200 feet below the level of the Mediterranean, is 46 miles long and has an average width of 8½ miles; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its water is intensely salt and has a specific gravity one-sixth greater than water, with 24 per cent. of salt. (The Great Salt Lake of Utah, U.S.A., is 80 miles long and 30 miles wide, at 4,218 feet above mean sea level, and contains 25 per cent. of salt.) The area of Palestine W. of the Jordan is about 9,000 square miles, with a population (July, 1921) of 700,000, of whom 547,000 are Muhammadans, 76,000 Jews, and 77,000 Christians. Since 1919 about 10,000 immigrants (mostly Jews) have settled in the country.

Palestine is divided into 7 administrative districts, under District Governors. English, Arabic and Hebrew are the official languages of the country. The chief town, *Jerusalem*, had been in Moslem hands since 1244, and under Turkish rule since 1917, until it surrendered to General Allenby on Dec. 9, 1917, to be entered the next day by British troops. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in 1900 of 60,000. The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Mosque of Omar, which contains a relic of Mahomet and the sacrificial stone of Abraham. *Bethlehem*, the scene of Christ's Nativity, is 5 miles S. of Jerusalem. The Church of the Nativity, at the E. end of the present village, is reputed to be the oldest Christian church in existence. King David was also born in Bethlehem. *Nazareth*, about 25 miles S.W. of the Sea of Galilee, had a population of 9,200 in 1900. Other large towns are Jaffa (45,000), Gaza (25,000), Acre (6,500), and Haifa (26,000). The Jewish schools at Haifa have been purchased from the German *Hilfsvereine* and presented to the Zionist Organization.

The railway system of Palestine consists of five sections: *Haifa-Haifa*, continuing southward to Kantara to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara; *Haifa-Acre*—

\* *Transjordan* or *Karak*.—The country beyond the Jordan is under the provisional government of the Emir Abdallah (brother of the Emir Faisal, King of Iraq), assisted by British advisers.

**Semakh**, continuing beyond Semakh to Damascus in the French mandatory territory of Syria; **Jaffa-Ludd-Jerusalem**; **Rafat-Beerseba**; and **Afula-Tulkerram**. The main junction of the Government Railways is at Ludd, the general offices being at Haifa.

The chief ports are Jaffa, Haifa and Acre. There are branches of the Anglo-Egyptian, Anglo-Palestine, Banco di Roma, Credit Lyonnais, and Imperial Ottoman Bank in the main towns.

Although economic conditions are still primitive, modern methods are making headway, and there are good prospects of development and progress. The country is generally fertile, and cereals, wine, olives and various fruits are produced, while sheep and goats thrive in the lowlands, and in the mountains in time of drought. The imports in the year ending March 31, 1922, were valued at £25,216,633 and the exports at £277,702.

#### ST. HELENA.

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 555 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (Census 1911) of 3,300. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trade" keeps the temperature mild and equable. The

thermometer goes up to 84° in the town at the sea-level; but in the country, 1,800 feet above the sea, the maximum is about 76°, and the mean temperature ranges from 57° in September to 66° in March, there being very little difference between night and day; the lowest temperature in winter is 51°, and the total rainfall (1900) 35.24 inches. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on May 21, 1502 (St. Helena's Day), and remained unknown to other European nations until 1582. It remained uninhabited until the Dutch colonised it *circa* 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II., until 1824 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for the Emperor Napoleon, who died there May 5, 1821), when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity received a fatal blow by the cutting of the Suez Canal, and it is now frequented only by a few sailing ships homeward bound from the East Indies. A phormium (flax fibre) and lace-making industry have been established under Government control. St. James's Bay, on the north-west of the island, possesses a good anchorage.

The government is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of 400 miles, an area of about 45,000 square miles, and a population of about 600,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kelingang, and Batang-Lupar mountains; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (20 miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 30, appointed by the sovereign. The government of Sarawak was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1865, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1904. The country produces sago, gutta-percha, india-rubber, beeswax, birds'-nests, oil, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. A large petroleum field has been discovered in the Baram district, and is now a valuable asset. Gold exports, (1913) \$1,077,400; (1915) \$1,256,500; (1916) \$1,209,050; (1917) \$675,600; (1918) \$323,100. Oil exports, (1917) 93,000 tons; (1918) 74,400 tons.

Steamer leaves Singapore for Kuching and Kuching for Singapore every Tuesday in normal times, a temporary service being now maintained 2 times a month. There is also direct communication with Sibul and Miri.

**SEYCHELLES.**

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in

1794, and were finally assigned to Great Britain in 1814. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 148½ square miles, of which Mahé occupies nearly 96 square miles. The population of all the islands (Census 1921) was 24,593 (Mahé 19,428, Praslin 1,999, La Digue 1,303, other islands 1,762), an increase since the Census of 1911 of 1,832. Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour; it is an Admiralty coaling station, and depot for patent fuel. Although only 4° S. of the Equator, the islands are very healthy, the death-rate in 1920 being 14·72 per 1,000. There are 19 Roman Catholic and Church of England primary schools; there are also 2 secondary schools.

The principal exports are copra, vanilla, coconuts, coco-nut oil, tortoise-shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 3 members (a *ex-officio* and 2 nominated), and by a Legislative Council of 3 official and 3 unofficial members.

**SIERRA LEONE.**

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for

Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 220 miles, with an estimated area of 4,000 square miles. In 1911 its population was 75,572, of whom 650 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 220 miles, lying between 7° and 10° N. lat., and the extreme breadth from east to west is 180 miles, between 10° 40' and 13° 21' of W. long. Its estimated area is 27,000 sq. miles, and its population about 1,327,560. For administrative purposes it is divided into 3 Provinces, under Provincial Commissioners, assisted by 10 District (and 14 Assistant District) Commissioners. The principal peoples are the Limbas and Korankos in the north, the Tennes in the centre, and the Mandis in the south.

The principal exports are palm kernels, kola nuts, and palm oil; but ginger, piassava, hides, and rice are also exported. The value of the palm kernels exported in 1900 reached £1,401,676. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 104 miles in length extends in a north-easterly direction from Bala to Kamabai. By the extension of the railway and the development of a system of roads in the Protectorate, it is estimated that the output of Sierra Leone products into the European market is capable of being more than doubled. There are 827 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council nominated by the Crown, and having full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

## SOMALILAND.

(The Somaliland Protectorate.)

In 1884 a Protectorate was declared over part of Somaliland, a region where the coast is divided between Great Britain, France and Italy, while the interior is subject to Abyssinia, and forming the north-eastern horn of the African continent. The British Protectorate contains about 68,000 sq. miles. The population, mainly consisting of Somalis, a Muhammadan people, is estimated at 300,000. The boundaries are defined by treaties with Abyssinia, France and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south. The Protectorate garrison is now confined to a Camel Corps, 400 strong, the Dervish power having been finally broken in 1900. The chief products of Somaliland are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden. The Protectorate was transferred to the administration of the Colonial Office on April 1, 1905.

The High Commission.—The office of High Commissioner, which was formerly combined

\* Inclusive of allowances.

with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner; by a similar Commission issued in 1905 in Lord Selborne; since 1906 it has been vested by a separate commission in the successive holders of the office of Governor-General of the Union of South Africa. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland, and he exercises the control provided by Order in Council over the Administration of the British South Africa Company in Southern and Northern Rhodesia. The Southern Rhodesia Order in Council, 1898, and the Northern Rhodesia Order in Council, 1911, provide respectively for a control by the High Commissioner over legislation, important appointments, and Native Affairs in Southern and Northern Rhodesia, and for the appointment of a Resident Commissioner, who is paid from Imperial funds and acts as the local representative of the High Commissioner and the Imperial Government.

## BASUTOLAND.

*(The Territory of Basutoland.)*

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,716 square miles. The Census of 1911 showed 497,696 natives and 1,615 whites, 1,078 coloured and 155 Asiatics.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The revenue is derived from Customs, native tax, Post-office, and licences. Telegraph offices have been opened at Leribe, Maseru, Teyateyaneng, Morija, Mafeteng, Moshale's Hoek, Quthing, and Qacha's Nek. There are 417 native schools, with over 32,500 native scholars on the roll, a large proportion being in the schools of the French Protestant Mission; there are also 7 white schools, with 133 pupils. The amount spent on education in 1920-21 was £26,745. The chief articles of export are grain, wool, cattle, and horses, the imports being chiefly blankets, hardware, and groceries.

## BECHUANALAND.

*(The Bechuanaland Protectorate.)*

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambezi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Rhodesia, Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 400 miles long and 450 miles broad, with a total area of about 275,000 square miles. The population at the Census of May 7, 1911, was 125,350, of whom 1,692 were whites.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April. The country is essentially pastoral, although Kaffir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 323,911 at the Census of 1911. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Linchwe (Bakgatla), of Sebele II. (Bakwena), of Tshosa (Bangwaketsi), of Seboko Mkgosi (Bamaletse), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, via Gaborone and Francistown, to Bulawayo and Salisbury. The chief European centres are Lobatse, Gaborone, Francistown, and Serowe, whither the Chief (Khama) and all his people moved a few years ago from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

#### AREA AND POPULATION.

|                                 | Sq. m.  | Pop.    |
|---------------------------------|---------|---------|
| Southern Rhodesia (Salisbury)   | 149,000 | 882,461 |
| Northern Rhodesia (Livingstone) | 291,000 | 983,539 |

The total area of Rhodesia is about 440,000 square miles, the total population being estimated at 1,866,000 in 1921. The territory is named after Cecil Rhodes, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north, to the Limpopo River in the south.

#### COMMUNICATIONS.

*Railways.*—The main arteries of communication are the Rhodesia and the Mashonaland Railways. The former is a continuation of the line from Cape Town to Vryburg, via Kimberley, and was opened to Bulawayo in November, 1907, the distance from Cape Town being 1,362 miles. A line connecting Bulawayo with Salisbury (302 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Companies to the port of Beira (Portuguese), a total distance of 374 miles. The section from Bulawayo via the Wankie coalfields to the Victoria Falls (282 miles) was completed in June, 1904. The line crosses the Zambesi at the Victoria Falls, traverses Northern Rhodesia, and, crossing the border (507 miles), extends a further 490 miles via Kambove to Bukama, in the Belgian Congo State. A branch line of standard gauge (3 ft. 6 in.) runs from Salisbury to the Eldorado mine (78 miles), and

has been extended to Sinoia (4 miles). A standard-gauge line leaves the Eldorado branch at Mt. Hampden Junction (13 miles from Salisbury) for the Shamva mines (72 miles). A line connects Gwelo with Selukwe (24 miles); another runs from Bulawayo via Gwanda to West Nicholson (124 miles), opening up the mining district to the south-east; another connects Bulawayo with the Matopo Hills, where the founder of Rhodesia and Sir Starr Jameson are buried, and a branch line from Gwelo to Umtali has been extended to Fort Victoria (123 miles).

*Telegraphs.*—The African Transcontinental Telegraph Line ("Cape to Cairo") has been constructed as far as Ujiji in East Africa, about 3,250 miles from the Cape.

#### SOUTHERN RHODESIA.

*Area and Population.*—The total area is 149,000 square miles, and the population (1921) 882,461, of whom 33,621 are Europeans. The native population is estimated at 845,993, with 3,247 Asiatics and other coloured persons, including those of mixed race.

*Constitution.*—Southern Rhodesia is administered by the Company under the Charter of 1895, amplified from time to time by Orders in Council. The Administrator is advised by an Executive Council consisting of the Resident Commissioner and not less than three members, appointed by the Company with the approval of the Secretary of State for the Colonies. There is a Legislative Council consisting of the Administrator, the Resident Commissioner (*ex officio*), and 19 members, of whom six are nominated by the Company with approval of Secretary of State, and 13 are elected by the registered voters. A Supplemental Charter was issued on March 13, 1915, giving effect to the arrangement to which the Directors of the Company had agreed to render possible the establishment of Responsible Government in Southern Rhodesia, should the Legislative Council desire it, and should H.M. Government concur at some date other than that the Charter permits.

The laws in force in the Cape Colony up to June 30, 1891, were adopted for Southern Rhodesia, so far as they are applicable. Subsequent legislation has been by proclamation of the High Commissioner and by ordinances passed by the Legislative Council. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

*Industrial Progress.*—Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and for the cultivation of European fruit-trees, cereals, and vegetables, in addition to tobacco and the indigenous products of the country. The local breeds of cattle are constantly restocked by importation of pedigree stock.

The first regular crushing returns began in September, 1896, and the gold produced to December 31, 1900, was of the value of £48,264,392. The output for the year ended December 31, 1900, was valued at £2,095,500. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, and other minerals have also been produced in considerable quantities.

#### NORTHERN RHODESIA.

This territory, a large portion of which was first opened to British influence by David Livingstone, is partly occupied by the native tribes living under their own chiefs, but large tracts are being opened up for European settlement. Over 1,000,000 acres of land are under settlement by white farmers, whose operations are chiefly stock-raising; over 56,000 head of cattle are being grazed by them. Extensive mineral deposits, copper in particular, have been discovered. Indigenous rubber is found in large areas. The country is well timbered, and well watered by the Zambesi and Kafue rivers and their affluents. There are large herds of native cattle (325,175 in 1900). Game is also abundant.

The total area is about 291,000 sq. miles, and the population was estimated in 1900 at 941,335, of whom 2,932 are Europeans.

#### SWAZILAND.

##### (The Swaziland Protectorate.)

Swaziland (called by the natives Kwa Ngwane) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and the Portuguese province of Mozambique (Delagoa Bay). By the Convention of 1894, Swaziland was placed under the administration of, but not incorporated with, the South African Republic; the British Government now controls the Territory. The total area is 6,678 square miles, and the estimated population 111,700, of whom 1,700 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. Except in the Low Veld the country is well watered and healthy.

A Special Court having the full jurisdiction of a Supreme Court, and Courts of Assistant Commissioners having a restricted jurisdiction, have been established. Native chiefs continue to exercise jurisdiction according to native law and custom in civil disputes between natives, subject to a final appeal to the Resident Commissioner. The Paramount Chief, Sobhuza, son of the late Paramount Chief Bunu, is about 35 years of age, and the regency is in the hands of his grandmother, Labotsihami, widow of Mbandeni.

The numerous mineral and land concessions and monopolies granted by Mbandeni, of which many of the latter carried exemption from Customs dues or invested private individuals with powers properly exercisable by the Crown, rendered satisfactory government difficult. A Commission was therefore appointed under proclamation to inquire into these concessions

and monopolies, and those conferring exclusive rights have been expropriated, compensation being made out of loans raised for the purpose. The Commission also determined the validity and extent of all concessions, and the agricultural and grazing rights of the natives have been fully safeguarded. A general survey of the country took place in connexion with the work of the Concessions Commission and the Special Commission.

The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching on a large scale has been commenced by several companies. There were about 300,000 head of cattle in the Territory at the end of March, 1901.

In the winter season between 250,000 and 300,000 sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal. The agricultural products are tobacco, maize (the staple product), millet, pumpkins, ground-nuts, beans, and sweet potatoes, grown in insufficient quantities to meet local requirements. Most of the sub-tropical fruits can be grown with success. Large areas of land are suitable for growing cotton, coffee, and tea. The country possesses considerable mineral wealth, including gold, tin, coal, and copper. During the year ended March 31, 1901, 407 tons of cassiterite tin, valued at £45,258, were exported. A few gold mines were being worked on a small scale, but these have had to close temporarily owing to the war.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. At each of the district headquarters—Hlatikulu, Stegi, and Pigg's Peak—there is a small number of Europeans in the vicinity of the station, likewise at Bremersdorp, the old headquarters of the Territory. There are eleven schools for Europeans at various centres; and the Government has established a school for natives at Zombode, the kraal of the Regent, at which, until recently, the young Paramount Chief (Sobhuza) attended. There is also a school for coloured children. Grants are also made to the various native missions for educational purposes.

There is a tri-weekly communication by motor-car between Mbabane and Carolina (22 miles) and between Mbabane and Bremersdorp (23 miles). Elsewhere the communication is by cart or runners. There are 14 post offices, and a telegraph office at Mbabane, Pigg's Peak, Bremersdorp, and Ezulweni.

#### STRAITS SETTLEMENTS.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Straits Settlements* (Singapore, Penang, Malacca, Labuan, Cocos Islands, and Christmas Island), the *Federated Malay States* (Perak, Selangor, Negri Sembilan, and Pahang), the *Federated Malay States* (Kelantan, Trengganu, Kedah, Perlis or Palit, and Brunei), and the *Protected State of Johore*.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies), Penang (including Province Wellesley and the Dindings), Malacca, the Cocos or Keeling Islands, Christmas Island, and Labuan. These Settlements have an entire area of about 1,600 square miles, with a population (1921) of 803,765.

The Government consists of a Governor, assisted by an Executive Council of 7 members, and a Legislative Council of 10 official and 7 unofficial members, appointed by the Crown. Two of the unofficial members are nominated by the Chambers of Commerce at Singapore and Penang respectively. The Resident Councillor of Penang has a seat in both Councils. The law of the colony is the common and statute law of England as it was in 1866, qualified by Indian Acts until 1867 and since then by local ordinances. The Supreme Court consists of the Chief Justice and four puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz. to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates' and coroners' courts.

The climate of the colony is almost uniform throughout the year, and foliage is perennial. The rainfall in 1924 amounted in Singapore to 84.24 inches, in Penang to 89.54 inches, and in Malacca to 84.27 inches.

The railway from Singapore to Bangkok was opened for passenger traffic in July, 1918.

The exports comprise—gutta-percha, gambier, pepper, india-rubber, horns, hides, canes, para rubber, shells, sago, tapioca, spices, dye-stuffs (cutch), copra, rattans, coffee, gums, tin, preserved pineapples, &c. The rubber exports amounted to 62,376 tons in 1918, 145,960 tons in 1919 and 128,155 tons in 1920.

The chief imports are rice, sugar, cotton piece goods, opium, petroleum, and coal.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 27 square miles, and a population (1921) of 426,328. It was first occupied, in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 16' N. and long. 103° 53' E., with 320,335 inhabitants in 1921. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. The railway from Singapore to Bangkok was open for passenger traffic on July 1, 1918.

The number of merchant vessels entered and cleared in 1920, exclusive of native craft, was 11,536, with a tonnage of 17,000,812. The total for the whole colony was 17,428, with a tonnage of 24,007,912. The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 62,325 (tonnage, 2,576,161). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of \$29,000,000. The King's Dock (opened in 1913) is the largest east of Suez, being 679 feet long, 200 feet wide, and 34 feet deep; its cost was \$2,300,000.

Singapore is a free port; no duties are levied upon anything except opium, tobacco, spirits, wines, beer, and petroleum consumed in the colony. The trade returns aggregate for 1920 (including inter-settlement trade), amounted to \$1,921,606,869 (including the value of bullion and specie), the value of exported tin being \$70,490,787.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo, in 5° 16' N. lat. and 103° 15' E. long., and forms part of the Settlement of Singapore. Its area is about 28 square miles; and its population is 5,908. It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited. The island has a fine harbour. The exports consist of coal, cloth, rice, sago, earthenware, brassware, &c. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island. Imports (1920), \$2,428,866; exports, \$2,325,822.

Resident, H. S. Eley (actg.).

**The Cocos-Keeling Islands** are a group of about 20 small islands about 700 miles south-west of Sumatra, and form part of the Settlement of Singapore. The population is 862, and the island exports about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

**CHRISTMAS ISLAND**, in the Indian Ocean, about 200 miles south-west of Java, and 700 miles east of the Cocos-Keeling Islands, has an area of about 56 square miles and a population of 783. A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1920 was 69,575 tons.

**PENANG** is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (population, 1921, 162,144), on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (population 1921, 130,341), and the Dindings. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18' N., long. 100° 21' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah. Area, 108 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1920 (including inter-settlement trade) amounted to \$39,180,937; the export of tin from the port being \$38,928,165 in 1920.

**Province Wellesley** is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kedah in 1786, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, and rubber plantations.

**The Dindings Territory** (area 183 square miles, population in 1921, 11,850) is at present little developed; but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor and Lumut. The territory comprises a group of islands (of which Pangkor is the largest); and a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 22 miles long by about 10 miles in width.

**MALACCA**, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 120 miles to the N. W. of Singapore, comprises an area of about 720 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1824, when it was restored to the Dutch; it finally became a British possession, in pursuance of the treaty with Holland, March 17, 1824, being exchanged for the British settlements in Sumatra. The population in 1921 was 152,222.

Aggregate trade, 1920.....\$79,241,394  
(including para rubber, \$42,225,251, exported in 1920.)

Singapore, distant 2,700 miles; transit, 22 days.  
Penang, 20 days; and Malacca, 23 days.

## TANGANYIKA TERRITORY.

**TANGANYIKA TERRITORY**, formerly "German East Africa," was attacked by British and South African forces and conquered in 1918, the German forces surrendering near Abercorn in North-east Rhodesia on Nov. 23, 1918. Civil Administration was established *pari passu* with the conquest of the territory, and the whole Colony passed under the effective control of the present Administration at the beginning of 1919.

Tanganyika Territory has a coast-line of about 600 miles and an estimated area of 384,120 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (Jan. 1, 1913) at 7,659,898, the coloured population (other than native) being 14,898. The thickly populated provinces of *Ruanda* and *Urundi* are now under Belgian administration, so that the native population of Tanganyika Territory is about 4,000,000. The total white population is 2,447. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule.

Education is not compulsory. In 1921 there were 45 Government schools, with 71 native teachers and 3,500 pupils. Protestant and Roman Catholic missionary societies are working in the Territory.

The total area under forests is about 2,700,000 acres, of which about 2,170,000 are included in the Government Forest Reserves. There are a number of plantations of coco-palms, coffee (on the higher lands), caoutchouc, sugar, cotton, cardamum and cinchona, while fibre plants (especially sisal) are successfully cultivated. In 1921 there were 43,617 cattle, 41,647 sheep and goats in the possession of Europeans, and 3,950,250 cattle and 6,398,300 sheep and goats in the possession of natives. Minerals known to exist within the Protectorate are coal, iron, lead, copper, mica, and salt. Agates, topaz, niobstones, tourmalin, and quartz crystals are found, and garnets in large quantities.

The revenue of Tanganyika Territory estimates for 1920-21 was £1,262,844 (including a grant in aid of £316,000) and the expenditure £1,399,354. The imports in 1919-20 were valued at £1,198,000, and in 1920-21 at £1,728,714; the exports were valued at £1,426,000 in 1919-20 and at £1,222,459 in 1920-21. The chief exports in 1920-21 were: Sisal (11,084 tons, £364,448), cotton (1,147,922 lb., £119,255), hides (14,726 cwt., £66,844), skins (2,738 cwt., £29,634), copra (69,834 cwt., £103,772), coffee (23,086 cwt., £88,683), ghee (14,966 cwt., £22,127), wax (4,772 cwt., £23,583) ground-nuts (67,377 cwt., £79,136), grain (1,227,476 cwt., £123,172), sisal (17,922 cwt., £26,494), rubber (2,207 cwt., £12,772), ivory (129 cwt., £28,254); the chief imports in 1920-21 were cotton piece goods (£276,923), rice (£8,692), other foodstuffs (£193,599), kerosene (£23,789), cigarettes (£41,739), tobacco (£26,612), spirits (£28,702), wines and beer (£20,122).

The chief seaports are Dar-es-Salaam, Tanga, Bagamoyo, Pangani, Kilwa, Lindi and Mikindani, but few of these are accessible to ocean-going vessels, though gradual improvements are being introduced. There are two railway lines in the

Protectorate—the Usambara railway from Tanga to New Moshi (220 miles), commenced in 1905 and completed in Feb. 1912, and the Central railway (780 miles), from Dar-es-Salaam to Kilgoma, completed in Feb., 1914. Dar-es-Salaam is in telegraphic communication with the coast towns, Zanzibar, Mombasa, and many inland centres. There are 43 post offices and telegraph stations. Three Battalions of the King's African Rifles are stationed in Tanganyika Territory.

In 1900-01, 129 steamers (exclusive of coastal boats) of 408,632 tons and 1,925 vessels (dhows) of 40,093 tons entered the various ports from places beyond the territory.

## TOGOLAND.

(Joint Franco-British Administration.)

The former German colony of Togoland was conquered by Franco-British forces during the war of 1914-18, and its administration has been entrusted to France and Great Britain jointly by the Supreme Council of the Allied Powers.

Togoland is situated on the Gulf of Guinea between the (British) Gold Coast Colony and (French) Dahomey, and is bounded on the south by the Atlantic and on the north by (French) Upper Senegal-Niger, and lies between 0° 15' W.-5° E. long. and 6°-11° N. lat. at its extreme limits, the coast line being only 28 miles in extent (1° 14'-1° 38' E. long.). The coast is fringed with lagoons, but for some 50 miles inland are undulating plains, which end in a plateau, about 1,000 feet in mean level, with Mount Agou (3,135 feet) and Mount Avakli (3,350 feet) in the south-west. The country is watered by the Oti, which effects a confluence with the Volta at the western boundary of Togoland. The area is 33,649 English square miles, with a population of about 1,000,000. The Christian element is small. Coffee, cocoa, cotton, maize, kola and other

tropical products are abundantly cultivated; palm oil, palm kernels, rubber, cotton, maize, ground nuts, vegetable butter, fibre, indigo, kola nuts, ebony, and other forest products are exported (exports, 1919, £850,744). The imports (valued at £665,322 in 1919) are textiles, metals, hardware and spirits. The revenue exceeds the expenditure, and the colony is in a very flourishing condition. About 220 miles of railway are open, lines running from the capital to Aneho and to Misahohe and Atakpame.

In 1900 the whole territory was divided into a British Sphere and a French Sphere.

The British Sphere consists of an area of about 10,200 sq. miles with an estimated population of 200,000. No portion of the coast is included in the British area. The sphere is administered by the Government of the Gold Coast.

## TRINIDAD and TOBAGO.

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. It lies between 10° 3'-10° 50' N. lat. and 60° 55'-61° 56' W. long., and is about 60 miles in length by 54 in breadth, with an area of 1,866 square miles (517,538 acres cultivated), and a population at the Census of 1921 of 332,552 (including Tobago). The estimated population on Dec. 31, 1920 was 391,279. The island was discovered by Columbus in 1498, was colonised in 1598 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 70,146), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 20,167), about 30 miles south of the capital; Princetown (pop. 4,564), and Arima (pop. 4,032). A remarkable phenomenon is the asphalt lake near the village of La Brea, 120 acres in extent, containing an apparently inexhaustible supply; in 1920, 113,697 tons (£265,540) were exported. The soil is rich and productive, the most important products being sugar, cocoa, mineral oil, molasses, rum, copra, limes, and coco-nuts, and various kinds of timber and fruits. The chief exports (1920) were cocoa £3,536,830; sugar £2,656,625; petroleum (1919) £843,384; and coconuts £308,660. Coal is found in Manzanilla, and is indicated in other parts of the island. The petroleum industry has made considerable advance, boring operations being carried on by 22 different companies. There are 124 miles of railway open, electric lighting and tramway service, and waterworks and sewage operations have been established. The island is crossed by the telegraph wire of the West India and Panama Company, by Government telegraph and private telephone wires. There is also wireless telegraphic communication between Trinidad and Tobago and between Trinidad and Demerara, Curaçao, Martinique, St. Thomas, &c. The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

**Tobago** was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between 11° 9' N. lat. and 60° 43' W. long., about 75 miles south-east of Grenada, 28 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is 26 miles long, and from 6 to 7½ broad, and has an area of 124 square miles, with a population (Census 1911) of 24,063. It is one of the most healthy of the West Indies; the temperature varies from 81° to 88°. There are two towns in the island, viz., Scarborough (pop. 740) and Plymouth (pop. 575).

### TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S. and long. 12° 2' W., discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. The population numbers 129, and the inhabitants are said to be very long-lived. The principal settlement (Edinburgh) is in the north-west of the island. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

**INACCESSIBLE ISLAND** is a lofty mass of rock with sides a miles in length; the island is the resort of penguins and sea-fowl.

**THE NIGHTINGALE ISLANDS** are three in number, of which the largest is 1 mile long and ½ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stollenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

**GOUGH ISLAND** (or Diego Alvarez), in 40° 20' S. and 9° 44' W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

### TURKS AND CAICOS ISLANDS.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-west of which they are distant about 420 miles. They have an area of about 170 square miles. The population in 1911 was 5,615, of which the principal island, Grand Turk, contains 1,681. Salt is the principal industry of the islands, and Sisal hemp and sponges are exported.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

### UGANDA.

(The Uganda Protectorate.)

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary; on the east, a line drawn down the middle of Lake Rudolf, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, by Tanganyika Territory (late German East Africa); and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyassa, part of Lake Edward, the whole of Lake George,

half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, part of Lake Rudolf, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Egyptian Sudan commences. Total area, 110,300 square miles, including 16,377 square miles of water.

For administrative purposes, the Protectorate is divided into 5 Provinces:—

(1) *Eastern Province*, comprising the districts of Busoga, Bukedi, Teso, Lango, Karamoja, and Lohor.

(2) *Rudolf Province*, comprising the districts of Turkwel, Turkana, and Dabossa (the last named being, at present, under military occupation).

(3) *Northern Province*, comprising the districts of Bunyoro, Gulu, Chua, and West Nile.

(4) *Western Province*, comprising the districts of Toro, Ankole, and Kigezi.

(5) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubendi, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts. Experiments are being made with a view to repopulating these islands.

With the exception of the Rudolf Province the whole Protectorate is now under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of Buganda is recognised as a native kingdom under a *Kabaka* (H. H. Daudi Chwa, grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or native assembly. In Buganda (and in *Bunyoro*, *Ankole* and *Toro*, also ruled over by native "Kings"), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an appeal to higher courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor who (with the assistance of the Executive and Legislative Councils), makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local and special courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyassaland and Zanzibar. In 1920 there were 3,468 criminal cases tried. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a volunteer reserve of Europeans.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan. 1921. The former consists of 4 appointed members and the latter includes the former, with 4 unofficial members, and is presided over by the Governor.

The total population of Uganda (Census 1921) is given as 3,044,220, composed as follows: Natives, 2,327,347; Asiatics, 5,604; Europeans, 1,269 (including 386 females). Among the natives approximately 785,000 belong to the intelligent, civilised Buganda, a race converted to Christianity by British and French missionaries. Educational work is undertaken by the various Missionary Societies, who receive grants amounting to £22,000 towards scholarships, &c., for students and teachers. About 170,000 natives

speak Bantu languages; there are a few Congo pygmies living near the Semliki river; the rest of the natives belong to the Massai, Nilotic, and Sudanese groups.

In 1920 (nine months only) total exports, £4,124,126; the import figures are now merged in those of Kenya. The export trade, which is increasing, is mainly in cotton (£3,778,932), coffee, chillies, oil-seeds, rubber, ivory, and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

In 1920 the poll-tax amounted to £398,338 and Customs to £161,118.

The headquarters of the British administration is at ENTebbe; the native capital of Buganda is at MENGO (Kampala). Nile steamers ply to Rejaf, which is about eight days' march from Nimule, the Sudan port of the Lake Albert Marine Service. A regular steamer service is maintained by the *Uganda Railway Administration* between Kisumu, the railway terminus, and Entebbe, Port Bell, and Jinja, the principal Uganda ports on Lake Victoria. The *Busoga Railway Marine*, which, with the Busoga Railway, is controlled by the Uganda Railway, deals with the traffic on Lake Kioga. There are two steamers and a large number of lighters on that waterway. An additional steamer and subsidiary craft ply on Lake Albert and the Nile between Butiaba, Nimule and Belgian port of Kasenye at the south of Lake Albert. The *Busoga Railway*, of the same gauge as the Uganda Railway, 6 miles in length, runs from Jinja (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, and deals with the cotton output in the regions round Lake Kioga, connecting that lake with Lake Victoria. There is a railway from Port Bell to Kampala, 7½ miles in length. There is a fleet of Government motor vans. The length of telegraph line in the Protectorate is (1920) 1,225 miles, with 24 telegraph offices.

## WEIHAIWEL.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on July 1, 1898, and lies in latitude 37° 30' N., longitude 121° 20' E. It is situated in the Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land 10 English miles wide along the entire coast-line, with a total area of about 285 square miles, and a population in 1911 of 147,177, in which are included 3,000 resident on the island of Liu Kung. In addition to the leased territory there is a zone which comprises that portion of the province of Shantung lying east of the meridian 121° 40'—an area of 1,500 square miles—within which Great Britain has the right to erect fortifications, station troops, or take any other measures necessary for defensive purposes. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small.

The government is administered by a Commissioner. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communication with the ports of Shanghai, Hong Kong, Chefoo, and Tientsin.

## WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with an estimated population (1920) of 180,182. There is one Governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's absence is governed by an Administrator subordinate to him.

Governor and Commander-in-Chief, Sir  
G. B. Haddon-Smith, K.C.M.G. £3,000  
Private Secretary & A.D.C., 300  
Auditor, M. J. Flanagan £440 to 550

## GRENADA

## (AND THE GRENADINES).

Grenada is situated between the parallels of 12° 30'–11° 30' N. lat. and 62° 30'–62° 35' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.E. W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 84,150 acres; population (including some of the Grenadines), 66,300 (Census of 1911). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was

definitely ceded to Great Britain by the Treaty of Versailles in 1763.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee, and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

THE GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1920), 7,636.

## ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 50' N. lat. and 60° 58' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 21 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles, with a population (1921) of 51,505. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1919) are sugar, cocoa, lime-juce, molasses and syrup, lime oil, bay oil, honey, hides, logwood and fuel. The chief places are Castries, the capital (pop. 1921, 5,899), and Soufrière (pop. 2,480).

Port Castries, one of the finest in the W.I., is a coaling depot. In 1920, 268 steamers (tonnage 585,661) entered Port Castries.

## ST. VINCENT.

an island about 95 miles west of Barbados, situate in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1921) of 44,447. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, sugar, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

## ZANZIBAR.

(The Zanzibar Protectorate.)

The Zanzibar dominions became independent in 1895 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tught Bay and north as Warsheikh; but since the cession of the coast-line from Ruvuma to Wanga, including the island of Mafia, to Germany in 1890, and of the Benadir coast to Italy in 1904, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta, and Siwa, together with the port of Kismayu, with a radius of 20 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the East Africa Protectorate (q.v.). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at £586,000 in 1920) and produce quantities of copra (exports in 1920 £368,000). In addition, Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed.

Of late years the importance of Zanzibar as a port of transhipment and distributing centre has largely decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, however, tend to indicate that the island, in spite of losing the main transhipment trade, will continue, from the very fact of its geographical position, to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast.

The principal imports are rice, grains, groceries, sugar, tobacco, copra, hardware, petroleum and piece-goods; the exports are cloves and copra, in addition to re-exports of previously imported rice, grain, copra and piece-goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba (Census of 1920) was 198,914, the area of the former 640 square miles, and of the latter 380 square miles.

The number of ocean-going steamers which entered the port in 1920 was—British 184, Italian 22, Portuguese 15, French 13, Norwegian 7, others 6, the total tonnage being 396,214; and 4,871 dhows (91,796 tons) entered the port in 1920.

## IMMIGRATION.

Statistics concerning the arrival of aliens are available for nearly a century, but the Government exhibits little interest in those who leave its shores. From 1790-1917 33,108,353 alien passengers arrived in the U.S. The following figures (from the *Statistical Abstract*) show the number of arrivals at certain periods from 1820-1900:—

## MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In addition to adultery and cruelty of the husband or adultery of the wife, abandonment (desertion), habitual drunkenness, and imprisonment for felony are qualifying offences.

## BIRTHS AND DEATHS.

Births and Deaths are reported only in the "Registration Area," which covers about 73 per cent. of the United States. The Births in the Registration Area for 1917 numbered 1,353,792, of which 1,280,288 were white and 73,504 coloured; in 1919 the total number of Births in the Area was 1,373,438. Deaths recorded in the Registration Area for the decade 1908-1917:—

## PHYSIOGRAPHY.

The Republic occupies the southern portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude  $25^{\circ}$ – $49^{\circ}$  North and longitude  $67^{\circ}$ – $124^{\circ}$   $30'$  West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line on both oceans has an estimated length of about 15,610 miles, besides 3,620 miles on the great lakes and 5,744 on the Gulf of Mexico. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance iron copper, lead, zinc, and aluminium; the non-metallic minerals including immense quantities of coal, anthracite, petroleum, stone, cement, phosphite rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver); while precious stones are worked in great variety, including the turquoise, sapphire, tourmaline, and garnet.

## HISTORY.

*Early Colonisation.*—A natural factor, the great expanse of ocean which divides the American continent from Asia, has saved America from *Asiatic* domination, and it required many centuries of progress before the *European* adventurer dared to attempt the passage of the narrower Atlantic. The aboriginal inhabitants were comparatively few in number, and being generally backward in development, except in Mexico, have left few permanent traces of their presence.

Although Columbus discovered America in the 15th century (Oct. 12, 1492), American history may be said to commence with the colonising expeditions from Europe in the 16th and 17th centuries. No definite European settlement was attempted until the last quarter of the 16th century, when England, Holland, Sweden, France, and Spain made determined efforts to bring into account the potential wealth of the newly discovered continent. Of these nationalities the English secured a paramount

influence, through their natural aptitude for colonisation, which continues to distinguish that race (and in a greater degree the Scotch) amongst the nations of Europe. In the 17th century a chartered company founded *Jamestown* (1607), and many Royalist settlements were established in the district which had been named *Virginia*, after Queen Elizabeth, in the previous century. But step by step with the Church and Royalist foundations in the South a similar series of Puritan and Separatist centres was established in the North. The small band of "Pilgrim Fathers" in their 180-ton *Mayflower*, from Southampton, England, to Plymouth, Massachusetts (1620), was soon followed by a stream of well-to-do merchants from Boston, Lincolnshire and other east coast English towns, and *New England* became rapidly prosperous. Between these two settlements the Dutch had established themselves in *New Netherlands* (1621), and the Swedes in *New Sweden* (1638). Other English foundations were *Maryland* (1632), *Carolina* (1663), *New York* (1664), *New Jersey* (1665), and *Pennsylvania* (1681). From that date Continental enterprise may be said to have ceased for half a century, and *Georgia* (1732) was the last of the English settlements.

*Anglo-French Wars.*—A continuous struggle was waged between the English and French settlements in America, but until the *War of 1754-1763* little part was taken by Great Britain in the actual campaigns. The issue of this war decided the fate of America. It secured the possession of the Pacific coast for the inhabitants of the Atlantic slope, and roused the interests of the British Government in the possibilities of its American colonies. The Home Government endeavoured to recover from the colonies part of the cost of the war by which their existence had been secured, but "taxation without representation" was bitterly resented. In December, 1773, some English ships laden with tea arrived in the harbour of Boston, where a non-importation agreement was strictly enforced. A band of colonists, disguised as Indians, boarded the vessels and threw their contents into the sea. This *Boston Tea Party* of December 16, 1773, remains as an outstanding incident in the quarrel between America and Great Britain.

*The War of Independence.*—In spite of the counsels of Chatham, the King persisted in repressive measures. The colonists resisted in arms, and bloodshed ensued at the first engagement at *Lexington*, April 19, 1775, and continued until the *Capitulation of Yorktown*, October 19, 1781, when *Lord Cornwallis* surrendered with the whole of his forces to *General Washington*. When peace was concluded between America and Great Britain (Sept. 3, 1783), no vestige of territory over which the dispute had raged remained under British rule.

*The Declaration of Independence.*—On July 4, 1776, the delegates of the various American colonies adopted the Declaration of Independence.\* "*We, the representatives of the United States of America, in Congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, solemnly publish and declare that these United Colonies are, and of right ought to be, Free and Independent States.*" This Declaration was at length acknowledged by Great Britain, and the United States of America from this beginning has become one of the greatest Powers of the world. The Declaration of Independence was followed by the framing of a *Constitution*, which was ratified in 1787 to 1790 by the 13 *Original States* (Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, South Carolina, New Hampshire, Virginia, New York, North Carolina, and Rhode Island). This Constitution established a legislature of two houses, and vested the executive power in an elective President, and on April 30, 1789, *George Washington* entered office as the first of a line of Presidents of the United States of America.

*War of 1812.*—The maritime war of Britain and France led to the outbreak of hostilities between the former and the United States, owing mainly to the rival interpretation of the law of allegiance in connexion with impressment of British subjects from American ships to serve in the British Navy. On June 18, 1812, the United States declared war against Britain, in which the latter was generally successful on land and the United States almost invariably victorious on the sea. A land engagement at *Chateaugay* on October 26, 1813, gained lasting glory for the troops of Canada, and earlier in the same year—June 1, 1813—a duel at sea between the *Chesapeake* and the *Shannon* did much to restore the prestige of the British Navy. Peace was concluded by the *Treaty of Ghent* on December 24, 1814, after a purposeless war, which Canada alone has reason to remember with satisfaction.

\* On April 30, 1819, the Raleigh (N.C.) Register published the following document, said to have been adopted by the Committee of Mecklenburg County, North Carolina, on May 20, 1775, the day after the receipt of the news of the battle of Lexington. "In the third session of the Second Continental Congress, Richard Henry Lee proposed, and John Adams, of Massachusetts, seconded, a resolution declaring the United Colonies free and independent States; and Thomas Jefferson, John Adams, Roger Sherman, and Robert Livingston were appointed a committee to draw up a Declaration of Independence. This famous document, composed almost entirely by Jefferson, was adopted unanimously on July 4, 1776."

**The Gold Rush.**—In 1846 a dispute arose between the United States and Mexico in connexion with the boundaries of *Texas*, recently (1845) admitted as a State of the Union, and after hostilities of several months the war ended in the *Treaty of Guadalupe Hidalgo* (1847). Under this treaty Mexico surrendered the disputed portions of Texas and New Mexico, part of Arizona, and California. In 1848 a great rush of goldseekers entered the newly acquired territory, which remains the principal gold-producing State of the Union.

**The Civil War.**—Among the industrial classes of America in 1860 nearly 4,000,000 were negro slaves, descendants of those planted in the Colonies by Britain. The question of their emancipation led to a bitter dispute between the Northern and Southern States of America, the latter seceding from the Union in 1861. Two years earlier John Brown, an advocate of emancipation, had embittered the relations between the North and South by a raid upon the Government arsenal at *Harper's Ferry*, which he captured and held until forced to surrender; and although he was hanged by the State of Virginia his object was eventually achieved by President Lincoln's *Emancipation Proclamation* of January 1, 1863. The *Secession of the Southern States* was followed by hostilities, which included many pitched battles, fought with astonishing tenacity and prolific slaughter on both sides. Hostilities ceased soon after the surrender of *General Lee at Appomattox* on April 9, 1865, and the bitterness engendered by the war was buried in a lasting peace. By a careless observance of the Foreign Enlistment Act, Britain permitted the departure from Liverpool of the *Alabama*, which committed depredations upon United States shipping, and was also guilty of other acts of negligence, for which, under the *Treaty of Washington*, May 8, 1871, Britain was called upon to pay £3,250,000 damages to the United States. In the four years' war the Confederate (Southern) States lost over 200,000 men by death and disease, while the victorious Federal (Northern) States lost close on 350,000 from the same causes.

**War with Spain.**—The continuous misgovernment of the neighbouring island of *Cuba* brought America into conflict with Spain in 1898. A succession of revolts, which the Spanish forces were unable to suppress, left Cuba the prey to anarchy, and induced the United States to despatch to Havana the warship *Maine*. By accident or design that vessel was destroyed by an explosion (Feb. 15), and the United States declared war against Spain on April 25, 1898. The outcome of the hostilities was the freedom of Cuba and the acquisition by the United States of the Spanish possessions in the *Philippine Islands*, in addition to *Guam* (Pacific) and *Porto Rico* in the West Indies.

**The Panama Canal.**—On June 28, 1902, Congress appropriated the sum of \$40,000,000 for the purchase of all outstanding rights in the work inaugurated on the *Panama Canal*, and on April 28, 1904, a further sum was granted for the purchase of a strip of territory on each side of the proposed waterway from the Republic of Panama. Operations were immediately undertaken, and the Canal was completed in 1913, and was opened to traffic with no inaugural ceremony on August 1, 1914.

**Anglo-American Arbitration.**—A Treaty of Arbitration between the United Kingdom and the United States was signed at Washington, August 3, 1911. The Treaty contained seven Articles (see 1912 Edition of WHITAKER'S ALMANACK). An Anglo-American Peace Commission Treaty was signed by Mr. Bryan and the British Ambassador on Sept. 15, 1914.

**The World War.**—On April 6, 1917, the United States, after fruitless endeavours to obtain guarantees from Germany that the rights of neutrals on land and sea would be observed, entered the World War on the side of France, Great Britain and the Allied and Associated Powers. The first shot by U.S. troops (Oct. 27, 1917) was followed by a full participation in the campaigns of the Allies, and the Armies of the United States contributed very largely to the defeat of the Central Powers. At the date of the *Armistice* (Nov. 11, 1918) 3,670,888 troops had been placed under arms, and 77,459 were numbered amongst the killed or died of disease, accident or other causes. U.S. troops also figured amongst the armies sent to the assistance of Russia against the Bolshevik régime, but these were withdrawn, in accordance with the plans of the Allies, in 1919.

## GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

**THE CONSTITUTION.**—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

## THE EXECUTIVE.

THE Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the *second Monday of the January* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *second Wednesday of February* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of \$25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and, with the approval of the Senate, negotiates Treaties with Foreign Powers. The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

## THE PRESIDENT.

*President of the United States*, Warren Gamaliel Harding, of Ohio (born at Blooming Grove, Morrow County, Ohio, Nov., 1865; student at Ohio Central College, 1879-1882; newspaper editor and publisher from 1884; member Ohio Senate 1899-1903; Lieutenant-Governor of Ohio 1904-5; United States Senator 1915-1921); elected Nov. 2, 1920, and came into office March 4, 1921, until March 4, 1925. *Republican*.

#### UNITED STATES GEOGRAPHIC BOARD, Washington, D.C.

By Executive order of August 10, 1902, the official title of the United States Board on Geographic Names was changed to United States Geographic Board and its duties enlarged. The Board passes on all unsettled questions concerning geographic names which arise in the departments, as well as determines, changes, and fixes place names within the United States and its insular possessions, and all names suggested by any officer of the Government shall be referred to the board before publication. The decisions of the board are to be accepted by all the departments of the Government as standard authority.  
**Chairman**, Dr. C. Hart Merriam.  
**Secretary**, Charles S. Sloane.

#### UNITED STATES RECLAMATION SERVICE.

**Director**, Arthur P. Davis, Interior Dept. Building, 19th and F, N.W., Washington, D.C.  
**Western Office**, Tramway Buildings, Denver, Colorado. **Employees**: Washington Office, 90; Western, 3,000 to 5,000. **Expenditure** per year about \$8,000,000.

The Reclamation Service was organised as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in the 17 arid and semi-arid States of the West. Twenty-five primary and three Indian projects are under construction or operation, aggregating 3,200,000 acres, and the major works aid in serving an additional 1,100,000 acres under private canals that generally get stored water from the government reservoirs. The funds for this work have come chiefly from the sale of public lands, and the money expended is returned to the fund by easy payments of settlers, usually in twenty annual instalments without interest, in accordance with the Reclamation Extension Act of August 13, 1914.

The Service has built about 13,000 miles of canals, ditches and drains (including 100,000 canal structures), involving the evacuation of 183,000,000 cubic yards of materials. In connexion with this work there have been constructed 100 storage and diversion dams with an aggregate volume of 13,980,000 cubic yards, including the Arrowrock Dam (349 feet high), Idaho, on the Boise River and the Elephant Butte Dam (305 feet high), New Mexico, on the Rio Grande. The Service has built 95 tunnels, 986 miles of road, 83 miles of railroad, 3,224 miles of telephone line, a dozen power plants and 672 miles of transmission lines. It is mining coal, and has manufactured 1,676,000 barrels of cement and sand cement. The net construction cost to June 30, 1900, was \$130,870,000.

Over 150,000 persons are living on the 42,000 farms irrigated by the Service. Of the 3,200,000 acres above referred to, water was furnished in 1900 to 1,675,000 acres, and of this area 1,196,000 acres were harvested in 1900, producing crops worth over \$67,000,000, or an average of about \$60 per acre. The additional lands using stored water yielded crops worth \$20,000,000 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers of the World War have a preference right to enter these farms, and at recent openings such soldiers have taken all units.

Information in regard to farms available for settlement may be obtained by addressing, Director, U.S. Reclamation Dept. of the Interior, Washington, D.C.

The Service issues the "Reclamation Record," a 48-page illustrated monthly publication, containing articles of interest to irrigation farmers and engineers. An annual report is also issued.

An engineering library of about 3,000 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Service. This library contains descriptions of the construction and operation of the projects, with numerous photographs and maps, cost data and results of original experimental investigations, and is available for consultation by those interested.

# GOVERNMENT PRINTING OFFICE, North Capitol Street, Washington, D.C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The present buildings having a floor space of 14 acres, together with the machinery and equipment which they contain, represent an expenditure of approximately \$6,000,000. The annual cost of operation and maintenance is about \$13,000,000. There are 4,500 persons annually employed in the various divisions of the office at a total yearly wage roll of more than \$6,000,000. In addition to doing all of the printing and binding ordered for Congress, the office executes nearly all the printing and binding required by the various executive departments and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world, including 86 linotype machines, 100 monotype key-boards and 125 monotype casting machines, which produced a total of 2,227,615,000 ems of type in 1920. The 150 presses of the office are credited with 2,377,644,000 chargeable impressions. During the year the office computed bills for \$3,225 separate jobs.

In addition to the execution of all kinds of printing and binding, including 1,972,345,000 postal cards, and 12,000,000 square inches of electrotypes and stereotype, the office manufactures its own printing inks, rollers, glue, type and type metal.

# LIBRARY OF CONGRESS, Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1855, purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire, 1851, and replenished in 1851-2. Since that date increased (1) by regular annual appropriations by Congress (now \$508,000); (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress, with the stipulation that future accessions should follow it. It comprises 2,918,256 printed books and pamphlets, the floor space of the building (erected at the cost of \$6,347,000, and first occupied in 1897) being 544,000 square feet, and the capacity of the book stacks 3,540,000 octavo volumes and 84,000 volumes of newspapers, the shelving extending to nearly 103 miles. The library is maintained by Congress, the appropriation in 1922 being \$711,745.

# U.S. MILITARY ACADEMY, West Point, N.Y.

The United States Military Academy for training cadets for commissions in the U.S. Army was founded at West Point, on the west bank of the Hudson River, in 1802. Superintendent, Brig.-Gen. Douglas MacArthur, U.S. Army.

# NAVAL ACADEMY, Annapolis, Maryland.

The United States Naval Academy was founded in 1845 for the education of officers for the Navy. Students are called midshipmen, and must be citizens of the U.S. The course of instruction comprises four years at the Academy. Superintendent, Rear-Adm. Henry B. Wilson, U.S. Navy.

# THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a veto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of

Representatives for each State is allotted in proportion to its population—at present 2 for each State. The Senate consists of 96 members. The salary of a Senator is \$7,500 per annum, with mileage at 20 cents per mile, coming and returning, for each regular session. The House of Representatives consists of 435 representatives and territorial delegates. The salary of a Representative is \$7,500 per annum, with mileage as for Senators.

#### THE JUDICATURE.

The Federal Judiciary consists of three sets of Federal Courts: (1) The Supreme Court at Washington, D.C., consisting of a Chief Justice and eight Puisne Judges, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts. (2) The Circuit Courts of Appeal, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The District Courts, eighty-seven in number, served by a District Court Judge.

#### DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

#### THE ARMY OF THE U.S.

Under the provisions of the Act of Congress, approved June 4, 1920, the enlisted strength of the Regular Army, including the Philippine Scouts, must not exceed 280,000, except in time of war or similar emergency, when the public safety demands it; in 1921 Congress limited the enlisted strength for the fiscal year 1921-22 to 150,000 men, exclusive of the Philippine Scouts. By the Act of 1920 the commissioned strength of the Army is limited to 17,717 officers. The actual strength of the Army of the U.S. on July 31, 1921, included 13,192 commissioned officers, 1,250 warrant officers, and approximately 162,000 enlisted men.

The total disbursement in pensions since the War of Independence is \$6,089,536,538, of which \$5,749,030,455 has been paid on account of the Civil War. The cost of maintenance and expenses of administration in the fiscal year 1921, including the cost of medical examinations and special field examinations, amounted to \$1,860,022.

Disbursements in claims arising out of service in the World War subsequent to Oct. 6, 1917, are not included in the above totals, as such claims are adjudicated in the Bureau of the War Risk Insurance, Treasury Department, which has jurisdiction over such matters.

#### \* THE NAVY OF THE U.S.

No new construction has been authorised for the U.S. Navy since 1918. The three-year building programme initiated in the Act of August 29, 1916, provided for the following construction:—

\* For the Disarmament proposals of Secretary Hughes at Washington, and for the suggested Naval Holiday, see "Questions of the Day."

Of the "all big gun" ships the *Maryland* and *Colorado* have been launched and are completing for sea, while the *Washington* and *West Virginia* are building. These ships carry eight 16-in. guns (with secondary batteries of 14 5-in. and four 3-in. anti-aircraft guns), and are 624 ft. long, 97 ft. wide, and displace 32,600 tons; they are driven by four electric-drive turbines of 28,900 h.p. The remaining six ships (*Massachusetts-Iowa* class) are designed to carry 12 16-in. guns (and 19 5-in.)

In addition to the vessels listed, 20 coast submarines were specifically authorized in March 1917, and under emergency appropriations made at that time, supplemented by later Acts, six more submarines were purchased in knock-down condition, and orders were placed for 235 35-knot destroyers (six of which were later cancelled), 112 *Eagle* patrol vessels undertaken by the Ford Motor Co. (12 for the Italian Government, which were cancelled together with 40 for the Navy), 448 sub-chasers (100 being for France and seven others never completed), 25 fleet tugs (six cancelled), 54 minesweepers (five cancelled), and 56 harbour and motor tugs.

There were also built 12 large tankers on Emergency Fleet contracts intended for naval use, five of which have been retained in the naval service, together with some 20 auxiliary vessels acquired by purchase or seizure during the war. Of the 341 sub-chasers built for the Navy, all but 98 have been sold, scheduled for sale, or otherwise disposed of.

Of the vessels included in the above 3-year programme, 12 destroyers, six of the fleet submarines, and the transport, have never been laid down, and the Naval Act of July 12, 1917, provides that no expenditures be made for vessels not already under construction. Reduced appropriations for new construction in this Act will also retard progress of vessels now building, which, on July 1, 1917, included 11 battleships, 6 battle cruisers, 10 scout cruisers, 4 destroyers, 37 submarines, 4 fleet submarines, 1 gunboat, and 8 auxiliaries.

All information as to characteristics, costs, &c., available for publication concerning naval vessels, may be found in the Ship Data Book, for any comparisons desired.

### EDUCATION.

#### State School Systems, 1917-1918.

In 1917-18 the total number of children in the United States 5 to 18 years of age was 27,686,476, of whom 20,853,516 (10,349,466 boys and 10,504,050 girls) were enrolled in public elementary and secondary schools, and 1,935,125 were estimated to be enrolled in private elementary and secondary schools. The average daily attendance in the public schools was 15,548,914, the average length of school term was 160.7 days, and the average number of days attended by each pupil enrolled was 119.8 days. In 1917-18, 650,799 teachers (205,194 men and 445,515 women) were employed, the average annual salary of all teachers being \$635. The total number of buildings used as school houses was 276,827, and the estimated value of all public school property was \$1,983,508,812.

The total money received for school purposes, excluding balances on hand and proceeds of bond sales, was \$222,613,168. Of this amount \$27,698,322 was received from permanent school funds and from the rent of school lands, \$224,625,129 from State taxes or State appropria-

tion, \$414,722,223 from local tax or appropriation, and \$22,794,905 from all other sources, State and local. The total payments, excluding payments of bonds, was \$640,717,053. This amount includes expenditures for general professional and business control aggregating \$25,179,311; salaries of teachers, supervisors and principals, \$421,024,254; text-books and other instruction supplies, \$23,053,792; miscellaneous current expenses, \$175,277,788; composed of operation of school plant, \$112,011,558; maintenance of school plant, \$20,046,848; auxiliary agencies, \$22,463,281; fixed charges, \$5,702,516; interest on indebtedness, \$15,154,585; and outlays—sites, new buildings and equipment, \$119,028,944.

#### Compulsory Attendance Laws, 1917-18.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from forty days in one State to the full term in twenty-eight States. Nearly all States have officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officer.

#### Colleges, Universities and Technological Schools, 1917-18.

Of the 554 colleges, universities, and technological schools, 112 are public institutions and 442 are under private control or management. The public institutions enrolled 106,181 undergraduate and graduate students (62,162 men and 44,019 women). The private schools enrolled 147,722 undergraduate and graduate students (80,436 men and 67,306 women). Of the 554 institutions 124 were for men, 100 for women and 330 were co-educational.

The total number of instructors in public and private universities, colleges, and technological schools was 36,522 (29,509 men and 7,013 women). In general engineering 7,203 students were enrolled, in chemical engineering 4,548, in civil engineering 5,108, in electrical engineering 5,683, in technical engineering 5,944, and in mining engineering 1,298.

The total number of baccalaureate degrees conferred in 1917-18 was 28,052 (14,720 men and 13,332 women); altogether 3,480 graduate degrees were conferred (2,320 men and 1,160 women). 735 honorary degrees were conferred.

The total receipts for all universities, colleges, and technological schools in 1917-18 aggregated \$123,801,555. The total receipts, exclusive of additional to endowments, were \$137,055,415. The number of volumes in the libraries of these institutions was 23,025,736. It was estimated that the value of libraries, scientific apparatus, machinery, and furniture was \$30,766,793; value of grounds, \$104,069,421; value of buildings, including dormitories, \$329,927,558; the value of dormitories, \$25,143,845; and the value of productive funds, \$281,025,822. During the year the total benefactions received was \$10,704,505.

#### Normal Schools, 1917-18.

In 1917-18, 308 normal schools reported. These schools are chiefly concerned with the training of elementary teachers. Of this number, 272 are State institutions; 34 city normal

schools; 45 county normal schools; and 57 private normal schools. The total number of instructors in all these schools is 8,552. Of this number, 4,949 are engaged in instructing pupils in normal courses. The total number of students enrolled is 138,174 (21,287 men and 116,887 women). Of this total enrolment, 110,953 students are in normal training courses. The number of graduates from the normal training courses was 2,170 men and 22,331 women, making a total of 24,501. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrolment in these model schools was 83,602. The total receipts for normal schools were \$22,728,203. The total number of volumes in the libraries was 2,172,627. The statistics show that the number of State normal schools has gradually increased, while the number of private normal schools has rapidly decreased. The city and county normal schools are new institutions. The total number of such schools throughout the United States is not represented in the report, inasmuch as many of these schools have been organised very recently. The average cost per week per student in attendance for maintaining a State normal school is \$6 43 cents.

#### Summer Schools, 1918.

In 1918, 480 summer schools were maintained. Of this number 358 schools were conducted by colleges, universities, and normal schools. 104 universities and 109 colleges are included in this total. The total number of instructors employed in these summer schools was 11,960 (7,472 men and 4,488 women). In addition to the instructors 1,762 lecturers were reported. The total number of students enrolled in these summer schools was 160,422 (33,445 men and 126,977 women). The average cost of conducting summer schools per student enrolled in 1918 was \$24.14. The corresponding cost for 1916 was \$17.85.

One hundred and fifty-eight colleges, universities and normal schools maintained a 6-weeks course, 44 an 8-weeks course, 20 a 9-weeks course and 37 an 11-weeks course. There appears to be a tendency for institutions of this type to offer an 8, 9, 10 or 11-weeks course. Altogether 272 institutions offered work accredited for degrees. The greater number of these summer schools have a small enrolment. Fifty per cent. of the schools enroll only 10 per cent. of the student body. One school has an enrolment of over 6,000 students.

#### Professional Schools, 1917-18.

In 1917-18 the schools of theology enrolled 9,354 students and reported 828 graduates; law schools enrolled 11,820 students and reported 1,369 graduates; schools of medicine enrolled 13,802 students and reported 2,423 graduates; schools of dentistry enrolled 8,314 students and reported 1,634 graduates; schools of pharmacy enrolled 4,053 students and reported 1,134 graduates; and schools of veterinary medicine enrolled 1,250 students and reported 475 graduates.

#### Nurse Training Schools, 1917-18.

The number of nurse training schools has increased very rapidly since 1903. At that time only 47 schools were in existence. In 1918 the number of such schools was 1,776. The number

of pupils enrolled in these schools in 1918 was 55,221, and the number graduating 13,751. These nurse training schools are of two types: 1. Those schools which are more or less general in nature, or which are highly specialised, which treat physical rather than mental disorders. 2. Schools in hospitals for insane patients. The general training schools number 1,680, while the number of schools connected with hospitals for the insane is 86. The figures relate only to hospitals which maintain nurse training departments. The capacity of the hospitals in which these schools are located is 303,193 beds, and the average daily number of patients is 225,899. In the general hospitals there are ordinarily from one to three patients to each nurse pupil in training. In the hospitals for the insane, the corresponding number usually exceeds ten. The nurse training schools in general hospitals are usually small. About half of them do not enroll more than twenty nurse pupils. Within the last seven years the age requirement for admission has been lowered about two years. In 1911 most schools required either a minimum of 20 or 21 years for admission. In 1918 a large majority of schools required a minimum of only 18 or 19 years. In general hospitals the greatest number of schools require ten hours of duty daily, 689 schools having this requirement, 434 schools require nine hours of duty, and 232 schools eight hours of duty. In hospitals for the insane, the number of hours of duty required is usually ten or more. 18 schools require 12 hours of duty, 8 require 13, and 6 require 14.

The remuneration granted to pupils in general hospitals is usually less than two hundred dollars (\$200). In the first year 84 per cent. of the schools pay under \$100; in the second year 65 per cent. of the schools pay under \$100; in the third year of the course 54 per cent. pay under \$100. In schools in hospitals for the insane the remuneration usually exceeds \$200. In the first year of the course, half the schools pay from \$300 to \$400; in the second year of the course, 45 per cent. of the schools pay from \$300 to \$400, and 40 per cent. pay over \$400; in the third year of the course, over half the schools pay over \$400, and about 40 per cent. pay from \$300 to \$400.

Almost 90 per cent. of all nurse training schools in general hospitals offer a three-year course. About 10 per cent. offer a two-year or two-and-one-half-year course. Within the last few years practically all nurse training schools have lengthened their course to three years, and usually require attendance for 50 weeks during the year. In hospitals for the insane, about 60 per cent. of the schools offer a three-year course, and about 40 per cent. offer a two-year course. Forty-three per cent. of the general nurse training schools require one year of high school work for admission, 17 per cent. require two years of high school work for admission, 28 per cent. require a full high school course, and 22 per cent. require only the completion of the elementary grades for admission. Within the past few years the tendency has been to require either one or two years of high school work for admission. The statistics indicate a difficulty in securing nurse pupils within the last few years, on account of the lengthening of the course, and that it has been necessary to increase the remuneration, and to lower entrance requirements.

In all 27 universities and colleges offer nurse

training courses. Each of them offers the course to nurse pupils registered in a nurse training school of a hospital affiliated with the college or university. By this co-operation an excellent opportunity is afforded to the training school to secure for their pupils a high type of instruction in technical and academic subjects.

#### Public High Schools, 1917-18.

In 1917-18, 13,951 public high schools reported. The total number of instructors in these secondary schools was 84,822 (28,781 men and 56,041 women). The total number of secondary students enrolled in these schools was 1,735,619 (747,778 boys and 987,841 girls). The total number of coloured students included in the preceding figures is 21,970. Altogether 1,226,523 students were enrolled in academic courses; 278,275 in commercial courses; 56,832, in technical or manual training courses; 26,675, in teacher training courses; 38,728, in agricultural courses; and 201,987, in home economics courses. In the first year of the course 654,935 students were enrolled, in the second year 441,868, in the third year 309,208, and in the fourth year 239,260 students. Altogether 1,265 schools reported military drill, in which 106,986 boys and 1,252 girls were enrolled. The number of graduates reported was 224,367 (26,922 boys and 197,445 girls).

Of the 13,951 public high schools 6,866 are fully accredited for admission to college. In these fully accredited high schools there are 66,619 teachers and 1,462,775 students (637,612 boys and 825,163 girls). There were 10,628 high schools that reported a four-year curriculum. In these four-year high schools there are 79,083 teachers and 2,654,600 pupils enrolled (714,696 boys and 939,904 girls).

Altogether, 12,631 public high schools reported school libraries with an aggregate of 8,766,863 volumes.

These statistics on public high schools are in the section on State School Systems. By deducting these figures from the totals given in that section the statistics of elementary schools may be secured.

#### Private High Schools and Academies, 1917-18.

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. The increase has been about proportional to the increase in population. In 1900 the number of students enrolled in these schools was 110,792. In 1917-18 the number enrolled was 158,745. The number of schools reporting in 1900 was 1,976, and the number reporting in 1918 was 2,058. The total number of instructors in these private high schools in 1918 was 14,199 (5,411 men and 8,788 women). In this group of schools more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational. Of the 2,058 schools reporting in 1918, 390 were for boys only, 772 were for girls only, and 996 were co-educational. The number of boys' schools has not increased materially since 1900, while the number of schools for girls has increased almost 50 per cent. There has been a decrease in the number of co-educational schools. Many of the schools for boys as well as some of the co-educational schools offer military drill. Altogether, about one-fourth of the schools had military drill in 1918, enrolling 35,532 students. Of this number 2,639 were girls.

In 1900 the number of boys taking this work was 10,224. Within the past two years the enrolment in military drill in these schools has been tripled. The number of coloured students enrolled in these schools in 1918 was 9,207. The total number of graduates from these institutions was 23,822. The average size of the faculty was 6.9 per cent. The average number of students to a school was 71.1 per cent. The average number of students to a teacher 21.3 per cent.

The number of students enrolled in the first year of these private high schools was 36.6 per cent. of the total number; in the second year, 25.7 per cent.; in the third year, 19.5 per cent.; and in the fourth year, 12.2 per cent.

Altogether, 2,019 schools offered an academic course; 872, commercial; 294, technical or manual training; 281, teacher-training; 152, agricultural; 411, home economics; and 118, a trade training course.

580 of these private schools were non-sectarian, and 1,478 were denominational (940 Roman Catholic).

Of the total number of students enrolled, 45.5 per cent. were boys and 54.5 per cent. were girls.

The number of Negro girls enrolled in these schools was about twice as many as the number of Negro boys, there being 6,021 coloured girls, and 3,086 coloured boys.

#### Private Commercial Schools, 1917-18.

In 1918 reports were received from 890 private commercial and business schools. These schools are of two types: first, those which are non-sectarian, and which are run on a commercial basis; second, those which are maintained by certain denominations and by Young Men's Christian Associations. The private non-denominational schools reporting number 780, the denominational and Young Men's Christian Association schools number 110. The total number of instructors in these 890 schools is 5,240 (2,310 men and 2,930 women). The number of students enrolled is 289,579 (95,449 men and 193,130 women). The average daily attendance in these schools is 122,688. Altogether 841 schools report 182,614 students enrolled in day courses. In night courses 106,165 students are enrolled in the 716 schools maintaining such courses. In the commercial or bookkeeping course 69,520 students are enrolled; stenographic, 152,402; combined course, 48,481; telegraphic (wire), 4,915; (wireless), 3,022; accountancy, 3,366; secretarial, 13,737; and in the salesmanship course, 3,992. Two hundred and forty-eight schools have an enrolment less than 100; 227 schools have an enrolment between 100 and 200. One-half of the commercial schools enrol about 25 per cent. of the students.

The average number of students per instructor varies considerably in the different schools. The largest group of schools have from 26 to 25 students per instructor.

The average length of the daily session likewise varies considerably in the different schools. Three hundred and fifty-five schools are in session 5 hours per day; 253 schools are in session 6 hours per day.

The usual tuition fee per month in the day course in the majority of schools varies from \$20 to \$25 for any course. The tuition fee for the night course per month is generally \$5 or \$6. The usual tuition fee charged for the entire

commercial or bookkeeping course, or for the entire stenographic course, varies from \$60 to \$80. The time usually required to complete the course is six months. The tuition fee for the combined commercial and stenographic courses usually varies from \$80 to \$140. The tuition fee usually charged for a course in telegraphy (wire) is \$60 to \$80.

The majority of these private commercial schools teach only one system of shorthand, 547 schools failing in this class. Two hundred and two schools teach two systems of shorthand. Forty-eight of the 76 schools having an enrolment of 500 students or more teach the Gregg system of shorthand. Forty of these schools teach some Pitmanic system. Altogether 64.4 per cent. of the schools offer the Gregg system of shorthand, and 44 per cent. offer some Pitmanic system.

#### Industrial Schools for Delinquents, 1917-18.

In 1918, 135 industrial schools for delinquents reported to the Bureau of Education. Most of these schools are State institutions. Eleven are supported by counties and five by cities, while two are supported jointly by a city and a county. Thirty-one of them are private institutions. In these reformatory institutions 1,137 teachers are employed (655 women and 482 men). In addition to the teachers 3,325 assistants caring for inmates are employed.

In these schools 63,768 inmates were enrolled during the year (49,660 boys and 14,108 girls). In so far as reported, there were 51,786 white children and 8,479 coloured children. Seventy-nine schools have an enrolment less than 300; the other schools vary in size from 300 to 2,500.

The valuation of property per child in average attendance in industrial schools for delinquents in the United States is \$1,645. This varies from \$299 in the State having the lowest average, to \$5,069 in the State having the highest per capita valuation of property. The amount spent annually in the United States for keeping an inmate in one of these institutions is \$287 for current expenses, and \$39 for permanent improvements.

#### Schools for the Deaf, 1917-18.

In 1917-18 reports were received from 155 schools for the deaf. Of this number, 68 schools are State institutions, 69 schools are maintained as a part of the city public school system, and 18 schools are under private control. The total number of instructors in the three types of schools is 1,821 (1,421 women and 410 men teachers). The total number of pupils enrolled is 14,448. This total includes 11,316 pupils enrolled in State institutions, 2,482 pupils in city day school classes, and 644 pupils in private schools. The number of graduates from secondary schools in State institutions is 206; from secondary schools of city day school classes for the deaf, 5; from private institutions, 3. The average expenditure per pupil for current expenses in State institutions is \$358 and in private institutions \$238.

#### Schools for the Blind, 1917-18.

In 1918, 62 schools for the blind reported a total enrolment of 5,386 pupils (2,867 boys and 2,519 girls). The number of instructors in these schools is 728 (527 women and 201 men). Fourteen States provide for the education of their deaf and blind in dual institutions, that is, both

deaf and blind pupils are educated in the same schools. Altogether there are 13 such dual schools in the United States. Ten of the schools for the blind included above are operated as a part of the city public school system. Four schools are under private control. The others are State schools or serve as State institutions. The average annual cost per student in schools for the blind is \$428.

#### Schools for Feeble-minded and Sub-Normal Children, 1917-18.

Nearly all States provide schools for feeble-minded children; 43 schools of this type reported in 1918; 32 private schools also submitted a report. Altogether 131 cities have organised classes for the teaching of sub-normal and backward children. The children in these schools are not usually feeble-minded, but are retarded in their school work. The number of instructors in State institutions was 425, in private institutions 121, and in public day school classes of city schools 1,134. The total number of inmates in State institutions was 35,968 (18,353 boys and 17,615 girls); in private institutions, 983 (467 boys and 516 girls); in public day school classes of city schools, 18,133 (11,937 boys and 6,196 girls).

In State institutions 11 per cent. of the pupils take music, 26 per cent. home economics, 19 per cent. manual training, 11 per cent. agriculture, and 13 per cent. trade training courses. In city day school classes, 90 per cent. of the pupils take music, 27 per cent. home economics, 86 per cent. manual training, 10 per cent. agriculture, and 12 per cent. trade training courses. In private schools 43 per cent. take music, 24 per cent. home economics, 34 per cent. manual training, 14 per cent. agricultural courses, and 4 per cent. trade training courses.

## PRODUCTION AND INDUSTRY.

**Agriculture.**—The total land surface, excluding Island possessions and Alaska, is 1,903,289,600 acres, of which in 1920 955,676,545 were farms (506,982,301 acres improved). The total number of farms in 1920 was 6,448,366, of which about 2,456,000 are between 100 and 500 acres, about 1,475,000 between 50 and 100 acres, and about 1,504,000 between 20 and 50 acres. The total value of the farm produce of the United States in 1920 (preliminary figures) was estimated at \$19,855,000,000—a decrease of \$5,105,000,000 compared with 1919. Crops in 1920 were valued at \$11,145,000,000, and animals and animal products at \$8,711,000,000.

**Wool.**—The total number of fleeces in 1920 was 35,901,000, producing 259,307,000 lb. fleece; pulled wool, 42,900,000 lb.; total, 302,207,000 lb.

**Minerals.**—The total value of metallic minerals produced in 1920 was estimated at \$1,724,300,000 (pig iron, \$1,137,926,882; copper, \$222,467,000; gold, \$49,590,400), and of non-metallic minerals the total value was \$4,977,500,000 (bituminous coal, \$1,950,000,000; Pennsylvania anthracite (1919), \$364,926,930; petroleum, \$1,360,000,000; clay products, \$364,220,000; stone, \$120,500,000; natural gas (1919), \$162,000,000; cement, \$193,548,000; and mineral paints (lead and zinc pigments, 1919), \$25,810,671. The exports of coal in 1918 amounted to 19,954,100 tons, in 1919 to 16,393,600 tons, and in 1920 to 34,410,000 tons, and in 1920 the amount sent across the Atlantic amounted to 13,906,000 tons, while 14,509,000 tons went to Canada.

**Manufactures.**—The manufacturing establishments enumerated at the five-year Census of 1919 numbered 239,768, the value of their products being \$62,910,202,000, as compared with a value in 1914 of \$24,246,435,000. The leading manufacturing States are New York, Pennsylvania, Illinois, Ohio, and Massachusetts. The principal industrial centres are New York (clothing, printing and publishing, copper smelting and refining, slaughtering and meat packing, foundry and machine-shop products, petroleum refining, tobacco, sugar-refining, textiles); Chicago (meat, clothing, iron and steel); Philadelphia (textiles, foundry products and machinery, clothing, printing and publishing); Boston (boots and shoes, rubber, meat, printing and publishing); Pittsburg (iron and steel); Detroit (automobiles); St. Louis (meat, tobacco, shoes); Cleveland (iron and steel, automobiles, clothing); Baltimore (clothing, copper); Cincinnati (foundry products and machinery, meat, clothing); Buffalo (iron and steel, meat, flour); Minneapolis (flour mills, lumber, printing); San Francisco (meat, printing).

ACRAGE AND CROP PRODUCTION, 1921. [Preliminary estimates; revised to August 9, 1921.]

## WEIGHTS, MEASURES, AND CURRENCY.

The *Weights and Measures* in common use are shown on page 464. The Metric System of Weights and Measures is permissive, but is little used. The unit of currency is the dollar of 100 cents. The rate of exchange on certain dates in 1921 will be found on p. 457.

\* Since spot mileage of switching and terminal companies has been excluded.

In 1914 the value of the U.S. dollar was d. 49<sup>3</sup>/<sub>4</sub> (£1 = \$4.867) in English currency; \$1 = 5.1813 francs in French currency; and \$1 = 4.2 marks in German currency. On Oct. 10, 1921, the English value of the U.S. dollar was d. 63<sup>1</sup>/<sub>4</sub> (£1 = \$3.795).

## Dependencies of the U.S.A.

### THE PHILIPPINE ISLANDS

are situated between  $4^{\circ} 40' - 21^{\circ} 10'$  N. lat. and  $116^{\circ} 40' - 126^{\circ} 34'$  E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 114,400 square miles, of which total 94,946 square miles are contained in the eight largest islands, the 3,130 other islands having a combined area of 14,578 square miles.

*Population.*—At the Census of 1918 the population was ascertained to be 10,350,730, almost all of Malayan stock, of whom nearly 9,500,000 were Christians (Roman Catholics), about 775,000 were Muhammadans; about 725,000 are pagans. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the U.S.A. (8,200 in 1903).

*History.*—The islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1542 Spain undertook the conquest of the islands, which were named "Filipinas" after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion was at its height under Aguinaldo, a native leader, whose assistance was secured by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898.

*Defence.*—In 1920 the Philippine Scouts consisted of 234 officers and 8,360 enlisted men; there were also in the islands on April 1, 1920, 538 officers and 13,223 enlisted men of the regular and emergency forces of the U.S. The Philippine constabulary consists of 374 officers and 6,352 enlisted men. All the enlisted men in the scouts and constabulary (and almost all the officers) are natives of the islands.

*Trade.*—The principal exports are hemp, coconut oil, sugar, and tobacco; the imports being cotton manufactures, and iron and steel manu-

factures. The trade in 1920 was valued at \$151,000,000 for exports and at \$149,500,000 for imports, 62 per cent. of the imports being from U.S. and 70 per cent. of the exports being taken by U.S. Sugar was the principal article of export in 1920, being valued at \$49,500,000, and Manila hemp at \$36,000,000.

*Towns.*—Capital, Manila, in the island of Luzon; population (Dec. 31, 1918), 283,613. The next largest towns are Cebu (63,500), Albay (53,105), and Iloilo (49,808); there are several others with populations from 25,000 to 40,000. Governor-General (Manila), Charles E. Yeater (acting).

### GUAM.

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in  $13^{\circ} 26'$  N. lat. and  $144^{\circ} 39'$  E. long., at a distance of about 1,566 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population on July 1, 1920, of 14,724, of whom 13,698 are classed as native, 478 of the naval station, and 548 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apra. Governor, Capt. I. C. Wettengel, U.S.N.

### PUERTO RICO.

Puerto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between  $17^{\circ} 50' - 18^{\circ} 30'$  N. lat. and  $65^{\circ} 30' - 67^{\circ} 15'$  W. long., with a total area of 3,606 square miles and a population of 1,297,772 at the census of 1920. Almost all the inhabitants are Roman Catholics. The island is about 200 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 98 miles from Key West. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 340 miles of railroad were in operation in 1920, and there are good harbours at San Juan and Ponce. The capital, San Juan, had 70,707 inhabitants in 1920, other towns being Ponce (41,562), Mayaguez (19,059), Arecibo (10,039), Bayamon (10,411), and Caguas (12,154). The legislative functions are vested in a legislature which consists of a elective

houses; the Senate, composed of 29 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (2 from each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years.

Governor, E. Mont. Riley .....\$10,000

#### TUTUILA.

Under an agreement between Great Britain, Germany,\* and the U.S., of Nov. 14, 1899 the first-named Power abandoned all claims to the islands of the Samoan Archipelago, which were divided by the remaining parties to the agreement, the islands east of 171° W. long. being reserved to the U.S. The territory thus acquired consists of the island of Tutuila and Anuanu, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 56 square miles and a population estimated at 7,500 in 1922.

Tutuila, the largest of the U.S. group, has an area of about 40 square miles and a population of 5,250, and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles and a population of about 2,000, Rose Island being uninhabited. Copra and cocoa beans are exported.

Governor, Comdr. W. J. Terhune, U.S.N.

#### WAKE AND JOHNSTON ISLANDS.

The flag of the U.S. was hoisted on Wake Island in 1899, and three other islands in the Pacific have been annexed (Johnston, Palmyra, and Midway).

#### ALEUTIAN ISLANDS.

The *Aleutian Islands*, or Catherine Archipelago (also known as the Santa Barbara group), lie westward of the district of Alaska, and consist of four groups of islands (Fox, Andreanof, Rat, and Near Islands) between 52°-53° N. lat. and 172° E.-163° W. long. They have a population estimated at 2,000. The principal settlement is at Iliuliuk, on Unalaska Island. The group forms a part of the district of Alaska, and was transferred to the U.S. by Russia in 1867.

#### VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 138.37 sq. miles, with a population in 1911 of 27,086. *St. Thomas* (18,080 acres) has a population of 10,121, mostly negroes; *St. Croix*, or *Santa Cruz* (53,912 acres), has a population of 12,901, the capital being Christianstad (or Bassin); *St. John* (959 acres) has a population of 960, the capital being Cruxhay. *St. Croix* exports sugar, rum, and cotton. In *St. Thomas* there are 8 public and 10 parochial schools, 1,705 pupils and 57 teachers; in *St. Croix*, 7 public and 17 parochial schools, 1,905 pupils and 73 teachers; in *St. John*, 5 public schools, 128 pupils and 9 teachers.

The revenue is derived from customs, income tax, ground and building tax, trade tax, &c. The estimated revenue for year ending June 30, 1920, was \$59,405. The administration is

under the Navy Department. There is a regular fortnightly service from New York to St. Thomas, which possesses a powerful wireless installation.

CAPITAL, Charlotte Amalie (St. Thomas) contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refueling station.

Governor, Rear-Adm. Joseph W. Oman, U.S.N.  
Secretary, Lieut. C. C. Thimmons, U.S.N.

#### THE PANAMA CANAL.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1850. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Inter-oceanic Panama Canal Company, of which de Lesseps was nominal head. After two years of preparatory work, the first excavation was made on January 20, 1882. The amount of work to be accomplished proved to be greater than was estimated, and the conditions under which it was carried on more embarrassing. Sickness, interference of local officials, and mismanagement by the administration in Paris, resulted in the failure of the company, and a receiver was appointed in 1889. Under direction of the French courts a new company was formed to carry on the work, and, after a period of surveys, excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

The interest of the United States in a canal across the Isthmus dates from 1823, and surveys under the auspices of that Government, or of companies organised in the United States, have been made at every available point between the Isthmus of Tehuantepec and the Atrato River. Actual construction, by an American company, of a canal across Nicaragua was begun in 1850, and abandoned in 1853, when the company failed for lack of funds. The failure of this company influenced the United States Government to take an active interest, and a commission was appointed in 1855 to make further studies and investigations. As a result of these investigations, the Congress of the United States authorised the President in 1902 to purchase the effects of the French company in Panama for \$40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory.

Two years were spent by the United States Government in sanitation, the assembling of plant, and organisation and housing of a labour

\* Under the Treaty of Versailles, 1919, the German Samoan Islands were allocated to New Zealand.

force; after which operations on a large scale were begun on all parts of the canal.

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1921, were \$443,455,968.02. Tolls and other revenues, from its opening until June 30, 1921, amounted to \$26,466,791.78. During the past two years they have averaged approximately \$20,480,000 a year, or about \$20,500,000 a month.

The canal is fifty statute miles long (43.84 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 8½ feet above sea-level varies from 8½ feet in some parts of Gatun Lake to 4½ feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

There are three essential parts: a lake formed by damming the Chagres River, and two channels leading from the Atlantic and Pacific Oceans to this lake. The surface of the lake is normally at 8½ feet above sea-level, and the channels connecting it with the sea are at sea-level. Ships are lifted from the sea-level channels to the lake, or lowered from the lake to sea-level in locks. These locks have a usable length of 1,000 feet, width of 120 feet; least depth of water over the sills when lake is at normal level, 41½ feet. These dimensions limit the size of ships using the canal. The dam which forms the lake is situated at Gatun, about seven miles inland from the Atlantic. It is built of earth, with an impermeable core of fine sand and clay, and is 1½ miles long, half a mile wide at bottom, and 100 feet at the top, which is 205 feet above sea-level. The lake is known as Gatun Lake, and is 164 square miles in area. At its southern end is Culebra Cut, the channel through the continental divide. This is the most extensive excavation ever made. The French canal builders dug about 18,600,000 cubic yards out of this section of the canal, and the Americans have completed an excavation that amounts to over 130,000,000 yards. The total excavation for the whole canal is about 266,000,000 cubic yards,

about 130,000,000 yards of which have been excavated in the dry and the balance by dredges. The amount of concrete used in the locks is 4,500,000 cubic yards.

The administrative organisation for the canal is known as "The Panama Canal," with the Governor of the Panama Canal (Col. Jay J. Morrow, U.S.A., retired) at its head. The Governor reports to the President, who has delegated the Secretary of War to have supervision over the canal for him. The Governor of the Panama Canal is President of the Panama Railroad.

In connexion with the construction and operation of the canal, extensive terminal and supply facilities have been constructed at both the Atlantic and Pacific entrances. These include marine and general repair shops, foundries, dry docks, five 1,000-foot steel and concrete piers, and a number of wharves, slaughter-houses, cold storage plants, ice plants, laundries, hospitals, coaling plants, fuel oil tanks and delivery plants, waterworks, commissary stores, storehouses of spare materials and ships' chandlery stores, and other accessories of great modern ports. An extensive transfer of cargo goes on at the Atlantic terminus of the canal, between ships plying the Atlantic and the Caribbean and ships which pass through the canal to or from Pacific ports. The 1,000-foot dry dock, with adjacent repair shops, at Balboa is an important assistance to shipping throughout the American tropics as well as a base for repairs for vessels of the Navy.

Health conditions are excellent, while the scenery is varied and attractive, with ruins of old Spanish towns and fortifications. Gatun Lake is studded with islands and surrounded by mountains. Shooting and tarpon fishing are excellent. The U.S. Government operates hotels at Colon and Ancon.

The number of commercial vessels passing through the canal in both directions in the fiscal year ending June 30, 1921, was 2,398, with a cargo tonnage of 11,599,214 tons, of 2,240 pounds. The total of commercial ships passing through the canal in the first seven years of its operation, from August 15, 1914, to August 15, 1921, was 13,416, of 45,869,942 net tons, Panama Canal measurement, carrying 51,578,920 tons of cargo.

## ABYSSINIA or ETHIOPIA.

*Empress, Walzeru Zauditu (daughter of late Emperor Menelek), born 1876; elected Sept. 27th, 1892.*

*Heir, H.H. Ras Tafari Makonnen, G.O.M.G. (Cousin of the Empress).*

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with a total population of 7,000,000, of whom about one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Massowah (Eritrea), the French colony of Djibuti, British Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Abyssinia is volcanic and mountainous. It contains some mineral wealth; iron and coal are not uncommon, and gold is washed in various streams, while salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, rubber, &c., flourish; in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 5,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Taps lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people.

The Abyssinians are Christian (a branch of the Coptic Church), and their kings claim descent from Menelek, the son of Solomon

by the Queen of Sheba. There is no popular literature, and little education. The potential army numbers at least 300,000, armed with rifles. The principal pursuits are agriculture and cattle breeding. The chief exports are coffee, civet, wax, hides, rubber, ivory, and gold. The total trade is valued at about £2,000,000 for imports and exports, but it suffered severely during 1902 from the prevalent depression. The import duty on all goods at Gambela is 10 per cent. *ad valorem*, and at Dire-Dawa and Harrar 8 per cent. *ad valorem*; in the interior the duty is variable, and 3 per cent. addition is imposed on goods brought to the capital. A railway (495 miles) has been built under French auspices from Jibuti to the capital, *via* Dire Dawa. The posts and telegraphs are under French management. The principal towns besides Addis Ababa, are Adwa, the capital of Tigré, Gondar, Debra-Markos, Sailyu, Aksum, Antaló, Ankober, Goré, Dembecha, Ijube, Jimma, and Harrar. There are ancient architectural remains at Aksum, Gondar, and Ankober; modern architecture is very poor.

**CAPITAL, Addis Ababa** (population fluctuates, but is ordinarily about 50,000). Harrar, in Eastern Abyssinia, has a population of about 45,000. Imports from U.K. (1900) ..... £83,128 Exports to U.K. (1900) ..... 8,986

FLAG: Green, red, yellow.

Addis Ababa is 500 miles from Zaila, *via* Harrar; letters from London are from 20 to 24 days in transit if the mail connects with steamer service from Aden; train from Djibouti takes 3 days; caravans take from 25 to 45 days.

## AFGHANISTAN (see p. 632).

## ALBANIA.

Albania (the former Turkish Provinces of Scutari and Yanina) lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic; total area about 11,000 sq. miles; total population estimated (1901) at 800,000. The political neighbours are, on the north Montenegro, on the east Serbia, and on the south-east and south Greece. The independence of the country was guaranteed by the Supreme Council of

the Allies, but is now awaiting the decision of the Council. The principal towns are Durazzo (the capital), pop. 5,000; Scutari (pop. 35,000); Elbasan (pop. 25,000); and Tirona (pop. 15,000). Cattle rearing and agriculture (grain and tobacco) are the principal industries and there is some mineral wealth.

*Durazzo—Consul, H. C. A. Eyres. (And local allowance, £300), £1,500.*

### ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a Judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

### ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 15° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,000,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000,000.

The organization of the Native States of Arabia is to be developed under British auspices, the principal rulers (the King of the Hejaz and the Imam of Yemen) being subsidised under certain conditions (control of foreign relations by British advisers and maintenance of internal peace by native rulers). The various Arab States are shown below:—

### THE KINGDOM OF THE HEJAZ.

*King of the Hejaz, El Hussein Ibn Ali.*

On June 5, 1916, the Grand Sheriff of Mecca (hereditary Keeper of the Holy Places) threw off the Turkish allegiance and declared the independence of the former vilayet of Hejaz. In concert with the British Imperial forces under General Allenby, the armies of the King of the Hejaz (under the leadership of the Emir Feisal) penetrated northward, through the districts E. of the Jordan, to Damascus, and the territories of the new kingdom extend from Asir (see below) in S. to Palestine and Syria in N., and from the Red Sea, the Gulf of Akaba, and Palestine in the W. to the ill-defined boundaries of Central Arabia.

Parallel with the Red Sea coast runs the Tihama range (Jebel Shar, or Mount Seir, 7,000 feet, and Jebel Radhwa, 6,000 feet). On

the coast are the small ports of Muwela, Damgha el Wijn, Yambo, Rabigu and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the Hejaz Railway. The Oasis of Khair, east of the railway, contains a considerable population, descendants of former negro slaves, with a Jewish centre at Kasr el Yahudi. The importance of the Kingdom of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. Medina (*Al Medina*, "The City"), 200 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 12). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. Jeddah, the principal port, has a considerable trade in hides, mother-of-pearl, coffee and carpets.

The Hejaz Railway runs from Medina in S. through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo. The total area under the rule of the King of the Hejaz is about 125,000 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes.

CAPITAL, Mecca (pop. 60,000).

### THE EMIRATE OF NEJD AND HASA.

*Emir, Abd-el-Aziz es Saud, K.G.L.E.*

This former vilayet was in the 18th century an independent Empire of the Wahabites, and has reasserted its autonomy under a representative of the former dynasty. It is known as "the true home of the Arab," and extends across the oases of Central Arabia, from the eastern boundary of Hejaz to the Persian Gulf. During military operations in 1913, the Emir of Nejd captured Hufuf (the capital of El Hasa), and extended his rule over the former Turkish province of El Hasa. The capital, Riyadh, is a station on the Pilgrims' trans-Arabian caravan route from El Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahabi Moslems. The principal trading centre is Anazla, in the central province of Qasim (Nejd). The principal port on the Persian Gulf is El Katif, on Bahrain Bay (El Hasa).

### THE PRINCIPALITY OF KOWEIT.

*Ruler, Sheikh Salim Ibn Mubarak, C.S.I.*

Koweit has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Nejd (El Hasa). The important harbour and gulf port of Koweit, the capital (pop. 25,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, dates, wool, &c. It was designated as the terminus of the Berlin-Constantinople-Baghdad railway as originally projected in 1902. Political Agent, Major J. C. Mora, B.S.O.

## THE SULTANATE OF OMÂN.

*Sultan, Seyyid Taimur bin Faisal, born 1886, suc. 1913.*

Omân (area 82,000 sq. miles, estimated pop. 550,000) is a Muhammadan State in S.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Omân, and the Arabian Sea from El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdhar an elevation of 20,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital. In 1913, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Imam or Spiritual Ruler, have since administered the whole of Omân proper, the efforts of the Sultan to establish his control having been, up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1916-17 to £200,000, and in 1917-18 to £323,015, a decrease owing to interior disturbances due to the war. Dates are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports. The capital, Muscat, has an estimated population of 24,000.

*British Consul and Political Agent, R. E. L. Wingate.....per mensem Rs. 2,250*

## THE EMIRATE OF JEBEL SHAMMAR.

*Emir, Abdullah Ibn Mitab or Rashid.*

Jebel Shammar is a Bedouin community of Central Arabia, extending across the oases from Hejaz on the west to Koweit on the east, with Nejd as a southern neighbour. Its boundaries are indeterminate, and the total population in allegiance to the Emir is believed to be about 200,000. The capital is Hall, between the two Shammar ranges (Jebel Aja and Jebel Salma) with a population of about 12,000.

## THE IMAMATE OF ASIR.

*Imam, Muhammad Hamid ed-Din.*

The territory of the Idriai (who claims the Imamate of Asir and part of Yemen), extends along the Red Sea littoral, approximately from Hali Point to Lohela. It includes part of Asir, part of Yemen and the Farasan Islands, and extends inland to the Dahna Desert. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

## THE IMAMATE OF YEMEN.

*Imam of Sana'a, Yahya Muhammad Hamid ed-Din.*

Yemen occupies the S.W. corner of the Arabian peninsula, between the Imamate of Asir and the British dependency of Aden, with an estimated area of 74,000 sq. miles and a population of 600,000 to 700,000. It was formerly divided into the vilayets of Sana'a, Taiz, Asir and Hodeida, and it extends inland to the Dahna Desert and to the tribal territories of Hadramut. Part of Yemen is now included in the territories of the Idriai (Imam of Asir), and of the remainder the greater part is under the rule of the Imam of Sana'a. On the plateau

between the coast and the Dahna Desert (a district known as *El Jebel*) are the most fertile parts of Arabia, where wheat, barley, millet and coffee are extensively grown. The sea port of *Mocha* has become associated with the coffee export trade, but in this trade (and in all others) it is of secondary importance to *Hodeida*. The trade of Yemen probably exceeds that of the remainder of Arabia. The capital is the walled city of Sana'a (pop. 20,000), and about 70 miles to the S. of the capital is Dhamar, an ancient seat of learning, and the headquarters of the Zaidi sect of the Muhammadans.

## THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 30 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadarim, an ancient people of Arabian stock (Hadaram was the son of Joktan, *Genesis* x., 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Kabr Hud) and Shlbam (Kabr Sâlih). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 82,000 sq. miles, and its Muhammadan population, of independent Apab tribes, is estimated at 150,000. The most important Coastal Chief is the *Sultan of Shahr and Mokalla*, C.S.I.E., who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Sey yem and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Ka'iti (by whom the former were expelled from the coast) was settled by treaty in 1912 on the initiative of the Aden Government. Under this Treaty the Ka'iti *Sultan of Mokalla* permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

## ARGENTINE REPUBLIC.

*President (1916-1922), Hipólito Irigoyen, assumed office Oct. 12, 1916.....\$96,000*  
*Vice-President (1919-22), Benito Villanueva 36,000*

*Minister of the Interior, Dr. Ramon Gomez.*  
*Foreign Affairs, Dr. H. Pueyrredon.*  
*Finance, Domingo Salaberry.*  
*Justice and Public Instruc., Jose Salinas.*  
*Agriculture, Alfredo Demarechi.*  
*War, Dr. Julio Moreno.*  
*Marine, Rear-Adm. Tomás Zurueta.*  
*Public Works, P. Torello.*

*Minister in London, Señor Don Dr. J. Evaristo Uriburu, 26, Park Lane, W. 1.*  
*Counsellor, Señor Don Paulino Llambi Campbell.*  
*Counsellor of Legation, Señor Don Luis H. Dominguez, 2 Palaces Gate, W. 8.*  
*Secretary, Señor Don Carlos Miguéns.*  
*Naval Attaché, Comm. Leon L. Scasso.*  
*Financial Secretary, Señor Don Carlos Domínguez.*

Consul-Gen., Dr. Bergio Garcia Uriburn, 123 Oxford Street, W. 1.  
Asst. Consul, Don Saúl Aguilar.

There are also Consulates at Liverpool, Southampton, Cardiff, Manchester, Newcastle-on-Tyne, Newport, and Glasgow.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 3,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, and in the north-western states by the eastern spurs of the Andes. The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 20 territories, comprising in all about 1,132,000 square miles, with a population of 3,462,030 in 1919. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. The climate is moderate and healthy. Spanish is the language of the country.

**Government.**—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1820 Spanish rule was overthrown, and in 1828 the independence of Argentina was complete, although not acknowledged by Spain until 1829. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1899) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 160 members. Members of Congress receive \$9,000 per annum.

**Production.**—Of the total area about one-third is suitable for agriculture and cattle raising, and vast tracts are held by the Federal Government

for sale or lease to colonists. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. The yield of the harvest of 1920-21 was 5,122,000 tons of wheat, 1,090,000 tons of linseed and 864,000 tons of oats; there were in 1924 25,866,763 cattle, 43,225,425 sheep, 3,325,825 horses, 565,469 mules, 4,325,280 goats and 2,000,585 pigs, the total value being placed at £130,000,000. The export of frozen beef and mutton is an important industry. The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1920, there were 4,500 registered wine presses, handling about 600,000 tons of grapes, the output in 1919 being over 4,000,000 hectolitres (88,212,000 gallons). The export of wine to neighbouring South American States is increasing annually, and the importation of wine has almost ceased.

**Communications.**—There were (1919) 22,121 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £150,000,000\* of British capital. Telegraphs about 43,153 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. The principal ports are Buenos Aires, Rosario, La Plata, and Bahía Blanca. The number of steam and sailing merchant vessels which entered Argentine ports in 1918 was 10,868 of a total tonnage of 8,907,731. Of these 1,818 were ocean-going vessels of an aggregate tonnage of 3,393,954.

**Defence.**—The Navy consists of 2 super-Dreadnought battleships, 2 river monitors, 4 armoured cruisers, 3 cruisers (old), 4 torpedo gunboats, 7 destroyers, and a first class and 6 second class torpedo boats. Strength about 5,000 men. There is a naval post at Bahía Blanca. The National Militia has a peace footing of about 30,000, with reserves of 250,000; on a war footing the Army would comprise 5 divisions of 20,000 each.

**Education.**—Primary Education is secular, free and nominally compulsory from the ages of 6 to 14, but only some 45 per cent. of attendances are secured. Secondary Education is controlled by the Federal Government in lycæums and normal schools, with an average attendance of 6,000. There are also *Special Government Schools*—1 naval, 1 military, 1 mining, and 1 agricultural. There are *National Universities* at Cordoba and Buenos Aires, and *Provincial Universities* at La Plata, Santa Fé, and Paraná.

#### ARMENIA.

Armenia occupies the uplands between the Iranian plateau and Asia Minor, and is bounded by the Black Sea and the Republic of Georgia on the N., by Kurdistan on the S., by the Republic of Azerbaijan on the E., and by Turkish Asia Minor on the W., and until the outbreak of the War of 1914-18 it was shared between Turkey (35,600 sq. miles), Russia (20,587 sq. miles), and Persia (6,328 sq. miles). The country possesses great historical interest as the reputed seat of the oldest civilised people in the world. The inhabitants have always possessed definite racial characteristics, but have seldom been politically independent, the country having been held successively by the Medes, Persians, Greeks, Romans, Arabs, and Turcoman-Tartars until 1214-1538, when the greater part became a province of the Ottoman Empire. The Eastern part remained under Persian rule, but in 1828 Russia obtained the larger share of non-Turkish Armenia. The rivers Euphrates, Tigris, Aras, Kur, and Tchorokh take their rise within its boundaries, and at the meeting of the former Turkish, Persian, and Russian boundaries is Mount Ararat (17,160 feet), the traditional resting place of "Noah's Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile,

producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit growing are capable of great development. Armenia has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper, lead, iron and valuable marbles; there are also numerous hot and cold mineral springs (similar in nature to those of Vichy). The Armenian Church is the oldest established Christian church, Christianity having been recognised as the State religion in 300, and from the 5th century there is a national language and literature. On account of their religion the Armenians have suffered a general persecution by Islam, particularly in the vilayet of Sivas, Bitlis, Diarbekir, Mamuret-el-Aziz, Van, and Erzerum, where massacres have frequently been organised with a view to extermination. In 1915-17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia, while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kurdish hordes. In 1918, during the Russian Revolution, an independent "Republic of Trans-Caucasia" was formed by the union of Georgia, Armenia, and Azerbaijan, and on the dissolution of the union (June 1, 1918) the Supreme Council of the Allied Powers recognised the independence of the Republic of Armenia (area, 20,587 sq. miles, population 2,000,000). Under the Treaty of Peace with the Allies (May 11, 1920), Turkey recognised the independence of Armenia, with its capital at Erivan. The United States Government was requested by the Allies to accept a mandate for Armenia, but the Foreign Relations Committee of the Senate has declined the mandate. American Representative in London, Maj.-Gen. Bagratuni.

Prior to the War the Austrian Empire, joined to the Kingdom of Hungary by the identity of sovereigns, was the largest Empire, next to Russia, on the continent of Europe, situated between 48°-51° N. lat. and 9° 30'-26° 20' E. long. It embraced an area of 240,455 sq. miles, and a population (1924) of nearly 22,000,000, and included Upper and Lower Austria; Bohemia; Bukovina; Carinthia, Carniola, Dalmatia, Gips and Gradiška; Istria, Moravia, Salzburg, Silesia,

Styria, Trieste, Tyrol and Vovarburg; with Bosnia and Herzegovina as administered territories. At the conclusion of the War, the territories of the Austrian Republic comprised an area of 32,795 square miles, with a population (1900) of 8,667,000.

On June 28, 1914, the assassination of the Austrian Archduke Francis at Sarajevo (Bosnia) was presumed to be the outcome of a plot fostered by Serbia, and after negotiations an ultimatum was presented by the Empire to the Serbian Government (July 23), and non-compliance with its terms led to the European War of 1914-18. Before the armistice of Nov. 11, 1918, Hungary had seceded from the "Dual Monarchy," and a Republic was declared Nov. 12, 1918, the throne being abdicated by the Emperor Karl (Nov. 26, 1918).

Under the Treaty of St. Germain (Sept. 20, 1919) the political neighbours of the Austrian Republic are the Republics of Germany and Czechoslovakia on the N.; the Kingdom of Italy, and the Yugo-Slav Kingdom on the S.; Switzerland on the W., and Hungary on the E.

Under the new Constitution (Nov., 1900), Austria became a Republican Federation of eight Provinces:—Lower Austria and Vienna, Upper Austria, Carinthia, Styria, Salzburg, Tyrol, Vorarlberg and Burgenland (West Hungary); the Bundesrat and Nationalrat were constituted; a government formed, and a President elected. The elections resulted in a majority for the Christian Socialists over the Social Democrats, the Pan-Germans coming next in order. In June, 1922, the Ministry resigned in favour of a non-party Government. There is a considerable body of opinion in favour of the inclusion of Austria in the German Reich and, on the other side, for a close alliance with Hungary.

Complete religious liberty is one of the fundamental laws of the new Republic. In 1915 the prevailing religion of the German-speaking people was Roman Catholic.

**Finance.**—Before the War Austria had a total indebtedness of about 24,400,000,000 crowns (£600,000,000), towards the annual cost of which (£80,000,000 crowns) Hungary made a contribution of 61,000,000 crowns (24 = £1 sterling). The indebtedness was increased by War credits (up to June 30, 1918) to £5,280,000,000, requiring an annual service of 4,335,000,000 crowns. The pre-war revenue was about 3,600,000,000 crowns (£120,000,000). The Budget of 1900-21 provided for receipts of 25,000,000,000 crowns, and for expenditure of 50,000,000,000 crowns, showing a deficit of 25,000,000,000 crowns; but by the middle of the year the deficit had reached 50,000,000,000. The rate of exchange, crowns to £ sterling (24 = £1 before the War) was 2,400 to 3,000 to £1 in August, 1921. The Austrian section of the Reparation Commission made an exhaustive examination of the resources of the country and, in May, 1922, a special commission of the League of Nations visited the country and made far-reaching proposals for financial reconstruction. Since the Armistice (Nov. 11, 1918), the British Government has advanced about £10,000,000 to the Republic.

**Industries.**—The principal industry is agriculture, the chief products being wheat, barley, oats, rye, maize, and potatoes. Forestry and stock raising are important. The forests are principally coniferous trees. The live-stock includes horses, cattle, sheep, pigs and goats. The vine is extensively cultivated. Among the

minerals produced are common and brown coal, iron, lead, zinc, silver and copper. The principal manufactures are woollens, cottons, glass, steel, wood-work and brewing.

**Communications.**—In Sept., 1922, there were about 3,800 miles of railway (exclusive of narrow gauge lines). The mercantile marine was considerable in 1924, but the new Republic is land-locked.

**Commerce.**—The Commerce of the "Common Customs Territory" of the Dual Monarchy of Austria and Hungary amounted in 1913 to £140,000,000 for Imports and £113,000,000 for Exports, of which totals £5,000,000 (Imports from) and £7,000,000 (Exports to) represented the exchange with the United Kingdom. The British trade with Austria was very small in 1921. Austria has free railway access to the seaport of Fiume in the neutral zone (see Yugo-Slavia), but no ports of her own.

**Defence.**—During the War of 1914-18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed. Under the Treaty of St. Germain the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up. Service in the Republican Army is by voluntary enlistment for twelve years.

**Towns.**—Vienna, the capital, is situated on the River Danube; in 1919 it contained an estimated population of 2,000,000. Other large towns are Grätz (277,000), Linz (93,000), and Innsbruck (60,000).

**CAPITAL, Vienna.** Pop. (1900) 2,825,000.

**FLAG:** Three horizontal bands, red, white, red.

A Kingdom of Central Europe, with a total area (1900) of 11,398 square miles and a population (Census of 1910) of 7,577,087. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 24, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, the Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium and ultimately overcame the resistance of the fortresses and overran almost the whole country. In revenge for the heroism of its defenders the Germans sacked and destroyed many cities, burning Louvain (with its library), Termonde, and other places, and established a reign of terror. They levied a war contribution on Belgium of close on £100,000,000, apart from enormous fines on localities, firms, and private persons. On Friday, Nov. 13, 1918, at the great turn of the tide, Antwerp was re-occupied by the victorious Belgian army, and Brussels and the remainder of Belgian soil a few days later. About 10,000 persons were added in 1919 by the cession of Moresnet and part of Malmédy by Germany, and the district of Eupen, with the remainder of the district of Malmédy, were ceded by Germany and annexed by Belgium (Sept. 20, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants.

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Brabant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 48 miles. The Meuse and its tribu-

tary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 535 feet. The principal rivers are the Schelde (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

**GOVERNMENT.**—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 120 senators (with the exception of 27 elected by the provincial councils) and 186 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 1919 elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers; widows or mothers of civilians shot by enemy; women imprisoned by enemy for patriotic acts, also voted.)

This Parliament, anomalous, and constitutionally elected, was required to make constitutional the machinery by which it was elected; i.e., to revise article 47 of the Constitution. This has not yet been done (Oct. 1920), but it is unlikely that the outworn method of plural voting will ever again be resorted to.

Deputies receive 4,000 francs a year and a free pass over the railways. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

**PRODUCTION.**—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Under Annex IV. of the *Treaty of Versailles* Germany undertook to deliver to Belgium certain live stock to replace the animals seized or destroyed during the War of 1914-1918. Belgium is essentially a manufacturing country, and it is largely dependant upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, and Brabant), glass, textiles (Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

**DEFENCE.**—In 1914 the Army on a peace footing consisted of about 50,000, all ranks. In the War of 1914-1918 over 500,000 passed into the armies, which were reorganised on French territory during the defensive period of the campaigns. An organised force of 200,000 co-operated with the Allies during the decisive offensive of the autumn of 1918. Those returned as dead or missing, during the War, numbered 200,000. Belgium has no Navy.

**EDUCATION.**—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special

schools abound. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are free institutions. Louvain University is to be rebuilt.

From 1914-19 loans of 2,170,525,448 francs were advanced by France, £78,524,613 by Great Britain, and \$240,543,000 by the United States.

The chief imports in 1919 were: manufactured articles (1,809,080,406 francs), raw materials (1,789,141,567), foodstuffs and beverages (1,322,697,478), and live animals (138,536,502); the chief exports were: raw materials (946,866,363 francs), manufactured articles (830,528,287), and foodstuffs and beverages (508,110,512).

COMMUNICATIONS.—In 1912 there were 4,719 kilometres of railway (including branch lines and 350 kilometres of private lines rented by the State); by Jan. 1, 1920, almost the whole length destroyed during the War had been repaired or relaid. In 1914 there were 44,964 kilometres of telegraph wire and 2,295 offices; in 1919, 24,397 kilometres had been restored and the 2,295 offices re-opened. In 1920, the post office had resumed full operations. The navigable rivers and canals have a length of 2,179 kilometres (1911), and there are 9,757 kilometres of roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1912) of 205 vessels (121,537 tons), in addition to which there were 453 fishing boats. In 1912, 9,268 foreign vessels entered at Belgian ports (tonnage 12,497,102). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Neuport, Blankenburg and Zeebrugge (blocked by the British Fleet April 23, 1918, and since re-opened for traffic). The vexed question of the Scheldt, of which the right bank is in Netherlands territory and the left in Belgium, appears likely to be settled by negotiation between the respective Governments. The navigation is to be free to both countries, from the mouth to Antwerp, and the Netherlands war vessels are to be removed from the river.

The Capital, BRUSSELS, had a population in 1912 of 175,809 (with suburbs, 756,637 inhabitants). Other towns with over 100,000 inhabitants are Antwerp, the chief port (312,224 with suburbs, 412,917); Ghent (167,477), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (170,624) the centre of the iron industry. Brussels is 224 miles from London; transit, 2 hrs.

#### THE BELGIAN CONGO.

The Independent State of the Congo became a Belgian Colony by a law of Oct. 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated at 5,000,000 to 7,000,000. The total European population (Jan. 1920) was 6,971, of whom 3,500 were Belgians, 818 were British, 229 Americans, 208 Italians, 657 Portuguese, 87 Swedes, 53 Russians, 123 French, 123 Dutch, 75 Swiss, 308 Greeks, 22 Luxemburgers, 21 Danes, 14 Norwegians, and 11 Spaniards.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and re-charge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Lukula to Boma, the cocoa planting district of Mayumbe. Above Leopoldville the river and its numerous affluents are navigable by steamer for about 5,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (125 kilometres), and another from Kindu to Kongolo (325 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (273 kilometres) was completed in 1916, connecting the West Coast of Africa with Belgian East Africa and the East Coast. The Katanga Railway reached Bukama in May, 1918, thus linking up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. Within eight years, 450 miles of railway have been constructed, 200 of which have been laid during the war. It is now possible to travel by train direct from Cape Town to the river Congo, a distance of 2,650 miles. Work has been started on the Stanleyville-Lake Albert Railway, which will run between the Congo River and the Nile, providing the last link to direct river and rail communication between the Cape and Cairo. Two new lines will run from the copper mining district of Katanga towards the West Coast, one of them reaching Lobito Bay (Portuguese Angola), the other linking the Katanga Railway with the Matadi-Leopoldville Railway. A telegraph line connects Banana to Coquilhatville (224 miles); Boma with Ishela (82 miles); Stanleyville with

Pontherville (99 miles); Kaseongo with Uvira (265 miles); Kiada with Kongolo (229 miles); Kabolo with Albertville (269 miles); and Sakania with Bukama (498 miles), a total length of 2,160 miles. There is telegraphic communication with Europe. Fifteen wireless stations connect the West Coast with the principal Government stations throughout the Colony. A great inter-Continental wireless station is being erected at Kanga to communicate direct with Brussels. The West Coast District has a rather scanty rainfall (40 inches), but on the Malumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Wild rubber and wild coffee are common; coffee, cocoa, Pará and Ceara rubber and cotton are successfully planted. Mines are very extensive. The copper district of Katanga has enormous deposits of copper ore, and the melters at the Lubumbashi produced about 23,000 tons of copper in 1919. A rich tin-belt extends from Bukama towards Lake Tanganyika. The gold-bearing districts of North-eastern Congo are being prospected by the Government, and contain both alluvial and reef gold. Diamond-bearing gravels are worked in the south. The total imports during the year 1919 were valued at \$5,681,000 francs: the exports (\$24,146,954 francs in 1919) are mostly palm-kernels and palm-oil, ivory, rubber, gum-copal, cocoa, copper, gold and diamonds. Capital, Boma (pop. 500 whites, 2,000 natives). Principal towns, Elisabethville (Katanga) (pop. 1,000 whites, 6,000 natives); Stanleyville (300 whites, 8,000 natives); Coquilhatville, Kinshasa (Stanley Pool), and Leopoldville.

By the Anglo-Belgian Agreement of July, 1919, the districts of Ruanda and Urundi, portions of the former territory of German East Africa (see "Tanganyika Territory"), which adjoin the Belgian Congo on the E., were assigned by Great Britain to Belgium. Ruanda and Urundi formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live stock and hides. The administrative capitals are Niansa (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

## BOKHARA.

Emir of Bokhara, H. H. Said Mir Alim Khan, b.

1854, succeeded 1912.

Bokhara is a Central Asian State with an estimated area of 85,000 square miles, and a

population of 2,500,000, the majority being Mohammedan Uzbeks. The capital (Bokhara) is a station on the Russian Trans-Caspian Railway, and has a population of about 95,000. The principal products are rice, wheat, fruit, hemp, cotton, and silk. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. Until the Russian revolution of 1917 the Emir was under the suzerainty of the Tsar. In Aug. 1920, a revolution, organised by Bolshevik (Red) emissaries, seized the capital, and the Emir took refuge in Afghanistan.

The Republic of Bolivia extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is about 597,460 square miles, with a population in Jan. 1918 of 2,800,074. The Republic was formerly comprised in the Spanish Vice-Royalty of *Alto-Peru*, and derives its present name from its liberator, Simon Bolivar, (born 1783, died 1830).

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu, Illimani and Sajama, three of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni and Mamoré.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked only for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. The principal exports are tin ore, rubber, silver, copper ore, bismuth, coca, wolfram, zinc, hides, and lead ore; the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are about 1,125 miles of trunk lines of railways in operation, and 330 miles under construction; and 4,000 miles of telegraph wire. There are wireless services between Riberalta, La Paz, Cobija, Capitandí (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo

\* The country has not been completely surveyed, and the area is officially estimated at 597,460 square miles; other estimates give an area of 707,125 square miles.

(2½ days), and also (with a gap of 125 miles) to Buenos Aires (4 days), and from Rio Mahuto to Potosí; branch lines run from Oruro to Cochabamba. Construction on the railway between La Quiaca and Tupiza, in Bolivia, which, when completed, will allow through railway communication with Buenos Aires, is in the hands of a French firm. The gap between Tupiza and La Quiaca is crossed by an automobile service, taking one day. Communication with Para is effected by rail to Guayaquil and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Autopagasta and Bolivia railroad (729 miles), and a line from La Paz to the province of Yungas may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Potosí to Sucre, the legal capital, is under construction.

Bolivia is the only country in South America without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882 (see Chile). The Republic intends to appeal to the League of Nations for the return of a small coastal area north and south of Arica, in the Province of Taena. The Peace Army amounts to about 3,000, all ranks, the War Effective being about 105,000.

The chief cities are La Paz (pop. 107,252), Cochabamba (30,818), Potosí (29,977), Santa Cruz (25,807), Sucre (29,000), Tarija (20,818), and Oruro (32,000).

Spanish is the language of the country.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Álvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean; and extends between lat. 5° 20' N. and 33° 45' S. and long. 34° 40' and 71° 15' W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. The Republic comprises an area of 3,268,870 square miles, with a population estimated (1922) at 20,000,000.

The northern States of Amazonas and Pará and the central State of Mato Grosso (which together constitute more than one-half of Brazil) are mainly wide, low-lying, forest-clad plains. The eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south, towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level. The principal ranges are Serra do Mar in São Paulo; the Serra do Mantiqueira (Itatiaia, 9,000), and the Serra do Espinhaço (Itacolumi, 6,000 feet), in the south-east of Minas Geraes; the Serra do Paraná, between Goyaz and Minas Geraes, the Serra dos Aymorés, which divide Espírito Santo from Minas Geraes; and the Serra da Gurguela, Brancos and Araripe, which envelop Piahy.

Brazil is unequalled for the number and extent of its rivers. The Amazon, the largest river in the world, has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its northern tributaries are the Rio Branco, Rio Negro, and Japurá; its southern tributaries are the Jurua, Purus, Madeira, and Tapajós, while the Xingu meets it within 200 miles of its outflow into the Atlantic. The Tocantins and Araguaia flow northwards from the Plateau of Mato Grosso and the mountains of Goyaz to the Gulf of Pará. The Paranaíba flows from the encircling mountains of Piahy into the Atlantic. The São Francisco rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The Paraguary, rising in the south-west of Mato Grosso, forms a boundary with Bolivia on its way through Paraguay to its confluence with the Paraná, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguaçu, which unites with

the Uruguay at the Argentine boundary, are the majestic *Falls of the Iguaçu*.

**GOVERNMENT.**—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1500 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal. On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. The constitution rests on the fundamental law of Feb. 24, 1891, which established a federal republic under the name of *Estados Unidos do Brazil*. The President and Vice-President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write; they are ineligible for the succeeding term. They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 212 members; members of both houses are paid. The language of the country is Portuguese, foreign languages being read and spoken in the following order:—French, Italian, English, German and Spanish.

**PRODUCTION.**—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monozite sand. Low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry, the number being computed at 31,000,000. The chief products of the country are coffee and rubber: the rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manaus; coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat, hides, maize, beans, and *Herba-maté* (tea). The imports consist principally of every description of manufactured articles, but there were (1925) 1,541 industrial establishments, including 161 cotton-mills, giving employment to 45,048 hands, and representing an invested capital of \$30,000,000. Foreign capital to the amount of \$1,000,000,000 has been invested in Brazilian undertakings in the ten years 1908–1917. The enormous protective duties were again increased in 1887, 1893, 1896, 1906, and 1916. In 1920 the exported merchandise was classified: (1) animals and their products, £14,628,234; (2) minerals and their products, £2,930,539; (3) vegetables and their products, £89,065,579.

In 1920 the foreign trade of Brazil was shared as under:

| Exports to:              | Exports to:              |

|                          | Total ..... £107,922,490 |

**DEFENCE.**—The peace effective of the Army is about 30,000 all ranks. The Navy consists of 3 Dreadnoughts, 2 old battleships, 5 protected cruisers, 2 scouts, torpedo boats, and some small vessels and aircraft.

**EDUCATION.**—Primary education is secular and free, but is not as yet compulsory; it is maintained and controlled by the governments of the various States. Public instruction is progressing, and reading and writing are the qualifications for the franchise for males at 21. About 600,000 children attended the primary schools in 1921. Secondary education is under Federal control, and there is a national gymnasium at Rio de Janeiro. The pupils in all secondary schools numbered 32,000 in 1921. There is no University, but degrees are conferred in various faculties by authorities in the capital and State centres.

**COMMUNICATIONS.**—In December, 1925, there were 28,594 kilometres of railway open, and 3,600 under construction. Length of telegraph wires, 79,792 kilometres. In 1920 steam and sailing vessels of 24,941,466 tons (of which 6,970,643 were under the British flag) entered Brazilian ports, the principal harbours being Manaus, Pará, Maranhão, Pernambuco, Macaé, Bahia, Victoria, Rio de Janeiro, Santos, and Rio Grande.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Yugo-Slavia and Greece, on the east by the Black Sea, and on the south by Greece.

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878), and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,200 square miles, with a population of 4,337,300. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 5,000 square miles to Rumania. On Oct. 22, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded the S. Dobruja to Rumania and E. and W. Thrace to Greece. The present area of Bulgaria is stated at 293,000 sq. kilometres (= 71,497 sq.

miles), with an estimated population of 4,975,000. The prevailing religion of the Bulgarians is the Orthodox Greek Church. In 1920, the Gregorian was substituted for the Greek Calendar.

**GOVERNMENT**.—The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him. The legislature is a single chamber National Assembly or *Sobranie* of 212 representatives, elected for a maximum term of four years by adult manhood suffrage. Metropolitan members receive 15 leva, and others 10 leva, a day and travelling expenses.

**PRODUCTION**.—Agriculture is the principal industry of the people and employs over half the population, the principal crops being wheat, rye, barley, oats, tobacco and fruit. The live stock includes sheep, goats, cattle, pigs, horses, asses and mules. Coal of good quality is mined at Pernik and Trevena, and stone, iron, gold, silver, lead, manganese and copper are worked, but the mineral development is in its infancy. The chief manufactures are woollens, cottons and cigarettes. The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco; the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal.

**DEFENCE**.—Before the War of 1912-1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 80,000, all ranks. During the War (Oct. 1915-Sept. 1918) about 550,000 passed into the ranks of the Army, and of those over 290,000 became casualties. By the *Treaty of Neuilly* the Bulgarian Army is limited to 20,000 all ranks.

**EDUCATION** is free and compulsory and the proportion of attendances is good; the number of illiterates in Bulgaria is very small. There are few technical schools. Sofia has a University.

**COMMUNICATIONS**.—There were 1,845 miles of railway open in 1919 and about 250 miles under construction; 4,000 miles of telegraph line and 1,254 of telephone line. In 1914 there were 2,515 post offices and 438 telegraph offices. The principal Black Sea ports are Varna and Bourgas; and Rustchuk, Sistor and Vidin on the Danube. In 1913, 11,755 vessels (3,132,482 tons) entered and 11,710 vessels (3,108,505 tons) cleared at Bulgarian ports.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 15' and 55° 59' S., and long. 66° 30' and 75° 48' W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain the height of 18,000 feet—the highest are the Guallatiri, 19,322 feet; the Baya, 19,993 feet; Cocorupit, 22,162 feet; El Muerto, 21,227 feet; and others nearly as lofty. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 23 provinces and 1 territory, the aggregate area of which is estimated at 289,778 square miles.

The population (on Aug. 1, 1921) was 3,777,485. Included in the population are four distinct racial divisions: (a) the Spanish settlers and their descendants; (b) the indigenous Araucanian Indians, Fuegians, and Chonos; (c) mixed Spanish-Indians; and (d) European immigrants, who were represented in 1920 by 20,000 Spaniards, 15,000 Italians, 14,000 British and Irish, 12,000 Germans, and 10,000 French.

In 1920, the births numbered 146,706; marriages, 25,131; and deaths, 117,950. The principal towns, with their estimated populations (1920), are:—Santiago (498,931), Valparaíso (192,000), Concepcion (86,144), Talca (39,312), Iquique (44,250), Chillan (39,000), Antofagasta (56,000), and Temuco (25,000).

GOVERNMENT.—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1820, when a revolutionary war, culminating in the Battle of Maipú (April 5, 1818) achieved the independence of the nation. The present constitution bears the date of May 25, 1833. The President is chosen by indirect vote. The National Congress consists of a Senate of 37 members and a Chamber of Deputies of 225 members, elected by direct vote every three years. There is universal adult male suffrage for those who can read and write. From 1879-1882 Chile was at war with Peru and Bolivia, and Peru renewed her application for the return of the provinces of Tacna and Arica which were taken from her by Chile in the "Pacific War." Bolivia also demands an outlet to the Pacific. In 1921 Peru withdrew her application to the League of Nations, while the Assembly of the League decided that the League was incompetent to revise the Treaty of 1904 with Bolivia. Chile has shown a conciliatory attitude in these matters.

PRODUCTION, &c.—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish. The live stock includes (1919) 2,163,140 cattle, 4,500,190 sheep, 450,000 horses, 200,000 goats, and 292,431 pigs. The mineral wealth is considerable, the country being extremely rich in copper-ore, and iron-ore. The rainless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver; and the south, iron and coal (1,007,026 metric tons of coal were mined in 1920). The production of copper in 1920 was 91,226 metric tons, valued at £7,592,000. In 1920 the production of nitrate was 2,523,446 metric tons, valued at £38,400,000; but in 1921 the nitrate industry was practically stagnant, buyers in Europe being unable to pay the high price of the fertiliser, while the artificial German product also entered into serious competition. There are smelting-works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage and paper factories, breweries and distilleries; and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and six lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to

Liverpool occupying from 30 days. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include flints, woollens and other textiles, food, and agricultural and mining machinery.

**COMMUNICATIONS.**—There were (1900) 8,211 kilometres of railway open, 33,820 kilometres of telegraph, 656 post-offices, and 82,843 kilometres of telephone, some worked by English companies, with 4 public wireless stations. The commercial marine numbers (1900) 95 steamers (46,587 tons) and 35 sailing vessels (23,382 tons). In 1900, 2,776 vessels (7,730,337 tons) entered Chilean ports from abroad, and 11,890 coasting vessels (7,595,270 tons); legislation is being introduced to make the coasting traffic exclusively Chilean.

**DEFENCE.**—All able-bodied male citizens from 20th to 45th year must serve in the militia. The peace effective of the active army is 21,440. The Air Force has a peace strength of 2 squadrons, with 60 pilots and 200 mechanics. The navy consists of 1 battleship, 1 ironclad, 6 cruisers, 22 destroyers, 5 torpedo-boats, and 6 submarines, with a complement of 6,000, all ranks.

**EDUCATION** is free, and in July, 1900, elementary education was made compulsory, and 73 per cent. of the children attend. There is a State University at Santiago. The National Library contains 293,085 volumes. The language of the country is Spanish and the State religion is Roman Catholic.

China proper (or the Eighteen Provinces) contains an area of over 1,500,000 square miles. Its length from north to south is 1,860 miles, and its breadth 1,500 miles, and its population, according to the latest Chinese estimates, exceeds 400,000,000.

China became a Republic on Feb. 12, 1912, with a President and Vice-President and 20

Executive Ministry, and a Legislature of a Senate (*T'ien Yi Ts'uan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 556 members. The government of the 18 provinces is entrusted to civil and military governors, and under them each province is subdivided into circuits superintended by *Taoyins* or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The Treaty of Kiakhta, 1858, between China, Russia, and Outer Mongolia recognises the Hukukha Khan as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the province of China proper. The exact status of Tibet is still unsettled.

FOREIGN RELATIONS with the Chinese Empire have existed for many centuries. In the 13th century the Venetian merchant-adventurer Marco Polo resided in Cambaluc (the present Peking), and was employed by the Mongol Emperor Kublai Khan as adviser. In the 17th century Jesuit missionaries had attained considerable influence, but their power aroused jealousy, and they were expelled. The Dutch and Portuguese traders had for centuries maintained commercial dealings with the port of Canton, but towards the end of the 18th century they were largely displaced by the British East India Company, and when the Company's monopoly was withdrawn, in 1833, the position of British merchants in Canton became a national question, and contributed towards the first Chinese War of 1840. A treaty was signed at Nanking, as the result of these operations, ceding Hong Kong to Great Britain and opening five ports to foreign trade and residence; but the principle of extra-territoriality was maintained, and foreigners remained amenable only to the laws of their own countries. The continued exclusiveness of the Chinese Government led by a long chain of events to the war of 1860, when British and French troops captured Peking and burnt the Summer Palace. From this date the development of foreign trade began to be most important. In 1894 China fought a disastrous war with Japan, resulting in the loss of Formosa and the establishment of Korea as an independent state. An abortive attempt was made, in 1898, by the Emperor to introduce administrative reforms, but his reactionary ministers persuaded the Dowager Empress (his aunt) to reassume the reins of government. Under her rule a plot was hatched to rid the country of foreigners; and in the summer of 1900 the Legations in Peking and the foreign settlements in Tientsin were fiercely attacked and bombarded for many weeks. The situation was relieved at its most critical moment by the arrival of an allied army despatched by nearly all the Treaty Powers, and Tientsin and Peking were captured. The Imperial Court fled, and remained in voluntary exile until early in 1901. Meanwhile, a Peace Protocol was signed between the Envoys of the Treaty Powers and the Chinese Plenipotentiaries, Prince Ching and the late Li Hung Chang. This provides for an indemnity of \$300,000,000, to be paid

within the next 30 years. Subsequent negotiations resulted in new commercial treaties: (1) between the U.K. and China (4 Sept., 1904); (2) U.S. and China (8 Oct., 1903); and (3) Japan and China (3 Oct., 1903). Under the two last Mukden, Tientsin, Chang-sha, and Antung in Manchuria, were made Treaty ports.

On the conclusion of the war between Russia and Japan in 1905, a Treaty and Additional Agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria; and by the latter the following cities and towns in Manchuria were opened as places of international residence and trade:—Feng-huang-ch'eng, Liao-yang, Hsin-mintun, Tung-chiang-tzu (on the Liao River), and Fa-ku-men in Fengtien Province; Ch'ang-ch'un, Kirin, Harbin, Ninguta, Hunch'un, and Mansing in the Kirin Province; and Taitshar, Hallar, Aihun and Manchuli in the Heilungchiang Province.

In October, 1911, a revolution broke out in Hankow, which resulted finally in February, 1912, in the abdication of the Manchu Dynasty in favour of a Republican form of Government. In 1913, a second revolution, engineered by the Southern Party, was successfully put down by President Yuan Shih-kai. Since that date the Central Government has been gradually consolidating its position, and bringing about a centralisation of power in Peking. In May, 1915, a new treaty with Japan was concluded by which additional privileges are granted to Japanese in Manchuria and Mongolia. Towards the end of 1915 President Yuan Shih-kai engineered a campaign to revert to a Monarchical form of government, and, as the result of elections held all over the country, was invited to ascend the throne as Emperor. The Southern Provinces, however, immediately rose in revolt, and the attempt failed and finally ended with the death of Yuan Shih-kai in May, 1916. The Vice-President, Li Yuan-hung, succeeded to the Presidency, and all traces of the Yuan Shih-kai régime were rapidly abolished. The first Republican Parliament reassembled, and the government reverted to the Republican form adopted after the overthrow of the Manchu Dynasty in 1912. Both Houses of Parliament are elected by a system of limited franchise, and the government of the country is vested in them. The President, who is elected by Parliament, is assisted by a Premier and a Cabinet of Ministers, whose appointments have to be approved by Parliament, and to whom they are responsible for their actions. An abortive attempt to restore the Monarchy was suppressed in June, 1917. In 1920 a revolt in South China culminated in the declaration of an independent Republic of South China (with its capital at Chung King) including the former provinces of Yunnan, Kwei Chow, Sze Chuen and Honan, but this Republic has not yet been recognised, and internal and external discussions appear to threaten its existence.

The estimated foreign population of China during the year 1914 was as follows: British, 8,914; Japanese, 84,948; Russian, 56,319; American, 4,365; Portuguese, 2,289; German, 3,013; French, 1,864; other nationalities, 1,197, the total being 164,807. Out of a total of 3,421 foreign firms in China, 134 were British, 1,277 Russian, 925 Japanese, 273 German, 136 American and 113 French.

**DEFENCE.**—The army is undergoing reorganization. The total strength of all forces in August 1913, just after the Rebellion of that year, was estimated at 200,000, but no authenticated statistics are obtainable. An Air Force is being organized, with the assistance of a British officer (Group-Capt. F. V. Holt, C.M.G., D.S.O.). The Navy consists of a protected cruisers built in 1911 (2,750 tons), 4 older protected cruisers (4,300–3,000 tons), 3 torpedo gunboats (850 tons), 11 gunboats (750–550 tons), 4 destroyers (400 tons), and 8 small torpedo boats (200 tons).

**EDUCATION.**—Many changes in administration and development are under discussion, including a proposal to establish universal compulsory primary education. There is a University in Peking and a number of colleges all over China under foreign management. In 1911, there were 545 foreigners employed in educational work.

**COMMERCE.**—The net trade of the open ports for the years 1914–1919 is stated as follows, in *taels* (In 1914, 7.5 = £1. In Oct. 1920, 4.1 = £1):—

| Year. | Imports.    | Exports.    | Total.        |
|-------|-------------|-------------|---------------|
| 1914  | 569,441,384 | 356,226,629 | 925,668,013   |
| 1915  | 424,475,749 | 418,861,164 | 843,336,913   |
| 1916  | 516,406,995 | 481,797,366 | 998,204,361   |
| 1917  | 549,518,774 | 468,931,630 | 1,018,450,404 |
| 1918  | 554,893,082 | 485,883,031 | 1,040,776,113 |
| 1919  | 614,647,395 | 599,268,939 | 1,213,916,334 |

The import of Indian opium is now prohibited.

**COMMUNICATIONS.**—*Railways.*—About 6,500 miles were open in Jan. 1913, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

*Shipping.*—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtze. In 1914 the total tonnage of vessels entered and cleared at the treaty ports was 96,326,276, an increase of 2,291,446 on that of the previous year. Of these 40 per cent. were British, 25 per cent. Chinese, 5 per cent. German, 20 per cent. Japanese, 2 per cent. French, and 3 per cent. Russian. In June, 1913, a vessel of 14,750 tons, constructed at the Kiangnan Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In 1913 there were 22,000 miles of land lines and 51,000 miles of aerial wires.

**CUSTOMS AND POSTS.**—The Chinese Maritime Customs is the controlling service; this body consists of nearly 1,500 Europeans, a large pro-

portion of these British subjects, all under the control of the *Inspector-General*. By an Imperial Decree of May, 1908, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the *Inspector-General*. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a *Postmaster-General* (foreign) was appointed. Already letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes. The number of Chinese post offices is 8,324; 528,981,400 postal packets and 5,385,260 parcels were handled in 1914.

**MANCHURIA** lies to the north of China Proper, and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown, and there is great mineral wealth.

**MONGOLIA** has a total area of 1,076,000 square miles and a population estimated at about 3,000,000. Outer Mongolia is now, by the Treaty of Kiakhta of 1915, an autonomous state under Chinese suzerainty. Its ruler, the Hutukhta Khan of Urga, receives his title from the Chinese Government. China appoints a Resident at Urga, with three Assistant Residents in other towns. The principal industry is cattle and sheep raising and the provision of transport animals.

**YUNNAN** adjoins Burma and has a considerable trade with British India, see p. 633.

**TIBET** (area, 750,000 square miles; pop. 3,000,000) borders on British India, see p. 633.

**CHINESE TURKESTAN** has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes Zungaria and Chinese Tartary, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Urumchi and Kulja, see p. 633.

The Republic of Colombia lies in the extreme north-west of South America, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 79° W. long., with an estimated area of 461,606 square miles, and a population estimated at 5,475,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Caquetá and Putumayo. The Patia flows through the famous *Minima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guistara) is spanned by the *Rumichaca Arch*, or *Inca's Bridge*, of natural stone. On the Funza is the Great *Fall of Tequendama*, 420 feet in height.

The Colombian coast was visited in 1499 by Christopher Columbus, and in 1536 a Spanish expedition under Quedes established a government of certain coastal communities under the name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1829 *Simón Bolívar* (born 1783, died 1830), established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. From 1833-1856 many of the Colombian Provinces declared their independence, and in the nineteenth century there were frequent revolutions and internal wars. In 1903 Panama seceded from Colombia, and is now a separate Republic.

The Colombian forests are extensive, and among the trees are mahogany, cedar, fustic, and gum.

dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in large quantities but is unworked. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, india-rubber, and bananas. All religions are tolerated.

The standing army consists of about 6,000 men; the navy has been nearly abolished. Railroads are in their infancy, about 750 miles being open in 1920, with 8,680 (1907) miles of telegraph. The rate of exchange is about \$5 gold = £1 (approximately).

Spanish is the language of the country.

The Republic of Costa Rica, the most southern State of Central America, extending across the Isthmus, between 8° 27' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (1920) of 469,123.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American

dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1920) are coffee (£27,420), bananas (£27,988), sugar, gold and silver bullion, cacao, hardwoods, vegetables, skins, and hides. The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1920, 52.11 per cent. from United States, 14.21 from United Kingdom, 13.42 per cent. from Germany, and 6.62 from Central America.

The chief ports are Limon, on the Atlantic coast, through which passes the whole of the important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast. In 1920, 534 foreign vessels (760,901 tons) entered, and 538 (763,758 tons) cleared at Costa Rican ports. About 405 miles of railroad were open in 1920. In 1920 there were 301 post offices, dealing with 3,944,504 packets, and 111 telegraph offices (one wireless), with 1,739 miles of line. Telephones, 513 miles. A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country.

The island of Cuba (the largest of the "West India" Islands) lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of 44,787 sq. miles and a population of 2,150,112 (1910).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1830-1836. The government of Spain was marked by a generally corrupt administration, complicated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated.

Of the total area of 28,000,000 acres, only about 1,000,000 acres are cultivated, 50 per cent. of these being under sugar cane and 30 per cent. under tobacco, sweet potatoes and bananas. Rice, coffee, coconuts and maize are also grown and tropical fruits (oranges, coco-nuts, pine apples, &c.) flourish. The chief agricultural products of the island are tobacco and sugar (estimated crop in 1920, 3,650,000 tons; actual crop, 1918-19, 3,977,594 tons); the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 3,000,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

2,516 miles of railroad are open and about 6,000 miles of telegraph line.

Spanish is the language of the island.

Part of the Austro-Hungarian Monarchy declared its independence on Oct. 28, 1918, as the Czechoslovak Republic, and ten days later the Národní Východ (National Council) of Czechoslovakia took over the administration of the independent territories. The political neighbours of the Republic are the Austrian and Hungarian Republics on the E., the German and Polish Republics on the N., the German Republic

on the W., and the Ukraine Republic on the E. Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia; and Northern Hungary from the Danube (at Pressburg, on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt. Vereska)—a total area of about 54,041 sq. miles, with a population estimated at 12,590,000 for the Czech Provinces of Bohemia, Moravia and Silesia, and at 3,250,000 for Slovakia—a total of 15,840,000, of whom 6,000,000 are Czechs, 3,700,000 Germans, 1,700,000 Slovaks, 1,200,000 Magyars, 300,000 Ruthenians and 250,000 Poles. The new State was recognised by Austria in 1918 and by Hungary on March 10, 1919. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers, appointed by the President. In 1919 the Democrats, Agrarians and Slovaks were in the ascendancy, Socialists 28, Clericals 28 and Progressives 6 being in the minority of the 260 members. The Constitution guarantees religious and political freedom, and the Church will be separated from the State. About 75 per cent. of the people are Roman Catholics.

As regards both natural resources and industrial development, Czecho-Slovakia is one of the richest territories in Europe. By the Peace Treaty it has acquired about 80 per cent. of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead, are all mined successfully, while the whole country is abnormally rich in mineral and thermal springs. Oil is found in Slovakia, and Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self-supporting. Thirty-three per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of ten millions, more than four million people are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Outside of Slovakia illiteracy is almost unknown, and both the German and Czech elements which compose the working-class population are hard-working and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and after the first two and a half years of its existence it is no exaggeration to state that Czecho-Slovakia is in a far more flourishing state than most of its neighbours.

Czecho-Slovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, via the Danube, to the Black Sea.

The capital is Prague on the Moldau, the former capital of Bohemia, with a population estimated in 1921 at 676,000; other large towns are Brunn (Brno) in Moravia (pop. 325,000); Pilsen (Pilsen), the brewing centre of Bohemia (pop. 23,000); Pressburg (Bratislava), where the Danube forms the S. boundary of the Republic (pop. 84,000); and Kaschau (Kosice) in Eastern Slovakia (pop. 50,000).

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N. lat. and 8° 5'—12° 40' E. long., with an area of 15,048 square miles, and a population in 1916 of 2,921,000, nearly one-half of whom live exclusively by agriculture, and one-fourth by manufactures and trade.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1918, 1,070,000 hectares were under corn crops, 287,600 ha. sugar and other crops, and 787,500 ha. hay crop. In July, 1918, the live stock numbered 544,900 horses, 2,123,400 cattle, 470,000 sheep, and 630,800 swine. The crops in 1918 included 4,120,400 qrs. of oats, 2,364,400 of barley, 1,507,500 rye, 2,003,000 mixed corn and 766,000 qrs. of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. There is a sea-going mercantile marine of 309 steamers, with a tonnage of 341,835. There are (1917) 2,565 miles of railway and 8,437 miles of telegraph line.

**DEFENCE**.—The Army consists of about 14,000 trained men, the vote for 1918-19 amounting to Kr. 85,000,000 (including supplementary

estimates of Kr. 69,000,000). The Navy consists of 4 coast-defence ironclads and 1 launched, 5 small cruisers, 57 torpedo-boats (built and building), 10 submarines (built or building). Vote, 1918-19, Kr. 33,000,000.

**EDUCATION** is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, horticulture and agriculture predominating. The University is at Copenhagen.

The outlying possessions and colonies of Denmark have an area of about 50,000 square miles, with close on 35,000 inhabitants. They include the Færoe, or Sheep Islands (515 sq. m., pop. 1914, 19,500); GREENLAND (ice-free portion about 50,000 sq. m., total area about 830,000 sq. m., population, 1911, 13,450), the trade of which is a Government monopoly. (The three islands in the West Indies—St. Croix, St. Thomas, and St. John—were sold to the U.S.A. in 1917, the price paid being stated as \$25,000,000.)

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America, having been founded in 1496 by Bartolomeo Columbus, who named it Hispaniola. The island was peopled by the Spaniards with imported African slaves, who soon exterminated the "Indian" tribes. In 1822 an independent republic was proclaimed and the Spaniards abandoned the country. The present republic of San Domingo broke away from Haiti in 1844 and its independence is secured under a law of Nov. 6, 1844. The Dominican Republic comprises an area of about 18,045 square miles, with an estimated population of nearly 700,000. Sugar and cocoa are the most important crops, and coffee, and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, cotton, wax, honey, logwood, fustic, turtle-shell, hides, and divi-divi. There are about 150 miles of public railroad, and telegraphic (3 wireless stations) and telephonic communication has been established throughout the Republic, which is connected by cable with North and South America, New York, Curacao, and Porto Rico. The Customs are administered temporarily by officials appointed by the United States Government, under a Treaty by which the U.S. collects the Customs, assists the Government to maintain peace, and acts as intermediary between the Republic and its foreign creditors. Since 1907 not less than 55 per cent. of the Customs Collections has been deposited in a New York Bank to pay the interest and sinking fund charges of the Foreign Loan.

On 29 Nov., 1906, a military Government by U.S. officers was proclaimed. All the Government departments are being administered by these officers, while the entire control of finance and police is in their hands. A native constabulary under American officers is being formed.

British trade is hampered by the insufficiency of direct maritime communication and by the absence of direct service with the largest ports, which are on the south coast, the ships of the R.M.S.P.Co. calling at the northern ports only.

An equatorial State of South America, extending from lat. 1° 38' N. to 6° 5' S., and between 60° 20' and 81° W. long. (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of 276,000 English sq. miles.

The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-Royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822).

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizos. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,700 ft.), Illinza (17,405 ft.), Caranahazazo (16,535 ft.), Cotacachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,620 ft.), and Sincholaza (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common.

Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, sugar, orchilla weed, straw hats and hammocks, bark, yams, tobacco,

fruits, castor-oil, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle; the chief imports are textiles and other manufactured goods. A railroad connecting Guayaquil and Quito was opened in 1908. Guayaquil is the chief port (population, 1900, about 100,000); other chief towns being Quito, the capital, 70,000; Cuenca, 30,000; and Riobamba, 12,000. The *Galapagos* (Tortoise) Islands (2,870 square miles) belong to Ecuador. The language of the country is Spanish.

The most northerly of the Baltic provinces, is bounded on the N. by the Gulf of Finland, on the S. by Latvia, on the W. by the Baltic Sea and on the E. by Lake Peipus and Soviet Russia (along a line roughly parallel with the eastern shore of the lake). The islands of Dago, Oesel and other smaller islands in the Baltic form part of the Republic. It has an area of about 23,160 sq. miles (within the boundary settled by agreement with Soviet Russia), with a population (1900) of about 1,800,000. A large portion of the surface consists of forests, moors, and small lakes. Agriculture is the chief industry, rye, oats, barley, and flax being the chief crops, and dairy farming is carried on. There are important manufactures, including distilling, sugar refining, oil pressing, woolen, cotton, tobacco, cork, soap, and petroleum. The capital is Reval (pop. 1900, 123,000), an important Baltic port, connected by railway with Petrograd;

other towns are Narva, Hapsa, Pernau, Valk and Reepm.

Legislature consists of a single-chamber Assembly (*Riigikogu*) of 100 members elected for 3 years by universal adult suffrage. The executive is entrusted to a council of Ministers, the Prime Minister being Regent of the Republic.

A country situated on the gulfs of Finland and Bothnia which was conquered by Russia from Sweden, and annexed in 1808. Resulting from the revolution in Russia, Finland proclaimed its independence in 1918, and is now an independent Republic. The area is 145,588 square miles, with a population (1921) of 3,331,814, of whom about 3,000,000 are Finns, 300,000 Swedes, and 2,000 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. There is a university at Helsingfors, with 2,720 students, of whom 737 are women, in addition to the Polytechnic and the (reopened) Swedish University at Åbo. The leading crops are rye, barley, oats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests are a great source of wealth, immense quantities of timber being prepared for export; dairy produce is also exported. There are 2,668 miles of railroad; and a merchant fleet of 5,000 vessels (mostly small), of which 693 are steamers. Railway connexion with Sweden was completed in 1909.

The country was formerly governed by the Finnish Senate, of 22 members, with a Diet of 4 estates elected by the people, but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

The Åland Archipelago, a group of some 300 small islands at the entrance to the Gulf of Bothnia was wrested from Sweden by Russia in 1809, and was incorporated in the government

district of Finland. The total area of the archipelago is about six square miles, with a population of about 19,000, of whom about two-thirds inhabit Åland (the largest island). Swedish claims to the archipelago are not admitted by the Finnish Government.

The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 207,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the *Treaty of Frankfurt* (May 10, 1871) amounted to 5,602 square miles; that regained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles, making the present area of France (exclusive of Algeria) 212,895 square miles, with a population (provisional returns of the census of March 6, 1921) of 37,499,394. The population at the census of 1911 was 39,601,509, and in 1913 there were 745,539 births, 298,760 marriages, and 703,638 deaths. From 1914-1920 there were 2,779,543 births, and 4,232,705 deaths, exclusive of war losses which exceeded 1,000,000; in 1920 the excess of women over men was 2,500,000.

France has always been attractive to foreigners, of whom (1921) 1,415,128 were resident there; in 1906 the number was 1,046,905, including 377,638 Italians, 310,433 Belgians, 87,836 Germans, 35,990 English, 14,863 of the latter residing in the Department of the Seine. 20 per cent. of the foreign population was born in France. About 26,000 Frenchmen are stated to be resident in England.

GOVERNMENT.—The monarchical system of government was overthrown by the *French Revolution* (1789-1793), and the First Republic endured until the Great Napoleon (born Aug. 15, 1769, died May 21, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20-June 29, 1815), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of the two houses of the Legislature, the Senate of 300 members (elected by indirect vote for

9 years, one-third being renewable every 3 years) and the *Chamber of Deputies* of 597 members (elected by direct vote for 4 years). Members of the legislature receive 25,000 francs a year and travelling facilities over the railways.

**PRODUCTION.**—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The agricultural production in 1913 and 1920 is shown in the following table:—

| Crop.          | Production.        |                    |

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. The vine is cultivated to a very great extent (56,034,124 hectolitres of wine were produced in 1920, and 52,461,887 hectolitres in 1919), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1913 amounted to 661,868,702 gallons. The live stock included about 15,000,000 cattle, 17,000,000 sheep, and 7,000,000 pigs at the outbreak of the War of 1914-1918. Some reparation of the destruction of the War is to be made under Annex IV. of the *Treaty of Versailles*, whereby Germany undertakes to deliver to the French Government specified numbers of bulls and milch cows, stallions, fillies and mares, rams and sheep, and goats. The mineral resources include, coal (1912, 40,394,777 metric tons), pig iron (4,939,124 metric tons), copper, lead, silver, antimony, and salt. Under Article 50 of the *Treaty of Versailles*, the coalfields of the Saar Basin are ceded to France for 15 years, at the end of which time the inhabitants are to decide by a plebiscite whether they will remain French, return to Germany, or become a self-governing community. The coalfields abut on Lorraine, and have an area of 217 square miles, with a population of 640,000, and they include the towns of Saarbrück (60,000), Saarlouis (26,000), and Merzig (10,000), on the River Saar. It is estimated that the coalfields will yield 20,000,000 tons of high-grade coal, and in 1913 the various establishments in the ceded area produced 1,375,000 tons of cast iron and 1,600,000 tons of steel. Under Annex V. of the Treaty, Germany also undertakes to deliver to France 7,000,000 metric tons of coal annually for 10 years, and to make good any deficiency due to War causes in the production of coal in the départements of Nord and Pas de Calais. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linens, silk, and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

**ARMY.**—The *National Army* of France consists of the *Metropolitan Army*, the *Colonial*

*Army*, the *Gendarmerie*, and *Republican Guard*, and of the partly native armies of *Algeria*, *Morocco*, and *Tunisia*. These forces had a total strength on a peace footing (in 1914) of 2,337,713 all ranks. In the War of 1914-1918 over 20 per cent. of the French people were mobilised, and 9,717,000 all ranks passed into the *Armies of France* (exclusive of troops from *Algeria*, *Tunisia*, and *Morocco*). Of this total over 1,500,000 were returned as killed or missing. By law of 1919, the French Army will consist in future of 350,000 all ranks on a peace footing, and of 1,300,000 on a war footing, with a reserve (including *Territorials*) of 2,000,000 all ranks. The French Navy was manned in 1914 by 64,000 officers and other ranks, and consisted in 1919 of 7 Dreadnought and 13 Pre-Dreadnought battleships, 15 armoured cruisers, 18 protected cruisers, 80 destroyers, 153 torpedo boats, and 100 to 120 submarines.

**EDUCATION.**—The educational system is highly developed. *Central Administration* comprises (a) Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades, and (b) Departmental Councils, presided over by the *préfet*, charged especially with primary education. By the Law of July, 1904, all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary: Secular, comp. and free.* Age 6-13. Schools include (a) infants; (b) lower primary; (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary: State lycées, communal colleges, and many private establishments, 7-yr. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5-6 yrs. Sèvres school and the Sorbonne Association well-known. (iii.) Special Schools are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) Universities (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix, Algiers, Angers, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseilles, Montauban, Montpellier, Nancy, Nantes, Paris, Poitiers, Rennes, and Toulouse.*

**COMMUNICATIONS.**—The principal rivers of France are the Seine, Loire, Garonne, and Rhône. The system of railroads in France is very extensive; they are almost entirely *concessés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on 31 December, 1919, was 25,573 miles, the total receipts from passenger and goods traffic, &c., being £49,426,000. The length of telegraph wires is 121,700 miles, and of telephone lines 27,120 miles. At the end of January, 1919, the mercantile marine, comprising boats of a tons and upwards, amounted to 17,690 vessels of 1,228,528 net tons (of which 13,812 were sailing ships, representing 822,000 net tons). The sums voted by Parliament for

construction and navigation Bounties to Shipping and to Deep Sea Fisheries in 1922 amounted to £1,530,000, and £1,406,772 for Postal and Cable Service Subventions.

**Shipping.**—The French mercantile marine consisted in 1926 of 1,226 steam vessels above 100 tons, with a total tonnage of 1,909,669 tons, and of 523 sailing vessels above 100 tons, total tonnage 376,119 tons. During the year 1923 the total number of French and foreign vessels entering French ports amounted to 27,409, representing a tonnage of 31,302,807 tons, of which 7,581,374 tons were French, while the total clearings amounted to 28,440 ships of a tonnage of 21,472,968 tons, of which 7,762,519 tons were French. The chief ports are Marseilles, Rouen, Bordeaux, Le Havre, Calais, Boulogne, Dunkirk, and Cherbourg. A bill is to be introduced into the Chamber for the canalisation of the Rhone, which will make the river navigable for 1,200 ton vessels from the sea to Switzerland, and will also provide electric power and irrigation to the surrounding departments.

**COMMERCE.**—The principal imports are wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oil, coffee, and wines. The principal exports are cotton tissues, silk tissues, wool, woollen tissues, wines, smallwares, automobiles, &c., silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig iron, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

**Alsace-Lorraine.**—*High Commissioner*, M. Mirhan (1926). Alsace-Lorraine, formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and was ceded to Germany by the *Treaty of Frankfurt* (May 10, 1871), after the Franco-Prussian War. At the close of the War, 1914-1918, the Provinces were regained by France under the *Treaty of Versailles* (June 28, 1919). They embrace the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxembourg. Wine, tobacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing. The area is 5,605 square miles; the population in Dec., 1922, was 1,874,224, of whom 965,602 were males and 908,389 females; while 1,428,343 were Catholics, 408,274 Protestants, and 30,483 Jews. Principal towns, Strasbourg (pop. 178,282), Mulhausen, and Metz.

**Algeria.**—The three departments of Algeria—Alger, Oran, and Constantine—form an integral part of France, under a Governor-General,

assisted by a Consultative Council. These departments lie between 4° 30' W. to 6° 30' E. longitude, 37° 6' N. to an undetermined S. limit, about 30° N., covering an area estimated in 1906 at about 1,119,416 square miles, with a population (1911) of 5,552,828, of whom 752,043 were Europeans and 4,740,266 natives. The revenue in 1917 was estimated at £5,283,652, and the expenditure at £5,222,226. The bulk of the trade is with France, the exports to France amounting in 1917 to 81.3 per cent. and the imports from France to 67.8 per cent. of the total; the exports to the U.K. in 1917 were valued at £2,300,000, and the imports from the U.K. at £2,159,000. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates (200,000 metric tons in 1922), cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1917 there were 2,172 miles of railroad open for traffic; and in 1917 the number of ships engaged in foreign trade entering and clearing Algerian ports was 4,075, of a net tonnage of 4,357,265 tons. The principal town is Algiers, the capital (population, 1911, 172,397), a most important coaling station and much frequented as a health resort; other large towns are Oran, Constantine, Bône, and Tlemçen. *Governor-General*, M. Abel.

**CAPITAL, Paris.** Population (1911), 2,846,986.

**FLAG:** The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

In ASIA.—French India includes Pondicherry,  
 on the Coromandel coast; Chandernagore, on  
 the Hooghly; Karikal, in the Carnatic delta;  
 Yanaon, in the Godavary delta; and Mahé, on

the Malabar coast—the total area being 200 square miles with an estimated population of 277,700. *French Indo-China* comprises the possession of Cochin-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1892-3 the port of Kwang-Chow-Wan was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,779 square miles, with a population (1912) estimated at 16,600,000.

In ASIA MINOR.—The French mandatory sphere of Syria, Cilicia and Lebanon has a total area of about 250,000 square miles, with an estimated population of 4,500,000 (see also pp. 830-1).

In AFRICA.—*Algeria* (see above) is an integral part of France. *Morocco* (see p. 807-8) is a French (and partly Spanish) protectorate.

*Tunisia* has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq. miles and an estimated population of 2,000,000, of whom about 600,000 are Berbers and 500,000 Arabs. The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked. The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. Tunis, the capital, has a population of 230,000; other towns are Sfax (84,000), Bizerta (30,000), Suse (30,000), Kairwan (22,000), Gabes (16,000), and Monastir (6,000). *French West Africa* extends from Mauritania to Dahomey, and has a total area of 1,509,733 square miles, and a population of 11,344,076. It consists of *Senegal* (94,000 sq. miles, pop. 1,250,500), capital, St. Louis; *Upper Senegal Niger* (304,000 sq. miles), and the *Niger Military Territory* (533,000 sq. miles), which have a total population of about 6,036,000; *French Guinea* (92,600 sq. miles, pop. 1,737,350); *Ivory Coast* (126,200 sq. miles, pop. 1,216,300); and *Dahomey* (38,000 sq. miles, pop. 878,500); adjoining Dahomey is the French Sphere of the former German colony of *Togoland* (23,400 sq. miles, pop. 800,000); while the hinterland of these colonies forms the *French Sahara*, which has an estimated area of 924,160 sq. miles and a population of about 450,000. *French Equatorial Africa* consists of the *French Congo* (513,000 sq. miles, pop. 9,000,000) and of the French Sphere in the former German territory of *Cameroon* (267,000 sq. miles, pop. 2,750,000). *French East Africa* consists of the *Somali Coast* (46,300 sq. ms., pop. 203,000) and of the large island of *Madagascar* (226,000 sq. miles, pop. 3,253,500) with its dependencies (Nosai Bé, Sainte Marie, Réunion, and the Mayotte-Comoro Islands, and St. Paul, Amsterdam, and Kerguelen Islands). Agriculture and cattle raising are the principal industries; the minerals include gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrowroot), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 75,000; other

towns are Tamatave (the chief port), Majunga, Diego-Suarez, Mamangary, Tuléar, Andoveranto and Vohémar. Off the south-east coast are the uninhabited islands of St. Paul, Kerguelen and Amsterdam. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian ocean.

In AMERICA.—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadalupe, with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin; and in South America, Cayenne or French Guiana. The total area of French possessions in North and South America is 35,300 square miles, with a population of 428,850.

In AUSTRALASIA.—New Caledonia (7,200 sq. ms., pop. 50,500) is a large island with many dependencies, and the Society Islands (Tahiti, &c.) and other islands have a total area in the Pacific Ocean of 8,378 square miles, with a population estimated at 81,200. The New Hebrides are under joint Franco-British administration.

At the outbreak of war, Aug., 1914, "Germany" was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor." The German Empire had a total area in Europe of 202,789 sq. miles, and consisted of the following 26 States:—Prussia (including Lauenburg and—since 1890—Heligoland); Bavaria; Saxony; Württemberg; Baden; Hesse; Mecklenburg-Schwerin; Saxe-Weimar; Mecklenburg-Strelitz; Oldenburg; Brunswick; Saxe-Meiningen; Saxe-Altenburg; Saxe-Coburg-Gotha; Anhalt; Schwarzburg-Sonderhausen; Schwarzburg-Rudolstadt; Waldeck; Reuss (elder line); Reuss (younger line); Schaumburg-Lippe; Lippe-Detmold; Reichsland (Alsace-Lorraine); Lübeck; Bremen; Hamburg; with a census population (1910) of 64,025,993, of whom 30,031,967 were males and 32,871,456 females.

By the *Treaty of Versailles* the "Reichsland" of Elsass-Lothringen and the Saar coal basin (temporarily) were ceded to France; parts of

Posen and West Prussia to the newly-formed Republic of Poland; North Schleswig to Denmark; and Meranet and Malmédy to Belgium. Plebiscites held in June 1920 in parts of East and West Prussia yielded majorities for Germany. A plebiscite to decide the fate of Upper Silesia was held under the Peace treaty. On March 7, 1921, negotiations between German representatives and the Supreme Council of the Allies on the methods of payment of the claims for reparation having broken down, the forces of the Allies (which were in occupation of "bridge-heads" across the Rhine) advanced to Duisburg, Ruhrort, and Düsseldorf on the right bank, and a general control was established over the customs administration.

The Colonial possessions of the German Empire extended over 1,035,086 sq. miles in Africa, 96,220 sq. miles in the Pacific, and 2,943 sq. miles in Asia—a total of 1,134,239 sq. miles, with a population estimated in 1914 at 15,000,000. By the *Treaty of Versailles* Germany renounced her overseas possessions, with all rights and titles therein, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German East Africa to Great Britain; German S.W. Africa to the Union of South Africa; the German Pacific possessions N. of the Equator to Japan; and those S. of the Equator to Australia and New Zealand.

On Nov. 9, 1918, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. On Nov. 11, 1918, Germany was granted an armistice, and on June 28, 1919, peace was signed at Versailles. In Jan. 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female), and on Feb. 11, 1919, the first President of the German *Versammlung* was elected at Weimar. Under the new Constitution of August 11, 1919, the federal legislature consists of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a *Reichsrat* representing the separate States. The people possess the right of initiative and the referendum. Bills dealing with economical questions or social issues arising thereout must first be submitted to the new advisory Economical Council (*Reichswirtschaftsrat*).

A counter-revolution in the Junker (aristocratic) interest was temporarily successful in March, 1920, and the President and Cabinet abandoned the capital; but in a few days the revolutionaries capitulated and the Republican administration resumed direction and control.

The religious confessions of the people of the former German Empire were divided in 1920 as follows:—39,991,421 Protestants, 23,821,453 Roman Catholics, 283,946 Christians of other categories, 615,021 Jews, and 214,125 adherents of other religions, or unknown.

There are 44 large towns with over 100,000 inhabitants, and of these 30 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 in Baden, and 1 each in Württemberg, Hesse, and Brunswick, while two of the three Hanse Towns also exceed 100,000.

PRODUCTION AND INDUSTRY.—Germany, up to the commencement of the War, was becoming more and more a manufacturing country. In 1907, 32.6 per cent. of the population were supported by agriculture, 37 per

cent. by industry and mining, 11.5 per cent. by trade and communications. Of the total area in 1907, 24,539,120 acres were under cultivation, and 34,279,121 acres were woods and forests. The Live Stock (Oct. 1, 1920) included 2,460,000 horses, 26,360,000 cattle, and 11,000,000 pigs; large numbers of these animals were ceded to France and Belgium (as part of the reparation) under the *Treaty of Versailles*. Germany supported about nine-tenths of her population by her own produce in 1914. The mineral produce was valued in 1912 at £592,250,000, and included 190,229,440 tons of coal, 87,233,084 of lignite, and 28,607,903 of iron ore; potash, rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, blamuth-ore, uranium-ore, wolfram-ore, pyrites, vitriols-ore, and alum-ore are also worked. Cræfeld, Elberfeld-Barmen, Chemnitz, Augsburg, and the provinces of Westphalia and Silesia are the great centres of the textile industries. By laws of 1919 and 1920, all coal, heavy iron and steel, potash and coal-tar producing concerns were compulsorily fused into All-German Syndicates, governed by assemblies representing Producers, Traders and Consumers, with equal representation for Employers and Employed.

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread-winners in Germany a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. This National Insurance is based on mutual insurance and self-administration. The Infirmary Insurance Act came into force Jan. 1, 1900. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses—in so far as the incomes do not exceed £100—including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working-class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employes and others above the class of manual workers, became law in 1921. A Bill establishing Federal Unemployment Insurance for industrial workers (not farm labourers or domestic servants), clerks, actors and orchestra musicians, and a Bill providing a Federal Labour Exchange Organisation, are before the Reichstag.

DEFENCE.—In the War of 1914–18 the German armies reached their zenith as a military machine during the German Offensive movement of July, 1918, when 207 divisions were available on the Western Front. At the close of the Armistice (Nov. 11, 1918) only 224 divisions

were available, and the reserves had dwindled from a proportion of over one half of the troops in action to that of one-eleventh only, while the 184 divisions were only barely 6,000 strong, all ranks. By the grant of an armistice the German armies escaped further encounters with the Allied Armies, the reserves of which were increasing in numbers every day, while their strategical position was becoming every day more satisfactory to Marshal Foch, their generalissimo. By Article 160 of the *Treaty of Versailles* the German *Military Forces*, as from March 31, 1920, must not comprise more than seven divisions of infantry and three divisions of cavalry, a total force of 100,000 all ranks. By Article 181 of the *Treaty*, the German *Naval Forces* must not exceed 6 battle-ships of the Deutschland or Lothringen class, 6 light cruisers, 12 destroyers, and 12 torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers are to be broken up or devoted to commercial purposes. Under the terms of the Armistice of Nov. 11, 1918, the German High Sea Fleet surrendered to the Allies (Nov. 21, 1918) and was interned in Scapa Flow, manned by German naval crews. It was scuttled by its crews in Scapa Flow, while in custody, on June 21, 1919. In consequence of this breach of the Armistice agreement by the German crews the Allies (Nov. 10, 1919) called upon the government to surrender 5 light cruisers, and certain floating docks, cranes, and dredgers, in addition to the previous naval surrenders. The interned vessels Berlin, Seydlitz, Santa Fé and Yorck are to be disarmed and treated as merchant ships. By Article 198 of the *Treaty*, the armed forces of Germany must not include any military or naval *Air Forces*, and no dirigible balloons, aeroplanes, sea-planes or flying boats.

**COMMUNICATIONS.**—The total length of the *Railroads* in 1913 was 37,823 miles, of which about 98 per cent. belonged to the different States. On April 1, 1920, all the State Railways passed to the Federal Government. There are 1,500 miles of inland canals and 1,600 miles of ship canals. The number of registered automobiles and motor cycles (January 1, 1913) was 77,769. Length of *Telegraph Lines* 228,600 kilometres (length of wires, 1,907,200 kilometres); telegrams landed in, 49,533,000; post offices, 41,415; telegraph offices, 50,053; wireless stations, 14; telephone call-stations, 37,070; letters delivered, 5,994,300,000; cash on delivery orders, £640,200,000; money orders, £4,626,500,000; telegrams despatched, 49,533,000; telegrams received, 49,643,000. The number of employes in the service of posts, telegraphs, and telephones was 320,363. The State postal services were taken over by the Federal Government in 1920. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,600 miles of ship canals. At the outbreak of the War of 1914-1918 Germany ranked second to Britain in the list of maritime countries. On January 1, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 1765 register tons and upwards (4,380,368 tons gross register), and of 2,420 sailing vessels (447,870 tons gross register); number of seamen, 77,746 (January 1, 1912, 75,130). There were completed in 1920 at German yards for German firms, 639 sea-going ships of 383,290 tons gross, and at German yards for foreign firms, 124 sea-going ships of 31,238 tons gross. Eleven new shipyards

were established during the War. Some of the larger ships were interned in foreign harbours during the War, and by the *Treaty of Versailles* reparation is to be made for the losses inflicted on the Allies by the surrender of merchant ships. The chief ports of Germany are Hamburg, on the Elbe; Bremen, on the Weser; Stettin, on the Oder; Königsberg, on the Pregel; Kiel, on the Baltic (connected with the Elbe by the Kaiser-Wilhelm Canal); and Lübeck, on the Baltic. Under the Peace Treaty Danzig became a Free State, subject in its foreign affairs to the Polish Republic.

**FINANCE.**—Under Articles 248-253 of the *Treaty of Versailles* the German Government undertook to pay the cost of the Armies of Occupation from Nov. 11, 1918, until they shall be withdrawn, the occupied area extending to the Rhine (with "bridgeheads" on the right bank) from Eiten, on the Netherland's frontier, in the north, to the junction of the German-Lorraine frontiers, in the south. The amount of the reparations due by Germany under the *Treaty* was fixed in January, 1921 (by the Financial Council of the Allies at Brussels) at 132 milliards of gold marks (£6,600,000,000) payable in bonds, to be redeemed by annual payments of a milliard gold marks, together with a sum equivalent to 26 per cent. of German exports. Of the amounts thus payable the various shares from 1921-1929 were apportioned to France 52 ninety-second parts, Great Britain 22, Italy 10 and Belgium 8 ninety-seconds; from 1929-1932 the shares are varied to France 130 two hundred and thirtieth parts, Great Britain 55, Italy 25 and Belgium 20 two hundred and thirtieths; and for the succeeding 31 years France 156 two hundred and seventy-six parts, Great Britain 66, Italy 30 and Belgium 24 two hundred and seventy-six parts.

#### FORMER GRAND DUCHIES.

**Baden**, separated by the Rhine from France (Alsace) and Switzerland, has an area of 5,819 square miles, with a population (1910) of 2,124,833. A great part of the surface is mountainous and covered with forest trees, including the Schwarzwald (Black Forest) and the Odenwald, but more than three-fifths of the total area is under cultivation, corn, wine, fruit, potatoes, tobacco and hops being the chief agricultural products. The principal manufactures are cigars, cotton and silk stuffs, brushes, jewellery and trinkets, clocks, chemicals, paper and machinery. More than half the population are Roman Catholics. Capital, Karlsruhe, pop. (1910) 134,313. Other large towns are Mannheim (206,049), Friburg (83,324), Pforzheim (73,786), and Heidelberg (56,016).

**Hesse**, in the West Centre, consists of Northern and Southern portions, nearly equal in size, on either side of the Main River, with a total area of 2,968 square miles and a population (1910) of 1,282,051, of whom more than half are Protestants. The country is mountainous but fertile, and agriculture is flourishing. Capital, Darmstadt, pop. (1910) 87,089. Other large towns are Mayence (Mainz) at the confluence of the Main and the Rhine (110,634), Offenbach (75,583), Worms (46,829), and Giessen (31,553).

**Mecklenburg**, between the Elbe and the Baltic, has a total area of 6,266 square miles, with a population (1910) of 746,400. Agriculture and stock raising are the principal industries, the Mecklenburg breed of horses being famous. The chief manufactures are bricks and machinery. Capital, Schwerin, pop. (1910) 42,519. Other centres are Rostock (63,383), Wismar (27,376), and Neu-Sirelitz (11,993).

**Oldenburg**, on the North Sea, between the estuary of the Weser (at Bremen) and the Prussian province of Hannover, has detached territories in Lubeck (between Holstein and Mecklenburg) and Birkenfeld (Rhine Province of Prussia). The total area is 2,479 square miles, with a population (1910) of 283,432, of whom more than 80 per cent. are Protestants. The chief industries are agriculture, bee-keeping and stock-raising; the principal manufactures are brewing and distilling, tanning, tobacco and cereals. Capital, Oldenburg, pop. (1910) 28,565.

**Saxe-Weimar-Eisenach** (now part of the new Thuringian State) consists of Weimar, Eisenach, and Naumburg, and 24 scattered enclaves in the Thuringian Forests of Central Germany. The total area is 1,397 square miles,

with a population (1910) of 457,122, of whom the majority are Lutherans. Agriculture, fruit growing and horticulture are the principal industries, the manufactures including brewing, chemicals, woollens and hosiery. Capital, Weimar, pop. (1910) 34,582. Other centres are Eisenach (38,362), Jena (38,427), and Apolda (22,620).

#### LAND THÜRINGEN.

The seven Thuringian States, Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz and Reuss-Gera, have been constituted into a single state under the title Land Thuringen, with an area of 11,000 square kilometres, a population of 1,500,000, and two seats in the Federal Reichsrat. In size Land Thuringen is seventh among German states. The new state is governed by a "Volkrat." Saxe-Coburg-Gotha has joined the Bavarian Republic.

#### HANSE TOWNS.

The *Free Hanse Towns* comprise the three cities of **Lubeck**, on the Trave (area 115 square miles, pop. 116,599), **Bremen**, on the Weser (area 99 square miles, pop. 313,433), and **Hamburg**, on the Elbe (area 160 square miles, pop. 1,075,220). Each has a small rural territory and has full Federal independence, with a Council of State (under the Presidency of a Burgomaster).

A maritime Kingdom in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian Sea, and on the E. by the Aegean, Sea of Marmora and Black Sea, with an estimated area of 69,000 sq. miles and an estimated population (1921) of 7,000,000 (exclusive of the area and population of Northern Epirus).

Government.—Greece became a kingdom in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 15th century. The legislature consists of a Chamber of Deputies (or *boule*) elected for 4 years by universal manhood suffrage, and of a Council of State. Members of the legislature are paid 4,000 *drachmae* annually. At the outbreak of the Great War the sympathies of the reigning house of Greece appeared to be with the Central Powers, but under the influence of M. Venizelos the Kingdom eventually entered the War on the side of the Allies, and King Constantine abdicated (June 11, 1917). King Alexander, who acceded to the throne, died from the effects of a monkey-bite, Oct. 25, 1920. The crown was offered to his younger brother Paul, a Regency being meanwhile proclaimed under Admiral Coundouriotis. The November elections drove the Venizelists from office, and the Regent, having admitted M. Rallis to the Premiership, was called upon to resign. He was succeeded by Queen Olga, until a plebiscite was taken, and King Constantine was thus restored to the throne in December 1920.

Prior to the Balkan Wars of 1912-13 the area was less than 25,000 sq. miles, the addition of portions of Macedonia and Epirus, Crete (2,950 sq. miles, pop. 336,151), and certain Aegean Islands increasing the area to 43,522 sq. miles. During the War of 1914-1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation of Thrace (including the monastic republic of Mount Athos), and the islands of Imbros and Tenedos. Under an arrangement with Italy, to come into effect after the ratification of the Treaty of Sevres, the Dodecanese (12 islands) are surrendered by Turkey, and these are to be handed over to Greece by Italy with the exception of Rhodes, for which a special arrangement is made. Greece also receives under the Treaty a mandate for the occupation and administration of the town and district of Smyrna, which remain, however, under Turkish suzerainty; in this region of Anatolia prolonged fighting took place in 1921 between the Greek Expeditionary forces and local Turkish armies, with varying fortunes. In addition, Greece will receive an extension of frontier in Epirus, the limits of which are not yet fixed. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), of islands in the Aegean, Mediterranean, and Ionian Seas, and of a portion of the mainland of Asia Minor. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented.

Production.—Agriculture is the principal industry and employs more than half the population. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. The exports consist of wine, olives, olive oil, tobacco, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, and sponges. The imports in 1920 were, from Gt. Britain, 220 million *drachmae*; U.S.A. 27 million; Italy 125 million; France 209 million; and other

countries 333 million. The exports were, to U.S.A., 40 million; Gt. Britain, 37 million; Italy 25 million; France, 20 million; and other countries 176 million.

**Defence.**—Service in the Army is universal and compulsory between the ages of 21 and 57. Both the land and sea forces were reorganised during the War of 1914-1918, and about 150,000 all ranks fought with the Allied Armies. The Navy consisted (July, 1919) of 6 ironclads, 1 modern cruiser, 14 destroyers, 6 torpedo-boats, and 2 submarines.

**Education** is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

**Finance.**—The debt in 1913 was 1,040,900,000 *drachmæ*, and the Balkan Wars of 1912-13 added 354,960,000 *drachmæ*, the Great War added 1,028,000,000 *drachmæ*, and subsequent military operations to March, 1921, were responsible for 1,776,140,000 *drachmæ*.

**Communications.**—There were (1919) 1,400 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of Corinth for ships up to 1,500 tons. The post offices (in Old Greece) number 1,150, dealing with 36,000,000 postal packets; telegraphs, 4,951 miles. The mercantile marine consists of 120 sailing vessels above 100 tons capacity, and 208 steamers (449,184 tons). The principal harbours are the Piræus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Kalamata, Laurium, Cavalla, Canea (Crete), and Smyrna (Asia Minor).

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45' to 17° 49', and in W. Long. from 88° 12' 49" to 92° 13' 43" and comprises an area of 42,456 square miles, and a population in 1920 of 2,200,000. The Republic is divided into 23 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital was destroyed by an upheaval in Jan., 1917. The country is well watered by numerous rivers; the climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. About 620 miles of railway were open for traffic in 1917. There were 4,057 miles of telegraph working in 1917. The chief ports are San José de Guatemala and Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being sugar, rubber, hides, bananas, and timber. Spanish is the language of the country.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India" Islands.

The island was visited on Dec. 6, 1492, by Christopher Columbus, who named it *Espagnola*, the native name being *Haïti* (mountainous) or *Quisqueia* (vast). The Spaniards explored the island and almost exterminated the 2,000,000 native Indians, whom they replaced with African negroes. By the Treaty of Ryswick (1697) the western portion of the island was ceded to France, and in 1803 the territory was abandoned by the French, and a republic was proclaimed under the aboriginal name of Haiti. In 1822 the rule of the Haitian President was extended over the whole of the island, the eastern portion having declared its independence of Spain in 1821. Since 1844 the eastern portion has formed a separate republic (see Dominican Republic).

The area of the republic is 10,200 square miles, with a population estimated at 2,500,000. The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums and oilseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. In November, 1915, both Houses of the Congress ratified a treaty with the U.S.A., establishing a virtual protectorate over the Republic, which came into effect in May, 1916. An armed Constabulary, rural and urban, under American officers, has been constituted, and a coastguard service is attached. On Nov. 27, 1920, some prominent Haytiens met and formed the "Union Patriotique," an association for raising funds by public subscription all over the country for the purpose of sending delegates to plead the cause of the Haytian people. It was arranged to send a delegation of three members to New York and Washington, and on the 6th of February last two of them left, the third following two months later. It appears that the Haytian cause has found supporters there, and as a result of the visit of this delegation a Senatorial Commission of enquiry is expected to visit the island shortly. The Constitution was amended in June 1918, and under its provisions the President is elected for four years and there is an elective legislation. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and

Germany. French is the language of the country.

President (1920), General Rafael Lopez Gutierrez.

*Consul-General* in London, A. B. Ryde, 4 Lloyds Avenue, E.C. 3.

The Middle State of Central America, stretching in N. lat. between 13° 10' and 16°, and W. long. between 83° 10' and 88° 40'; containing 44,275 English square miles, with a population estimated at 627,000 (1910).

Christopher Columbus landed at Cape Honduras in 1502, and in 1524 the country was settled by the Spaniards. In 1525 Hernando Cortes founded the city of Puerto Cortes and from 1530 to 1822 the country formed part of the Captaincy-General of Guatemala. From 1821 to 1839 Honduras was included in the Confederation of Central America.

The Republic of Honduras has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Cortes, Omoa, Roatan, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. (NOTE.—Amapala is on Tiger Island, port on mainland is San Lorenzo, 3 hours in gasoline launch from Amapala. From San Lorenzo by auto to capital, Tegucigalpa, 88 miles, good road, 5-6 hours. Road from Tegucigalpa to N. coast now reaches Comayagua and the journey can be made to Comayagua in 4 hours. From there to end of railroad, 3 to 4 days by mule. A through road for automobile traffic is expected to be open early in 1922 from Comayagua to Pito Solo, at S. end of Lake Yojoa, and work is in progress for the extension of the national railway from Potrerillos southwards to the N. end of the Lake, thus completing direct inter-oceanic transport communication. When this route is open New York will be only 7 days from Tegucigalpa.) The country is mountainous, being traversed by the Cordilleras. The soil is very fertile, the products being mahogany, fruit, cattle, cotton, sugar, rubber, rice, tobacco, coffee, indigo, sarsaparilla, hides

and skins, indiarubber, cedar, fustic, rose, henequen, and Lima wool. There is an immense amount of uncultivated land. The number of cattle in 1920 was approximately 900,000. The forests are practically inexhaustible, but there is a lack of communications and transport. Its mineral wealth is great. In 1920 there were 763 kilometers of railway open, all on the North Coast. The language of the country is Spanish.

Hungary was declared a Republic on Nov. 17, 1918, its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugo-Slav Kingdom (q.v.) and of Slovakia and Ruthenia to Czecho-Slovakia (q.v.). A part of Western Hungary, known as the *Burgenland*, should have been handed over to Austria, but this has not yet been done (*see* below). The area of Hungary is about 32,800 sq. miles, with a population (almost entirely Magyar) estimated (1920) at 7,482,000. The political neighbours are Czecho-Slovakia on the N., Yugo-Slavia on the S., Rumania on the E., and Austria on the W.

On the declaration of Republican institutions in 1918, Count Károlyi assumed office as Pro-

visional President, but on March 22, 1919, Count Károlyi resigned, and was succeeded by a "Bolshevik" administration with a "Soviet (Workers' Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes of the Rumanian military forces (which invaded Hungary and occupied Buda Pest) and was followed by a Socialistic Government under Julius Fiedel (Aug. 1, 1919). Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug. 7, 1919, but resigned in consequence of the protests of the League of Nation's delegates in Paris.

On March 21, 1920, Admiral Nicholas von Horthy of Nagybánya was appointed Governor of Hungary by vote of the National Assembly, which gave him royal rights, with the exception that his approval is not necessary to the verification of laws made by the National Assembly.

In 1921, the ex-king Karl made two efforts to regain the throne, remaining in the country from March 26 to April 5, and from Oct. 21 until removed under escort. On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers. In August 1921 the Serbians evacuated the Barranza, which they had occupied since the Armistice. Immediately afterwards Hungary should have handed over the *Burgenland* to Austria, but was prevented from so doing by a band of Hungarian irregulars, who prevented the entrance of the Austrian authorities. The Austrians declined to use force, and the questions at issue have been referred to the mediation of Italy.

All religions are tolerated; the greater number of Magyars are Roman Catholics, but there is a large Protestant minority. The parceling out of the great estates, which was forcibly attempted during the Károlyi régime, has been continued to a small extent, but on an economic basis and at the initiative of the owners; a land-reform bill aiming at the forced sale of the properties exceeding a given area has been passed.

A single chamber National Assembly (introduced in Nov., 1918, in place of the Upper and Lower Houses of the former Parliament) is elected by universal suffrage. The question of providing a Second Chamber from a reformed House of Magnates (which ceased to function after the revolution) is under discussion.

The greater part of the area of present Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The mountainous districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

~ Prior to the war Hungary imported merchandise to the value of approximately £85,000,000, and exported approximately £75,000,000 annually; in the year 1926 the imports amounted to about K. 3,220,000,000 and the exports to about K. 2,650,000,000. Taking an average exchange equivalent, based on Zurich quotation for the year 1926, these amounts may be taken as

\* The external debt remains the same. No interest has been paid since 1914, and arrears of interest amounted on Dec. 1, 1920, to nearly £20,000,000.

£80,500,000 and £66,250,000 respectively. There is a British-Hungarian Chamber of Commerce at Budapest, and there are openings for trade in chemicals, machinery, hardware, small tools, iron mill products, leather, and textiles. Hungarian (or German) is the language in which business letters should be written.

No part of Hungary touches the sea. The length of navigable rivers is 687 miles; there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom.

The pre-war revenue of Hungary was about 2,250 million Korona (£93,750,000), whereas the estimated revenue according to the Budget for the year 1921-2 amounts to 20,296,000,000 Korona (£17,000,000). The public debt stood at 6,000,000,000 Korona (£250,000,000), and its present amount may be estimated at about 800,000,000,000 Korona, but this is dependent on exchange conditions and subject to decisions that may be given by the Reparations Commission, which has not yet begun to sit in Budapest.

**CAPITAL:** Budapest, on the Danube, has a population of 925,000 (1920). The other large towns are: Szeged (110,000), and Debreczen (103,000); there are 34 other towns with a population over 20,000.

The value of the Korona has fluctuated during 1921 between K. 750 and K. 3,000 per £1 sterling; it averaged K. 1,300 for the year 1920-21.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 63° 23' to 66° 33' N. lat., and from 13° 22' to 24° 35' W. long., with an estimated area of 40,427 square miles, or greater than that of Ireland. The population was estimated in 1918 at 92,000.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but since the constitution granted in 1913 the assembly (Al-thing) had been more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessities of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1918): estimated, £2,400,000; exports, £1,247,000. Iceland is now in direct telegraphic communication with the United Kingdom.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 70 minor islands (with certain dependencies hereinafter noted). It is bounded on the N. by the Republics of Switzerland, Germany, and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and by the League of Nations territory of \*Fiume, Istria, &c., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area of the kingdom of Italy in 1914 was 110,623 sq. miles, and by the *Treaty of Versailles* (June 28, 1919) Italy gained from Austria-Hungary the Trentino (about 4,000 sq. miles) and Trieste (with about 1,000 sq. miles of the Adriatic Sea-board).

The administration of the northern portion of Albania (the former Turkish vilayet of Scutari) has also been entrusted to Italy, and under the

\* See also Yugo-Slavia.

Turkish Treaty of Peace (1900) the Asia Minor Vilayet of *Konia* (40,000 sq. miles, pop. 1,000,000) is placed within the Italian sphere of influence. The total area of the Kingdom was estimated (Jan. 1900) at 120,450 square miles, with a population of about 35,500,000. There is a large settled and floating population of Americans and English, with Anglican churches, and chapels belonging to Methodists, Baptists, and others.

The Italian peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France, Switzerland, Germany, Austria and Yugo Slavia. *Mont Blanc* (15,782 feet), the highest peak of the Alps, is in the French Pennine Alps, but within the Italian borders are *Monte Rosa* (15,217 feet) and several peaks from 12,000 to 14,000 feet. The chief rivers are the Po, the Adige, the Tiber, and the Arno.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848-1870, in which the great patriots *Mazzini* (born 1805, died 1872) and *Gari-baldi* (born 1807, died 1882) were the principal figures. It was completed when the Austrians (under stress of the war with Prussia) evacuated Lombardy in 1866, and through the evacuation of the Papal States by the French in 1870. In 1872 the King of Italy entered Rome, and that city was declared to be the capital. The government is that of a constitutional monarchy with a legislature of two houses—the *Senate* (of 385 life members appointed by the King), and the *Chamber of Deputies* of 520 members (elected by adult manhood suffrage). The maximum duration of Parliament is 5 years; Deputies receive 15,000 lire annually.

PRODUCTION.—Agriculture (including the growing of grapes, olives and chestnuts) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of the silkworm forms an important industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly. In 1919 the produce of the vines amounted to 770,460,000 gallons, and that of the olive crop (1919) to 25,115,000 gallons. The principal exports are olive-oil, wine, candied citron, sienna earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE.—The Army consists on a peace footing of 310,000 all ranks. On May 23, 1915, Italy declared war on Austro-Hungary, and on Aug. 27, 1916, a state of war was declared to exist with Germany. The cost of the war to Oct. 31, 1918, amounted to 48 milliards of lire (£1,920,000,000). During the War of 1914-1918, over 10 per cent. of the population were mobilized, and 5,250,000 men passed into the Armies of Italy. The killed and missing amounted to 650,000. The Navy includes 5 modern and 6 pre-Dreadnought battleships, 5 armoured cruisers, 30 destroyers, 100 torpedo boats, and 80 submarines. The peace personnel of the Italian Navy is about 40,000 all ranks. Spezia and Pola, the chief naval and military ports of the kingdom, are securely fortified.

EDUCATION.—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

COMMUNICATIONS.—In 1919 there were 12,800 miles of railway open for traffic; the post-offices numbered 11,314, and there were 35,328 miles of telegraph line. The sea-going commercial marine (1917) consisted of 844 steamers (811,660 tons) and 4,464 sailing vessels (261,769 tons). In 1917, 78,101 Italian and 2,257 foreign vessels (total tonnage 15,882,877) entered and 70,016 Italian and 2,260 foreign vessels (15,895,084 tons) cleared at Italian ports. It is proposed to construct a harbour at Ostia, at the mouth of the Tiber, which will convert Rome into a seaport; improvements in the water connexion to Milan are also being taken in hand.

*Libia.*—The Turkish vilayet of Tripoli and the mutessarifat of Benghazi on the northern coast of Africa, were occupied by Italy in 1911-12, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred to the King of Italy, the spiritual headship over the Muhammadan population being retained by the Sultan. Tripoli is the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast-line of nearly 1,200 miles, and inland to the south a distance of about 800 miles. The transferred territory comprises the four sub-provinces or Mutessariflik of Tripoli, Khoms, Jabel-el-Gharb, and Fezzan, and also of Benghazi or Cyrenaica, a total area of 870,000 square miles, with a population of about 1,000,000. There are no rivers in the country, and, the rainfall being precarious, a good harvest can only be reckoned on every four or five years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient ruins in Cyrenaica, i.e. at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli. The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of "Tripolitana" is Tripoli (population 50,000), and of Cyrenaica, Benghazi (population 25,000).

Governor of Cyrenaica, Senator G. de Martino.

Governor of Tripolitana, L. Mercatelli.

*Eritrea* is a Red Sea colony, and extends from Ras Kasar, 16° 2' N., to Ras Domoira, 12° 42' N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Abyssinia, and on E.E. by French Somaliland. It consists of a triangular portion of barren and sandy lowland with a coast-line along the Red Sea of about 700 miles, and covers a total area of 64,000 square miles, with a population of

about 382,000, of whom about 3,000 are Europeans. The capital is Asmara, Massawa being the chief port, where there is a good harbour. The principal products are potash, skins, and salt, of great value as being the monetary currency of Southern Abyssinia.

*Governor of Eritrea*, Admiral G. Cerrina.

**Somaliland.**—Italian Somaliland comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 12° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. French and British Somaliland lie between Eritrea and Italian Somaliland. The total area is about 233,000 sq. miles, and the population is estimated at 300,000. Agriculture and camel and cattle rearing are the principal industries. The capital is Mogadisho, on the Indian Ocean.

*Governor*, C. Riveri.

**Tientsin.**—Italy obtained in 1902 a concession of land fronting the Peiho river (China), with a total area of 20 square miles and a population of about 10,000 natives.

**Konia.**—Under the *Treaty of Sévres* Italy received from Turkey the right to occupy the Asia Minor district of Konia (40,000 square miles) of which, however, the suzerainty remains vested in the Sultan.

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all about 4,223, the principal of which are Honshu, Shikoku, Kiu-shū, Hokkaidō or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 235,886 square miles, with a population (Dec. 1918) of 79,636,126. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fūjino-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, manganese, tin, tungsten, molybdenum, antimony, zinc, agate, corneal, and rock crystal are found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Petroleum is also being produced in quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zeikowa Keaki*; the *Paulownia Imperialis* is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 300,000,000 bushels being consumed annually (in 1900 the home grown crop exceeded all previous records and amounted to 450,000,000 bushels). Agriculture, upon which the Japanese bestow great care, is their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit, for the most part of inferior quality, is abundant; English fruits, such as apples, strawberries, pears, grapes, figs, and peaches are being produced.

**Commerce and Industry.**—The chief manufactures are silk and cotton, cotton yarn, matches, paper, glass, lacquer ware, porcelain, and bronze, and shipbuilding is an important industry in the yards; the cotton-spinning factories increased from 122 in 1913 to 229 in 1920. The chief imports are raw cotton from India, U.S., Egypt, and China; flour from the U.S.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from the U.S.A. and Europe. Sugar is largely imported from the Dutch East Indies, Philippine Islands and Formosa; indigo from Germany, British India and Dutch East

Indies; kerosene oil from U.S. and the Dutch Indies; beans, peas, and pulse from China and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton yarns, rice, tea, fish, copper, matches, coal, camphor, straw plaits, porcelain, earthenware, lacquer ware, and marine products.

**Communications.**—There were 8,106 miles of railroad open in Dec., 1920, in addition to 1,313 miles open in Korea and 1,221 miles in Formosa, while the South Manchurian Railway (China) is under Japanese control. The mercantile marine consisted in 1920 of 3,077 steamers above 20 tons (792 of them over 1,000 tons), and 3,190 sailing vessels over 100 tons. The total tonnage entered and cleared at open ports in 1919 was 89,201,972 (66,676 vessels). The three great ports are Kobe, Yokohama and Osaka, the first named having a large transhipment trade, in addition to direct imports and exports. In 1919 there were 7,877 post offices dealing with 3,390,850,232 postal packets, and 25,711 miles of telegraph line carrying 75,156,716 messages outwards, and 76,597,583 inwards.

**Defence.**—Service in the Army is universal and compulsory between the ages of 20 and 40. The peace effective is 272,731 of all ranks. The war strength is: First line, field army, about 479,022; second line, fully trained, about 1,023,190. The Navy includes 15 battleships, 7 battle cruisers, 27 cruisers, 15 coast defence ships, 8 gunboats, 85 destroyers, 20 torpedo boats and 20 submarines (Sept. 1921). Japan declared war against Germany on Aug. 23, 1914, and her fleet was active throughout the war, while her troops are assisting to restore order in Siberia.

**Education** is in the lower grades free and compulsory. High schools are State-aided, and prepare for a 3 years' course at the Universities, which is largely devoted to the study of European languages. There are high schools for girls, and the technical and special schools are well attended. There are five State Universities of Tokio, Kyoto, Tohoku (at Sendai), Hokkaido and Kiushu (at Fukuoka).

**Formosa.**—The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. Its total area is 12,900 square miles, with 3,669,667 inhabitants (1920). Imports, Yen 64,135,000; exports, Yen 35,622,000, in 1919. The colony has

been self-supporting since 1906. Estimated revenue and expenditure (1919-20), Yen 70,305,000.

**CAPITAL, Taihoku.** Population (1917), 102,933. **Saghalin (Karafuto).**—The southern half of this island was ceded by Russia at the close of the Russo-Japanese war. The ceded territory has a total area of 9,824 sq. miles with a population (1918) of 76,795. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue and expenditure (1920-21) Yen 5,007,000.

The **Kwantung Peninsula** (capital, Dairen, formerly Dalny), which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,220 sq. miles; population, 572,25. Dairen provides Japan with a mainland port, ice free all the year round, and the peninsula is fertile. Imports (1917), Yen 148,928,309; exports, Yen 149,413,033. Estimated revenue, Yen 11,099,000, and expenditure, Yen 7,984,000 (1920-21).

**CAPITAL, Dairen.** Population (1918), 168,284. The **Pescadores (Hokuto)** consists of about 14 islands, with a total area of 85 square miles, and a population of (1917) of 56,932.

**Korea (Cho-sen).**—By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between 122° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of some 71,000 square miles. Population estimated at 16,668,997 (Dec. 1917); there are about 333,000 (Dec. 1917) Japanese in the country. The soil is fertile, but mountainous except in the river valleys. About 2,790,580 acres are under cultivation, the staple agricultural products being rice and other cereals, beans, cotton, tobacco, and hemp; the other natural products are chiefly gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the province of Pyeng-An, and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. The principal exports are beans, rice, livestock, cowhides, ginseng, wheat, barley, iron ores, and raw cotton. Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass ware, and an excellent quality of paper resembling the Japanese article, but stouter. About 73 per cent. of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The total railway mileage open to traffic is 1,313 miles. Estimated revenue and expenditure (1919-20), Yen 77,513,000.

#### KHIVA.

*Khan*, H. H. Said Asfendiari, b. 1871, succeeded 1910.

Khiva lies between Bokhara and Russian Trans-Caspia, and has a total area of about 26,000 square miles, with a population of 800,000, of whom about half are nomads. The country occupies the fertile delta of the Oxus, and is highly productive. The capital (Khiva) has about 10,000 inhabitants.

#### KURDISTAN.

Kurdistan is a mountainous district of Eastern Asia Minor, between Armenia (N.), Syria and Mesopotamia (S.), Persia (E.), and Turkish Anatolia (W.). The Kurds are a semi-nomadic tribe inhabiting the mountainous regions of Turkish Asia Minor and of N.W. Persia. They are believed to be the Karduchi of Xenophon's *Anabasis*, and for centuries they lived in

quasi-independence, punctuated by raids and subsequent punitive expeditions. In 1900 the autonomy of Kurdistan was recognised by Turkey and Persia, and by the Supreme Council of the Allied Powers.

The area of the country is estimated at 65,000 to 70,000 square miles, with a population of 2 to 3 millions. The chief centres are Diarbekir, Bitlis, Van (to the east of Lake Van) in the former Turkish dominions, and Urmia (to the west of Lake Urmia) and Kermanshah, in the Persian dominions. *Lake Van* (2,000 sq. miles in extent) occupies the central portion of the former Vilayet of Van; *Lake Urmia* (1,600 sq. miles in extent), across the Persian border, is about 4,000 feet above sea level, and its waters are so salt that fish cannot live therein.

The climate is severe, with a short hot summer and long and severe winter; but cereals, vines and fruit are abundantly cultivated on the slopes of the mountains; rice is grown in the hot, well-watered plains, while the rich pastures of the slopes and valleys support large herds of horses, mules and sheep. The mineral wealth of the country is almost entirely undeveloped, but it is believed to be very great, and there are numerous hot and cold mineral springs; salt is obtained in large quantities in the neighbourhood of Lake Van.

The Kurds are Muhammadans and fierce persecutors of the Christians in their districts and in the neighbouring territory of Armenia.

#### LATVIA.

*President*, Jahnis Tschakste.  
*Premier and Foreign Affairs*, Z. A. Meierovics.

*Minister in London*, G. W. Bisseneek, 24 Gledhow Gardens, South Kensington, S.W. 5.

A Baltic Republic in the basin of the Dvina river and round the Gulf of Riga, includes the former Russian Provincial government of Courland, and parts of Livonia and Latgale, the area being about 28,000 sq. miles, with a population of about 1,750,000.

The surface of the country is generally flat with marshy areas, interspersed with over 1,000 lakes, of which the largest is Lake Peipus. Agriculture and dairy farming are the principal occupations of the people, and there are many flourishing industries; while the fisheries are also of importance.

The seat of government is Riga, at the mouth of the Dvina river, with an estimated population of 570,000, other centres being Libau (100,000) and Windau (50,000) on the Baltic coast, and Mitau (50,000) and Dwinsk (90,000) near the Southern (Lithuanian) frontier.

The legislature consists of a single Chamber Assembly of 150 members, elected by universal adult suffrage, and the President of the Assembly is President of the Republic. The executive is entrusted to a Council of Ministers.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the rivers Cavalla, S.E., and Mano, N.W., a distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 50', a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State. The population is estimated at 1,500,000 to 2,000,000, including about 12,000 Americo-Liberians. The principal exports are palm-kernels, piasava, palm-oil, coffee, cocoa, ivory and kola nuts. The chief imports are rice, tobacco, Manchester goods, provisions, spi ice, salt, hardware, glass and earthenware and building materials. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Senate, with eight members elected for six years, and the House of Representatives with fifteen members elected for four years. There is no regular army, but there is an enlisted frontier force of about 600 men under native officers. The control of the customs is in the hands of a General Receiver (who is also Financial Adviser) lent by the Government of the U.S.A. There are 10 ports of entry along the 350 miles of coast and 12 interior ports. In 1920, 446 vessels (525,314 net tons) entered and cleared at Monrovia.

The former Russian Governments of Kovno and Vilna and portions of Grodno, Mogilev and Vitelsk were united in 1918 as the Republic of Lithuania (Lietuva). The Republic is bounded on the N. by Latvia, on the S. by the German district of Königsberg, Poland and Soviet Russia, on the E. by Soviet Russia, and on the W. by the Baltic Sea, the total area included in the Republic being about 40,000 sq. miles, with an estimated population of 5,000,000. The future of the districts of Memel and Tilsit is to be settled by the League of Nations, as between Lithuania and its S. neighbour, Poland.

The legislature consists of a single chamber Assembly of 112 members, elected by universal adult suffrage, the Executive being entrusted to a council of ministers. The seat of government is Vilna, on the Villya river, a tributary of the Niemen (pop. 210,000) connected by railway with Riga (Latvia), Petrograd, and Warsaw (Poland); Kovno, on the Niemen, has a population of 95,000, other centres being Grodno (60,000), Memel, on the Baltic (35,000), Suvalki (30,000), and Shavil (30,000).
